Gildemeister, in his communications to Tischendorf (Gr. Test. 1859. Prolegg. cccxix.), endeavours to prove, that all the supposed connexion of this (or apparently of any) version with John of Seville is a mistake. The words, however, of Mariana, the Spanish historian, are express. He says, under the year 737, "His aequalis Joannes Hispalensis Praesul divinos libros lingua Arabica donabat utriusque nationis salutis consulens; quoniam Arabice lingua multus usus erat Christianis aequae atque Mauris; Latina passim ignorabatur. Ejus interpretationis exempla ad nostram aetatem (i. e. A.D. 1600) conservata sunt, extantque non uno in loco in Hispania."^b Gildemeister says, indeed, that this was entirely caused from a misunderstanding of what had been stated by Roderic of Toledo, the first who says anything on the subject. He adds that John of Seville lived really in the 10th century, and not in the 8th: if so, he must be a different person apparently from the Bishop, of the same name, about whom Mariana could hardly have been misinformed. It does not appear as if Juynboll's details and arguments were likely to be set aside through the brief fragments of Gildemeister's letters to Tischendorf, which the latter has published.

In the Erpenian Arabic the latter part is a translation from the Peshito-Syriac; the Epistles not found in that version and the Apocalypse are said to be from the Memphitic.

The latter part of the text in the Polyglotts is from the Greek. Various Arabic translations of portions of the New Test. exist in MS.: they do not require any especial enumeration here.

^a Cardinal Wiseman (*On the Miracles of the New Test.* Essays I. 172-178, 240-244) gives a curious investigation of the origin and translation of this Arabic Psalter, and of the occasional use of the Hebrew text, and sometimes of the Syriac version.

^b Adler (*Revue archéol.*, p. 184) gives a citation from D. Vincente Juan de Lestunosa, who says in his *Tratado*

de las Medallas desconocidas, Huesca, 1645, p. 113, "El santo Arzobispo Don Juan traduxo la sagrada escritura en Arabigo, por cuya intercessiva hizo Dios muchos milagros: los Moros le llamavan *Quid almatoren*." Adler conjectures this designation to be **قيد المطران** or **المطارنة**.

ARMENIAN VERSION.—Before the 5th century the Armenians are said to have used the Syriac alphabet; but at that time Miesrob is stated to have invented the Armenian letters. Soon after this it is said that translations into the Armenian language commenced, at first from the Syriac. Miesrob, with his companions, Joseph and Ezrak, began a version of the Scriptures with the Book of Proverbs, and completed all the Old Test.; and in the New, they used the Syriac as their basis, from their inability to obtain any Greek books. But when, in the year 431, Joseph and Ezrak returned from the council of Ephesus, bringing with them a Greek copy of the Scriptures, Isaac, the Armenian Patriarch, and Miesrob, threw aside what they had already done, in order that they might execute a version from the Greek. But now arose the difficulty of their want of a competent acquaintance with that language: to remedy this, Ezrak and Joseph were sent with Moses Chorenensis (who is himself the narrator of these details) to study that language at Alexandria. There they made what Moses calls their *third* translation; the first being that from the Syriac, and the second that which had been attempted without sufficient acquaintance with the Greek tongue. The fact seems to be that the former attempts were used as far as they could be, and that the whole was remodelled so as to suit the Greek.

The first printed edition of the Old and New Testaments in Armenian appeared at Amsterdam in 1666, under the care of a person commonly termed Uscan, or Uscan, and described as being an Armenian bishop (Hug, however, denies that Uscan was his name, and Eichhorn denies that he was a bishop). From this *editio princeps* others were printed, in which no attempt was made to do more than to follow its text; although it was more than suspected that Uscan had by no means faithfully adhered to MS. authority. Zohrab, in 1789, published at Venice an improved text of the Armenian New Test.; and in 1805 he and his coadjutors completed an edition of the entire Armenian Scriptures, for which not only MS. authority was used throughout, but also the results of collations of MSS. were subjoined at the foot of the pages. The basis was a MS. written in the 14th century, in Cilicia; the whole number employed is said to have been eight of the entire Bible, twenty of the New Test., with several more of particular portions, such as the Psalms. Tischendorf states that Ancher, of the monastery of St. Lazarus at Venice, informed him that he and some of his fellow-monks had undertaken a new critical edition: this probably would contain a repetition of the various collations of Zohrab, together with those of other MSS.

The critical editors of the New Test. appear all of them to have been unacquainted with the Armenian language; the want of a Latin translation of this version has made it thus impossible for them

to use it as a critical authority, except by the aid of others. Some readings were thus communicated to Mill by Louis Piques; Wetstein received *et cetera* more from La Croze; Griesbach was aided by a collation of the New Test. of 1789, made by Bardenkamp of Hamburg. Scholz speaks of having been furnished with a collation of the text of 1805, but either this was done very partially and incorrectly, or else Scholz made but little use (and that without real accuracy) of the collation. These partial collations, however, were by no means so much as to supply what was needed for the real critical use of the version; and as it was known that Uscan's text was thoroughly untrustworthy for critical purposes, an exact collation of the Venice text of 1805 became a desideratum; Dr. Charles Rieu of the British Museum undertook the task for Truguelius, thus supplying him with a valuable portion of the materials for his critical edition of the Greek Testament. By marking the words, and noting the import of the various readings, and the discrepancies of Uscan's text, Rieu did all that was practicable to make the whole of the labour of Zohrab available for those not like himself Armenian scholars.

It had been long noticed that in the Armenian New Test. as printed by Uscan 1 John v. 7 was found: those who are only moderately acquainted with criticism would feel assured that this must be an addition, and that it could not be part of the original translation. Did Uscan then introduce: from the Vulgate? he seems to have admitted that in some things he supplied defects in his MS. by translations from the Latin. It was, however, said that Haitho king of Armenia (1224-70), had asserted this verse: that he revised the Armenian version by means of the Latin Vulgate, and that he translated the *prefaces* of Jerome (and also those which are spurious) into Armenian. Hence a kind of suspicion attached itself to the Armenian version, and its use was accompanied by a kind of doubt whether or not it was a critical authority which could be safely used. The known fact that Zohrab had omitted 1 John v. 7, was felt to be an far satisfactory that it showed that he had not found it in his MSS., which were thus seen to be earlier than the introduction of this corruption. But the collation of Dr. Rieu, and his statement of the Armenian authorities, set forth the character of the version distinctly in this place as well as in the text in general. Dr. Rieu says of 1 John v. 7, that out of eighteen MSS. used by Zohrab, one only, and that written A.D. 1656, has the passage as in the Syriac Greek text. In one ancient MS. the reading is found from a recent correction. Thus there is no ground for supposing that it was inserted by Haitho, or by any one till the time when Uscan lived. The wording, however, of Uscan in this place, is not in accordance with the MS. of 1656, so that each seems to have been independently borrowed from the Latin. That Uscan did this, can be no reasonable doubt; for in the immediate context Uscan accords with the Latin in opposition to all collated Armenian MSS.: thus in ver. 6, he follows the Latin "*Christus est veritas*;" in ver. 20 he has, instead of *deum*, the subjunctive answering to *simus*: even in this minute point the Armenian MSS. definitely vary from Uscan. In iii. 11, for *ἀγαπήσας*, Uscan stands alone in agreeing with the Vulgate *diligatis*. These are proofs of the employment of the Vulgate either by Uscan, or by some one else who prepared the MS. from which

be printed. There are many other passages in which alterations or considerable additions (see for instance Matt. xvi. 2, 3, xxiii. 14; John viii. 1-11; Acts xv. 34, xxiii. 24, xxviii. 25), are proofs that Usuan agrees with the Vulgate against all known MSS. (These variations in the two texts of Usuan and Zohrab, as well as the material readings of Armenian MSS. are inserted in Tregelles's Greek Test. on Dr. Rieu's authority.)

But systematic revision with the Vulgate is not to be found even in Usuan's text: they differ greatly in characteristic readings; though here and there throughout there is some mark of an influence drawn from the Vulgate. And as to correspondences with the Latin, we have no reason to believe that there is any proof of alterations having been made in the days of King Hsiatho.

Some have spoken of this version as though it had been made from the Peshito Syriac, and not from the Greek; the only grounds for such a notion can be the facts connected with part of the history of its execution. There are, no doubt, a few readings which show that the translators had made some use of the Syriac; but these are only exceptions to the general texture of the version: an addition from John xx. 21, brought into Matt. xxviii. 18, in both the Armenian and the Peshito is probably the most marked.

The collations of MSS. show that some amongst them differ greatly from the rest: it seems as if the variations did not in such cases originate in Armenian, but they must have sprung from some recasting of the text and its revision by Greek copies. There may perhaps be proofs of the difference between the MS. brought from Ephesus, and the copies afterwards used at Alexandria; but thus much at least is a certain conclusion, that comparison with Greek copies of different kinds must at some period have taken place. The omission of the last twelve verses of St. Mark's Gospel in the older Armenian copies, and their insertion in the later, may be taken as a proof of some effective revision.

The Armenian version in its general texture is a valuable aid to the criticism of the text of the New Test.: it was a worthy service to rehabilitate it as a critical witness as to the general reading of certain Greek copies existing in the former half of the 5th century.

CHALDEE VERSIONS. [TARGUMS, p. 1637.]

EGYPTIAN VERSIONS.—I. THE MEMPHITIC VERSION.—The version thus designated was for a considerable time the only Egyptian translation known to scholars; *Coptic* was then regarded as a sufficiently accurate and definite appellation. But when the fact was established that there were at least two Egyptian versions, the name *Coptic* was found to be indefinite, and even unsuitable for the translation then so termed: for in the dialect of Upper Egypt there was another; and it is from the ancient *Coptos* in Upper Egypt that the term *Coptic* is taken. Thus *Copto-Memphitic*, or more simply *Memphitic*, is the better name for the version in the dialect of Lower Egypt.

When Egyptian translations were made we do not know: we find, however, that in the middle of

the 4th century the Egyptian language was in great use amongst the Christian inhabitants of that country; for the rule of Pachomius for the monks is stated to have been drawn up in Egyptian, and to have been afterwards translated into Greek. It was prescribed that every one of the monks (estimated at seven thousand) for whom this rule in Egyptian was drawn up, was to learn to read (whether so disposed or not), so as to be able at least to read the New Test. and the Psalms. The whole narration presupposes that there was in Upper Egypt a translation.

So, too, also in Lower Egypt in the same century. For Palladius found at Nitria the Abbot John of Lycopolis, who was well acquainted with the New Test., but who was ignorant of Greek; so that he could only converse with him through an interpreter. There seems to be proof of the ecclesiastical use of the Egyptian language even before this time. Those who know what the early Christian worship was, will feel how cogent is the proof that the Scriptures had then been translated.

When the attention of European scholars was directed to the language and races of modern Egypt, it was found that while the native Christians use only Arabic vernacularly, yet in their services and in the public reading of the Scriptures they employ a dialect of the Coptic. This is the version now termed *Memphitic*. When MSS. had been brought from Egypt, Thomas Marshall, an Englishman, prepared in the latter part of the 16th century an edition of the Gospels; the publication of which was prevented by his death. From some of the readings having been noted by him Mill was able to use them for insertion in his Greek Test.; they often differ (sometimes for the better) from the text published by Wilkins. Wilkins was a Prussian by birth; in 1716 he published at Oxford the first *Memphitic New Test.*, founded on MSS. in the Bodleian, and compared with some at Rome and Paris. That he did not execute the work in a very satisfactory manner would probably now be owned by every one; but it must be remembered that no one else did it at all. Wilkins gave no proper account of the MSS. which he used, nor of the variations which he found in them: his text seems to be in many places a confused combination of what he took from various MSS.; so that the sentences do not properly connect themselves, even (it is said) in grammatical construction. And yet for 130 years this was the only *Memphitic* edition.

In 1848-8, Schwartz published at Berlin an edition of the *Memphitic Gospels*, in which he employed MSS. in the Royal Library there. These were almost entirely modern transcripts; but with these limited materials he produced a far more satisfactory work than that of Wilkins. At the foot of the page he gave the variations which he found in his copies; and subjoined there was a collation of the *Memphitic* and *Thebaic* versions with Lachmann's Greek Test. (1842), and the first of Tischendorf (1841). There are also such references to the Latin version of Wilkins, that it almost seems as if he supposed that all who used his edition would also have that of Wilkins before them.

The death of Schwartz prevented the continuation of his labour. Since then Boetticher's editions, first of the Acts and then of the Epistles, have appeared; these are not in a form which is available for the use of those who are themselves unacquainted with Egyptian: the editor gives as his reason for issuing a bare text, that he intended soon to publish

a work of his own in which he would fully employ the authority of the ancient versions. Several years have since passed, and Boetticher does not seem to give any further prospect of the issue of such volume on the ancient versions.

In 1848-52, a magnificent edition of the Memphitic New Test. was published by the Society for Promoting Christian Knowledge, under the editorial care of the Rev. R. T. Lieder of Cairo. In its preparation he followed MSS. without depending on the text of Wilkins. There is no statement of the variations of the authorities, which would have hardly been a suitable accompaniment of an edition intended solely for the use of the Coptic churches, and in which, while the Egyptian text which is read aloud is printed in large characters, there is at the side a small column in Arabic in order that the readers may themselves be able to understand something of what they read aloud.

It is thus impossible to give a *history* of this version: we find proof that such a translation existed in early times, we find this now (and from time immemorial) in church use in Egypt; when speaking of its internal character and its value as to textual criticism (after the other Egyptian versions have been described), it will be found that there are many considerations which go far to prove the identity of what we now have, with that which must have existed at an early period.

The Old Testament of this version was made from the LXX. Of this, Wilkins edited the Pentateuch in 1731; the Psalter was published at Rome in 1744. The Rev. Dr. Tatam edited the Minor Prophets in 1836, Job in 1846, and the Major Prophets in 1852. Bardelli published Daniel in 1849.

II. THE THEBAIC VERSION.—The examination of Egyptian MSS. in the last century showed that besides the Memphitic there is also another version in a cognate Egyptian dialect. To this the name *Sahidic* was applied by some, from an Arabic designation for Upper Egypt and its ancient language. It is, however, far better to assign to this version a name not derived from the language of the Arabian occupants of that land: thus Copto-Thebaic (as styled by Giorgi), or simply Thebaic, is far preferable. The first who attended much to the subject of this version was Woide, who collected readings from MSS. which he communicated to Cramer in 1779. In 1785 Mingarelli published a few portions of this version of the New Test. from the Nani MSS. In 1789 Giorgi edited very valuable Greek and Thebaic fragments of St. John's Gospel, which appear to belong to the fifth century. Münster, in 1787, had published a fragment of Daniel in this version; and in 1789 he brought out portions of the Epistles to Timothy, together with readings which he had collected from MSS. in other parts of the New Test. In the following year Mingarelli printed Mark xi. 29-xv. 22, from MSS. which had recently been obtained by Nani; but owing to the editor's death the unfinished sheets were never, properly speaking, published. A few copies only seem to have been circulated: they are the more valuable from the fact of the MSS. having been destroyed by the persons into whose hands they fell, and from their containing a portion of the New Test. not found, it appears, in any known MS. Woide was now busily engaged in the collection of portions of the Thebaic Scriptures: he had even issued a Prospectus of such an edition in 1778. Woide's death took place before his edition was completed. In 1799, however, it appeared under the editorial

care of Ford. In this work all the portions found by Woide himself were given, as well as those published by Mingarelli in his lifetime; but not only were Mingarelli's posthumous sheets passed by, but also all that had been published by Münster and Giorgi, as well as the transcripts of Münster from the Borgia MSS., which Ford might have used for his edition. This collection of fragments contains the greater part of the Thebaic New Test. They might, however, be greatly amplified out of what are mentioned by Zoega, as found in the Borgia MSS. (now in the Propaganda), in his catalogue published in 1810 after his death. It could hardly have been thought that this definite account of existing Thebaic fragments would have remained more than half a century without some Egyptian scholar having rescued the inedited portions of the version from their obscurity; and surely this we should not have been the case if Biblical critics had been found who possess Egyptian learning.

In the Memphitic Gospels of Schwartz there is not only, as has been already mentioned, a collation subjoined of the Thebaic text, but also the criticisms of that learned editor on both Ford and Woide, neither of whom, in his judgment, possessed sufficient editorial competency. In this opinion he was perhaps correct; but still let it be observed, that if it had not been for the labours of Woide (of whom Ford was simply the continuer), there is no reason to suppose but that the Thebaic New Test. would remain unprinted still. Had this been the case, the loss to textual criticism would have been great.

III. A THIRD EGYPTIAN VERSION.—Some Egyptian fragments were noticed by both Münster and Giorgi amongst the Borgia MSS., which a dialect differ both from the Memphitic and Thebaic. These fragments, of a third Egyptian translation, were edited by both these scholars independently at the same year (1789). In what part of Egypt this third dialect was used, and what should be its distinctive name, has been a good deal discussed. Arabian writers mention a third Egyptian dialect under the name of *Bashmuric*, and this has by some been assumed as the appellation for this version. Giorgi supposed that this was the dialect of the Ammonian Oasis; in this Münster agreed with him; and thus they called the version the *Ammonian*. There is in fact no certainty on the subject: but as the affinities of the dialect are closely allied to the Thebaic, and as it has been shown that *Bashmur* is the district of Lower Egypt to the east of the Delta, it seems by no means likely that it can belong to a region so far from the Thebaic. Indeed it has been reasonably doubted whether the slight difference (mostly those of orthography) entitle this to be considered to be a really different dialect from the Thebaic itself.

After the first portions of this version, others were transcribed independently by Zoega and Emperbrecht, and their transcripts appeared respectively in 1810 and 1811. The latter of these scholars accompanied his edition with critical remarks, and the text of the other Egyptian versions on the same page for purposes of comparison.

The Character and critical use of the Egyptian Versions.—It appears that the Thebaic version may reasonably claim a higher antiquity than the Memphitic. The two translations are independent of each other, and both spring from Greek copies. The Thebaic has been considered to be the older of the two, partly from it having been thought that a book in the Thebaic dialect quotes this version, and

from what was judged to be the antiquity of the book so referred to. There are other grounds less precarious. If the Memphitic version exhibits a general agreement with the text current at Alexandria in the third century, it is not unreasonable to suppose that it either belongs to that age, or at least to one not very remote. Now while this is the case it is also to be noticed that the Thebaic seems to have been framed from a text in which there was a much greater admixture, and that not arising from the later revisions which moulded it into the transition text of the fourth century (commencing probably at Antioch), but exactly in the opposite direction: so that the contents of the two versions would seem to show that the antiquity of the Thebaic is most to be regarded, but that the Memphitic is often preferable as to the goodness of its readings, as well as in respect to dialect.

It is probable that the more Hellenized region of Lower Egypt would not require a vernacular version at so early a period as would the more thoroughly Egyptian region of the Thebaic. There are some marks of want of polish in the Thebaic; the Greek words which are introduced are changed into a barbarous form; the habitual introduction of an *aspirate* shows either an ignorance of the true Greek sounds, or else it seems like a want of polish in the dialect itself. That such a mode of expressing Greek words in Egyptian is not needed, we can see from its non-existence in the Memphitic.

The probable conclusions seem to be these:—that the Thebaic version was made in the early part of the third century, for the use of the common people among the Christians in Upper Egypt; that it was formed from MSS. such as were then current in the regions of Egypt which were distant from Alexandria; that afterwards the Memphitic version was executed in what was the more polished dialect, from the Greek copies of Alexandria; and that thus in process of time the Memphitic remained alone in ecclesiastical use. Possibly the disuse of the Thebaic in the Egyptian churches did not take place until Arabic was fast becoming the vernacular tongue of that land. It will be well for those whose studies enable them personally to enter on the domain of Egyptian literature, to communicate to Biblical scholars the results of new researches.

The value of these versions to textual criticism, even though they are known only through defective channels, is very high. In some respect they afford the same kind of evidence relative to the text current in Egypt in the early centuries, as do the Old Latin and the version of Jerome for that in use in the West. [VULGATE.]

A few remarks only need be made respecting the *third* Egyptian version. The fragments of this follow the Thebaic so closely as to have no independent character. This version does however possess critical value, as furnishing evidence in a small portion not known in the Thebaic. The existence of the *third* version is a farther argument as to the early existence and use of the Thebaic, for this seems to be formed from it by moulding it into the colloquial dialect of some locality.

GOTHIC VERSION.—In the year 518 the Gothic bishop and translator of Scripture, Ulphilas, was born. He succeeded Theophilus as bishop of the Goths in 548, when he subscribed a confession rejecting the orthodox creed of Nicaea; through him it is said that the Goths in general adopted Arianism; it may be, however, more correct to consider that Arianism (or Semi-Arianism) had already spread amongst the Goths inhabiting within the Roman Empire, as well as amongst the Greeks and Latins. Theophilus, the predecessor of Ulphilas, had been present at the council of Nicaea, and had subscribed the Homo-ousion confession. The great work of Ulphilas was his version of the Scriptures, a translation in which few traces, if any (except in Phil. ii. 6), can be found of his peculiar and erroneous dogmas. In 388 Ulphilas visited Constantinople to defend his heterodox creed, and while there he died.

In the 5th century the Eastern Goths occupied and governed Italy, while the Western Goths took possession of Spain, where they ruled till the beginning of the 8th century. Amongst the Goths in both these countries can the use of this version be traced. It must in fact have at one time been the vernacular translation of a large portion of Europe.

In the latter part of the 16th century the existence of a MS. of this version was known, through Morillon having mentioned that he had observed one in the library of the monastery of Werden on the Ruhr in Westphalia. He transcribed the Lord's Prayer and some other parts, which were afterwards published, as were other verses copied soon after by Arnold Mercator.

In 1648, almost at the conclusion of the Thirty Years' War, the Swedes took that part of Prague on the left of the Moldau (Kleine Seite), and amongst the spoils was sent to Stockholm a copy of the Gothic Gospels, known as the *Codex Argenteus*. This MS. is generally supposed to be the same that Morillon had seen at Werden; but whether the same or not, it had been long at Prague when found there by the Swedes, for Strömberg, who died in 1601, mentions it as being there. The *Codex Argenteus* was taken by the Swedes to Stockholm; but on the abdication of Queen Christina of Sweden, a few years later, it disappeared. In 1655 it was in the possession of Isaac Vossius in Holland, who had been the queen's librarian; to him therefore it is probable that it had been given, and not to the queen herself, by the general who brought it from Prague. In 1662 it was repurchased for Sweden by Count Magnus Gabriel de la Gardie, who caused it to be splendidly bound, and placed it in the library of the University of Upsal, where it now remains.

While the book was in the hands of Vossius a transcript was made of its text, from which Junius, his uncle, edited the first edition of the Gothic Gospels at Dort in 1665: the Anglo-Saxon Gospels, edited by Marshall, accompanied the Gothic text. The labours of other editors succeeded: Stiernhielm, 1671; Benzell and Lye, 1750; and others comparatively recent. The MS. is written on vellum that was once purple, in silver letters, except those at the beginning of sections, which are golden. The

Gospels have many lacunae: it is calculated that when entire it consisted of 320 folios; there are now but 188. The uniformity of the writing is wonderful: so that it has been thought whether each letter was not formed by a hot iron impressing the gold or silver, used just as bookbinders put on the lettering to the back of a book. It is pretty certain that this beautiful and elaborate MS. must have been written in the 6th century, probably in Upper Italy when under the Gothic sovereignty. Some in the last century supposed that the language of this document is not Gothic, but Frankish—an opinion which was set at rest by the discovery in Italy of Ostro-Gothic writings, about which there could be no question raised. Some Visi-Gothic monuments in Spain were evidence on the same side.

Kuittel, in 1762, edited from a Wolfenbüttel palimpsest some portions of the Epistle to the Romans in Gothic, in which the Latin stood by the side of the version of Ulphilas. This discovery first made known the existence of any part of a version of the Epistles. The portions brought to light were soon afterwards used by Ihre in the collection of remarks on Ulphilas edited in 1773 by Busching.

But as it was certain that in obscure places the *Codex Argenteus* had been not very correctly read, Ihre laboured to copy it with exactitude, and to form a Latin version: what he had thus prepared was edited by Zahn in 1805.

New light dawned on Ulphilas and his version in 1817. While the late Cardinal Mai was engaged in the examination of palimpsests in the Ambrosian Library at Milan, of which he was at that time a librarian, he noticed traces of some Gothic writing under that of one of the codices. This was found to be part of the Books of Ezra and Nehemiah. In making further examination, four other palimpsests were found which contained portions of the Gothic Version. Mai deciphered these MSS. in conjunction with Count Carlo Ottavio Castiglione, and their labours resulted in the recovery, besides a few portions of the Old Test., of almost the whole of the thirteen Epistles of St. Paul and some parts of the Gospels.

The edition of Gabelentz and Loebe (1836-45) contains all that has been discovered of the Gothic Version, with a Latin translation, notes, and a Gothic Dictionary and Grammar. These editors were at the pains to re-examine, at Upsal and Milan, the MSS. themselves. They have thus, it appears, succeeded in avoiding the repetition of errors made by their predecessors. The Milan palimpsests were chemically restored when the mode of doing this was not as well known as it is at present; the whole texture of the vellum seems stained and spoiled, and thus it is not an easy task to read the ancient writing correctly. Those who have themselves looked at the Wolfenbüttel palimpsest from which Kuittel edited the portions of Romans, and who have also examined the Gothic palimpsests at Milan, will probably agree that it is less difficult to read the unrestored MS. at Wolfenbüttel than the restored MSS. at Milan.* This must be borne in mind if we would appreciate the labours of Gabelentz and Loebe.

In 1854 Uppström published an excellent edition of the text of the *Codex Argenteus*, with a beautiful fac-simile. Ten leaves of the MS. were then mis-

ing, and Uppström tells a rather ungratifying story that they had been stolen by some English traveller. It is a satisfaction, however, that a few years afterwards the real thief on his death-bed restored the missing leaves; and, though stolen, was not by anyone out of Sweden. Uppström edited them as a supplement in 1857.

In 1855-6 Massmann issued an excellent new edition of all the Gothic portions of the Scriptures known to be extant. He accompanies the Gothic text with the Greek and the Latin, and there are a Grammar and Vocabulary subjoined. This edition is said to be more correct than that of Gabelentz and Loebe. Another edition of Ulphilas by F. L. Stange appeared at Paderborn in 1858.

As an ancient monument of the Gothic language the version of Ulphilas possesses great interest: as a version the use of which was once extended widely through Europe, it is a monument of the Christianization of the Goths; and as a version known to have been made in the 4th century, and transmitted to us in ancient MSS., it has its value in textual criticism, being thus a witness to readings which were current in that age. In certain passages it has been thought that there is some proof of the influence of the Latin; and this has been regarded as confirmed by the order of the Gospels in the *Codex Argenteus*, being that of some of the Old Latin MSS., Matthew, John, Luke, Mark. But if the peculiarities pointed out were borrowed in the Gothic from the Latin, they must be considered rather as exceptional points, and not such as affect the general texture of the version, for its Greek origin is not to be mistaken. This is certain from the manner in which the Greek constructions and the forms of compound words are imitated. The very mistakes of rendering are proofs of Greek and not Latin origin. The marks of conformity to the Latin may have been introduced into the version in the case of MSS. copied in Italy during the rule in the land of the Gothic sovereigns. The Wolfenbüttel palimpsest has Latin by the side of the Gothic.

The Greek from which the version was made must in many respects have been what has been termed the transition text of the 4th century, another witness to which is the revised form of the Old Latin, such as is found in the *Codex Brixianus* (this revision being in fact the *Itala Vulgate*.)

In all cases in which the readings of the Gothic confirm those of the most ancient authorities, the united testimony must be allowed to possess especial weight.

Literature.—Waitz, *Ueber das Leben und die Lehre des Ulphila*, 1840; Gabelentz and Loebe, *Ulphilas (Prolegomena)*, 1836-43; Uppström, *Codex Argenteus*, 1854 (*Decem Codicis Argentei reliqua folia*, 1857); Massmann, *Ulphilas*, 1857. [S. P. T.]

GREEK VERSIONS OF THE OLD TESTAMENT.

1. SEPTUAGINT.—In addition to the special article on this version [SEPTUAGINT] a few points may be noted here.

(1.) *Name.*—In all discussions relative to the name of *Septuagint*, so universally appropriated to the Greek version of Alexandria, the scholion discovered by Omann and published by Kitzsch ought to be considered. The origin of this Latin scholion

* Such is the writer's judgment from his own examination of the palimpsest at Wolfenbüttel, and of those at

Milan; but of course he never saw the latter prior to their restoration.

in curious. The substance of it is stated to have been extracted from Callimachus and Eratosthenes, the Alexandrian Librarians, by Tetzze, and from this Greek note an Italian of the 15th century has formed the Latin scholion in question. The writer has been speaking of the collecting of ancient Greek poems carried on at Alexandria under Ptolemy Philadelphus, and then he thus continues: "Nam rex ille philosophis affectissimus (corr. 'differtissimus,' Ritschl, 'affectissimus,' Thiersch) et caeteris omnibus auctoribus clavis, disquisitis impensa regiae munificentiae ubique terrarum quantum valuit voluminibus opera Demetrii Phalerei phaza senum duas bibliothecas fecit, alteram extra regiam alteram autem in regia." The scholion then goes on to speak of books in many languages: "quae summa diligentia rex ille in suam linguam fecit ab optimis interpretibus converti." ⁴ Bernhardt reads instead of "phaza senum," "et lxx senum," and this correction is agreed to by Thiersch, as it well may be; some correction is manifestly needed, and this appears to be right. This gives us *seventy elders* associated in the formation of the Library. The testimony comes to us from Alexandrian authority; and this, if true (or even if believed to be true), would connect the *Septuagint* with the Library; a designation which might most easily be applied to a version of the Scriptures there deposited; and, let the translation be once known by such a name, then nothing would be more probable than that the designation should be applied to the *translators*. This may be regarded as the first step in the formation of the fables. Let the *Septuagint* be first known as applying to the associates in the collection of the Library, then to the Library itself, and then to that particular book in the Library which to so many had a far greater value than all its other contents. Whether more than the Pentateuch was thus translated and then deposited in the Royal Library is a separate question.

(11.) *The Connection of the Pentateuch in the LXX. with the Samaritan Text.*—It was long ago remarked that in the Pentateuch the Samaritan copy and the LXX. agree in readings which differ from the Hebrew text of the Jews. This has been pointed out as occurring in perhaps two thousand places. The conclusion to which some thus came was that the LXX. must have been translated from a Samaritan copy.

But, on many grounds, it would be difficult to admit this, even if it were found impossible to explain the coincidences. For (i.) it must be taken into account that if the discrepancies of the Samaritan and Jewish copies be estimated numerically, the LXX. will be found to agree far more frequently with the latter than the former. (ii.) In the cases of considerable and marked passages occurring in the Samaritan which are not in the Jewish, the LXX. does not contain them. (iii.) In the passages in which slight variations are found, both in the Samaritan and LXX., from the Jewish text, they often differ amongst themselves, and the amplification of the LXX. is less than that of the Samaritan. (iv.) Some of the small amplifications in which the Samaritan seems to accord with the LXX. are in such incorrect and non-idiomatic Hebrew that it is suggested that these must be *translations*, and, if so, probably from the LXX. (v.)

The amplifications of the LXX. and Samaritan often resemble each other greatly in character, as if similar false criticism had been applied to the text in each case. But as, in spite of all similarities such as these, the Pentateuch of the LXX. is more Jewish than Samaritan, we need not adopt the notion of translation from a Samaritan Codex, which would involve the subject in greater difficulties, and leave more points to be explained. (On some of the supposed agreements of the LXX. with the Samaritan, see Bishop Fitzgerald in *Kitto's Journal of Sacred Literature*, Oct. 1848, pp. 324-332.)

(111.) *The Liturgical Origin of Portions of the LXX.*—This is a subject for inquiry which has received but little attention, not so much, probably, as its importance deserves. It was noticed by Tregelles many years ago that the headings of certain Psalms in the LXX. coincide with the liturgical directions in the Jewish Prayer-Book: the results were at a later period communicated in *Kitto's Journal of Sacred Literature*, April, 1852, pp. 207-9. The results may be briefly stated:—The 23rd Psalm, LXX. (24th, Hebrew), is headed in the LXX., *ᾠδὴ μὲν σαββατικὴ*; so too in Hebrew, in De Sola's *Prayers of the Sephardim*, *בְּיוֹם הַרְאֵשׁוֹן* Ps. xlvii., LXX. (Heb. xlviii.), *שִׁנְתָּהּ סַבְבָּתוֹן*, Ps. xciii., LXX. (Heb. xciv.), *תַּרְפָּדִים סַבְבָּתוֹן*, *לְיוֹם רַבִּיעִי*, Ps. xcii., LXX. (Heb. xciii.), *סִר חֲזָק מְעַלְמָא דְּרֵי שְׁפִירָא סַבְבָּתוֹן*, *לְיוֹם שַׁבָּת*. There appear to be no Greek copies extant which contain similar headings for Psalms lxxxi. and lxxz. (Heb. lxxxi. and lxxxi.), which the Jewish Prayer-Book appropriates to the *third* and *fifth* days; but that such once existed in the case of the latter Psalm seems to be shown from the Latin *Psalterium Vetus* having the prefixed *quinta sabbati*, *לְיוֹם חַמִּישִׁי*. Prof. Delitzsch in his *Commentary on the Psalms* has recently pointed out that the notation of these Psalms in the LXX. is in accordance with certain passages in the Talmud.

It is worthy of inquiry whether variations in other passages of the LXX. from the Hebrew text cannot at times be connected with liturgical use, and whether they do not originate in part from rubrical directions. It seems to be at least plain that the Psalms were translated from a copy prepared for synagogue worship.

2. *AQUILA.*—It is a remarkable fact that in the second century there were three versions executed of the Old Testament Scriptures into Greek. The first of these was made by Aquila, a native of Sinope in Pontus, who had become a proselyte to Judaism. The Jerusalem Talmud (see Bartolocci, *Bibliotheca Rabbi*, iv. 281)* describes him as a disciple of R. A. Akiba; and this would place him in some part of the reign of the Emperor Hadrian (A.D. 117-138). It is supposed that the object of his version was to aid the Jews in their controversies with the Christians: and that as the latter were in the habit of employing the LXX., they wished to have a version of their own on which they could rely. It is very probable that the Jews in many Greek-speaking countries were not sufficiently acquainted with Hebrew to refer for themselves to the original, and thus they wished to have such a Greek translation as they might use with confidence in their discus-

⁴ See Thiersch, *De Pentateuchi versione Alexandrina*, pp. 8, 9. Erlangen, 1841.

* Eichhorn and those who have followed him state this

on the authority of Irenaeus, instead of that of the Jerusalem Talmud, a confusion which needs to be explicitly and not merely tacitly corrected.

sions. Such controversies were (it must be remembered) a new thing. Prior to the preaching of the Gospel, there were none besides the Jews who used the Jewish Scriptures as a means of learning God's revealed truth, except those who either partially or wholly became proselytes to Judaism. But now the Jews saw to their grief, that their Scriptures were made the instruments for teaching the principles of a religion which they regarded as nothing less than an apostasy from Moses.

This, then, is a probable account of the origin of this version. Extreme literality and an occasional polemical bias appear to be its chief characteristics. The idiom of the Greek language is very often violated in order to produce what was intended should be a very literal version; and thus, not only sense but grammar even was disregarded: a sufficient instance of this is found in his rendering the Hebrew particle וְ by συν , as in Gen. i. 1, $\text{οὐρανὸν καὶ συν τῇ γῇ}$, "quod Graeca et Latina lingua omnino non recipit," as Jerome says. Another instance is furnished by Gen. v. 5, $\text{καὶ ἔζησεν Ἀδὰμ τριάκοντα ἔτος καὶ ἑννακῆςια ἔτος}$.

It is sufficiently attested that this version was formed for controversial purposes: a proof of which may be found in the rendering of particular passages, such as Is. vii. 14, where Παρθένος in the LXX. παρθένος , is by Aquila translated παῖς ; such renderings might be regarded perhaps rather as modes of avoiding an argument than as direct falsification. There certainly was room for a version which should express the Hebrew more accurately than was done by the LXX.; but if this had been thoroughly carried out it would have been found that in many important points of doctrine—such, for instance, as in the Divinity of the Messiah and the rejection of Israel, the true rendering of the Hebrew text would have been in far closer conformity with the teaching of the New Test. than was the LXX. itself. It is probable, therefore, that one polemical object was to make the citations in the New Test. from the Old appear to be inconclusive, by producing other renderings (often probably more literally exact) differing from the LXX., or even contradicting it. Thus Christianity might seem to the Jewish mind to rest on a false basis. But in many cases a really critical examiner would have found that in points of important doctrine the New Test. definitely rejects the reading of the LXX. (when utterly unsuited to the matter in hand), and adopts the reading of the Hebrew.

It is mentioned that Aquila put forth a second edition (i. e. revision) of his version, in which the Hebrew was yet more servilely followed, but it is not known if this extended to the whole, or only to three books, namely, Jeremiah, Ezekiel, and Daniel, of which there are fragments.

Aquila often appears to have so closely sought to follow the etymology of the Hebrew words, that not only does his version produce no definite idea, but it does not even suggest any meaning at all. If we possessed it perfect it would have been of great value as to the criticism of the Hebrew text, though often it would be of no service as to its real understanding.

That this version was employed for centuries by the Jews themselves is proved indirectly by the 146th Novella of Justinian: $\text{πληρὸν δὲ διὰ τῆς Ἑλληνίδος ἀγαπησάντες τῇ τῶν ἑβραίων κολύμβησιν παραδόσει . . . πλὴν ἄλλ' ὅτι ἐν μὴ τὰς$

$\text{λοιπὰς αὐτοῖς ἀποκλείειν νομοθετικῶς ἀρετὰς, εἰδὲναι δίδωμεν καὶ τῇ Ἀκρίλου κεχρημένῃ, καὶ ἐν ἀλλόφυλοις ἐκείνῳ καὶ οὐ ματρὶν ἰν. τινῶν λέγειν ἔχρ. πρὸς τοὺς ἑβραϊκοὺς τὴν διαφάνειαν.}$

3. THEODOTIOS.—The second version, of which we have information as executed in the second century, is that of Theodotion. He is stated to have been an Ephesian, and he seems to be most generally described as an Ebionite: if this is correct, his work was probably intended for those semi-Christians who may have desired to use a version of their own instead of employing the LXX. with the Christians, or that of Aquila with the Jews.

But it may be doubted if the name of *translatus* can be rightly applied to the work of Theodotion. It is rather a revision of the LXX. with the Hebrew text, so as to bring some of the copies then in use into more conformity with the original. Thus he was able to do (with the aid probably of some constructors) so as to eliminate portions which had been introduced into the LXX., without really being an integral part of the version; and also so as to bring much into accordance with the Hebrew in other respects. But his own knowledge of Hebrew was evidently very limited; and thus words and parts of sentences were left untranslated; the Hebrew being merely written with Greek letters.

Theodotion, as well as Aquila was quoted by Irenaeus; and against both there is the common charge laid of corrupting texts which relate to the Messiah: some polemical intention in such passages can hardly be doubted. The statement of Epiphanius that he made his translation in the reign of Commodus accords well with its having been quoted by Irenaeus; but it cannot be correct if it is one of the translations referred to by Justin Martyr as giving interpretations contrary to the Christian doctrine of the New Test.

There can be no doubt that this version was much used by Christians; probably many changes in the text of the LXX. were adopted from Theodotion; this may have begun before the Biblical labours of Origen brought the various versions into one conspectus. The translation of the Book of Daniel by Theodotion was substituted for that of the LXX. in ecclesiastical use as early at least as part of the third century. Hence Daniel, as rendered or revised by Theodotion, has so long taken the place of the true LXX., that their version of this book was supposed not to be extant; and it has only been found in one MS. In most editions of the LXX. Theodotion's version of Daniel is still substituted for that which really belongs to that translation.

4. SYMMACHUS is stated by Eusebius and Jerome to have been an Ebionite: so too in the Syrian accounts given by Assemani; Epiphanius, however, and others style him a Samaritan. There may have been Ebionites from amongst the Samaritans, who constituted a kind of separate sect; and these may have desired a version of their own; or it may be that as a Samaritan he made this version for some of that people who employed Greek, and who had learned to receive more than the Pentateuch. But perhaps to such motives was added (if indeed this were not the only cause of the version) a desire for a Greek translation not so unintelligibly bald as that of Aquila, and not displaying such a want of Hebrew learning as that of Theodotion. It is probable that if this translation of Symmachus had appeared prior to the time of Irenaeus, it would have been mentioned by him; and this agrees with what Epi-

phanus says, namely, that he lived under the Emperor Severus.

The translation which he produced was probably better than the others as to sense and general phraseology. When Jerome speaks of a *second edition* he may probably mean some revision, more or less complete, which he executed after his translation was first made: it could hardly be a retranslation, or anything at all tantamount thereto.

5. THE FIFTH, SIXTH, AND SEVENTH VERSIONS.—Besides the translations of Aquila, Symmachus, and Theodotion, the great critical work of Origen comprised as to portions of the Old Testament three other versions, placed for comparison with the LXX.; which, from their being anonymous, are only known as the fifth, sixth, and seventh; designations taken from the places which they respectively occupied in Origen's columnar arrangement. Ancient writers seem not to have been uniform in the notation which they applied to these versions; and thus what is cited from one by its number of reference is quoted by others under a different numeral.

These three partial translations were discovered by Origen in the course of his travels in connexion with his great work of Biblical criticism. Eusebius says that two of these versions (but without designating precisely which) were found, the one at Jericho, and the other at Nicopolis on the gulf of Actium. Epiphanius says, that what he terms the fifth, was found at Jericho, and the sixth at Nicopolis; while Jerome speaks of the fifth as having been found at the latter place.

The contents of the *fifth version* appear to have been the Pentateuch, Psalms, Canticles, and the minor prophets: it seems also to be referred to in the Syro-Hexaplar text of the second book of Kings: it may be doubted if in all these books it was complete, or at least if so much were adopted by Origen. The existing fragments prove that the translator used the Hebrew original; but it is also certain that he was aided by the work of former translators.

The *sixth version* seems to have been just the same in its contents as the fifth (except 2 Kings); and thus the two may have been confused: this translator also seems to have had the other versions before him. Jerome calls the authors of the fifth and sixth "*Judaicos* translators;" but the translator of this must have been a Christian when he executed his work, or else the hand of a Christian reviser must have meddled with it before it was employed by Origen; which seems from the small interval of time to be hardly probable. For in Hab. iii. 15 the translation runs, ἐξήλθες τοῦ οὐρανοῦ ἵνα ἰδῇς τὸν λαόν σου διὰ Ἰησοῦ τοῦ χριστοῦ σου.

Of the *seventh version* very few fragments remain. It seems to have contained the Psalms and minor prophets; and the translator was probably a Jew.

From the references given by Origen, or by those who copied from his columnar arrangement and its results (or who added to such extracts), it has been thought that other Greek versions were spoken of. Of these δ' Ἑβραῖος probably refers to the Hebrew text, or to something drawn from it: δ' ὕψος to the Old Syriac version: τὸ Σαμαρειτικὸν probably a reference to the Samaritan text, or some Samaritan gloss: δ' Ἑλληνικὸς, δ' ἄλλος, δ' ἀνεπίγραφος some unspecified version or versions.

The existing fragments of these varied versions are mostly to be found in the editions of the

relics of Origen's Hexapla, by Montfaucon and by Bardet.

[For an account of the use made of these versions by Origen, and its results, see SEPTUAGINT.]

6. THE VENETO-GREEK VERSION.—A MS. of the fourteenth century, in the library of St. Mark at Venice, contains a peculiar version of the Pentateuch, Proverbs, Ecclesiastes, Canticles, Ruth, Lamentations, and Daniel. All of these books, except the Pentateuch, were published by Villoison at Strasburg in 1784; the Pentateuch was edited by Ammon at Erlangen in 1790-91. The version itself is thought to be four or five hundred years older than the one MS. in which it has been transmitted; this, however, is so thoroughly a matter of opinion, that there seems no absolute reason for determining that this one MS. may not be the original as well as the only one in existence. It is written in one very narrow column on each page; the leaves follow each other in the Hebrew order, so that the book begins at what we should call the end. An examination of the MS. suggested the opinion that it may have been written on the broad inner margin of a Hebrew MS.; and that for some reason the Hebrew portion had been cut away, leaving thus a Greek MS. probably unique as to its form and arrangement. As to the translation itself, it is in any supposition too recent to be of consequence in criticism. It may be said briefly that the translation was made from the Hebrew, although the present punctuation and accentuation is often not followed, and the translator was no doubt acquainted with some other Greek versions. The language of the translation is a most strange mixture of astonishing and cacophonous barbarism with attempts at Attic elegance and refinement. The Doric, which is employed to answer to the Chaldean portions of Daniel, seems to be an indication of remarkable affectation.

THE GREEK OF ST. MATTHEW'S GOSPEL.—Any account of the Greek versions of Holy Scripture would be incomplete without some allusion to the fact, that if early testimonies and ancient opinion unitedly are to have some weight when wholly uncontradicted, then it must be admitted that the original language of the Gospel of St. Matthew was Hebrew, and that the text which has been transmitted to us is really a Greek translation.

It may be briefly stated that every early writer who mentions that St. Matthew wrote a Gospel *of all* says that he wrote in Hebrew (that is in the Syro-Chaldaic), and in Palestine in the first century; so that if it be assumed that he did not write in Hebrew but in Greek, then it may well be asked, what ground is there to believe that he wrote any narrative of our Lord's life on earth?

Every early writer that has come down to us uses the *Greek* of St. Matthew, and this with the definite recognition that it is a translation; hence we may be sure that the Greek copy belongs to the Apostolic age, having been thus authoritatively used from and up to that time. Thus the question is not the *authority* of the Greek translation, which comes from the time when the Churches enjoyed apostolic guidance, but whether there was a Hebrew original from which it had been translated.

The witnesses to the Hebrew original were men sufficiently competent to attest so simple a fact, especially seeing that they are relied on in what is far more important,—that St. Matthew wrote a Gospel at all. Papias, in the beginning of the second

century, repeats apparently the words of John the Presbyter, an immediate disciple of our Lord, that "Matthew wrote the oracles in the Hebrew dialect." Irenaeus, in the latter part of the same century, is equally explicit; in connexion with the Indian mission of Pantaenus in the same age, we learn that he found the Gospel of Matthew in the very Hebrew letters. In the next century Origen, the laborious investigator and diligent inquirer, says, that the received account was that St. Matthew had written the first Gospel, and that it was in Hebrew. So too in the next century, Epiphanius and Jerome, both of whom, like Origen, were acquainted with Hebrew. Jerome also mentions the very copies of this Hebrew original which were extant in his time, and which he transcribed. He shows indeed that the copies then circulated amongst the Nazarenes had been variously interpolated; but this would not affect the antecedent fact. So too Epiphanius shows that the document had been variously depraved; but this does not set aside what it originally was.

To follow the unanimous agreement of later writers is needless; but what can be said on the other side? What evidence is adduced that St. Matthew wrote in Greek? None whatever; but simply some *a priori* notions that he ought to have done so are advanced: then it is truly stated that the Greek Gospel does not read as though it had about it the constraint of a translation; and then it is said that *perhaps* the witnesses for the Hebrew original were mistaken.^f "But (says Principal Campbell) is the positive testimony of witnesses, delivered as of a well-known fact, to be overturned by a mere supposition, a *perhaps*? for that the case is really as they suppose no shadow of evidence is pretended" (*Works*, ii. 171).

For another theory, that St. Matthew wrote both in Hebrew and also in Greek, there is no evidence: the notion is even contradicted by the avowed ignorance of the early Christian writers as to whose hand formed the Greek version which they accepted as authoritative. To them there was nothing self-contradictory (as some have said) in the notion of an authoritative translation. As it can be shown that the public use of the *four* Gospels in Greek was universal in the churches from the apostolic age, it proves to us that apostolic sanction must have been the ground of this usage; this surely is sufficient to authorize the Greek Gospel that we have.

Erasmus seems to have been the first to suggest that the Greek is the original of the Apostle: at least no writer earlier than Erasmus has been brought forward as holding the opinion: in this many have followed him on what may be called very

subjective grounds. Erasmus also advanced the opinion that Irenaeus against *Heretics* was written by him in Latin. For this he had just as good grounds as for the Greek original of St. Matthew. As to Irenaeus no one appears to follow Erasmus; why should so many adhere to his bold opinion (opposed by so much evidence and supported by none) relative to St. Matthew? On the revival of letters there was much curiosity expressed for the recovery of a copy of St. Matthew's Hebrew original. Pope Nicholas V. is said to have offered five thousand ducats for a copy: this probably suggested the re-translations into Hebrew of this Gospel published in the following century by Sebastian Munster and others. [S. P. T.]

LATIN VERSIONS. [VULGATE.]

SAMARITAN VERSIONS. [SAMARITAN PENTATEUCH, p. 1113b.]

SLAVONIC VERSION. In the year 845 there was a desire expressed, or an inquiry made for Christian teachers in Moravia, and in the following year the labours of missionaries began amongst them. We need not consider the Moravia in which these services were commenced to be precisely restricted to or identified with the region which now bears that name, for in the ninth century Great Moravia was of far wider extent; and it was amongst the Slavonic people then occupying the whole region, that the effort for Christianization was put forth. But while this further extent of Moravia is admitted, it is also to be recollected that the province of Moravia, of which Brinn is the metropolis, is not only the nucleus of Moravia, but that also the inhabitants of that country, still retaining as they do their Slavonian tongue, rightly consider themselves as the descendants and successors of those who were then Christianized. Thus, in 1862 they commemorated the thousandth anniversary of their having taken this step, and in 1863 they celebrated the thousandth from the actual arrival of missionaries amongst them. These missionaries were Cyrilus and Methodius, two brothers from Thessalonica: to Cyrilus is ascribed the invention of the Slavonian alphabet, and the commencement of the translation of the Scriptures. Neander truly says that he was honourably distinguished from all other missionaries of that period in not having yielded to the prejudice which represented the languages of rude nations as too profane for sacred uses; and by not having shrunk from any toil which was necessary in order to become accurately acquainted with the language of

^f The manner in which the testimony of competent witnesses has been not only called in question, but set aside, is such as would cast doubt on any historical fact competently attested; and the terms applied to the witnesses themselves, are such as seem to show that argument being vain, it is needful to have recourse to something else; not mere assertion as opposed to the definite evidence, but a mode of speaking of the witnesses themselves and of misrepresenting their words, which would not be ventured on in common matters. Thus a writer who is well and justly esteemed on other subjects, the Rev. Dr. Wm. Lindsay Alexander, sets aside the evidence and the statements of Jerome in this manner—"The one who says he had seen the [Hebrew] gospel is Jerome; but his evidence about it is so conflicting that it is not worth a rush. First he says he has seen it, and is sure that it is the original of the Greek gospel; then he softens down with 'it is called by most people Matthew's authentic,' 'as most believe,' and so on. Now he says,

'Who translated it into Greek is unknown;' and presently, with amusing self-complacency and obtrusiveness, he tells us, 'I myself translated it into Greek and Latin!' Why there is not a small-debt court in the country where such a witness would not be hooted to the door." Would such modes of reasoning be adopted if we were not desirous to mystify the subject? Who can see that Jerome says that it is unknown who had made the Greek translation then current for centuries? And who imagines that he identified with that version the one which he had recently made from the documents found at Bercea? But that it is that this is unwarranted for argument on this subject. Dr. Land, in the *Journal of Sacred Literature*, Oct. 1868, boldly asserts, "We may safely say that there is, in probability as well as in direct testimony, a weight as heavy in the scale of the Greek text as in that of the Hebrew, not to go farther." But in fact, there is no testimony, direct or indirect, to a Greek original of St. Matthew.

to people amongst whom he laboured. Cyrillus appears to have died at Rome in 868, while Methodius continued for many years to be the bishop of the Slavonians. He is stated to have continued his brother's translation, although *how much* they themselves actually executed is quite uncertain; perhaps much of the Old Testament was not translated at all in that age, possibly not for many centuries after.

The Old Testament is, as might be supposed, a version from the LXX., but what measure of revision it may since have received seems to be by no means certain. As the oldest known MS. of the whole Bible is of the year 1499, it may reasonably be questioned whether this version may not in large portions be comparatively modern. This could only be set at rest by a more full and accurate knowledge being obtained of Slavonic Biblical MSS. Dobrowsky however mentions (Griesbach's *Gr. Test.* ii., xxviii.) that this MS. (his 1), and two others copied from it, are the only Slavonic MSS. of the entire Bible existing in Russia. If it be correct that the MSS. which he terms 2 and 3 are copied from this, there are strong reasons for believing that it was not completed for some years subsequently to 1499. The oldest MSS. of any part of this version is an Evangelarium, in Cyrillic characters, of the year 1056; that at Rheims (containing the Gospels) on which the kings of France used to take their coronation oath, is nearly as old. One, containing the Gospels, at Moscow, is of the year 1144.

The first printed portion was an edition of the Gospels in Wallachia, in 1512; in 1575 the same portion was printed at Wilna; and in 1581 the whole Bible was printed at Ostrog in Volhynia; from this was taken the Moscow edition of 1661, in which, however, there was some revision, at least so far as the insertion of 1 John v. 7 is concerned.

Wetstein cited a few readings from this version; after made more extracts, which were used by Tischendorf, together with the collations sent to him by Dobrowsky, both from MSS. and printed editions. We thus can say, with some confidence, that the general text is such as would have been expected in the ninth century; some readings from the Latin have, it appears, been introduced in places: this arises probably from the early Slavonian custom of reading the Gospel in Latin before they did it in their own tongue.

Dobrowsky paid particular attention in his collation to the copies of the Apocalypse: it has been, however, long suspected that that book formed no portion of this version as originally made. We can now go farther and say definitely that the Apocalypse, as found in some at least of the Slavonic copies, could not be anterior to the appearance of the first edition of the Gr. Test. of Erasmus in 1516. For there are readings in the Apocalypse of

MSS. which are entirely devoid of any support from Greek MSS. This can be said confidently, since the one Greek copy used by Erasmus has been identified and described by Prof. Delitzsch.⁶ It is now therefore known that peculiarities as to error in Erasmus's text of the Apocalypse, as it first appeared, are in several places due not to the MS. from which he drew, but to the want of care in his edition. And thus, whatever agrees with such peculiarities must depend on, and thus be subsequent to, the Erasmus text. In Rev. ii. 13, the Erasmus text has the peculiar reading, *ἐν ταῖς ἡμέραις ταύταις*; for this no MS. was cited by Griesbach, and all his authority, besides the Erasmus edition, was in fact "Slav. 3, 4," i. e. two MSS. collated by Dobrowsky; one of these is said by him to be copied from the oldest Slavonic MS. of the whole Bible: if, therefore, it agrees with it in this place, it shows that the Slavonic MS. must, in that part at least, be later than the year 1516. The only Greek authority for this reading, *ἐν ταῖς*, is the margin of 92, the Dublin MS., famous as containing 1 John v. 7: in which the Gospels belong to the end of the fifteenth century; the Acts and Epistles are somewhat later, and the Apocalypse was added about the year 1580.⁷ There seems to be another Slavonic text of the Apocalypse contained in Dobrowsky's 10, but whether it is older than the one already mentioned is doubtful.

SYRIAC VERSIONS. I. OF THE OLD TESTAMENT.

A. *From the Hebrew.*—In the early times of Syrian Christianity there was executed a version of the Old Testament from the original Hebrew, the use of which must have been as widely extended as was the Christian profession amongst that people. Ephraem the Syrian, in the latter half of the 4th century, gives abundant proof of its use in general by his countrymen. When he calls it OUR VER-

sion, *ḥawā*, it does not appear to be in opposition to any other Syriac translation (for no other can be proved to have then existed), but in contrast to the original Hebrew text, or to those in other languages.¹ At a later period this Sy-

riac translation was designated *Peshito*, פְּשִׁטָּה (Simple); or, as in the preface of Bar-Hebraeus to his *Thesaurus Arcanorum*, מִשְׁכָּל פְּשִׁטָּה (Simple version). It is probable that this name was applied to the version after another had been formed from the Hexaplar Greek text. In the translation made from Origen's revision of the LXX., the critical marks introduced by him were retained, and thus every page and every part was

^b This Greek authority is the one denoted by 92. Fehlebrandt (following a misprint in Tregelles's *Greek*

and *English Revelation*, 1844) gives it 91^{oo}. That would signify a correction in a later hand in 91; which in the modern supplement to the Vatican MS, in which such a correction has been sought in vain.

¹ Ephraemi Opera Syr. i. 380 (on i Sam. xiv. 4). He is simply comparing the Hebrew phrase and the Syriac

version: - **וְנִחַלְתֶּם אִתָּם** (לְהַסֵּר אֶת־דִּמְיָיו) **וְנִחַלְתֶּם אִתָּם**

marked with asterisks and obeli, from which the translation from the Hebrew was free. It might, therefore, be but natural for a bare text to be thus designated, in contrast to the marks and the citations of the different Greek translators found in the version from the Hexaplar Greek. This translation from the Hebrew has always been the ecclesiastical version of the Syrians; and when it is remembered how in the 5th century dissensions and divisions were introduced into the Syrian Churches, and how from that time the Monophysites and those termed Nestorians have been in a state of unhealed opposition, it shows not only the antiquity of this version, but also the deep and abiding hold which it must have taken on the mind of the people, that this version was firmly held fast by both of these opposed parties, as well as by those who adhere to the Greek Church, and by the Maronites. Its existence and use prior to their divisions is sufficiently proved by Ephraem alone. But how much older it is than that version of Edessa we have no evidence. From Bar-Hebraeus (in the 13th century) we learn that there were three opinions as to its age; some saying that the version was made in the reigns of Solomon and Hiram, some that it was translated by Aes, the priest who was sent by the King of Assyria to Samaria, and some that the version was made in the days of Adai the apostle and of Abgarus, King of Osrhoene (at which time, he adds, the *Simple* version of the New Test. was also made).^a The first of these opinions of course implies that the books written before that time were then translated; indeed, a limitation of somewhat the same kind would apply to the second. The ground of the first opinion seems to have been the belief that the Tyrian king was a convert to the profession of the true and revealed faith held by the Israelites; and that the possession of Holy Scripture in the Syriac tongue (which they identified with his own) was a necessary consequence of this adoption of the true belief: this opinion is mentioned as having been held by some of the Syrians in the 9th century. The second opinion (which does not appear to have been cited from any Syriac writer prior to Bar-Hebraeus), seems to have some connexion with the formation of the Samaritan version of the Pentateuch. As that version is in an Aramaean dialect, any one who supposed that it was made immediately after the mission of the priest from Assyria, might say that it was then first that an Aramaean translation was executed; and this might afterwards, in a sort of indefinite manner, have been connected with what the Syrians themselves used. James of Edessa (in the latter half of the 7th century) had held the third of the opinions mentioned by Bar-Hebraeus, who cites him in support of it, and accords with it.

It is highly improbable that any part of the Syriac version is older than the advent of our Lord; those who placed it under Abgarus, King of Edessa, seem to have argued on the account that the Syrian people then received Christianity; and thus they supposed that a version of the Scriptures was a necessary accompaniment of such conversion. All that the account shows clearly is, then, that it was believed to belong to the earliest period of the Christian faith among them: an opinion with which all that we know on the subject accords well. Thus Ephraem, in the 4th century, not only shows that it was then current, but also gives the im-

pression that this had even then been long the case. For in his commentaries he gives explanations of terms which were even then obscure. This must have been from age; if so, the version was made comparatively long before his days: or it may be from its having been in a dialect different from that to which he was accustomed at Edessa. In this case, then, the translation was made in some other part of Syria; which would hardly have been done, unless Christianity had at such a time been more diffused there than it was at Edessa. The dialect of that city is stated to have been the purest Syriac; if, then, the version was made at that place, it would no doubt have been a monument of such purer dialect. Probably the origin of the Old Syriac version is to be compared with that of the Old Latin [see VULGATE]; and that it differed as much from the polished language of Edessa as did the Old Latin, made in the African Province, from the contemporary writers of Rome, such as Tacitus.

Even though the traces of the origin of this version of the Old Test. be but few, yet it is of importance that they should be marked; for the Syriac has the peculiar value of being the first version from the Hebrew original made for Christian use; and, indeed, the only translation of the last before that of Jerome, which was made subsequently to the time when Ephraem wrote. The Syriac commentator may have termed it "*OUR* version," in contrast to all others then current (as the Targums were hardly versions), which were merely reflections of the Greek and not of the Hebrew original.

The proof that this version was made from the Hebrew is twofold: we have the direct statements of Ephraem, who compares it in places with the Hebrew, and speaks of this origin as a fact; and who is confirmed (if that had been needful) by later Syriac writers; we find the same thing as evident from the internal examination of the version itself. Whatever internal change or revision it may have received, the Hebrew groundwork of the translation is unmistakable. Such indications of revision must be afterwards briefly specified.

The first printed edition of this version was that which appeared in the Paris Polyglott of Le Jay in 1645; it is said that the editor, Gabriel Sionita, a Maronite, had only an imperfect MS., and that, besides errors, it was defective as to whole passages, and even as to entire books. This last charge seems to be so made as if it were to imply that *verses* were omitted besides those of the Apocrypha, a part which Sionita confessedly had not. He is stated to have supplied the deficiencies by translating into Syriac from the Vulgate. It can hardly be supposed but that there is some exaggeration in these statements. Sionita may have filled up occasional hiatus in his MS.; but it requires very definite examination before we can fully credit that he thus supplied whole books. It seems much more to believe that the defective books were simply those in the Apocrypha, which he did not supply. The result, however, is, that the Paris edition is not an infirm groundwork for our speaking with confidence of the text of this version.

In Walton's Polyglott, 1657, the Paris text is reprinted, but with the addition of the Apocryphal books which had been wanting. It was generally said that Walton had done much to amend the texts upon MS. authority; but the late Prof. Lee denies this, stating that "the only additions made by Walton was some Apocryphal books." From

^a WILKINSON, *Horae Syriacae*, 96

Walton's *Polyg. At.*, Kirsch, in 1787, published a separate edition of the Pentateuch. Of the Syriac Psalter there have been many editions. The first of these, as mentioned by Eichhorn, appeared in 1610; it has by the side an Arabic version. In 1325 there were two editions; the one at Paris edited by Gabriel Sionita, and one at Leyden by Erpenius from two MSS. These have since been repeated; but anterior to them all, it is mentioned that the seven penitential Psalms appeared at Rome in 1584.

In the punctuation given in the Polyglotta, a system was introduced which was in part a peculiarity of Gabriel Sionita himself. This has to be borne in mind by those who use either the Paris Polyglott or that of Walton; for in many words there is a redundancy of vowels, and the form of some is thus exceedingly changed.

When the British and Foreign Bible Society proposed more than forty years ago to issue the Syriac Old Testament for the first time in a separate volume, the late Prof. Lee was employed to make such editorial preparations, as could be connected with a mere revision of the text, without any specification of the authorities. Dr. Lee collated for the purpose six Syriac MSS. of the Old Test. in general, and a very ancient copy of the Pentateuch: he also used in part the commentaries of Ephraem and of Bar-Hebraeus. From these various sources he constructed his text, with the aid of that found already in the Polyglotta. Of course the corrections depended on the editor's own judgment; and the want of a specification of the results of collations leaves the reader in doubt as to what the evidence may be in those places in which there is a departure from the Polyglott text. But though more information might be desired, we have in the edition of Lee a veritable Syriac text, from Syriac authorities, and free from the suspicion of having been formed in modern times, by Gabriel Sionita's translating portions from the Latin.

But we have now in this country, in the MS. treasures brought from the Nitrian valleys, the means of far more accurately editing this version. Even if the results should not appear to be striking, a thorough use of these MSS. would place this version on such a basis of diplomatic evidence as would show positively how this earliest Christian translation from the Hebrew was read in the 6th or 7th century, or possibly still earlier: we thus could use the Syriac with a fuller degree of confidence in the criticism of the Hebrew text, just as we can the more ancient versions of the new for the criticism of the Greek.

In the beginning of 1849, the late excellent Biblical scholar, the Rev. John Rogers, Canon of Exeter, published "*Reasons why a New Edition of the Peschito, or ancient Syriac Version of the Old Testament, should be published.*" In this interesting pamphlet, addressed to the late Abp. of Canterbury, Canon Rogers speaks of the value of the version itself, its importance in criticism, the existing editions, their defects, the sources of emendation now possessed by this country, in the Nitrian MSS. especially, "now [1849] under the care of the Rev. Wm. Cureton, who is making known to the public the treasures of the library of the Monastery of St. Mary Deipura, in the Nitrian Desert in Egypt, thus happily obtained." He

¹ The Pentateuch could probably be given on a basis of the fifth century.

advert to the facility which would be afforded for the proper publication of the proposed edition, from type having been of late prepared representing the proper Estrangelo Syriac character, of which Dr. Cureton was even then making use in printing his text of the Syriac Gospels, &c. If it had been an honour to this country to issue the collations of Kennicott for the Hebrew Old Test., and of Holmes for the LXX., might not this proposed Syriac edition be a worthy successor to such works? The plan proposed by Canon Rogers for its execution was this:—to take the Syriac MS. which appeared to be the best in each portion of the Old Test., both on the ground of goodness and antiquity: let this be printed, and then let collations be made by various scholars in interleaved copies; the whole of the results might then be published in the same form as De Rossi's *Variae Lectiones to the Hebrew Bible*. Canon Rogers gives a few hints as to what he thought would be probable results from such a collation. He did not expect that the differences from the printed Syriac would be very great; but still there would be a far greater satisfaction as to the confidence with which this version might be quoted, especially in connexion with the criticism of the Hebrew original. By way of illustration he pointed out a good many passages, in which it can hardly be doubted that the defects in the printed Syriac arise from the defectiveness of the copy or copies on which it was based. He also showed it to be a point of important inquiry, whether in places in which the printed Syriac agrees with the LXX., the Syriac has been altered; or whether both may preserve the more ancient reading of Hebrew copies once extant. The reasons why such a Syriac text should be prepared and published, and why such collations should be made, are thus summed up by Canon Rogers: "1st. Because we have no printed text from ancient and approved MSS. 2nd. Because the Latin version in Walton's Polyglott often fails to convey the sense of the Syriac. 3rd. Because there are many omissions in the printed text which may perhaps be supplied in a collation of early MSS. 4th. Because the facilities now given to the study of Hebrew make it desirable that new facilities should also be given to the study of the cognate languages. 5th. Because it is useless to accumulate ancient and valuable Biblical MSS. at the British Museum, if those MSS. are not applied to the purposes of sacred criticism. 6th. Because in comparing the Syriac with the Hebrew original, many points of important and interesting investigation will arise. Finally, Because it is neither creditable to the literary character of the age, nor to the theological position of the Church of England, that one of our most ancient versions of the Bible should continue in its present neglected state." These considerations of the late Canon Rogers are worthy of being thus repeated, not only as being the deliberate judgment of a good Biblical scholar, but also as pointing out practically the objects to be sought in making proper use of the Biblical materials which are at our hands, and of which the scholars of former ages had not the benefit.

There was a strong hope expressed soon after the issue of Canon Rogers's appeal, that the work would have been formally placed in a proper manner in the hands of the Rev. Wm. Cureton, and that thus it would have been accomplished under his superintendence, at the Oxford University Press. Canon Rogers announced this in an Appendix to his pamphlet. But this has not been effected. It may

still be hoped that Dr. Cureton will edit at least the Pentateuch from a very ancient copy: but there is not now in this country the *practical encouragement* to such Biblical studies as require the devotion of time, labour, and attention (as well as pecuniary expense), which in the last century Ken-olcott and Holmes received.

But if the printed Syriac text rests on by no means a really satisfactory basis, it may be asked, How can it be said positively that what we have is the same version substantially that was used by Ephraem in the 4th century? Happily, we have the same means of identifying the Syriac with that anciently used, as we have of showing that the modern Latin Vulgate is substantially the version executed by Jerome. We admit that the common printed Latin has suffered in various ways, and yet at the bottom and in its general texture it is undoubtedly the work of Jerome: so with the Peshito or the Old Test., whatever errors of judgment were committed by Gabriel Sionita, the first editor, and however little has been done by those who should have corrected these things on M.S. authority, the identity of the version is too certain for it to be thus destroyed, or even (it may be said) materially obscured.

From the citations of Ephraem, and the single words on which he makes remarks, we have sufficient proof of the identity of the version: even though at times he also furnishes proof that the copies as printed are not exactly as he read. The following may be taken as instances of accordance: they are mostly from the places (see Wiseman, *H. Syr.* 122, &c.) in which Ephraem thinks it needful to explain a Syrian word in this version, or to discuss its meaning, either from its having become antiquated in his time, or from its being unused in the same sense by the Syrians of Edessa. Thus,

Gen. i. 1, Δ is used in Syriac as answering to the Hebrew Δ . The occurrence of this word Ephraem mentions, giving his own explanation:

i. 2, Δ ; x. 9, for Δ , the Syriac has Δ , which Ephraem mentions as being a term which the Persians also use.

Gen. xxx. 14, for Δ there is Δ , a word which Ephraem mentions as being there, and the possible meaning of which he discusses.

Exod. xxviii. 4, Δ stands for the Hebrew Δ ; Ephraem reads it Δ , and explains

the meaning:—xxviii. 4, Δ ;

xxviii. 16, Δ ;

xxviii. 40, Δ ;

Num. xi. 7, for Δ there is

Δ , a word equally, it seems, meaning

sorter; which was, however, unknown to Ephraem, who expounds it as though it meant food of

all kinds, as Δ . 1 Sam. xxiii. 28,

for Δ ; 2 Sam. viii. 7, Δ ,

merely retaining the Hebrew word Δ in

Syriac form. 1 K. x. 11, Δ ;

xii. 11, Δ ; 2 K. iii. 4, Δ ;

(Δ); Job xxxix. 23, Δ ;

xli. 13, Δ , the Heb. Δ . Is. iii. 23,

Δ (Δ); Jer. xl. 41, Δ ;

(Δ). Zech. v. 7, Δ . In these

passages, and in several others, the words of the Peshito are cited by Ephraem because of their obscurity, and of the need that they had of explanation.

The proof that the version which has come down to us is substantially that used by the Syrians in the 4th century, is perhaps more definite from the comparison of words than it would have been from the comparison of passages of greater length; because in longer citations there always might be some ground for thinking that perhaps the M.S. of Ephraem might have been conformed to later Syriac copies of the Sacred Text; while, with regard to peculiar words, no such suspicion can have any place, since it is on such words still found in the Peshito that the remarks of Ephraem are based. The fact that he sometimes cites it differently from what we now read, only shows a variation of copies, perhaps ancient, or perhaps such as is found merely in the printed text that we have.

From Ephraem having mentioned *translators* of this version, it has been concluded that it was the work of several: a thing probable enough in itself, but which could hardly be proved from the occurrence of a casual phrase, nor yet from variations in the rendering of the same Hebrew word; such variations being found in almost all translations, even when made by one person—that of Jerome, for instance; and which it would be almost impossible to avoid, especially before the time when concordances and lexicons were at hand. Variations in phraseology give a far surer ground for supposing several translators.

It has been much discussed whether this translation were a Jewish or a Christian work. Some, who have maintained that the translator was a Jew, have argued from his knowledge of Hebrew and his mode of rendering. But these considerations prove nothing. Indeed, it might well be doubted if in that age a Jew would have formed anything except a Chaldee Targum; and thus diffuseness of paraphrase might be expected instead of closeness of translation. There need be no reasonable objection made to the opinion that it is a Christian work. Indeed it is difficult to suppose, that before the diffusion of Christianity in Syria, the version could have been needed.

It may be said that the Syriac in general supports the Hebrew text that we have: how far arguments may be raised upon minute coincidences or variations cannot be certainly known until the ancient text of the version is better established. Occasionally, however, it is clear that the Syriac translator read one consonant for another in the Hebrew, and translated accordingly; at times another vocalization of the Hebrew was followed.

A resemblance has been pointed out between the

Syriac and the reading of some of the Chaldean Targums: if the Targum is the older, it is not unlikely that the Syriac translator, using every aid in his power to obtain an accurate knowledge of what he was rendering, examined the Targums in difficult passages. This is not the place for formally discussing the date and origin of the Targums [see below, TARGUMS]; but if (as seems almost certain) the Targums which have come down to us are almost without exception more recent than the Syriac version, still they are probably the successors of earlier Targums, which by amplification have reached their present shape. Thus, if existing Targums are more recent than the Syriac, it may happen that their coincidences arise from the use of a common source—an earlier Targum.

But there is another point of inquiry of more importance: it is, how far has this version been affected by the LXX.? and to what are we to attribute this influence? It is possible that the influence of the LXX. is partly to be ascribed to copyists and revisers; while in part this belonged to the version as originally made. For, if a translator had access to another version while occupied in making his own, he might consult it in cases of difficulty; and thus he might unconsciously follow it in other parts. Even knowing the words of a particular translation may affect the mode of rendering in another translation or revision. And thus a tinge from the LXX. may have easily existed in this version from the first, even though in whole books it may not be found at all. But when the extensive use of the LXX. is remembered, and how soon it was superstitiously imagined to have been made by direct inspiration, so that it was deemed canonically authoritative, we cannot feel wonder that readings from the LXX. should have been from time to time introduced; this may have commenced probably before a Syriac version had been made from the Hexaplar Greek text; because in such revised text of the LXX. the additions, &c., in which that version differed from the Hebrew, would be so marked that they would hardly seem to be the authoritative and genuine text.

Some comparison with the Greek is probable even before the time of Ephraem; for, as to the Apocryphal books, while he cites some of them (though not as Scripture), the Apocryphal additions to Daniel and the Books of Maccabees were not yet found in Syriac. Whoever translated any of these books from the Greek, may easily have also compared with it in some places the books previously translated from the Hebrew.

In the Book of Psalms this version exhibits many peculiarities. Either the translation of the Psalter must be a work independent of the Peshito in general, or else it has been strangely revised and altered, not only from the Greek,¹ but also from targumical use. Perhaps, indeed, the Psalms are a different version; and that in this respect the practice of the Syrian Churches is like that of the Roman Catholic Church and the Church of England—using liturgically a different version of the book much read ecclesiastically.

It is stated that, after the divisions of the Syrian Church, there were revisions of this one version by the Monophysites and by the Nestorians: probably

¹ Perhaps as to this the version of the Psalms from a Greek made by Polycarp (to be mentioned presently) has not been sufficiently taken into account. Indeed, remarkably little attention appears to have been paid to evidence that such a version existed.

it would be found, if the subject could be fully investigated, that there were in the hands of different parties copies in which the ordinary accidents of transcription had introduced variations.

The *Karkaphensian* recension mentioned by Bar Hebraeus was only known by name prior to the investigations of Wiseman; it is found in two MSS. in the Vatican; it was formed for the use of Monophysites; there is peculiarity in the punctuation introduced, by a leaning towards the Greek; but it is, as to its substance, the Peshito version.

B. *The Syriac version from the Hexaplar-Greek Text.*—The only Syriac version of the Old Testament up to the 6th century was apparently the Peshito. The first definite intimation of a portion of the Old Testament translated from the Greek is through Moses Aghelaeus. This Syriac writer lived in the middle of the 6th century. He made a translation of the *Glaphyra* of Cyril of Alexandria from Greek into Syriac; and, in the prefixed Epistle, he speaks of the versions of the New Testament, and the *Psalter*, “which Polycarp (rest his soul), the Chorepiscopus, made in Syriac for the faithful Xenaias, the teacher of Mabug, worthy of the memory of the good.” We thus see that a Syriac version of the *Psalms* had a similar origin to the Philoxenian Syriac New Testament. We know that the date of the latter was A.D. 508; the *Psalter* was probably a contemporaneous work. It is said that the Nestorian patriarch, Marabla, A.D. 552, made a version from the Greek; it does not appear to be in existence, so that, if ever it was completely executed, it was probably superseded by the Hexaplar version of Paul of Tella; indeed Paul may have used it as the basis of his work, adding marks of reference, &c.

This version by Paul of Tella, a Monophysite, was made in the beginning of the 7th century; for its basis he used the Hexaplar Greek text—that is, the LXX., with the corrections of Origen, the asterisks, obeli, &c., and with the references to the other Greek versions.

The Syro-Hexaplar version was made on the principle of following the Greek, word for word, as exactly as possible. It contains the marks introduced by Origen; and the references to the versions of Aquila, Symmachus, Theodotion, &c. In fact, it is from this Syriac version that we obtain our most accurate acquaintance with the results of the critical labours of Origen.

Andreas Masius, in his edition of the Book of Joshua,² first used the results of this Syro-Hexaplar text; for, on the authority of a MS. in his possession, he revised the Greek, introducing asterisks and obeli, thus showing what Origen had done, how much he had inserted in the text, and what he had marked as not found in the Hebrew. The Syriac MS. used by Masius has been long lost; though in this day, after the recovery of the Codex Bezae Cantabrigiae of the Apocalypse (from which Erasmus first edited that book) by Prof. Delitzsch, it could hardly be a cause for surprise if this Syriac Codex were again found.

It is from a MS. in the Ambrosian Library at Milan that we possess accurate means of knowing this Syriac version. The MS. in question contains

² Assenat, *Bibliotheca Orientalis*, ii. 83; where, however, the obscure Syriac is turned into still more obscure Latin.

³ Josuae Imperatoris historia illustrata etque explicata ab Andrea Masio. Aotwerp, 1574.

the Psalms, Job, Proverbs, Ecclesiastes, Canticles, Wisdom, Ecclesiasticus, minor prophets, Jeremiah, Baruch, Daniel, Ezekiel, and Isaiah. Norberg published, at Lund in 1787, the Books of Jeremiah and Ezekiel, from a transcript which he had made of the MS. at Milan. In 1788, Bugati published at Milan the Book of Daniel; he also edited the Psalms, the printing of which had been completed before his death in 1816; it was published in 1820. The rest of the contents of the Milan Codex (with the exception of the Apocryphal books) was published at Berlin in 1835, by Middeldorpf, from the transcript made by Norberg; Middeldorpf also added the 4th (2nd) Book of Kings from a MS. at Paris.

Besides these portions of this Syriac version, the MSS. from the Nitrian monasteries now in the British Museum would add a good deal more: amongst these there are six, from which much might be drawn, so that part of the Pentateuch and other books may be recovered.* These MSS. are like that at Milan, in having the marks of Origen in the text; the references to readings in the margin; and occasionally the Greek word itself is thus cited in Greek.

Dr. Antonio Ceriani, of the Ambrosian Library at Milan, after having for a considerable time proposed to edit the portions of the Syro-Hexaplar Codex of Milan which had hitherto remained in MS., commenced such a work in 1861 (*Monumenta Sacra et Profana, Opera Collegii Bibliothecae Ambrosianae*), the first part of the Syriac text being Baruch, Lamentations, and the Epistle of Jeremiah. To this work Ceriani subjoined a collection of some of the more important texts, and critical notes. A second part has since appeared. It is to be hoped that he may thus edit the whole MS., and that the other portions of this version known to be extant may soon appear in print.

The value of this version for the criticism of the LXX. is very great. It supplies, as far as a version can, the lost work of Origen.

The list of versions of the Old Test. into Syriac often appears to be very numerous; but on examination it is found that many translations, the names of which appear in a catalogue, are really either such as never had an actual existence, or else that they are either the version from the Hebrew, or else that from the Hexaplar text of the LXX., under different names, or with some slight revision. To enumerate the supposed versions is needless. It is only requisite to mention that Thomas of Harkel, whose work in the revision of a translation of the New Test. will have to be mentioned, seems also to have made a translation from the Greek into Syriac of some of the Apocryphal books—at least, the subscriptions in certain MSS. state this.

* The following is the notation of these MSS., and their contents and dates:—

12,133 (besides the Peshito Exodus); *Joshua* (defective), cent. vii. "Translated from a Greek MS. of the Hexapla, collated with one of the Tetrapla."

2,134, *Exodus*. A.D. 697.

14,434, *Psalms* formed from two MSS. cent. viii. (with the Song of the Three Children subjoined to the second). Both MSS. are defective. Subscription, "According to the LXX."

14,431, *Numbers* and 1 *Kings*, defective (cent. vii. or viii.). The subscription to 1 *Kings* says that it was translated into Syriac at Alexandria in the year 927 (A.D. 616).

II. THE SYRIAC NEW TESTAMENT VERSIONS

A. *The Peshito Syriac N. T.* (Text of Widmanstadt, and Cureton's Gospels.)

In whatever forms the Syriac New Test. may have existed prior to the time of Philoxenus (the beginning of the sixth century), who caused a new translation to be made, it will be more convenient to consider all such most ancient translations or revisions together; even though there may be reasons afterwards assigned for not regarding the version of the earlier ages of Christianity as absolutely acc.

It may stand as an admitted fact that a version of the New Test. in Syriac existed in the 2nd century; and to this we may refer the statement of Eusebius respecting Hegesippus, that he "made quotations from the Gospel according to the Hebrews and the Syriac," *ἐκ τοῦ καὶ Ἑβραίου εὐαγγελίου καὶ τοῦ Συριακοῦ* (*Hist. Eccl.* iv. 22). It seems equally certain that in the 4th century such a version was as well known of the New Test. as of the Old. It was the companion of the Old Test. translation made from the Hebrew, and as such was in habitual use in the Syriac Churches. To the translation in common use amongst the Syrians, orthodox, Monophysite, or Nestorian, from the 5th century and onward, the name of Peshito has been as commonly applied as the New Test. as the Old. In the 7th century at least the version so current acquired the name of *ܡܦܬܝܬܐ*, *old*, in contrast to that which was afterwards formed and revised by the Monophysites.

Though we have no certain data as to the origin of this version, it is probable on every ground that a Syriac translation of the New Test. was an accompaniment of that of the Old; whatever therefore bears on the one, bears on the other also.

There seem to be but few notices of the old Syriac Version in early writers. Cosmas Indicopleustes, in the former half of the 6th century, incidentally informs us that the Syriac translation does not contain the Second Epistle of Peter, 2 and 3 John, and Jude. This was found to be correct when a thousand years afterwards this ancient translation became again known to Western scholars. In 1552, Moses of Mardin came to Rome to Pope Julius III., commissioned by Ignatius the Patriarch (Monophysite, patriarch, to state his religious opinions, to effect (it is said) a union with the Roman Church, and to get the Syriac New Test. printed. In this last object Moses failed both at Rome and Venice. At Vienna he was, however, successful. Widmanstadt, the chancellor of the Emperor Ferdinand I., had himself learned Syriac from Thomas Ambrosius many years previously; and through his influence the emperor undertook the charge of an

14,442, *Genesis*, defective (with 1 Sam. Peshito). "According to the LXX." (cent. vi.).

17,103, *Judges* and *Ruth*, defective (cent. vii. or vii. 1). Subscription to *Judges*, "According to the LXX.; to *Ruth*, "From the Tetrapla of the LXX."

The notes on these MSS. made by the present writer in 1857 have been kindly compared and amplified by Mr. William Wright of the British Museum.

Rörödm issued at Copenhagen in 1859 the first portion of an edition of the MS. 17,103; another part has since been published. Some of these MSS. were written in the same century in which the version was made. They may probably be depended on as giving the text with general accuracy.

edition, which appeared in 1555, through the joint labours of Widmanstadt, Moses, and Postell. Some copies were afterwards issued with the date of 1562 on the back of the title.*

In having only *three* Catholic epistles, this Syriac New Test. agreed with the description of Cosmas; the Apocalypse was also wanting, as well as the section John viii. 1-11; this last omission, and some other points, were noticed in the list of errata. The editors appear to have followed their MSS. with great fidelity, so that the edition is justly valued. In subsequent editions endeavours were made conjecturally to amend the text by introducing 1 John v. 7 and other portions which do not belong to this translation. One of the principal editions is that of Leusden and Schaaf; in this the text is made as *full* as possible by supplying every lacuna from *any* source; in the punctuation there is a strange peculiarity, that in the former part Leusden chose to follow a sort of Chaldean analogy, while on his death Schaaf introduced a regular system of Syriac vocalization through all the rest of the volume. The Lexicon which accompanies this edition is of great value. This edition was first issued in 1708: more copies, however, have the date 1709; while some have the false and dishonest statement on the title page, "Secunda editio a mendis purgata," and the date 1717. The late Professor Lee published an edition in 1816, in which he corrected or altered the text on the authority of a few MSS. This is so far independent of that of Widmanstadt. It is, however, very far short of being really a critical edition. In 1828, the edition of Mr. William Greenfield (often reprinted from the stereotype plates), was published by Messrs. Bagster: in this the text of Widmanstadt was followed (with the vowels fully expressed), and with certain supplements within brackets from Lee's edition. For the collation with Lee's text Greenfield was not responsible. There are now in this country excellent materials for the formation of a critical edition of this version: it may, however, be said, that as in its first publication the MSS. employed were honestly used, it is in the text of Widmanstadt in a far better condition than is the Peshito Old Testament.

This Syriac Version has been variously estimated: some have thought that in it they had a genuine and unaltered monument of the second, or perhaps even of the *first* century. They thus naturally upheld it as almost co-ordinate in authority with the Greek text, and as being of a period anterior to any Greek copy extant. Others finding in it indubitable marks of a later age, were inclined to deny that it had any claim to a very remote antiquity; thus La Croze thought that the commonly printed Syriac New Test. is not the Peshito at all,

but the Philoxenian executed in the beginning of the 6th century. The fact is, that this version is transmitted to us containing marks of antiquity, and also traces of a later age. The two things are so blended, that if either class of phenomena alone were regarded, the most opposite opinions might be formed. The opinion of Wetstein was one of the most perverse that could be devised: he found in this version readings which accord with the Latin; and then, acting on the strange system of criticism which he adopted in his later years, he asserted that any such accordance with the Latin was a proof of corruption from that version: so that with him the proofs of antiquity became the tokens of later origin, and he thus assigned the translation to the *seventh* century. With him the real indication of later readings were only the marks of the very reverse. Michaelis took very opposite ground to that of Wetstein; he upheld its antiquity and authority very strenuously. The former point could be easily proved, if one class of readings alone were considered; and this is confirmed by the *contents* of the version itself. But on the other hand there are difficulties, for very often readings of a much more recent kind appear; it was thus thought that it might be compared with the Latin as found in the Codex Brixianus, in which there is an ancient groundwork, but also the work of a reviser is manifest. Thus the judgment formed by Griesbach seems to be certainly the correct one as to the peculiarity of the text of this version: he says (using the terms proper to his system of *recensions*); "Nulli harum recensionum Syriaca versio, prout quidem typis excusa est, similis, verum nec ulli prorsus dissimilis est. In multis coccinit cum Alexandria recensione, in pluribus cum Occidentali, in nonnullis etiam cum Constantinopolitana, ita tamen ut quae in hac posterioribus demum seculis inuenta sunt, pleraque repudiet. *Diversis ergo temporibus ad Graecos codices plures diversos iterum iterumque recognita esse videtur*" (*Nov. Test. Proleg. lxxv.*). In a note Griesbach introduced the comparison of the Codex Brixianus, "Illustrari hoc potest codicum nonnullorum Latinorum exemplo, qui priscam quidem versionem ad Occidentalem recensionem accommodatam representant, sed passim ad juniores libros Graecos refectam. *Ex hoc genere est Brixianus Codex Latinus, qui non raro a Graeco-Latinis et vetustioribus Latinis omnibus solus discedit, et in Graecorum partes transit.*" Some proof that the text of the common printed Peshito has been *re-wrought*, will appear when it is compared with the Curetonian Syriac Gospels.

Let it be distinctly remembered that this is no *new* opinion; that it is not the *peculiar* notion of Tregelles, or of any one individual; for as the

* The date of 1555 appears repeatedly in the body of the volume; at the end of the Gospels, May 18, 1555; St. Paul's Epp., July 18, 1555; Acts, Aug. 14, 1555; Cath. Epp. and the conclusion, Sep. 27, 1555. The volume is dedicated to the Emperor Ferdinand, and the *contents* mention *three* other dedications to other members of the imperial house. All of these three are often wanting, and two of them, addressed to the Archdukes Ferdinand and Charles, are not only generally wanting, but it is even said that no copy is known in which they are found.

* Griesbach's most matured judgment on this subject was thus given:—"Interpolationes autem a locis Evangeliorum parallelae, quales apud Syrum, Matt. xxviii. 18, Luc. ix. 39, item Matt. xxii. 22, 23, Mar. vi. 11, alii. 14, Jan. iv. 12, deprehenduntur, non magis quam addita-

menta e lectionis libris in sacrum contextum traducta velut Luc. xv. 11, aut liturgicum illud assumptum Matt. vi. 13, vitia sunt *non propria*. Quin pleraque interpolationes modo enumeratas, cum aliis ejusmodi generis multis, quae nunc in versione Syriaca extant, primitus ab ea abfuisse et aetiori demum tempore in eam irrepisse, plane mihi persuasum est. Verissime enim clat. Hugius (. . . coll. prolegomenis in majorem m-ram N. T. editionem, Hal. 1796, vol. i. p. lxxv.) animadvertit, versionem hanc a Diorthote quodam videri recognitam fuisse ac castigatam. Id quod quinto saeculo ineunte, antequam ecclesiae orientales Nestorianae et Monophysiticae rixae discernerentur, evenisse suspicor et in epistolis magis adhuc quam in Evangelii locis habuisse autumo." *Commentarius Criticus II. Melite 1811.*

question has been re-opened, it has been treated as if this were some theory newly invented to serve a purpose. The Rev. F. H. Scrivener, whose labours in the collation of Greek MSS., and whose care in editing Codex Augiensis of St. Paul's Epistles, deserve very high commendation, avowed himself many years ago an ardent admirer of the Peshito-Syriac. But even then he set aside its authority very often when it happened to adhere to the ancient Greek text, to the other ancient versions, and to the early Fathers, in opposition to the later copies. But when the judgment of Griesbach respecting the common printed Syriac had been repeated and enforced by Tregelles (*Horne's Introd.* vol. iv. 265), Scrivener came forward as its champion. In his Introduction to Codex Augiensis, Mr. Scrivener says, "How is this divergence of the Peshito version from the text of Codex B explained by Tregelles? He feels of course the pressure of the argument against him, and meets it, if not successfully, with even more than his wonted boldness. The translation degenerates in his hands into '*the version commonly printed as the Peshito*.' Now let us mark the precise nature of the demand here made on our faith by Dr. Tregelles. He would persuade us that the whole Eastern Church, distracted as it has been, and split into hostile sections for the space of 1400 years, orthodox and Jacobite, Nestorian and Maronite alike, those who could agree in nothing else, have laid aside their bitter jealousies in order to substitute in their monastic libraries and liturgical services, another and a spurious version in the room of the Peshito, that sole surviving monument of the first ages of the Gospel in Syriac. Nay, more, that this wretched forgery has deceived Orientalists profound as Michaelis* and Lowth, has passed without suspicion through the ordeal of searching criticism to which every branch of Sacred literature has been subjected during the last half century! We will require solid reasons, indeed, before we surrender ourselves to an hypothesis as novel as it appears violently improbable" (pp. xiv. xv.). Mr. Scrivener's warmth of declamation might have been spared: no one calls the Peshito "a spurious version," "wretched forgery," &c., it is not suggested that the Syrian Churches agreed in some strange substitution: all that is suggested is, that at the time of the transition Greek text, before the disruption of the Syrian Churches, the then existing Syriac version was revised and modernized in a way analogous to that in which the Latin was treated in Cod. Bezaianus. On part of Mr. Scrivener's statements the Rev. F. J. A. Hort has well remarked:—"The text may have been altered and corrupted between the first or second, and fifth centuries. This is all that Dr. Tregelles has supposed, though Mr. Scrivener assails him with unseemly violence, as if he had represented the vulgar text as 'a wretched forgery.' Mr. Scrivener's rashness is no less remarkable in calling this a '*novel hypothesis*,' when in fact it is at least as old as Griesbach. . . . There is neither evidence nor internal probability against the supposition that the Old Syriac version was revised into its present form . . . in the 4th or even 3rd century, to make it accord with Greek MSS. then current at Antioch,

Edessa, or Nisibis: and without some such supposition the Syriac text must remain an inexplicable phenomenon, unless we bring the Greek and Latin texts into conformity with it by contradicting the full and clear evidence which we do possess respecting them. All that we have now said might have been alleged before the Curetonian Syriac was discovered: the case is surely strengthened in a high degree by the appearance (in a MS. assigned to the 5th century) of a Syriac version of the Gospels, bearing clear marks of the highest antiquity in its manifest errors as well as in its choicest readings. The appropriation of the name 'Peshito,' appears to be wholly unimportant, except for rhetorical purposes."

These remarks of Mr. Hort will suffice to recall the opinion stated by Tregelles from the charge of novelty or rashness: indeed, the supposition as stated by Griesbach, is a simple solution of various difficulties; for if this be not the fact, then every other most ancient document or monument of the New Test. must have been strangely altered in its text. The number of difficulties (otherwise inexplicable) thus solved, is about a demonstration of its truth. Mr. Scrivener, however, seems incapable of apprehending that the revision of the Peshito is an opinion long ago held: he says since, "I know no other cause for suspecting the Peshito, than that its readings do not suit Dr. Tregelles, and if this fact be enough to convict it of corruption, I am quite unable to vindicate it." Why, then, do not the readings "suit" Dr. Tregelles? Because, if they were considered genuine, we should have to me Mr. Hort's words to "bring the Greek and Latin texts into conformity with it, by contradicting the full and clear evidence which we do possess respecting them."

Whether the whole of this version proceeded from the same translator has been questioned. It appears to the present writer probable that the New Test. of the Peshito is not from the same hand as the Old. Not only may Michaelis be right in supposing a peculiar translator of the Epistle to the Hebrews, but also other parts may be from different hands; this opinion will become more general the more the version is studied. The revisions to which the version was subjected may have succeeded in part, but not wholly, in effacing the indications of a plurality of translators. The Acts and Epistles seem to be either more recent than the Gospels, though far less revised; or else, if coeval, far more corrected by later Greek MSS.

There is no sufficient reason for supposing that this version ever contained the four Catholic Epistles and the Apocalypse, now absent from it, not only in the printed editions but also in the MSS.

Some variations in copies of the Peshito have been regarded as if they might be styled Monophysite and Nestorian recensions: but the designation would be far too definite; for the differences are not sufficient to warrant the classification.

The MSS. of the *Karkaphensian* recension (as it has been termed) of the Peshito Old Test. contain also the New with a similar character of text.

The Curetonian Syriac Gospels.—"Comparative

* Even Michaelis did not think it needful to assume that the Peshito had been transmitted without any change. "In using the Syriac version, we must never forget that our present editions are very imperfect, and not coincide that every reading of the Syriac printed

text was the reading of the Greek MS. of the first century." Marsh's *Michaelis*, ii. 46

† *Journal of Classical and Sacred Philology* (Dunbridge), Feb. 1860. 378-9.

"—Plain Introduction, p. 424, *foot-note*.

criticism" shows the true character of every document, whether previously known or newly brought to light, which professes to contain the early text of the New Test. By comparative criticism is not meant such a mode of examining authorities as that to which Mr. Scrivener has applied this term, but such a use of combined evidence as was intended and defined by the critic by whom the expression was (for convenience sake) introduced: that is, the ascertainment that readings are in ancient documents, or rest on ancient evidence (whether early citations, versions, or MSS.), and then the examination of what documents contain such readings, and thus within what limits the inquiry for the ancient text may be bounded. Thus a document, in itself modern, may be proved to be ancient in testimony: a version, previously unknown, may be shown to uphold a very early text. For purposes of comparative criticism early readings, known to be false, have often as definite a value in the chain of proof as those which are true. In the process of comparative criticism nothing is assumed, but point after point is established by independent testimony; and thus the character of the text of MSS., of ancient versions, and of patristic citations, is upheld by their accordance with facts attested by other witnesses, of known age and certain transmission.

It was reasonable to suppose with Griesbach that the Syriac version must at one time have existed in a form different from that in the common printed text: it was felt by Biblical scholars to be a mere assumption that the name *Peshito* carried with it some hallowed prestige; it was established that it was a groundless imagination that this version, as edited, had been known from the earliest ages as the original monument of Syrian Christianity. Hence if it could be shown that an earlier version (or earlier basis of the same version) had existed, there was not only no *a priori* objection, but even a demonstrated probability (almost certainty) that this had been the case. When it is remembered how little we know historically of the Syriac versions, it must be felt as an assumption that the form of text common from the fifth century and onward was the original version. In 1848 Tregelles (see Davidson's *Introduction to the New Test.* vol. i. p. 429) suggested that "the Nitrian MSS. when collated may exhibit perhaps an earlier text." This was written without any notion that it was an ascertained fact that such a MS. of the Gospels existed, and that the full attention of a thorough Syriac scholar had been devoted to its illustration and publication.

Among the MSS. brought from the Nitrian monasteries in 1842, Dr. Cureton noticed a copy of the Gospels, differing greatly from the common text: and this is the form of text to which the name of

Curetonian Syriac has been rightly applied. Every criterion which proves the common *Peshito* not to exhibit a text of extreme antiquity, equally proves the early origin of this. The discovery is in fact that of the object which was wanted, the want of which had been previously ascertained. Dr. Cureton considers that the MS. of the Gospels is of the fifth century, a point in which all competent judges are probably agreed. Some persons indeed have sought to depreciate the text, to point out its differences from the *Peshito*, to regard all such variations as corruptions, and thus to stigmatise the Curetonian Syriac as a corrupt revision of the *Peshito*, barbarous in language and false in readings.^a This peremptory judgment is as reasonable as if the old Latin in the Codex Vercellensis were called an ignorant revision of the version of Jerome. The judgment that the Curetonian Syriac is older than the *Peshito* is not the peculiar opinion of Cureton, Alford, Tregelles, or Biblical scholars of the school of ancient evidence in this country, but it is also that of continental scholars, such as Ewald, and apparently of the late Prof. Bleek.^b

The MS. contains Matt. i.-viii. 22, x. 31-xxiii. 25. Mark, the four last verses only. John i. 1-42, iii. 6-vii. 37, xiv. 11-29; Luke ii. 48-iii. 18, vii. 33-xv. 21, xvii. 24-xxiv. 41. It would have been a thing of much value if a perfect copy of this version had come down to us; but as it is, we have reason greatly to value the discovery of Dr. Cureton, which shows how truly those critics have argued who concluded that such a version must have existed; and who regarded this as a *proved fact*, even when not only no portion of the version was known to be extant, but also when even the record of its existence was unnoticed. For there is a record showing an acquaintance with this version, to which, as well as to the version itself, attention has been directed by Dr. Cureton. Bar Salibi, bishop of Amida in the 12th century, in a passage translated by Dr. C. (in discussing the omission of three kings in the genealogy in St. Matthew) says:—"There is found occasionally a Syriac copy, made out of the Hebrew, which inserts these three kings in the genealogy; but that afterwards it speaks of *fourteen* and not of *seventeen* generations, because fourteen generations has been substituted for seventeen by the Hebrews on account of their holding to the septenary number," &c.^c

It shows then that Bar Salibi knew of a Syriac text of the Gospels in which Ahaziah, Josiah, and Amaziah were inserted in Matt. i. 8; there is the same reading in the Curetonian Syriac; but this might have been a coincidence. But in ver. 17 the Curetonian text has, in contradiction to ver. 8, *fourteen* generations and not *seventeen*: and so had the copy mentioned by Bar Salibi: the former point might be a mere coincidence; the

^a It is very certain that many who profess a peculiar admiration for the *Peshito* do this rather from some traditional notion than from minute personal acquaintance. They suppose that it has some prescriptive right to the first rank amongst versions, they praise its excellencies, which they have not personally investigated, and they do not care to know wherein it is defective. Every error in translation, every doubtful reading, every supposed defect in the one known MS. of the Curetonian Gospels, has been enumerated by those who wish to depreciate that version, and to detract from the critical merits of its discoverer and editor. But many of the supposed defects are really the very opposite; and if they similarly examined the *Peshito*, they might find

more fault with it and with its translator. The last fourteen chapters of the Book of Acts, as they have come down to us in the *Peshito*, present far more grounds for comment than an equal portion of the Curetonian. The *Peshito* is a very valuable version, although overpraised by some injudicious admirers, who (even if they have read it) have never closely and verbally examined it. Many have evidently never looked farther than the Gospels, even though aided by Schaff's Latin interpretation.

^b "Perhaps the earliest and most important of all the versions." Alford's *Gr. Test. Proleg.* vol. I. 114, ed. 4.

^c See Bleek's *Einführung in das N. Test.* p. 723, *facta nota*.

^d For the Syriac of this part of the passage from Bar Salibi, see Assemani, *Bibliotheca Orientalis*, II. 186.

latter, however, shows such a kind of union in contradiction as proves the identity very convincingly. Thus, though this version was unknown in Europe prior to its discovery by Dr. Cureton, it must in the 12th century have been known as a text sometimes found, and as mentioned by the Monophysite Bishop, it might be more in use amongst his co-religionists than amongst others. Perhaps, as its existence and use is thus recorded in the 12th century, some further discovery of Syriac MSS. may furnish us with another copy so as to supply the defects of the one happily recovered.

In examining the Curetonian text with the common printed Peshito, we often find such identity of phrase and rendering as to show that they are not wholly independent translations: then, again, we meet with such variety in the forms of words, &c. as seems to indicate that in the Peshito the phraseology had been revised and refined.^b But the great (it might be said characteristic) difference between the Curetonian and the Peshito Gospels is in their readings; for while the latter cannot in its present state be deemed an unchanged production of the second century, the former bears all the marks of extreme antiquity, even though in places it may have suffered from the introduction of readings current in very early times.

The following are a few of the very many cases in which the ancient reading is found in the Curetonian, and the later or translation reading in the Peshito. For the general authorities on the subject of each passage, reference must be made to the notes in critical editions of the Greek New Test.

Matt. xix. 17, *τί με ἐρωτᾷς καὶ τοῦ ἀγαθοῦ*; the ancient reading, as we find in the best authorities, and as we know from Origen; in the Curetonian: *τί με λέγεις ἀγαθόν*; the common text with the Peshito. Matt. xx. 22, the clause of the common text, *καὶ τὸ βαπτισμα ὃ ἐν ὕδατι βαπτίζομαι* (and the corresponding part of the following verse) are in the Peshito; while we know from Origen that they were in his day a peculiarity of St. Mark: omitted in the Curetonian with the other best authorities. In fact, except the Peshito and some revised Latin copies, there is no evidence at all extant for these words prior to the fifth century. Matt. v. 4, 5: here the ancient order of the beatitudes, as supported by Origen, Tertullian, the canons of Eusebius, and Hilary, is that of placing *μακάριοι οἱ πτωχοί*, κ. τ. λ. before *μακάριοι οἱ πενθοῦντες*, κ. τ. λ.; here the Curetonian agrees with the distinct testimonies for this order against the Peshito. In Matt. i. 18, we know from Irenaeus that the name "Jesus" was not read; and this is confirmed by the Curetonian: in fact, the common reading, however widely supported, could not have originated until *Ἰησοῦς χριστός* was treated as a combined proper name, otherwise the meaning of *τεῦ δὲ Ἰησοῦ χριστοῦ ἡ γένεσις* would not be "the birth of Jesus Christ," but "the birth of Jesus as the Christ." Here the Curetonian reading is in full accordance with what we know of the second century in opposition to the Peshito. In Matt. vi. 4 the Curetonian omits *αὐτός*; in the same ver. and in ver. 6 it omits *ἐν τῷ φανερό*; in each case with the best authorities, but against the Peshito. Matt. v. 44, has been amplified by copyists in an extraordinary manner: the words in

brackets show the amplifications, and the place from which each was taken: *ἐν ὃ δὲ λέγει ὁ κύριος*. 'Αγαπήτε τοὺς ἐχθροὺς ὑμῶν [*ἐδόξατε τοὺς καταραμένους ὑμᾶς*, Luke vi. 28, *καλῶς ποιῶν τοὺς μισούντας ὑμᾶς*, *Ibid.* 27]. *καὶ προσεύχεσθ' ὑπὲρ τῶν [ἐπηρεαζόντων ὑμᾶς καὶ, Ibid. 35] διωκόντων ὑμᾶς*. The briefer form is attested by Irenaeus, Clement, Origen, Cyprian, Eusebius, etc.; and though the inserted words and clauses are found in almost all Greek MSS. (except Codices Vaticanus and Sinaiticus), and in many versions including the Peshito, they are not in the Curetonian Syriac. Of a similar kind are Matt. xviii. 35, *τὰ πνεύματα αὐτῶν*; Luke viii. 54, *ἐκβαλὼν ἐκ πάντας καὶ*; Luke ix. 7, *ὅτι αὐτοῦ*; ix. 54, *ὅτι καὶ ἡλίας ἐποίησεν*; xi. 2, *γενεθήτω τὸ θέλημα σου ὡς ἐν οὐρανῷ καὶ ἐπὶ τῆς γῆς*; xi. 29, *τοῦ προφήτου*; xi. 44, *γραμματεῖς καὶ φαρισαῖοι ὑποκριταί*; John iv. 43, *καὶ ἀπῆλθεν*; v. 16, *καὶ ἐξήγγειλεν αὐτὸν ἀποκριναι*; vi. 51, *ὅτι ἐν ὃ δόσω*; vi. 69, *τοῦ ζῶτος*.

These are but a few samples of the variations which exist between the Curetonian Syriac and the Peshito as to the kind of text: the instances of this might be increased almost indefinitely. Those acquainted with critical results will know that some of those here specified are crucial tests in points of Comparative Criticism. Such a comparison not only shows the antiquity of the text of the Curetonian Syriac, but it also affords abundant proof that the Peshito must have been modernised and revised.

The antiquity of the Curetonian text is also shown by the occurrence of readings which were, as we know, early current, even though rightly adjudicated as erroneous: several of these are in the Curetonian Syriac; it may suffice to refer to the long addition after Matt. xx. 28.

The Curetonian Syriac presents such a text as we might have concluded would be current in the second century: the Peshito has many features which could not belong to that age; unless, indeed, we are ready to reject established facts, and those of a very numerous kind: probably, at least, two thousand.

It is not needful for very great attention to be paid to the phraseology of the Curetonian Syriac in order to see that the Gospel of St. Matthew differs in mode of expression and various other particulars from what we find in the rest. This may lead us again to look at the testimony of Bar Sabba; he tells us, when speaking of this version of St. Matthew, "there is found occasionally a Syriac copy made out of the Hebrew:" we thus know that the opinion of the Syrians themselves in the 12th century was that this translation of St. Matthew was not made from the Greek, but from the Hebrew original of the Evangelist: such, too, is the judgment of Dr. Cureton: "this Gospel of St. Matthew appears at least to be built upon the original Aramaic text, which was the work of the Apostle himself." (*Preface to Syriac Gospels*, p. vi.)

Dr. Cureton rightly draws attention to the peculiar title prefixed to the Gospel by St. Matthew. *ܡܬܬܝܬܝܐ ܕܥܝܝܬܐ ܕܡܬܬܝܐ*. Now whatever be the meaning of the word *ܡܬܬܝܐ* in

^b A collation of an ancient Syriac MS. of the Gospels (Rich. 4,167 in the British Museum) showed that the Syrians were in the habit of reforming their copies in

some respects. The grammatical forms, &c., of this MS. are much more ancient than those of the text of W. E. M. L. who has been followed by successive editors.

here brought in—whether it signifies “the distinct Gospel of Matthew,” as rendered by Cureton, or “the Gospel of Matthew set forth” [i. e. for lessons throughout the ecclesiastical year], as Bernstein advances, supporting his opinion by a passage in Assemani (which can hardly here apply, as this copy is not so “set forth”), or if it means (as some have objected), “the Gospel of Matthew explained”—still there must be some reason why the first Gospel should be thus designated, and not the others. But the use of the cognate Hebrew verb in the Old Test. may afford us some aid as to what kind of *explanation* is meant, if indeed that is the meaning of the term here used. In the description of the reading of the law in Neh. viii. 8, we are told, “So they read in the book of the law distinctly (*בְּקוֹל יָחִיד*), and gave the sense, and caused the people to understand the reading.” The word here used has been regarded by able scholars as implying an interpretation from the ancient Hebrew into the form of Aramaean then current. Such a *Mephorash*, when written, would be the germ of the Targum of after ages. (See below, p. 1638a.) The same word may be used in the heading of St. Matthew’s Gospel in the same sense—as being an explanation from one Shemitic tongue or dialect into another, just as St. Matthew’s Gospel turned from one form of Hebrew into pure Syriac would be.

But it may be asked, if St. Matthew’s Hebrew (or Chaldaic) Gospel was before the translator, why should he have done more than copy into Syriac letters? Why *translate* at all? It is sufficient, in reply, to refer to the Chaldaic portions of Daniel and Ezra, and to the Syriac version made from them. In varying dialects it sometimes happens that the vocabulary in use differs more than the grammatical forms. The verbal identity may often be striking, even though accompanied with frequent variation of terms.

We know from Jerome that the Hebrew St. Matthew had *מָחֵד* where the Greek has *ἐκτίθεσθαι*. We do not find that word here, but we read for both *ἐκτίθεσθαι* and *συνεπερ* at the end of the verse, *ܡܥܬܐ ܕܝܡܝܢܐ*, “constant of the day.”

This might have sprung from the interpretation, “morrow by morrow,” given to *מָחֵד*; and it may be illustrated by Old Test. passages, e. g. Num. iv.

7. where *וְהָיָה חֵדְוֹ* is rendered by *ܡܥܬܐ*

ܡܥܬܐ. Those who think that if this Syriac version had been made from St. Matthew’s Hebrew, we ought to find *מָחֵד* here, forget that a translation is not a verbal transference.

We know from Eusebius that Hegesippus cited from the Gospel according to the Hebrews, and from the Syriac. Now in a fragment of Hegesippus (Routh, i. 219), there is the quotation, *μακάριοι οἱ ὁφθαλμοὶ ὑμῶν ὅτι βλέπετε καὶ τὰ ἄρα ὑμῶν τὰ ἀκούοντα*, words which might be a Greek rendering from Matt. xiii. 16, as it stands in this Syriac Gospel as we have it, or probably also in the Hebrew work of the Apostle himself. Every notice of the *cinel* is important; and Dr. Cureton, in pointing it out, has furnished students with one of the varied data through which a right conclusion may be reached.

Every successive investigation, on the part of competent scholars, aids in the proof that the Curetonian Gospels are an older form than those in

the Peshito; that the Peshito is a revision replete with readings unknown in the 2nd century (and often long after); and that the Curetonian text possesses the highest critical as well as historical value.

The more the evidence, direct and indirect, is weighed, the more established it appears will be the judgment that the Curetonian Syriac of St. Matthew’s Gospel was translated from the Apostle’s Hebrew (Syro-Chaldaic) original, although injured since by copyists or revisers.

B. *The Philoxenian Syriac Version, and its revision by Thomas of Harkel*.—Philoxenus, or Xenaias, Bp. of Hierapolis or Mabug at the beginning of the 6th century (who was one of those Monophysites who subscribed the *Henoticon* of the Emperor Zeno), caused Polycarp, his *Chorepiscopus*, to make a new translation of the New Test. into Syriac. This was executed in A.D. 508, and it is generally termed *Philoxenian* from its promoter.*

This version has not been transmitted to us in the form in which it was first made; we only possess a revision of it, executed by Thomas of Harkel in the following century (The Gospels, A.D. 616). Pococke, in 1630,⁴ gives an extract from Bar Salibi, in which the version of Thomas of Harkel is mentioned; and though Pococke did not know *what* version Thomas had made, he speaks of a Syriac translation of the Gospels communicated to him by some learned man whom he does not name, which from its servile adherence to the Greek was no doubt the Harklean text. In the *Bibliotheca Orientalis* of Assemani there were further notices of the work of Thomas; and in 1730 Samuel Palmer sent from the ancient Amida (now Diarbekr) Syriac MSS. to Dr. Gloucester Ridley, in which the version is contained. Thus he had two copies of the Gospels, and one of all the rest of the New Test., except the end of the Epistle to the Hebrews, and the Apocalypse. No other MSS. appear to have yet come to light which contain any of this version beyond the Gospels. From the subscriptions we learn that the text was revised by Thomas with *three* (some copies say *two*) Greek MSS. One Greek copy is similarly mentioned at the close of the Catholic Epistles.

Ridley published, in 1761, an account of the MSS. in his possession, and a notice of this version. He had intended to have edited the text: this was however done by White, at different times from 1778 to 1803. After the publication of the Gospels, the researches of Adler brought more copies into notice of that part of the Harklean text. From one of the MSS. in the Vatican, St. John’s Gospel was edited by Bernstein in 1851. It will be noticed that this version differs from the Peshito, in containing all the seven Catholic Epistles.

In describing this version as it has come down to us, the text is the first thing to be considered. This is characterized by extreme literality: the Syriac idiom is constantly bent to suit the Greek, and everything is in some manner expressed in the Greek phrase and order. It is difficult to imagine that it could have been intended for ecclesiastical reading. It is not independent of the Peshito, the words, &c., of which are often employed. As to the kind of Greek text that it represents it is just what might have been expected in the 6th century. The work of Thomas in the text itself is

* See Moses Aghaieus in Assemani, *Biblioth. Orient.* ii. 23.

⁴ Preface to the Syriac edition of 3 Pet. 2n.

seen in the introduction of *obeloi*, by which passages which he rejected were condemned; and of *asterisks*, with which his insertions were distinguished. His model in all this was the Hexaplar Greek text. The MSS. which were used by Thomas were of a different kind from those employed in making the version; they represented in general a much older and purer text. The margin of the Harklean recension contains (like the Hexaplar text of the LXX.) readings, mostly apparently from the Greek MSS. used. It has been questioned whether these readings are not a comparison with the Peshito; if any of them are so, they have probably been introduced since the time of Thomas. It is probable that the Philoxenian version was very literal, but that the slavish adaptation to the Greek is the work of Thomas; and that his text thus bore about the same relation to that of Philoxenus as the Latin Bible of Arias Montanus does to that of his predecessor Pagninus. For textual criticism this version is a good authority as to the text of its own time, at least where it does not merely follow the Peshito. The amplifications in the margin of the Book of Acts bring a MS. used by Thomas into close comparison with the Codex Bezae. One of the MSS. of the Gospels sent to Ridley contains the Harklean text, with some revision by Bar Salibi.

C. *Syriac Versions of portions wanting in the Peshito*.—I. The second Epistle of Peter, the second and third of John, and that of Jude. The fact has been already noticed, that the Old Syriac Version did not contain these Epistles. They were published by Pococke in 1630, from a MS. in the Bodleian. The version of these Epistles so often agrees with what we have in the Harklean recension, that the one is at least dependent on the other. The suggestion of Dr. Davidson (*Biblical Criticism*, ii. 196), that the text of Pococke is that of Philoxenus before it was revised by Thomas, seems most probable. But if it is objected, that the translation does not show as great a knowledge of Greek as might have been expected in the translation of the rest of the Philoxenian, it must be remembered that here he had not the Peshito to aid him. In the Paris Polyglott these Epistles were added to the Peshito, with which they have since been commonly printed, although they have not the slightest relation to that version.

II. *The Apocalypse*.—In 1627 De Dieu edited a Syriac version of the Apocalypse, from a MS. in the Leyden Library, written by one "Caspar from the land of the Indians," who lived in the latter part of the 16th century. A MS. at Florence, also written by this Caspar, has a subscription stating that it was copied in 1562 from a MS. in the writing of Thomas of Harkel, in A.D. 622. If this is correct it shows that Thomas by himself would have been but a poor translator of the N.T. But the subscription seems to be of doubtful authority; and until the Rev. B. Harris Cowper drew attention

to a more ancient copy of the version, we must well be somewhat uncertain if this were really an ancient work.* It is of small critical value, as the MS. from which it was edited is incorrectly written. It was in the MS. which Abp. Usher sent as a present to De Dieu in 1631, in which the whole of the Syriac N. T. is said to have been contained (of what version is unknown), that having been the only complete MS. of the kind described: and of this MS., in comparison with the text of the Apocalypse printed by De Dieu, Usher says, "the Syriac lately set out at Leyden may be amended by my MS. copy" (Todd's Walton, i. 196, note). This book, from the Paris Polyglott and onward, has been added to the Peshito in this translation. Some have erroneously called this Syriac Apocalypse the *Philoxenian*, a name to which it has no title: the error seems to have originated from a verbal mistake in an old advertisement of Greenfield's edition (for which he was not responsible), which said "the Apocalypse and the Epistles not found in the Peshito, are given from the Philoxenian version."

III. *The Syriac Version of John viii. 1-11*.—From the MS. sent by Abp. Usher to De Dieu, the latter published this section in 1631. From De Dieu it was inserted in the London Polyglott, with a reference to Usher's MS., and hence it has passed with the other editions of the Peshito, where it is a mere interpolation.

A copy of the same version (essentially) is found in Ridley's *Codex Bezae Cantabrigiae*, where it is attributed to Maras, A.D. 622: Adler found it also in a Paris MS. ascribed to Abbas Mar Paul.

Bar Salibi cites a different version, out of Maras, Bp. of Amida, through the chronicle of Zacharias of Melitina. See Assemani (*Biblioth. Orient.* ii. 3: and 170), who gives the introductory words. Probably the version edited is that of Paul (as stated in the Paris MS.), and that of Maras the one cited by Bar Salibi; while in Ridley's MS. the two are confounded. The Paul mentioned is apparently Paul of Tarsus, the translator of the Hexaplar Greek text into Syriac.

D. *THE JERUSALEM SYRIAC LECTONARY*.—The MS. in the Vatican containing this version was pretty fully described by S. E. Assemani in 1754 in the Catalogue of the MSS. belonging to that Library; but so few copies of that work escaped destruction by fire, that it was virtually unpublished, and its contents almost unknown. Adler, who at Copenhagen had the advantage of studying one of the few copies of this Catalogue, drew public attention to this peculiar document in his *Ausweis seiner bibelkritischen Reise nach Rom*, pp. 118-127 (Altona, 1783), and still further, in 1789, in his valuable examination of the Syriac versions. The MS. was written in A.D. 1037, in peculiar Syriac writing; the portions are of course those for the different festivals, some par-

The Rev. B. Harris Cowper has courteously communicated the following notice relative to the Syriac Apocalypse in MSS. in the British Museum: "The MS. No. 7186 of the 14th century does not contain the actual text of the Apocalypse, but a brief commentary upon it—upon paper, and not quite perfect; the text seeming to be that of our printed books. The text of the Apocalypse is apparently all found in No. 17,127, a commentary upon the book of the 11th century. This also seems to be of the same text as the printed edition."

* De Dieu says that this Syriac MS. contained "omnia T. Syriac. quae in prioribus decant editionibus."

Does this mean that it merely contained what was previously wanting, or the whole, including such parts? It seems strange if this section of St. John stood in it alone. This makes it seem as if the transcription given above were the true one. Usher's own description is this:—"I have received the portions of the N. Test. [in Syriac] which hitherto we have wanted in that language, viz., the history of the adulterous woman, the 2d Epistle of Peter, the 2nd and 3rd Epistles of St. John, the Epistle of Jude, and the Revelation; as also a small tractate of Ephrem Syrus in his own language." Abp. Usher to Dr. Samuel Ward June 23, 1636 (Todd's Walton, i. 194).

of the Gospel not being there at all. The dialect is not common Syriac; it was termed the *Jerusalem Syriac*, from its being supposed to resemble the Jerusalem Talmud in language and other points. The grammar is peculiar; the forms almost Chaldean rather than Syriac; two characters are used for expressing F and P.

For critical purposes this Lectionary has a far higher value than it has for any other: its readings often coincide with the oldest and best authorities. It is not yet known as to its entire text; for except a small specimen, no part has been printed; Adler, however, selected large numbers of readings, which have been commonly used by critics from that time and onward. In Adler's opinion its date as a version would be from the 4th to the 8th century; but it can hardly be supposed that it is of so early an age, or that any Syrians then could have used so corrupt a dialect. It may rather be supposed to be a translation made from a Greek Lectionary, never having existed as a substantive translation: to what age its execution should be assigned seems wholly uncertain. (A further account of the MS. of this version, drawn up from a comparison of Assemani's description in the Vatican Catalogue, and that of Adler, with the MS. itself in the Vatican Library, made by the present writer, is given in Horne's *Introd.* iv. 284-287, where, however, "*Jerusalem Targum*" twice stands for *Talmud*.)

It appears, from the statement of Dr. Ceriani of Milan, that Count Marescalchi has met with a MS. of this Lectionary, and that he has long had the intention of publishing it.

On the *Syriac Versions*.—Adler, *N. T. Versiones Syriacae, Simples, Philoxeniana et Hierosolymitana demum examinatae*, 1789; Wiseman, *Horae Syriacae*, 1827; Ridley, *De Syriacarum N. Testamenti versionum indole atque usu*, &c., 1761; Winer, *Commentatio de versionis N. T. Syriacae usu critico acute instituendo*, 1823; Wichelhaus, *De Novi Test. versionis Syriacae antiqua quam Peschito vocant*, 1850; Bernstein, *De Charklensi N. T. translatione Syriaca commentatio*, 1857; Cureton, *Antient Recension of the Syriac Gospels* (Preface, &c.), 1858. [S. P. T.]

TARGUM (תרגום, from תרגם; Arab. ترجم, to translate, explain); a Chaldean word of uncertain origin, variously derived from the roots תרג, דק (comp. Arab. رقى, &c.), and even identified with the Greek τράγημα, desert (Fr. *dragées*), (trop. *τραγῆματα τῶν λόγων*, Dion. Hal. *Rhet.* 10, 18), which occurs often in the Talmud as תרגימא, or תרגימא ("such as dates, almonds, nuts," &c. Pes. 119b):—the general term for the CHALDEE, or, more accurately ARAMAIC VERSIONS of the Old Testament.

The injunction to "read the Book of the Law before all Israel . . . the men, and women, and children, and the strangers," on the Feast of Tabernacles of every Sabbatical year, as a means of solemn instruction and edification, is first found in Deut. xxxi. 10-13. How far the ordinance was observed in early times we have no means of judging. It would appear, however, that such readings did

take place in the days of Jeremiah. Certain it is that among the first acts undertaken by Ezra towards the restoration of the primitive religion and public worship is reported his reading "before the congregation, both of men and women" of the returned exiles, "in the Book in the Law of God" (Neh. viii. 2, 8). Aided by those men of learning and eminence with whom, according to tradition, he founded that most important religious and political body called the Great Synagogue, or Men of the Great Assembly (אנשי כנסת הגדולה), 536-167), he appears to have succeeded in so firmly establishing regular and frequent public readings in the Sacred Records, that later authorities almost unanimously trace this hallowed custom to times immemorial—nay to the time of Moses himself. Such is the statement of Josephus (c. Ap. ii. 17); and we read in the Acts, xv. 21, "For Moses of old time hath in every city them that preach him, being read in the synagogue every sabbath-day." So also Jer. Meg. i. 1: "Ezra has instituted for Israel that the maledictions in the Pentateuch should also be read in public," &c. Further, Meg. 31 b, "Ezra instituted ten things, viz., that there should be readings in the Law also in the afternoon service of Sabbath, on the Monday, and on the Thursday, &c. . . . But was not this instituted before in the desert, as we find 'they went for three days and found no water' (water meaning the Law, as Is. lv. 1 is fancifully explained by the Haggada), until the 'prophets among them' arranged the three weekly readings? But Ezra only reinstituted them," comp. also B. Kama, 82 a, &c. To these ancient readings in the Pentateuch were added, in the course of time, readings in the Prophets (in some Babylonian cities even in the Hagiographa), which were called חזקוני, Haftarah; but when and how these were introduced is still matter of speculation. Former investigators (Abudraham, Elias Levita, Vitringa, &c.) almost unanimously trace their origin to the Syrian persecutions, during which all attention to the Law was strictly prohibited, and even all the copies of it that were found were ruthlessly destroyed; so that, as a substitute for the Pentateuchical Paraphrase, a somewhat corresponding portion of the Prophets was read in the synagogue, and the custom, once introduced, remained fixed. Recent scholars, on the other hand, without much show of reason, as it would appear, variously hold the Haftarah to have sprung from the sermon or homiletic exercise which accompanied the reading in the Pentateuch, and took its exordium (as Haftarah, by an extraordinary linguistic stretch, is explained by Frankel) from a prophetic passage, adapted in a manner to the Mosaic text under consideration; or, again, they imagine the Haftarah to have taken its rise spontaneously during the exile itself, and that Ezra retained and enforced it in Palestine.

If, however, the primitive religion was re-established, together with the second Temple, in more than its former vigour, thus enabling the small number of the returned exiles—and these, according to tradition, the lowest of the low, the poor in wealth, in knowledge, and in ancestry,* the very outcasts and refuse of the nation as it were—to found

* "Ten kinds of families went up from Babylon: Priests, Levites, Israelites, profaned (חללים), those whose fathers are priests, but whose mothers are not fit for priestly marriage; proselytes, freedmen, bastards (or rather those born in illegal wedlock); Nethinims (Nethinim

menials of the Temple); שְׁתוּקִי ('about whose lineage there is silence,—of unknown fathers); and חֲסִידֵי דִּבְרֵי 'foundlings of unknown father and mother'" (Kidd. 4, 1).

† "Ezra, on leaving Babylon, made it like unto purg flour בְּסוּלִית נְקִייה" (ib.).

upon the ruins of Zion one of the most important and lasting spiritual commonwealths that has ever been known, there was yet one thing which neither authority nor piety, neither academy nor synagogue, could restore to its original power and glory—the Hebrew language. Ere long it was found necessary to translate the national books, in order that the nation from whose midst they had sprung might be able to understand them. And if for the Alexandrine, or rather the whole body of Hellenistic Jews, Greek translations had to be composed, those who dwelt on the hallowed soil of their forefathers had to receive the sacred word through an Aramaic medium. The word מֵפָרָשׁ, *Mephorash*, “explanatory,” “clearly,” or, as the A. V. has it, “distinctly,” used in the above-quoted passage of Neh. viii. 8, is in the Talmud explained by “Targum.”* Thus to Ezra himself is traced the custom of adding translations in the then popular idiom—the Aramaic—to the periodical readings (Jer. Meg. 28 b; J. Ned. iv., Bab. Ned. i.; Maim. Hilch. Teph. xii. §10, &c.), for which he is also reported to have fixed the Sabbaths, the Mondays and Thursdays—the two latter the market and law-days, when the villagers came to town—of every week (Jer. Meg. i. 1; Baba Kama, 82 a). The gradual decay of the pure Hebrew vernacular, among the multitude at least, may be accounted for in many ways. The Midrash very strikingly points out, among the characteristics of the long sojourn of Israel in Egypt, that they neither changed their language, nor their names, nor the shape of their garments, during all that time. The bulk of their community—shut up, as it were, in the small province of Goshen, almost exclusively reduced to intercourse with their own race and tribes, devoted only to the pasture of their flocks, and perhaps to the tilling of their soil—were in a condition infinitely more favourable for the retention of all the signs and tokens of their nationality than were the Babylonian captives. The latter scattered up and down the vast empire, seem to have enjoyed everywhere full liberty of intercommunication with the natives—very similar in many respects to themselves—to have been utterly unrestrained in the exercise of every profession and trade, and even to have risen to the highest offices of state; and thus, during the comparatively short space, they struck root so firmly in the land of their exile, that when opportunity served, they were, on the whole, loth to return to the Land of Promise. What more natural than that the immigrants under Zerubbabel, and still more those who came with Ezra—several generations of whose ancestors had been settled in Babel—should have brought back with them the Aramaic, if not as their vernacular; at all events as an idiom with which they were perfectly familiar, and which they

may partly have continued to use as their colloquial language in Palestine, as, in fact, they had to use it in Babylon? Continuous later immigrations from the “Captivity” did not fail to reinforce and further to spread the use of the same tongue. All the decrees and official communications addressed to the Jews by their Persian masters were in Aramaic (Ezr. Neh. *passim*), Judaea being considered only as part of the Syrian satrapy. Nor must it be forgotten that the old colonists in Palestine (2 K. xvii. 24) were Samaritans, who had come from “Aram and Babel,” and who speak Chaldee; that intermarriages with women from Ashdod, Ammon, and Moab had been common (Neh. xiii. 23); that Phoenicia, whose merchants (Tyrians, Neh. xiii. 16) appear to have settled in Palestine, and to have established commercial relations with Judaea and Galilee, contains large elements of Chaldee in its own idiom. Thus it came to pass that we find in the Book of Daniel, for instance, a somewhat forced Hebrew, from which, as it were, seem, the author gladly lapses into the more familiar Aramaic (comp. ii. 4, &c.); that oracles were received by the High-priests Johanan⁴ and Simon the Just⁵ in the Holy of Holies (during the Syrian wars) in Aramaic (Sotah, 33, a); and that in short, some time before the Hasmonæan period, this was the language in which were composed not only popular sayings, proverbs, and the *Ezra* (מֵפָרָשׁ, Beresh. R. 107 d; Tanh. 17 a. Midr. Tehill. 23 d; 51 f, &c. &c.), but official and legal documents (Mishna Ketub. 4, 8; Tosefta Sabb. c. 8; Edujoth, 8, 4,—c. 130 A.C.), even certain prayers⁶—of Babylonian origin probably—and in which books destined for the great mass of the people were written.⁷ That, indeed, the Hebrew Language—the “language of Kanan” (Is. xix. 18, a “Jehudith” (2 K. xviii. 26, 28; Is. xxxvi. 11; or the Bible—became more and more the language of the few, the learned, the *Holy Language*, לִשָּׁן קֹדֶשׁ, or, still more exactly, לִשָּׁן בֵּית הַמִּקְדָּשׁ, “Language of the Temple,” set aside almost exclusively for the holy service of religion: be it the Divine Law and the works in which this was contained (like the Mishna, the Beraitoth, Mechilta, Sifti, Sifra, the older Midrashim, and very many portions of the Talmud), or the correspondence between the different academies (written the Hebrew letter sent from Jerusalem to Alexandria about 100 B.C., Chag. Jer. ii. 2), or be it the sacred worship itself in temple and synagogue, which was almost entirely carried on in pure Hebrew.

If the common people thus gradually had lost all knowledge of the tongue in which were written the

* “And they read in the book of the Law of God clearly (מֵפָרָשׁ), and gave the understanding, so that they understood the reading:—‘in the book of the Law’—this is Mikra, the original reading in the Pentateuch; ‘מֵפָרָשׁ’ clearly—this is ‘Targum’ (Meg. 3 a; Ned. 37 b). To this tradition also might be referred the otherwise rather enigmatical passage (Sanh. 21 b): “Originally,” says Mar Sutra, “the Law was given to Israel in Ibrî writing and the holy (Hebrew) language. It was again given to them in the days of Ezra in the Ashurith writing and the Aramaic language,” &c.

⁴ “The youths who went to combat at Antiochia have been victorious.”

⁵ “Perished has the army which the enemy thought to lead against the Temple.”

⁷ Introduction to the Haggadah for the Pesach (מִצְדָּה מִצְדָּה): “Such was the bread of misery which our fathers ate in the land of Mitzrajim. Whoever is needy, he come and eat with us; whoever is in want, he come and celebrate the Pesach. This year bare, next year in the land of Israel; this year slaves, next year free men.” The *Kaddish*, to which afterwards a certain sanctification as a prayer for the dead was given, and which begins as follows: “Let there be magnified and sanctified the Great Name in the world which He has created according to His will, and which He rules as His kingdom, during your life and your days, and the life of the whole house of Israel, speedily and in a near time, and say ye, ‘Amen: Be the Great Name praised for ever and evermore.’” &c.

⁶ Megillath Taanith, &c.

books to be read to them, i. e. naturally followed (in order "that they might understand them") that recourse must be had to a translation into the idiom with which they were familiar—the Aramaic. That further, since a bare translation could not in all cases suffice, it was necessary to add to the translation an explanation, more particularly of the more difficult and obscure passages. Both translation and explanation were designated by the term *Targum*. In the course of time there sprang up a guild, whose special office it was to act as interpreters in both senses (*Meturgeman*¹), while formerly the learned alone volunteered their services. These interpreters were subjected to certain bonds and regulations as to the form and substance of their renderings. Thus (comp. Mishna Meg. *passim*; Mas. Sofer. xl. 1; Maimon. Hilch. Ephhl. 12, §11 ff; Orach Chaj. 145, 1, 2), "neither the reader nor the interpreter are to raise their voices one above the other;" "they have to wait for each other until each have finished his verse;" "the Meturgeman is not to lean against a pillar or a beam, but to stand with fear and with reverence;" "he is not to use a written Targum, but he is to deliver his translation *viva voce*"—lest it might appear that he was reading out of the Torah itself, and thus the Scriptures be held responsible for what are his own dicta; "no more than one verse in the Pentateuch, and three in the Prophets [a greater licence is given for the Book of Esther] shall be read and translated at a time;" "that there should be not more than one reader and one interpreter for the Law, while for the Prophets one reader and one interpreter, or two interpreters, are allowed," &c. (comp. Cor. xiv. 21 ff; xii. 30; 27, 28). Again (Mishna Meg. and Tosifah, *ad loc.*), certain passages liable to give offence to the multitude are specified, which may be read in the synagogue and translated; others, which may be read but not translated; others, again, which may neither be read nor translated. To the first class² belong the account of the Creation—a subject not to be discussed publicly, on account of its most vital bearing upon the relation between the Creator and the Kosmos, and the nature of both: the deed of Lot and his two daughters (Gen. xix. 31); of Judah and Tamar (Gen. xxxviii.); the first account of the making of the golden calf (Ex. xxxii.); all the curses in the Law; the deed of Amnon and Tamar (2 Sam. xiii.); of Absalom with his father's concubines (2 Sam. xvi. 22); the story of the woman of Gibeah (Judg. xix.). These are to be read and translated—being mostly deeds which carried their own punishments with them. To be read but not translated are the deed of Reuben with his father's concubine (Gen. xxv. 22); the latter portion of the story of the golden calf (Ex. xxxii.); the benediction of the priests (on account of its awful nature). And neither to be read nor translated are the deed of David and Bathsheba (2 Sam. xi. and xii.), and according to one the story of Amnon and Tamar (2 Sam. xiii.). (Both the latter stories, however, are, in Mishna Meg. iv. 10, enumerated among those of the second class, which are to be read but not translated.)

Altogether these *Meturgemanim* do not seem to have been held generally in very high respect; one

of the reasons being probably that they were paid (two *Sela'im* at one time, according to Midr. R. Gen. 98), and thus made (what P. Aboth especially inveighs against) the Torah "a spade to dig with it." "No sign of blessing," it was said, moreover, "could rest upon the profit they made by their calling, since it was money earned on the Sabbath" (Pae. 4 b). Persons unfit to be readers, as those whose clothes were so torn and ragged that their limbs became visible through the rents (פנימב), their appearance thus not corresponding to the reverence due to the sacred word itself, or blind men, were admitted to the office of a Meturgeman; and, apart from there not being the slightest authority attached to their interpretations, they were liable to be stopped and silenced, publicly and ignominiously, whenever they seemed to overstep the bounds of discretion. At what time the regulation that they should not be under fifty years of age (in odd reference to the "men of fifty," Ia. iii. 3, mentioned in Juchas. 44, 2) came into use, we are not able to decide. The Mishna certainly speaks even of a minor (under thirteen years) as being allowed both to read and to act as a Meturgeman (comp. Mishna Meg. *passim*). Altogether they appear to have borne the character of empty-headed, bombastic fools. Thus Midr. Koh. has to Eccl. vii. 5: "It is better to hear the rebuke of the wise"—these are the preachers (Darshanim)—than for a man to hear the song of fools:—these are the Meturgemanim, who raise their voices in sing-song, (רשע), or with empty fancies:—that the people may hear." And to ix. 17: "The words of wise men are heard in quiet"—these are the preachers (Darshanim)—more than the cry of him that ruleth among fools—these are the Meturgemanim who stand above the congregation." And though both passages may refer more especially to those Meturgemanim (Emoras, speakers, expounders) who at a later period stood by the side of the *Chacham*, or president of the Academy, the preacher כהן דבורה (himself seated on a raised dais), and repeated with a loud voice, and enlarged upon what the latter had whispered into their ear in Hebrew (חכם לחוש לו לשון עברית, comp. Matt. x. 27, "What ye hear in the ear, that preach ye upon the housetops"), yet there is an abundance of instances to show that the Meturgeman at the side of the reader was exposed to rebukes of a nature, and is spoken of in a manner, not likely to be employed towards any but men low in the social scale.

A fair notion of what was considered a proper Targum may be gathered from the maxim preserved in the Talmud (Kidd. 49, a), "Whosoever translates [as Meturgeman] a verse in its closely exact form [without proper regard to its real meaning] is a liar, and whosoever adds to it is impious and a blasphemer, e. g., the literal rendering into Chaldees of the verse, 'They saw the God of Israel' (Ex. xxiv. 10), is as wrong a translation as 'They saw the angel of God'; the proper rendering being, 'They saw the glory of the God of Israel.'" [Comp. SAMAR. PENT. p. 1114b]. Other instances are found in the Mishna (Meg. iv. 8): "Whosoever renders the text (Lev. xviii. 21) 'And thou shalt not let any of thy seed pass through the

¹ תורגמן. תורגמן. בתורגמן. (Ar. ترجمين)

² s. v. Sargmanist; Ital. Turcimano; Fr. Truchement; Engl. Dragoman, &c.

¹ Comprised in the mnemonic formula לֹא תִּתֵּן שְׁמוֹתַי בְּרִשְׁוֹן (Meg. 28 a).

² לֹא תִּתֵּן שְׁמוֹתַי בְּרִשְׁוֹן.

fire to Molech,' by 'Thou shalt not give thy seed to be carried over to heathenism (or to an Aramite woman)' [*i. e.* as the Gemara *ad loc.*; Jer. Sanh. 8, and Sifri on Deut. xviii. 10, explain it, one who marries an Aramaic woman; for although she may become a proselyte, she is yet sure to bear enemies to him and to God, since the mother will in the end carry his children over to idolatrous worship;] as also he who enlarges upon (or figuratively explains) the sections relative to incest (Lev. xviii.)—he shall forthwith be silenced and publicly rebuked." Again (comp. Jer. Ber. v. 1; Meg. iv. 10), "Those who translate 'O my people, children of Israel, as I am merciful in heaven, so shall ye be merciful on earth':—*'Cow or ewe, it and her young ye shall not kill in one day'* (Lev. xxii. 28)—they do not well, for they represent the Laws of God [whose reasons no man dare try to fathom] as mere axioms of mercy;" and, it is added, "the short-sighted and the frivolous will say, 'Lo! to a bird's-nest He extends His mercy, but not to yonder miserable man . . .'"

The same causes which, in the course of time, led to the writing down—after many centuries of oral transmission—of the whole body of the Traditional Law, the very name of which (תורה שבעל פה), "oral law," in contradistinction to תורה שבכתב, or "written law" seemed to imply that it should never become a fixed, immutable code, engendered also, and about the same period, as it would appear, written Targums: for certain portions of the Bible, at least.^a

The fear of the adulterations and mutilations which the Divine Word—amid the troubles within and without the Commonwealth—must undergo at the hands of incompetent or impious exponents, broke through the rule, that the Targum should only be oral, lest it might acquire undue authority (comp. Mishna Meg. iv. 5, 10; Tosifia, *ib.* 3; Jer. Meg. 4, 1; Bab. Meg. 24a; Sota, 39b). Thus, if a Targum of Job is mentioned (Sab. 115a; Tr. Soferim, 5, 15; Tosifia Sab. c. 14; Jer. Sabb. 16, c.) as having been highly disapproved by Gamaliel the Elder (middle of first century, A.D.), who caused it to be hidden and buried out of sight:—we find, on the other hand, at the end of the second century, the practice of reading the Targum generally commended, and somewhat later Jehoshua ben Levi enjoins it as a special duty upon his sons. The Mishna even contains regulations about the manner (Jad. iv. 5) in which the Targum is to be written. But even in their written, and, as we may presume, authoritatively approved form, the Targums were of comparatively small weight, and of no canonical value whatsoever. The Sabbath was not to be broken for their sake as it was lawful to do for the Scripture in the original Hebrew (Sab. 115a). The Targum does not defile the hands (for the purpose of touching consecrated food) as do the Chaldean portions of Ezra and Nehemiah (Yad. iv. 5).

The gradual growth of the Code of the written Targum, such as now embraces almost the whole of the O. T., and contains, we may presume, but

few snatches of the primitive Targums, is shrouded in deep obscurity. We shall not fail to indicate the opinions arrived at as to the date and authorship of the individual versions in their due places; but we must warn the reader beforehand, that no positive results have been attained as yet, save that nearly all the names and dates hitherto commonly attached to them must be rejected. And we fear that, as long at least as the Targum shares the fate of the LXX., the Samaritan Pentateuch, the Midrash, the Talmud, &c. :—viz. that a really critical edition remains a thing occasionally dreamt of, but never attempted;—so long must we abandon the hope of getting any nearer a final solution of this and many other still more important questions. The utter corruption, moreover, of the Targum, bitterly complained of already by Elias Levita—(an author, be it observed, of very moderate attainments, but absurdly overrated by certain of his contemporaries, and by those who copied his usually shallow dicta without previous examination)—debars us from more than half its use. And yet how fertile its study could be made; what light it might be made capable of throwing upon the Bible itself, upon the history of the earliest development of Biblical studies, versions, and upon the Midrash—both the Halachah and Haggadah—snatches of which, in their, as it were, liquid stages, lie embedded in the Targums:—all this we need not urge here at length.

Before, however, entering into a more detailed account, we must first dwell for a short time on the *Midrash* itself, of which the Targum forms part.

The centre of all mental activity and religious action among the Jewish community, after the return from Babylon, was the Scriptural Canon collected by the Soferim, or Men of the Great Synagogue. These formed the chief authority on the civil and religious law, and their authority was the Pentateuch. Their office as expounders and commentators of the Sacred Records was twofold. They had, firstly, to explain the exact meaning of such prohibitions and ordinances contained in the Mosaic Books as seemed not explicit enough for the multitude, and the precise application of which in former days, had been forgotten during the Captivity. Thus, *e. g.*, general terms, like the "work" forbidden on the Sabbath, were by them specified and particularized; not indeed according to their own arbitrary and individual views, but according to tradition traced back to Sinai itself. Secondly, laws neither specially contained nor even indicated in the Pentateuch were inaugurated by them according to the new wants of the times and the ever-shifting necessities of the growing Commonwealth (*Gezeroth, Tekumoth*). Nor were the latter in all cases given on the sole authority of the Synod; but they were in most cases traditional, and certain special letters or signs in the Scriptures, seemingly superfluous or out of place where they stood, were, according to fixed hermeneutical rules, understood to indicate the inhibitions and prohibitions (*Gezarim, "Fences"*), newly issued and fixed. But Scripture, which had

^a As, according to Frankel, the LXX. was only a partial translation at first. Witness the confusion in the last chapters of Exodus, which, as mere repetitions (of chaps. xxv. and xxix.), were originally left untranslated.

Rashi in a similar manner uses the formula כדל

כדל in repetitions

כדל (Arab. *Madras*) first used in 2 Chr. xii

22, xiv. 27; "Commentary," in the sense of Ouseman's "Commentaries," enlargement, embellishment, complement, &c. (A. V. story). The compilers of Chronicles seem to have used such promiscuous works treating of biblical personages and events, provided they contained aught that served the tendency of the book.

for this purpose to be studied most minutely and unremittingly—the most careful and scrutinizing attention being paid even to its outward form and semblance—was also used, and more especially in its non-legal, prophetic parts, for homiletic purposes, as a wide field of themes for lectures, sermons, and religious discourses, both in and out of the Synagogue:—at every solemnity in public and private life. This juridical and homiletical expounding and interpreting of Scripture—the germs of both of which are found still closely intertwined and bound up with each other in the Targum—is called *darash*, and the avalanche of Jewish literature which began silently to gather from the time of the return from the exile and went on rolling uninterruptedly—however dread the events which befel the nation—until about a thousand years after the destruction of the second Temple, may be comprised under the general name *Midrash*—“expounding.” The two chief branches indicated are, *Halachah* (הלכה, “to go”), the rule by which to go, = binding, authoritative law; and *Haggadah* (הגדה, “to say”) = saying, legend,—flights of fancy, darting up from the Divine word. The *Halachah*, treating more especially the Pentateuch as the legal part of the O. T., bears towards this book the relation of an amplified and annotated Code; these amplifications and annotations, be it well understood, not being new laws, formerly unheard of, deduced in an arbitrary and fanciful manner from Scripture, but supposed to be simultaneous oral revelations *hinted at* in the Scripture: in any case representing not the human but the Divine interpretation, *handed down through a named authority* (*Kabbala*, *Shemata*—“something received, heard”). The *Haggadah*, on the other hand, held especial sway over the wide field of ethical, poetical, prophetic, and historical elements of the O. T., but was free even to interpret its legal and historical passages fancifully and allegorically. The whole Bible, with all its tones and colours, belonged to the *Haggadah*, and this whole Bible she transformed into an endless series of themes for her most wonderful and capricious variations. “Prophetess of the Exile,” she took up the hallowed verse, word or letter, and, as the *Halachah* pointed out in it a special ordinance, she, by a most ingenious exegetical process of her own, showed to the wonder-struck multitude how the woeful events under which they then groaned were hinted at in it, and how in a manner it predicted even their future issue. The aim of the *Haggadah* being the purely momentary one of elevating, comforting, edifying its audience for the time being, it did not pretend to possess the slightest authority. As its method was capricious and arbitrary, so its cultivation was open to every one whose heart prompted him. It is saga, tale, gnome, parable, allegory,—poetry, in short, of its own most strange kind, springing up from the sacred soil of Scripture, wild, luxuriant, and tangled, like a primeval tropical forest. If the *Halachah* used the Scriptural word as a last and most awful resort, against which there was no further appeal, the *Haggadah* used it as the golden nail on which to hang its gorgeous tapestry: as introduction, refrain, text, or fundamental stanza for a gloss; and

if the former was the iron bulwark around the nationality of Israel, which every one was ready at every moment to defend to his last breath, the latter was a maze of flowery walks within those fortress-walls. That gradually the *Haggadah* preponderated and became the *Midrash* *par' d'foxyh* of the people, is not surprising. We shall notice how each successive Targum became more and more impregnated with its essence, and from a version became a succession of short homiletics. This difference between the two branches of *Midrash* is strikingly pointed in the following Talmudical story: “*R. Chis b. Abba*, a Halachist, and *R. Abbahu*, a Haggadist, once came together into a city and preached. The people flocked to the latter, while the former's discourses remained without a hearer. Thereupon the Haggadist comforted the Halachist with a parable. Two merchants come into a city and spread their wares,—the one rare pearls and precious stones; the other a ribbon, a ring, glittering trinkets: around whom will the multitude throng? . . . Formerly, when life was not yet bitter labour, the people had leisure for the deep word of the Law; now it stands in need of comfortings and blessings.”

The first collections of the *Halachah*—embracing the whole field of juridico-political, religious, and practical life, both of the individual and of the nation: the human and Divine law to its most minute and insignificant details—were instituted by Hillel, Akiba, and Simon B. Gamaliel; but the final redaction of the general code, *Mishna*,* to which the later *Toseftais* and *Boraithas* form supplements, is due to Jehudah Hannasi in 220 A.D. Of an earlier date with respect to the contents, but committed to writing in later times, are the three books: *Sifra*, or *Torath Kohanim* (an amplification of Leviticus), *Sifri* (of Numbers and Deuteronomy), and *Mechilta* (of a portion of Exodus). The masters of the Mishnaic period, after the Soferim, are the Tannaim, who were followed by the Amoraim. The discussions and further amplifications of the Mishna by the latter, form the *Gemara* (Complement), a work extant in two redactions, viz. that of Palestine or Jerusalem (middle of 4th century), and of Babylon (5th century A.D.), which, together with the Mishna, are comprised under the name Talmud. Here, however, though the work is ostensibly devoted to *Halachah*, an almost equal share is allowed to *Haggadah*. The Haggadistic mode of treatment was threefold: either the simple understanding of words and things (*Peshat*), or the homiletic application, building up the minor of Scripture to the present (*Derash*), or a mystic interpretation (*Sod*), the second of which chiefly found its way into the Targum. On its minute division into special and general, ethical, historical, esoteric, &c., *Haggadah*, we cannot enter here. Suffice it to add that the most extensive collections of it which have survived are *Midrash Rabbah* (commenced about 700, concluded about 1100 A.D.), comprising the Pentateuch and the five Megilloth, and the *Pesikta* (about 700 A.D.), which contains the most complete cycle of Pericopes, but the very existence of which had until lately been forgotten, surprisingly enough, through the very extracts made from it (*Jalkut*, *Pesikta Rabbathi*, *Sutarta*, &c.).

* *Mishna*, from *shama*, “to learn.” “learning,” not, as erroneously translated of old, and repeated ever since, *shema*—“repetition;” but corresponding exactly

with Talmud, (from *lamad*, “to learn”), and *Torah* (from *ara*), “to teach:” all three terms meaning “the study,” by way of eminence.

From this indispensable digression we return to the subject of Targum. The Targums now estant are as follows:—

I. Targum on the Pentateuch, known as that of Onkelos.

II. Targum on the first and last prophets, known as that of Jonathan Ben-Uzziel.

III. Targum on the Pentateuch, likewise known as that of Jonathan Ben-Uzziel.

IV. Targum on portions of the Pentateuch, known as Targum Jerushalmi.

V. Targums on the Hagiographa, ascribed to Joseph the Blind, viz.:—

1. Targum on Psalms, Job, Proverbs.

2. Targum on the five Megilloth (Song of Songs, Ruth, Lamentations, Esther, Ecclesiastes).

3. Two (not three, as commonly stated) other Targums to Esther: a smaller and a larger, the latter known as Targum Shenl, or Second Targum.

VI. Targum to Chronicles.

VII. Targum to Daniel, known from an unpublished Persian extract, and hitherto not received among the number.

VIII. Targum on the Apocryphal pieces of Esther.

We have hinted before that neither any of the names under which the Targums hitherto went, nor any of the dates handed down with them, have stood the test of recent scrutiny. Let it, however, not for a moment be supposed that a sceptic Wolfian school has been at work, and with hypercritical and wanton malice has tried to annihilate the hallowed names of Onkelos, Jonathan, and Joseph the Blind. It will be seen from what follows that most of these names have or may have a true historical foundation and meaning; but uncritical ages and ignorant scribes have perverted this meaning, and a succession of most extraordinary misreadings and strangest *блѣпыя вѣдѣнія*—some even of a very modern date—have produced rare confusion, and a chain of assertions which dissolve before the first steady gaze. That, notwithstanding all this, the implicit belief in the old names and dates still reigns supreme will surprise no one who has been accustomed to see the most striking and undeniable results of investigation and criticism quietly ignored by contemporaries, and forgotten by generations which followed, so that the same work had to be done very many times over again before a certain fact was allowed to be such.

We shall follow the order indicated above:—

I. THE TARGUM OF ONKELOS.

It will be necessary, before we discuss this work itself, to speak of the person of its reputed author as far as it concerns us here. There are few more contested questions in the whole province of Biblical, nay general literature, than those raised on this head. Did an Onkelos ever exist? Was there more than one Onkelos? Was Onkelos the real form of his name? Did he translate the Bible at all, or part of it? And is this Targum the translation he made? Do the dates of his life and this Targum tally? &c. &c. The ancient accounts of Onkelos are avowedly of the most corrupted and confused kind: so much so that both ancient and modern investigators have failed to reconcile and amend them so as to gain general satisfaction, and opinions remain widely divergent. This being the case, we think it our duty to lay the whole—not very voluminous—evidence, collected both from the body of Talmudical and post-Tal-

mulical (so-called Rabbinical) and patristic writing before the reader, in order that he may judge for himself how far the conclusions to which we shall point may be right.

The first mention of "Onkelos"—a name variously derived from Nicolaus (Geiger), *Ὀνέλος* [sic] (Renan), Homunculus, Avunculus, &c.—namely "Onkelos the Proselyte," is found in the Toseftah, a work drawn up shortly after the Mishnah. Here we learn (i.) that "Onkelos the Proselyte" was so serious in his adherence to the newly-adapted (Jewish) faith, that he threw his share in his paternal inheritance into the Dead Sea (Toa. Dem. vi. 9). (2.) At the funeral of Gamaliel the Elder (1st century A.D.) he burnt more than 70 minas worth of spices in his honour (Toa. Shabb. 8). (3.) This same story is repeated, with variations (Toa. Semach. 8). (4.) He is finally mentioned, by way of corroboration to different Halachas, in connection with Gamaliel, in three more places, which complete our references from the Toseftah (Toa. Mikv. c. 1; Kelim, iii. 2, 2; Chag. 3, 1). The Babylonian Talmud, the source to which we turn our attention next, mentions the name Onkelos four times: (1.) As "Onkelos the Proselyte, the son of Kalonymus" (Calonicus? Cleonicus?), the son of Titus' sister, was intending to become a convert, conjured up the ghosts of Titus, Balaam, and Christ [the latter name is doubtful], in order to ask them what nation was considered the first in the other world. Their answer that Israel was the favoured one decided him (Gitt. 56). (2.) As "Onkelos the son of Kalonymus" (Cleonymus?) (Aboda Sar. 11 a.). It is there related of him that the emperor (Kaiser) sent three Roman cohorts to capture him, and that he converted them all. (3.) In Baba Bathra 99 a; Beraita), "Onkelos the Proselyte" is quoted as an authority on the question of the form of the Cherubim. And (4.) The most important passage—because on it and it alone, in the wide realm of ancient literature, has been founded the general belief that Onkelos is the author of the Targum now current under this name—is found in Meg. 3 a. It reads as follows:—"R. Jeremiah, and, according to others, R. Chis bar Abba, said: The Targum to the Pentateuch was made by the 'Proselyte Onkelos,' from the mouth of R. Eliezer and L. Jehoshua; the Targum to the Prophets was made by Jonathan ben Uzziel from the mouth of Haggai, Zechariah, and Malachi. . . . But have we not been taught that the Targum existed from the time of Ezra? . . . Only that it was forgotten, and Onkelos restored it." No mention whatever is to be found of Onkelos either in the Jerusalem Talmud redacted about a hundred years before the Babylonian, nor in the Church fathers—an item of negative evidence to which we shall presently draw further attention. In a Midrash collection, completed about the middle of the 12th century, we find again "Onkelos the Proselyte" asking an old man, "Whether that was all the love God bore towards a proselyte, that he promised to give him bread and a garment? Whereupon the old man replied that this was all for which the Patriarch Jacob prayed (Gen. xxviii. 20)." The Book Zechariah, of late and very uncertain date, makes "Onkelos" a disciple of Hillel and Shammai. Finally, a MS., also of a very late and uncertain date, in the library of the Leipzig Senate (Ms. H. 17), relates of "Onkelos, the nephew of Titus," that he asked the emperor's advice as to what merchandise he thought it was profitable to trade in. The em-

perer told him that that should be bought which was cheap in the market, since it was sure to rise in price. Whereupon Onkelos went on his way. He repaired to Jerusalem, and studied the Law under R. Eleazar and R. Jehoshua, and his face became wan. When he returned to the court, one of the courtiers observed the pallor of his countenance, and said to Titus, "Onkelos appears to have studied the Law." Interrogated by Titus, he admitted the fact, adding that he had done it by his advice. No nation had ever been so exalted, and none was now held cheaper among the nations than Israel: "therefore," he said, "I concluded that in the end none would be of higher price."

This is all the information to be found in ancient authorities about Onkelos and the Targum which bears his name. Surprisingly enough, the latter is well known to the Babylonian Talmud (whether to the Jerusalem Talmud is questionable) and the Midrashim, and is often quoted, but *never once as Targum Onkelos*. The quotations from it are invariably introduced with כְּדִמְתַּרְגְּמִין, "As we [Babylonians] translate;" and the version itself is called (e. g. Kiddush. 49a) תַּרְגוּם דְּרַן, "Our Targum," exactly as Ephraim Syrus (*Opp.* i. 380) speaks of the Peshito as "Our translation."

Yet we find on the other hand another current version invariably quoted in the Talmud by the name of its known author, viz. תַּרְגוּם עֲקִילָא, "the [Greek] Version of Akilas:" a circumstance which, by showing that it was customary to quote the author by name, excites suspicion as to the relation of Onkelos to the Targum Onkelos. Still more surprising, however, is, as far as the person of Onkelos is concerned (whatever be the discrepancies in the above accounts), the similarity between the incidents related of him and those related of Akilas. The latter (עֲקִילָא, אֶקִילָא) is said, both in Sifra (Lev. xxv. 7) and the Jerusalem Talmud (Demai, xvi. 1d), to have been born in Pontus, to have been a proselyte, to have thrown his paternal inheritance into an asphalt lake (T. Jer. Demai, 25d), to have translated the Torah before R. Eliezer and R. Joshua, who praised him (קִלְסִין, in allusion perhaps to his name, עֲקִילָא); or, according to other accounts, before R. Akiba (comp. Jer. Kidd. 1, 1, 2, &c.; Jer. Meg. 1, 11; Babil. Meg. 3a). We learn further that he lived in the time of Hadrian (Chag. 2, 1), that he was the son of the Emperor's sister (Tanch. 28, 1), that he became a convert against the Emperor's will (ib. and Shem. Rabba, 146c), and that he consulted Eliezer and Jehoshua about his conversion (Ber. R. 78d; comp. Midr. Koh. 102b). First he is said to have gone to the former, and to have asked him whether that was all the love God bore a proselyte, that He promised him bread and a garment (Gen. xxviii. 20). "See," he said, "what exquisite birds and other delicacies I now have: even my slaves do not care for them any longer." Whereupon R. Eliezer became wroth, and said, "Is that for which Jacob prayed, 'And give me bread to eat and a garment to wear,' so small in thine eyes?—Comes he, the proselyte, and receives these things without any trouble!"—And Akilas, dissatisfied,

left the irate Master and went to R. Joshua. He pacified him, and explained to him that "Bread" meant the Divine Law, and "Garment," the Talith, or sacred garment to be worn during prayer. "And not this alone," he continued, but the Proselyte may marry his daughter to a Priest, and his offspring may become a High-Priest, and offer burnt-offerings in the Sanctuary." More striking still is a Greek quotation from *Onkelos*, the Chaldee translator (Midr. Echa, 58c), which in reality is found in and quoted (Midr. Shir hashir. 27d) from Akilas, the Greek translator.

That Akilas is no other than Aquila (Ἀquila), the well-known Greek translator of the Old Testament, we need hardly add. He is a native of Pontus (Iren. *adv. Haer.* 3, 24; Jer. *De Vir. Ill.* c. 54; Philastr. *De Haer.* §90). He lived under Hadrian (Epiph. *De Pond. et Mens.* §12). He is called the *πρωτοπρεσβυτης* (Chron. Alex. *πρωτοπρεσβυτης*) of the Emperor (ib. §14), becomes a convert to Judaism (§15), whence he is called the Proselyte (Iren. *ib.*; Jerome to Is. viii. 14, &c.), and receives instructions from Akiba (Jer. *ib.*). He translated the O. T., and his Version was considered of the highest import and authority among the Jews, especially those unacquainted with the Hebrew language (Euseb. *Praep. Ev.* l. c.; Augustin, *Civ. D.* xv. 28; Philastr. *Haer.* 90; Justin, *Novell.* 146). Thirteen distinct quotations from this Version are preserved in Talmud and Midrash, and they tally, for the most part, with the corresponding passages preserved in the Hexapla; and for those even which do not agree, there is no need to have recourse to corruptions. We know from Jerome (on Ezek. iii. 15) that Aquila prepared a further edition of his Version, called by the Jews *κατ' ἀκριβείαν*, and there is no reason why we should not assume, *ceteris paribus*, that the differing passages belong to the different editions.

If then there can be no reasonable doubt as to the identity of Aquila and Akilas, we may well now go a step further, and from the threefold accounts adduced,—so strikingly parallel even in their anachronisms and contortions—safely argue the identity, as of Akilas and Aquila, so of Onkelos 'the translator,' with Akilas or Aquila. Whether in reality a proselyte of that name had been in existence at an earlier date—a circumstance which might explain part of the contradictory statements; and whether the difference of the forms is produced through the Y (ng, nk), with which we find the name sometimes spelt, or the Babylonian manner, occasionally to insert an *u*, like in Adrianus, which we always find spelt *A*ndrianus in the Babylonian Talmud; or whether we are to read Gamaliel II. for Gamaliel the Elder, we cannot here examine; anything connected with the person of an Onkelos no longer concerns us, since he is not the author of the Targum; indeed, as we saw, only *once* ascribed to him in the passage of the Babylonian Talmud (Meg. 3a), palpably corrupted from the Jerusalem Talmud (Meg. i. 9). And not before the 9th century (Pirke der. Eliezer to Gen. xlv. 27) does this mischievous mistake seem to have struck root, and even from that time three centuries elapsed, during which the Version was quoted often enough, but without its authorship being ascribed to Onkelos.

² Greek quotations:—Gen. xvii. 1, 10 Beresh. Rab. 51 b; Lev. xxiii. 40, Jer. Succah, 2, 8, fol. 53 d (comp. Vaj. Rab. 200 d); Is. lii. 20, Jer. Shabb. 6, 4, fol. 8 b; Ex. xvi. 10, Midr. Thren. 58 c; Ex. xxiii. 43, Vaj. Rab. 203 d; Ps. xlviii. 15 (Masor. T., xvii. according to LXX.), Jer. Uss. 2, 3, fol. 73 b; Prov. xviii. 21, Vaj. Rab. fol. 203 b;

Esth. i. 6, Midr. Esth. 120 d; Dan. v. 6, Jer. Joma, 2, 6, fol. 41 a.—Hebrew quotations, re-translated from the Greek:—Lev. xix. 20, Jer. Kid. i. 1, fol. 59 a; Dan. viii. 13, Ber. Rab. 21 c.—Chaldean quotations:—Prov. xiv. 11; Beresh. Rab. 104 b; Is. v. 6, Midr. Koh. 113 c, d.

From all this it follows that those who, in the face of this overwhelming mass of evidence, would still retain Onkelos in the false position of translator of our Targum, must be ready to admit that there were two men living simultaneously of most astoundingly similar names; both proselytes to Judaism, both translators of the Bible, both disciples of R. Elieser and R. Jehoshua; it being of both reported by the same authorities that they translated the Bible, and that they were disciples of the two last-mentioned Doctors; both supposed to be nephews of the reigning emperor, who disapproved of their conversion (for this account comp. Dion Cass. lxxvii. 14, and Deb. Rab. 2; where Domitian is related to have had a near relative executed for his inclining towards Judaism), and very many more palpable improbabilities of the same description.

The question now remains, why was this Targum called that of Onkelos or Akilas? It is neither a translation of it, nor is it at all done in the same spirit. All that we learn about the Greek Version shows us that its chief aim and purpose was, to counteract the LXX. The latter had at that time become a mass of arbitrary corruptions—especially with respect to the Messianic passages—as well on the Christian as on the Jewish side. It was requisite that a translation, scrupulously literal, should be given into the hands of those who were unable to read the original. Aquila, the disciple, according to one account, of Akiba; the same Akiba who expounded (*durash*) for Halachistic purposes the seemingly most insignificant Particles in the Scripture (c. g. the $\Pi\alpha\tau$, sign of accusative; Gen. R. 1; Tos. Sheb. 1; Talm. Sheb. 26a), fulfilled his task according to his master's method. "Non solum verba sed et etymologia verborum transferre conatus est. . . . Quod Hebraei non solum habent *ἁρφα* sed et *ῥῥῥῥῥῥῥῥῥ*, ille *κακοῦ* *ἁρφα* et syllabas interpretatur et litteras, dictaque *σὺν τὸν οὐρανὸν καὶ σὺν τῇ γῇ* quod graeca et latina lingua non recipit" (Jer. de Opt. Gen. interpret.). Targum Onkelos, on the other hand, is, if not quite a paraphrase, yet one of the very freest versions. Nor do the two translations, with rare exceptions, agree even as to the renderings of proper nouns, which each occasionally likes to transform into something else. But there is a reason. The Jews in possession of this most slavishly accurate Greek Bible-text, could now on the one hand successfully combat arguments, brought against them from interpolated LXX. passages, and on the other follow the expoundings of the School and the Halachah, based upon the letter of the Law, as closely as if they had understood the original itself. That a version of this description often marred the sense, mattered less in times anything but favourable to the literal meaning of the Bible. It thus gradually became such a favourite with the people, that its renderings were household words. If the day when the LXX. was made was considered a day of distress like the one on which the golden calf was cast, and was actually entered among the fast days (8th Tebeth; Meg. Taanith);—this new version, which was to dispel the mischievous influences of the older, earned for its author one of the most delicate compliments in the manner of the time. The verse of the Scripture (Pr. xiv. 3), "Thou art more beautiful (*yofefita*) than the sons of men," was applied to him—in allusion to Gen. ix. 27, where it is said that Japheth, (i. e. the Greek language), should one day dwell in the tents of Shem (i. e. Israel), Meg. 1, 11, 71 b and c; 2 b, Ber. Rab. 40 b.—*Οὐκ ἔστι γὰρ Ἀν-*

δρας δουλεύων τῇ ἑβραϊκῇ λέξει ἐκδοῦναι αὐτὸν . . . φιλοτιμότερον πεπιστευμένους παρὰ τῶν ὁσίων, ἡμενεσκεῖν τὴν γραφὴν, &c. (Orig. c. Afric. 2).

What, under these circumstances, is more natural than to suppose that the new Chaldee Version—at least as excellent in its way as the Greek—was started under the name which had become expressive of the type and ideal of a Bible-translation; that, in fact, it should be called a Targum done in the manner of Aquila:—*Aquila-Targum*. Whether the title of recommendation was, in consideration of the merits of the work upon which it was bestowed, gladly endorsed and retained—or for aught we knew, was bestowed upon it until it was generally found to be of such surpassing merit, we need not stop to argue.

Being thus deprived of the dates which a close examination into the accounts of a translator's life might have furnished us, we must needs try to fix the time of our Targum as approximately as we can by the circumstances under which it took its rise, and by the quotations from it which we meet in early works. Without unnecessarily going into detail, we shall briefly record, what we said in the introduction, that the Targum was begun to be committed to writing about the end of the 2nd century, A.D. So far, however, from its superseding the *Old* Targum at once, it was on the contrary strictly forbidden to read it in public (Jer. Meg. 4, 1). Nor was there any uniformity in the version. Even to the middle of the 2nd century we find 12 masters most materially differing from each other with respect to the Targum of certain passages (Sob. 54 a.) and translations quoted not to be found in any of our Targums. The necessity must thus have pressed itself upon the attention of the spiritual leaders of the people to put a stop to the fluctuating state of a version, which, in the course of time must needs have become naturally surrounded with a halo of authority little short of that of the original itself. We shall thus not be far wrong in placing the work of collecting the different fragments with their variants, and reducing them into one—finally authorized Version—about the end of the 3rd, or the beginning of the 4th century, and in assigning Babylon to it as the birthplace. It was at Babylon, that about this time the light of learning, extinguished in the blood-stained fields of Palestine, shone with threefold vigour. The Academy at Nahardeh, founded according to legend during the Babylonian exile itself, had gathered strength in the same degree as the numerous Palestinian schools began to decline, and when in 259 A.D. that most ancient school was destroyed, there were three others simultaneously flourishing in its stead:—Tiberias, whither the college of Palestinian Jabneh had been transferred at the time of Gamaliel III. (200); Sora, founded by Chasda of Kufri (293); and Pumbedita founded by R. Jehudah b. Jecheskel (297). And in Babylon for well nigh a thousand years "the crown of the Law" remained, and to Babylon, the seat of the "Head of the Golah" (Dispersion), all Israel, scattered to the ends of the earth, looked for its spiritual guidance. That one of the first deeds of these Schools must have been the fixing of the Targum, as soon as the fixing of it became indispensable, we may well presume; and as we see the text fluctuating down to the middle of the 2nd century, we must needs assume that the reduction took place as soon afterwards as may reasonably be supposed. Further corroborative arguments are

found for Babylon as the place of its final redaction, although Palestine was the country where it grew and developed itself. Many grammatical and idiomatic signs—the substance itself, i. e. the words, being Palestinian—point, as far as the scanty materials in our hands permit us to draw conclusions as to the true state of language in Babylon, to that country. The Targum further exhibits a greater linguistic similarity with the Babylonian, than with the Palestinian Gemara. Again, terms are found in it which the Talmud distinctly mentions as peculiar to Babylon,⁴ not to mention Persian words, which on Babylonian soil easily found their way into our work. One of the most striking hints is the unvarying translation of the Targum of the word נַחֲלִי, "River," by Euphrates, the River of Babylon. Need we further point to the terms above mentioned, under which the Targum is exclusively quoted in the Talmud and the Midrashim of Babylon, viz., "Our Targum," "As we translate," or its later designation (Aruch, Rashi, Tosafot, &c.) as the "Targum of Babel"? Were a further proof needed, it might be found in the fact that the two Babylonian Schools, which, holding different readings in various places of the Scripture, as individual traditions of their own, consequently held different readings in the Targum ever since the time of its redaction.

The opinions developed here are shared more or less by some of the most competent scholars of our day: for instance, Zuns (who now repudiates the dictum laid down in his *Gottesdienstl. Vortr.*, that the translation of Onkelos dates from about the middle of the first century, A.D.; comp. Geiger, *Zeitschr.* 1843, p. 179, note 3), Grätz, Levy, Herzfeld, Geiger, Frankel, &c. The history of the investigation of the Targums, more especially that of Onkelos, presents the usual spectacle of vague speculations and widely contradictory notions, held by different investigators at different times. Suffice it to mention that of old authorities, Reuchin puts the date of the Targum as far back as the time of Isaiah—notwithstanding that the people, as we are distinctly told, did not understand even a few Aramaic words in the time of Jeremiah. Following Abar de Rossi and Elijah Levita (who, for reasons now completely disposed of, assumed the Targum to have first taken its rise in Babylon during the Captivity), Bellarmine, Sixtus Senensis, Aldret, Bartolucci, Rich. Simon, Hottinger, Walton, Thos. Smith, Pearson, Allix, Wharton, Prideaux, Schickard, take the same view with individual modifications. Pfeiffer, B. Meyer, Steph. Morinus, on the other hand, place its date at an extremely late period, and assign it to Palestine. Another School held that the Targum was not written until after the time of the Talmud—so Wolf, Havermann, partly Rich. Simon, Hornbeck, Joh. Morinus, &c.: and their reasons are both the occurrence of "Talmudical Fables" in the Targum and the silence of the Fathers. The former is an argument to which no reply is needed, since we do not see what it can be meant to prove, unless the "Rabbinus Talmud" has floated before their eyes, who, according to 'Henricus Seyoensis Capucinus' (*Ann. Eccl.* tom. i. 261), must have written all this gigantic literature, ranging over a thousand years, out of his own head, in which case, indeed, every

dictum on record, dating before or after the compilation of the Talmud, and in the least resembling a passage or story contained therein, must be a plagiarism from its sole venerable author. The latter argument, viz. the silence of the Fathers, more especially of Origen, Jerome, and Epiphanius, has been answered by Walton; and what we have said will further corroborate his arguments to the effect, that they did not mention it, not because it did not exist in their days, but because they either knew nothing of it, or did not understand it. In the person of an Onkelos, a Chaldean translator, the belief has been general, and will remain so, as long as the ordinary Handbooks—with rare exceptions—do not care to notice the uncontested results of contemporary investigation. How scholars within the last century have endeavoured to reconcile the contradictory accounts about Onkelos, more particularly how they have striven to smooth over the difficulty of their tallying with those of Akilas—as far as either had come under their notice—for this and other minor points we must refer the reader to Eichhorn, Jahn, Berthold, Hävernick, &c.

We now turn to the Targum itself.

Its language is Chaldean, closely approaching in purity of idiom to that of Ezra and Daniel. It follows a sober and clear, though not a slavish exegesis, and keeps as closely and minutely to the text as is at all consistent with its purpose, viz., to be chiefly, and above all, a version for the people. Its explanations of difficult and obscure passages bear ample witness to the competence of those who gave it its final shape, and infused into it a rare unity. Even where foreign matter is introduced, or, as Berkowits in his Hebrew work *Oleh Or* keenly observes, where it most artistically blends two translations: one literal, and one figurative, into one; it steadily keeps in view the real sense of the passage in hand. It is always concise and clear, and dignified, worthy of the grandeur of its subject. It avoids the legendary character with which all the later Targums entwine the Biblical word, as far as ever circumstances would allow. Only in the poetical passages it was compelled to yield—though reluctantly—to the popular craving for Haggadah; but even here it chooses and selects with rare taste and tact.

Generally and broadly it may be stated that alterations are never attempted, save for the sake of clearness; tropical terms are dissolved by judicious circumlocutions, for the correctness of which the authors and editors—in possession of the living tradition of a language still written, if not spoken in their day—certainly seem better judges than some modern critics, who through their own incomplete acquaintance with the idiom, injudiciously blame Onkelos. Highly characteristic is the aversion of the Targum to anthropopathies and anthropomorphisms; in fact, to any term which could in the eyes of the multitude lower the idea of the Highest Being. Yet there are many passages retained in which human affections and qualities are attributed to Him. He speaks, He sees, He hears, He smells the odour of sacrifice, is angry, repents, &c.—the Targum thus showing itself entirely opposed to the allegorising and symbolising tendencies, which in those, and still more in later days, were prone to transform Biblical history itself into the most extraordinary legends and fairy tales with or without a moral. The Targum, however, while retaining terms like the arm of God, the right hand of God, the finger of God—for

⁴ נַחֲלִי. "a girl," is rendered by רַבִּיָּא; "for thus they call in Babylon a young girl." שְׁכָן קֹרִין בְּבָבֶל לִינוֹקָא רַבִּיָּא (*Chag.* 13a).

Power, Providence, &c.—replaces terms like foot, front, back of God, by the fitting figurative meaning. We must notice further its repugnance to bring the Divine Being into too close contact, as it were, with man. It erects a kind of reverential barrier, a sort of invisible medium of awful reverence between the Creator and the creature. Thus terms like "the Word" (Logos = *Sinac. Ōm*), "the Shechinah" (Holy Presence of God's Majesty, "the Glory"), further, human beings talking not to, but "before" God, are frequent. The same care, in a minor degree, is taken of the dignity of the persons of the patriarchs, who, though the Scripture may expose their weaknesses, were not to be held up in their iniquities before the multitude whose ancestors and ideals they were. That the most curious *תוספתא* *תוספתא* and anachronisms occur, such as Jacob studying the Torah in the academy of Shem, &c., is due to the then current typifying tendencies of the Haggadah. Some extremely cautious, withal poetical, alterations also occur when the patriarchs speak of having acquired something by violent means: as Jacob (Gen. xlviii. 22), by his "sword and bow," which two words become in the Targum, "prayers and supplications." But the points which will have to be considered chiefly when the Targum becomes a serious study—as throwing the clearest light upon its time, and the ideas then in vogue about matters connected with religious belief and exercises—are those which treat of prayer, study of the law, prophecy, angelology, and the Messiah.

The only competent investigator who, after Winer (*De Onkelos*, 1820), but with infinitely more minuteness and thorough knowledge of the subject, has gone fully into this matter, is Luzatto. Considering the vast importance of this, the oldest Targum, for biblical as well as for linguistic studies in general,—not to mention the advantages that might accrue from it to other branches of learning, such as geography, history, &c.: we think it advisable to give—for the first time—a brief sketch of the results of this eminent scholar. His classical, though not rigorously methodical, *Onkelos* (1830) is, it is true, quoted by every one, but in reality known to but an infinitely small number, although it is written in the most lucid modern Hebrew.

He divides the discrepancies between Text and Targum into four principal classes.

(A.) Where the language of the Text has been changed in the Targum, but the meaning of the former retained.

(B.) Where both language and meaning were changed.

(C.) Where the meaning was retained, but additions were introduced.

(D.) Where the meaning was changed, and additions were introduced.

He further subdivides these four into thirty-two classes, to all of which he adds, in a most thorough and accurate manner, some telling specimens. Notwithstanding the apparent pedantry of his method, and the undeniable identity which necessarily must exist between some of his classes, a glance over their whole body, aided by one or two examples in

each case, will enable us to gain as clear an insight into the manner and "genius" of the Onkelos Targum as is possible without the study of the work itself.

(A.) Discrepancies where the language of the text has been changed in the Targum, but the meaning of the former has been retained.

1. Alterations owing to the idiom: e. g. the singular, "Let there be [sit] lights" (Gen. i. 14), is transformed into the plur. [sint] in the Targum "man and woman,"^a as applied to the animals (Gen. vii. 2), becomes, as unsuitable in the Aramaic, "male and female."^a

2. Alterations out of reverence towards God, more especially for the purpose of doing away with all ideas of a plurality of the Godhead: e. g. the terms Adonai, Elohim, are replaced by Jehovah, lest these might appear to imply more than one God. Where Elohim is applied to idolatry it is rendered "Error."^a

3. Anthropomorphisms, where they could be misunderstood and construed into a disparagement or a lowering of the dignity of the Godhead among the common people, are expunged: e. g. for "And God smelled a sweet smell" (Gen. viii. 21), Onkelos has, "And Jehovah received the sacrifice with grace;" for "And Jehovah went down to see the city" (Gen. xi. 5), "And Jehovah revealed" Himself, a term of frequent use in the Targum for verbs of motion, such as "to go down," "to go through," &c., applied to God. "I shall pass over you" (Ex. xii. 13), the Targum renders, "I shali protect you."^b Yet only anthropomorphisms which clearly stand figuratively and might give offence, are expunged, not as Maimonides, followed by nearly all commentators, holds, all anthropomorphisms, for words like "hand, finger, to speak, see," &c. (see above), are retained. But where the words remember, think of, &c., are used of God, they always, whatever their tense in the text, stand in the Targum in the present; since a past or future would imply a temporary forgetting on the part of the Omniscient.^c A keen distinction is here also established by Luzatto between *לִּי* and *לִּי*, the former used of a real, external seeing, the latter of a seeing "into the heart."

4. Expressions used of and to God by men are brought more into harmony with the idea of His dignity. Thus Abraham's question, "The Judge of the whole earth, should he not (לֹא) do justice?" (Gen. xviii. 25) is altered into the affirmative: "The Judge . . . verily He will do justice." Laban, who speaks of his gods^d in the text, is made to speak of his religion^e only in the Targum.

5. Alterations in honour of Israel and their ancestors. Rachel "stole" the Teraphim (xxx. 19) is softened into Rachel "took;"^f Jacob "died" from Laban (lb. 22), into "went";^g "The sons of Jacob answered Shechem with craftiness" (xxxiv. 13), into "with wisdom."^h

6. Short glosses introduced for the better understanding of the text: "for it is my mouth that speaks to you" (xiv. 12), Joseph said to his brethren: Targum, "in your tongue,"ⁱ i. e. without an interpreter. "The people who had made

יְהוָה יְהוָה יְהוָה
סְעוּת עַמִּימָא כְּדָר וְנוֹקְבָא
מִסְחָתִי וְאַחֲנֵלִי יוֹרֵד
מִקֵּד זֶכֶר אֲחֻסָּם
וְאִין שְׁכֵחָה וְכוּ' Compi. Prayer for Kosh hashana.

"And there is no forgetting before the throne of Thy glory."

יְהוָה יְהוָה יְהוָה
יְהוָה יְהוָה יְהוָה
יְהוָה יְהוָה יְהוָה
יְהוָה יְהוָה יְהוָה

the calf" (Ex. xxxii. 35) Targum, "worshipped," since not they, but Aaron made it.

7. Explanation of tropical and allegorical expressions: "Be fruitful (lit. 'creep,' from פִּרְיָא) and multiply" (Gen. i. 28), is altered into "bear children;" "thy brother Aaron shall be thy prophet" (Ex. vii. 1), into "thy interpreter" (Meturgeman); "I made thee a god (Elohim) to Pharaoh" (Ex. vii. 1), into "a master;" "to a head and not to a tail" (Deut. xxviii. 13), into "to a strong man and not to a weak;" and finally, "Whoever says of his father and his mother, I saw them not" (Deut. xxiii. 9), into "Whoever is not merciful towards his father and his mother."

8. Tending to ennoble the language: the "washing" of Aaron and his sons is altered into "sanctifying;" the "carcasses" of the animals of Abraham (Gen. xv. 11) become "pieces;" "anointing" becomes "elevating, raising;" "the wife of the bosom," "wife of the covenant."

9. The last of the classes where the terms are altered, but the sense is retained, is that in which a change of language takes place in order to introduce the explanations of the oral law and the traditions: e. g. Lev. xxiii. 11, "On the morrow after the Sabbath" (i. e. the feast of the unleavened bread) the priest shall wave it (the sheaf); Onkelos for Sabbath, *feast-day*. For frontlets (Deut. vi. 8), Tefillin (phylacteries).¹

(B.) Change of both the terms and the meaning.

10. To avoid phrases apparently derogatory to the dignity of the Divine Being: "Am I in God's stead?" becomes in Onkelos, "Dost thou ask [children] from me?" from before God thou shouldst ask them" (Gen. xxx. 2).

11. In order to avoid anthropomorphisms of an objectionable kind. "With the breath of Thy nose" ("blast of Thy nostrils," A. V., Ex. xv. 8), becomes "With the word of Thy mouth." "And I shall spread my hand over thee" (Ex. xxxii. 22), is transformed into "I shall with my word protect thee." "And thou shalt see my back parts," but my face shall not be seen" (Ex. xxxiii. 23): "And thou shalt see what is behind me," but that which is before me shall not be seen" (Deut. xxxiii. 12).

12. For the sake of religious euphemisms: e. g. "And ye shall be like God" (Gen. iii. 5), is altered into "like princes." "A laughter" has God made me" (Gen. xxi. 6), into "A joy." He gives me—"God" being entirely omitted.

13. In honour of the nation and its ancestors:

נביאך	אחילדיו	דאשטעברו
לחקיקה ולא לחלש	רב	מתורגמן
פנרים	ויקדשון	רחים
תרבי	משח	(בתרים) פלגיא
אישת קיימך	אישת חיקך	
מוטפות	יומא מנא	שבת
התחת אל אנכי	הפילין	
וברוח אפיך	המני את בעיא ובר	
ושכותי כפי	ובמימר פוטך	
פני	אחור	ואנין בממרי
אלהים	ית דקרמי	ית דבתי
הדוא	צחוק	רברבין
משמש בבית אולפנא	ירשב אלהים	
חד דימחד בעמא	אחר היום	

e. g. "Jacob was an upright man, a dweller in tents" (Gen. xiv. 27), becomes "an upright man, frequenting the house of learning." "One of the people might have lain with thy wife" (Gen. xvi. 10)—"One singled out among the people." i. e. the king. "Thy brother came and took my blessing with deceit" (Gen. xxvii. 35), becomes "with wisdom."

14. In order to avoid similes objectionable on aesthetical grounds. "And he will bathe his feet in oil" "And he will have many delicacies of a king" (Deut. xxxiii. 24).

15. In order to ennoble the language. "And man became a living being" (Gen. ii. 7)—"And it became in man a speaking spirit." "How good are thy tents," O Jacob—"How good are thy lands," O Jacob" (Num. xxiv. 5).

16. In favour of the Oral Law and the Rabbinical explanations. "And go into the land of Moriah" (Gen. xxii. 2), becomes "into the land of worship" (the future place of the Temple). "Isaac went to walk in the field" (Gen. xxiv. 63), is rendered "to pray." [Comp. SAM. I'KNT., p. 1114 b]. "Thou shalt not boil a kid in the milk of its mother" (Ex. xxxiv. 26)—as meat and milk, according to the Halachah.

(G.) Alterations of words (circumlocutions, additions, &c.) without change of meaning.

17. On account of the difference of idiom: e. g. "Her father's brother" (= relation), (Gen. xxix. 12), is rendered "The son of her father's sister." "What God does" (future) he has told Pharaoh" (Gen. xli. 28)—"What God will do," &c.

18. Additions for the sake of avoiding expressions apparently derogatory to the dignity of the Divine Being, by implying polytheism and the like: "Who is like unto Thee among the gods?" is rendered, "There is none like unto Thee, Thou art God" (Ex. xv. 11). "And they sacrifice to demons who are no gods"—"of no use" (Deut. xxxii. 17).

19. In order to avoid erroneous notions implied in certain verbs and epithets used of the Divine Being: e. g. "And the Spirit of God moved" (Gen. i. 2)—"A wind from before the Lord." "And Noah built God an altar" (Gen. viii. 20)—"an altar before the Lord." "And God was with the boy" (Gen. xxi. 20)—"And the word of God was in the aid of the boy." "The mountain of God" (Ex. iii. 1)—"The mountain upon which was revealed the glory of God." "The staff of God" (Ex. iv. 20)—"The staff with which thou hast done the miracles before God."

שמן	בחוכמא	במרמא
לנפש חיה	תפנוקי	
אהליך	והות באדם לרוח ממללא	
לשוח	מוריה	ארעך
פולחנא. [Abraham instituted, according to the Midrash, the morning- (Shaharith), Isaac the afternoon- (Minha), and Jacob the evening-prayer (Maarib).]		
בשר וחלב	גדי בחלב	
עושה	בר אחת	אחי
לית בר מנך	מי כמוך	עתיך למעבד
לית בהן צורך	לא אלהי	
רוח מן קדם אלהים	רוח אלהים	
אל	קדם ה'	לה'
יין קדם ה'	יקרא	מימרא דה'

And I shall see what will be their end"—"It is open (revealed) before me," &c. The Divine Being is in fact very rarely spoken of without that spiritual medium mentioned before; it being considered, as it were, a want of proper reverence to speak to or of Him directly. The terms "Before" (קדם), "Word" (אֱלֹהִים, אֱלֹהִים), "Glory" (כבוד), "Majesty" (שֹׁהַדָּה), are also constantly used instead of the Divine name: e. g. "The voice of the Lord God was heard" (Gen. iii. 8)—"The voice of the Word." "And He will dwell in the tents of Shem" (ix. 27)—"And the Shechina [Divine Presence] will dwell." "And the Lord went up from Abraham" (Gen. xvii. 22)—"And the glory of God went up." "And God came to Ahimelech" (Gen. xx. 3)—"And the word from [before] God came to Ahimelech."

20. For the sake of improving seemingly irreverential phrases in Scripture. "Who is God that I should listen unto His voice?" (Ex. v. 2)—"The name of God has not been revealed to me, that I should receive His word."

21. In honour of the nation and its ancestors. "And Israel said to Joseph, Now I shall gladly die" (Gen. xli. 30), which might appear frivolous in the mouth of the patriarch, becomes "I shall be comforted now." "And he led his flock towards the desert" (Ex. iii. 1)—"towards a good spot of pasture" in the desert."

22. In honour of the Law and the explanation of its obscurities. "To days and years" (Gen. i. 14)—"that days and years should be counted by them." "A tree of knowledge of good and evil"—"A tree, and those who eat its fruits will distinguish between good and evil." "I shall not further curse for the sake of man" (viii. 21)—"through the sin of man." "To the ground shall not be forgiven the blood shed upon it" (Num. xxi. 33)—"the innocent blood."

23. For the sake of avoiding similes, metonymical and allegorical passages, too difficult for the comprehension of the multitude: e. g. "Thy seed like the dust of the earth" (Gen. xiii. 16)—"mighty as the dust of the earth." "I am too small for all the benefits" (Gen. xxxii. 10)—"My good deeds are small." "And the Lord thy God will circumcise thy heart"—"the folly of thy heart."

24. For the sake of elucidating apparent obscurities, &c., in the written Law. "Therefore shall a man leave his father and his mother" (Gen. ii. 24)—"the home" (not really his parents). "The will of Him who dwelleth in the bush"—"of Him that dwelleth in heaven" [whose Shechina is in heaven], and who revealed Himself in the bush to Moses."

25. In favour of the oral Law and the traditional explanations generally. "He punishes the sins of the parents on their children" (Ex. xx. 5), has the

addition, "when the children follow the sins of their parents" (comp. Ex. xvi. 19). "The righteous and the just ye shall not kill" (Ex. xxiii. 7)—"He who has left the tribunal as innocent, thou shalt not kill him," i. e., according to the Halacha he is not to be arraigned again for the same crime. "Doorposts" (*mesuoth*) (Deut. vi. 9)—"And thou shalt write them . . . and after them upon the posts," &c.

(D.) Alteration of language and meaning.

26. In honour of the Divine Being, to avoid apparent multiplicity or a likeness. "Behold man will be like one of us, knowing good and evil" (Gen. iii. 22)—"He will be the only one in the world to know good and evil." "For who is a God in heaven and on earth who could do like Thy deeds and powers?" (Deut. iii. 24)—"Thou art God, Thy Divine Presence (Shechina) is in heaven above, and reigns on earth below, and there is none who does like unto Thy deeds," &c.

27. Alteration of epithets employed of God. "And before Thee shall I hide myself" (Gen. iv. 14)—"And before Thee it is not possible to hide." "This is my God and I will praise Him, the God of my father and I will extol Him" (Ex. xv. 2)—"This is my God, and I will build Him a sanctuary; the God of my fathers, and I will pray before Him." "In one moment I shall go up in thy midst and annihilate thee"—"For one hour will I take away my majesty from among thee" (since no evil can come from above).

28. For the ennobling of the sense. "Great is Jehovah above all gods"—"Great is God, and there is no other god beside Him." "Send through him whom thou wilt send" (Ex. iv. 13)—"through him who is worthy to be sent."

29. In honour of the nation and its ancestors. "And the souls they made in Haran" (Gen. xii. 5)—"the souls they made subject to the Divine Law in Haran." "And Isaac brought her into the tent of his mother Sarah" (Gen. xxiv. 67)—"And so righteous were her works, like the works of his mother Sarah." "And he bent his shoulder to bear, and he became a tributary servant" (Gen. xlix. 15)—"And he will conquer the cities of the nations and destroy their dwelling-places, and those that will remain there will serve him and pay tribute to him." "People, foolish and not wise" (Deut. xxxii. 6)—"People who has received the Law and has not become wise."

30. Explanatory of tropical and metonymical phrases. "And besides thee no man shall raise his hand and his foot in the whole land of Egypt" (Gen. xli. 44)—"There shall not a man raise his hand to seize a weapon, and his foot to ride on a horse."

31. To ennoble or improve the language. "Garments of skin" (Gen. iii. 21)—"Garments of honour on the skin of their flesh." "Thy two daughters"

יִדְעִיתִי גְּלִי קִדְמִי
לֹא אֶתְגַּלִּי לִי דֹאקְבֵל בְּמִימְרִיהָ
אֶחָד הֵם אֶחָדָה
לְמַטְנֵי בָהֶן שֹׁפֵר רִעִיָּה בִּי

were who are found with thee" (Gen. xix. 15)—"who were found faithful with thee." "May Reuben live and not die" (Deut. xxxiii. 6)—"May Reuben live in the everlasting life."

The foregoing examples will, we trust, be found to bear out sufficiently the judgment given above on this Targum. In spite of its many and important discrepancies, it never for one moment forgets its aim of being a clear, though free, translation for the people, and nothing more. Wherever it deviates from the literalness of the text, such a course, in its case, is fully justified—nay, necessitated—either by the obscurity of the passage, or the wrong construction that naturally would be put upon its wording by the multitude. The explanations given agree either with the real sense, or develop the current tradition supposed to underlie it. The specimens adduced by other investigators, however differently classified or explained, are easily brought under the foregoing heads. They one and all tend to prove that Onkelos, whatever the objections against single instances, is one of the most excellent and thoroughly competent interpreters. A few instances only—and they are very few indeed—may be adduced, where even Onkelos, as it would appear, "dormitat." Far be it from us for one moment to depreciate, as has been done, the infinitely superior knowledge both of the Hebrew and Chaldean idioms on the part of the writers and editors of our document, or to attribute their discrepancies from modern translations to ignorance. They drank from the fullness of a highly valuable traditional exegesis, as fresh and vigorous in their days as the Hebrew language itself still was in the circles of the wise, the academies and schools. But we have this advantage, that words which then were obsolete, and whose meaning was known no longer—only guessed at—are to us familiar by the numerous progeny they have produced in cognate idioms, known to us through the mighty spread of linguistic science in our days; and if we are not aided by a traditional exegesis handed down within and without the schools, perhaps ever since the days of the framing of the document itself, neither are we prejudiced and fettered by it. Whatever may be implied and hidden in a verse or word, we have no reason to translate it accordingly, and, for the attaining of this purpose, to overstrain the powers of the roots. Among such small shortcomings of our translator may be mentioned that he appears to have erroneously derived *למלכא* (Gen. iv. 7) from *למלך*; that *למלכא* (xx. 6) is by him rendered *למלך*; *למלכא* (Gen. xli. 43) by *למלכא*; *למלכא* (Deut. xxiv. 5) *למלכא*; and the like. Comp. however the Commentators on these passages.

The bulk of the passages generally adduced as proofs of want of knowledge on the part of Onkelos have to a great part been shown in the course of the foregoing specimens to be intentional deviations; many other passages not mentioned merely instance the want of knowledge on the part of his critics.

Some places, again, exhibit that blending of two distinct translations, of which we have spoken; the catchword being apparently taken in two different senses. Thus Gen. xiii. 13, where he translates: "And Abraham lifted up his eyes after these, and beheld there was a ram;" he has not "in his perplexity" mistranslated *למלך* for *למלך*, but he has only placed for the sake of *למלך* the *למלך* after *למלך*.

the verb (he saw), instead of the noun (ram); and the *למלך*, which is moreover wanting in some texts, has been added, not as a translation of *למלך* or *למלך*, but in order to make the passage more lucid still. A similar instance of a double translation is found in Gen. ix. 6: "Whosoever sheds a man's blood, by man shall his blood be shed"—rendered "Whosoever sheds the blood of man, by witnesses through the sentence of the judges shall his blood be shed;" *למלך*, by man, being taken first as "witness," and then as "judges."

We may further notice the occurrence of two Messianic passages in this Targum: the one, Gen. xlix. 10, Shiloh; the other, Num. xxiv. 17, "sceptre;" both rendered "Messiah."

A fuller idea of the "Genius" of Onkelos as Translator and as Paraphrast, may be arrived at from the specimens subjoined in pp. 1659-61.

We cannot here enter into anything like a minute account of the dialect of Onkelos or of any other Targum. Regarding the linguistic shades of the different Targums, we must confine ourselves to the general remark, that the later the version, the more corrupt and adulterated its language. Three dialects, however, are chiefly to be distinguished: as in the Aramaic idiom in general, which in contradistinction to the Syriac, or Christian Aramaic, may be called Judæo-Aramaic, so also in the different Targums; and their recognition is a material aid towards fixing the place of their origin; although we must warn the reader that this guidance is not always to be relied upon.

1. The Galilean dialect, known and spoken of already in the Talmud as the one which most carelessly confounds its sounds, vowels as well as consonants. "The Galileans are negligent with respect to their language," and care not for grammatical forms" is a common saying in the Gemara. We learn that they did not distinguish properly between B and P (ב, פ), saying *Tapula* instead of *Tabula*, between Ch and K (כ, ק) saying *xalpis* for *kupis*. Far less could they distinguish between the various gutturals, as is cleverly exemplified in the story where a Judæan asked a Galilean, when the latter wanted to buy an *אמר*, whether he meant *אמר* (wool), or *אמר* (a lamb), or *אמר* (wine), or *אמר* (an ass). The next consequence of this their disregard of the gutturals was, that they threw them often off entirely at the beginning of a word *per aphæresin*. Again they contracted, or rather wedged together, words of the most dissimilar terminations and beginnings. By confounding the vowels like the consonants, they often created entirely new words and forms. The Mappik H (ה) became Ch (somewhat similar to the Scotch pronunciation of the initial H). As the chief reason for this Galilean confusion of tongues (for which comp. Matt. xxvi. 73; Mark xiv. 70) may be assigned the increased facility of intercourse with the neighbouring nations owing to their northern situation.

2. The Samaritan Dialect, a mixture of vulgar Hebrew and Aramean, in accordance with the origin of the people itself. Its chief characteristics are the frequent use of the *Ain* (which not only stands for other gutturals, but is even used as *vowel lectus*), the commutation of the gutturals in general, and the indiscriminate use of the mute consonants ב for פ, ק for כ, ח for פ, &c.

3. The Judæan or Jerusalem Dialect (comp.

לא דימא לישא * לא הקפידו *
S N

Ned. 66b) scarcely ever pronounces the gutturals at the end properly, often throws them off entirely. Jeshuā, becomes Jeshā; Shebā—Shib. Many words are peculiar to this dialect alone. The appellations of "door," "light," "reward," &c., are totally different from those used in the other dialects. Altogether all the peculiarities of provincialism shortening and lengthening of vowels, idiomatic phrases and words, also an orthography of its own, generally with a fuller and broader vocalisation, are noticeable throughout both the Targums and the Talmud of Jerusalem, which, for the further elucidation of this point as of many others have as yet not found an investigator.

The following recognised Greek words, the greater part of which also occur in the Talmud and Midrash, are found in Onkelos: Ex. xviii. 25, 'βήρυλλος; Ex. xviii. 11, *γλυφά; Gen. xviii. 17, *ιδιότης; Lev. xi. 30, *καλώτης; Ex. xviii. 19, *θρόνιος (Plin. xxxvii. 68); Ex. xxxix. 11, *καρχηδόνιος, comp. Pes. der. Kah. xxii. (Carbunculi); Deut. xx. 20, *χαρδανω (Ber. R. xviii.); Ex. xviii. 20, *χρῶμα; Num. xv. 38, Deut. xii. 12, *κρῶμα; Ex. xxx. 34, *κίστρος; Gen. xxxvii. 28, *ἀγῶν; Ex. xxiv. 16, *φάρος; Ex. xvi. 6, *πόρπη; Gen. vi. 14, *κέδος; Ex. xviii. 19, *πέγχερος (Plin. xxxvii. 4). To these may be added the unrecognised *κεραμὶς (Ex. xxi. 18), *λιβρό-χης, or λεβρόχη (Gen. xxx. 14), &c.

The following short rules on the general mode of transcribing the Greek Letters in Aramaic and Syriac (Targum, Talmud, Midrash, &c.), may not be out of place:—

Γ before palatals, pronounced like ν, becomes J. Z is rendered by Ḳ.

H appears to have occasionally assumed the pronunciation of a consonant (Digamma); and a Ḳ is inserted.

Θ is Π, T, D. But this rule, even making allowances for corruptions, does not always seem to have been strictly observed.

K is P, sometimes J.

M, which before labials stands in lieu of a ν, becomes J: occasionally a J is inserted before labials where it is not found in the Greek word.

N, generally D, sometimes, however, J or Z.

Π is D, sometimes, however, it is softened into J.

P is sometimes altered into Ḳ or J.

Ρ becomes either Π or Ḳ at the beginning of a word.

Σ either D or J.

The *spiritus asper*, which in Greek is dropped in the middle of a word, reappears again sometimes (*συνέδαι*—*Sanwedrin*). Even the *lenis* is represented sometimes by a Π at the beginning of a word; sometimes, however, even the *asper* is dropped.

As to the vowels no distinct rule is to be laid down, owing principally to the original want of vowel-points in our texts.

Before double consonants at the beginning of a word an *N* *protheticum* is placed, so as to render the pronunciation easier. The terminations are frequently Hebraised:—thus *oi* is sometimes rendered by the termination of the Masc. Pl. *oi*, &c.

• כבא לרשא	• כבא לרשא	• כבא לרשא
• אנר לרשא	• אנר לרשא	• אנר לרשא
• גלף	• הדיוט	• חלמא
• מרשא	• מרשא	• מרשא

A curious and instructive comparison may be instituted, between this mode of transcription of the Greek letters into Hebrew, and that of the Hebrew letters into Greek, as found chiefly in the LXX.

Κ sometimes inaudible (*spirit. len.*) 'Ασπρὸν 'Ελκωδ; sometimes audible (as *spirit. asper*), 'Ασπρῶν, 'Ηλκωδ.

Ζ = β: 'Ρεβέκκα; sometimes φ: 'Ιαννῶν, sometimes υ: 'Ραυῶν, sometimes μβ: 'Ζερε μβαβῶν, sometimes it is completely changed into μ: 'Ιαννῶν (2 Chr. xvi. 6).

Ζ = γ: Γόμερ, sometimes κ: Δοφέ, sometimes χ: Χερόχ.

Τ = δ: once = τ Ματθαῖο (Gen. xxxvi. 39).

Π = κ, either *spirit. asper* like 'Οδοφῶν, or *spirit. len.* like 'Αβέλ.

Ι = υ, not the vowel, but our υ: 'Εσν, Δει: thus also ον (as the Greek writers often express the Latin υ by ον): 'Ιεσσαῖ: sometimes = β: 'Ζαβῶ (Gen. xiv. 5); sometimes it is entirely let out, 'Αστί for Vashiti.

Ι = ζ, sometimes σ: 'Σαβουλῶν, Χασβί; rarely ξ: Βασί (Gen. xxii. 21).

Π, often entirely omitted, or represented by a *spirit. len.* in the beginning, or the reduplication of the vowel in the middle or at the end of the word, sometimes = χ: Χάμ; sometimes = α: Τίβη (Gen. xxii. 24).

Θ = τ: 'Χαφῶν; sometimes = δ: Φοδῶ (Gen. i. 6); or θ: 'Ελιφθαλῶν (2 Sam. v. 16).

Ι = λ: 'Ιαννῶν, or λ before ρ (λ): 'Ιερραῖα. Between several vowels it is sometimes entirely omitted: 'Ιωαβῶν.

Ζ = χ: 'Χαφῶν; sometimes κ: 'Σαβουλῶν (Gen. x. 7); rarely = γ: Γαφθερῶν.

Β, J, Γ = λ, ν, ρ; but they are often found interchanged: owing perhaps to the similarity of the Greek letters. J is sometimes also rendered μ (see above).

Δ = μ, sometimes β: Νεβρόδ, 'Σαβῶν (1 Chr. i. 47).

Ω and Ο = σ: Συμεῶν, Σελῶ, Σίλ.

Υ = *spirit. len.*: 'Εφρόν; sometimes = γ (ζ) Γε μορῶν; sometimes κ: 'Αρβέκ (Gen. xxiii. 3).

Δ = φ: Φαλέγ, or π: 'Σαλαμῶν.

Υ = σ: Σιδῶν; sometimes ζ: Οδζ (Gen. x. 2. Cod. Alex. "Ως; xxii. 21: "Ωζ).

Ρ = κ: Βαλῶν; sometimes χ: Χετταῶν; also γ: Χελέγ.

Π = θ: 'Ιαφῶν; sometimes τ: Τοχῶν.

As to the Bible Text from which the Targum was prepared, we can only reiterate that we have no certainty whatever on this head, owing to the extraordinarily corrupt state of our Targum text. Pages upon pages of Variants have been gathered by Cappellus, Kennicott, Buxtorf, De Rossi, Clermont Luzzatto, and others, by a superficial comparison of a few copies only, and those chiefly printed *casu*. Whenever the very numerous MSS. shall be collated, then the learned world may possibly arrive to certain probable conclusions on it. It will appear, however, that broadly speaking, our present Masoretic text has been the one from which the

• כבא לרשא	• כבא לרשא	• כבא לרשא
• אנר לרשא	• אנר לרשא	• אנר לרשא
• גלף	• הדיוט	• חלמא
• מרשא	• מרשא	• מרשא

Onk. Version was, if not made, yet edited, at all events; unless we assume that late hands have been intentionally busy in mutually assimilating text and translation. Many of the inferences drawn by De Rossi and others from the discrepancies of the version to discrepancies of the original from the Masor. Text, must needs be rejected if Onkelos' method and phraseology, as we have exhibited it, are taken into consideration. Thus, *wt'n*, Ex. xxiv. 7, "before the people" is found in Onkelos, while our Hebrew text reads "in the ears," it by no means follows that Onkelos read *וְיִשְׂרָאֵל*: it is simply his way of explaining the unusual phrase, to which he remains faithful throughout. Or, "Lead the people unto the place (A.V.) of which I have spoken" (Ex. xxii. 34), is solely Onkelos' translation of *לְעֵינֵי הָאֵל*, *scil.* the place, and no *מִקְדָּשׁ* need be conjectured as having stood to Onkelos' copy; as also, Ex. ix. 7, his addition "From the cattle of the children of Israel" does not prove a *וְיִשְׂרָאֵל* to have stood in his Codex.

And this also settles (or rather leaves unsettled), the question as to the authenticity of the Targumic Texts, such as we have them. Considering that no MS. has as yet been found older than at most 600 years, even the careful comparison of all those that do exist would not much further our knowledge. As far as those existing are concerned, they teem with the most palpable blunders,—not to speak of variants, owing to sheer carelessness on the part of the copyists;—but few are of a nature damaging the sense materially. The circumstance that Text and Targum were often placed side by side, column by column, must have had no little share in the incorrectness, since it was but natural to make the Targum resemble the Text as closely as possible, while the nature of its material differences was often unknown to the scribe. In fact, the accent itself was made to fit both the Hebrew and the Chaldean wherever a larger addition did not render it utterly impossible. Thus letters are inserted, omitted, thrust in, blotted out, erased, in an infinite number of places. But the difference goes still further. In some Codices synonymous terms are used most arbitrarily as it would appear: *אֱלֹהִים* and *אֱלֹהִים* earth, *אֱדָם*, *אֱדָם* man, *אֱדָם* and *אֱדָם* path, *הוּא* and *הוּא*, Jehovah and Elohim, are found to replace each other indiscriminately. In some instances, the Hebrew Codex itself has, to add to the confusion, been emended from the Targum.

A Masorah has been written on Onkelos, without, however, any authority being inherent in it, and without, we should say, much value. It has never been printed, nor, as far as we have been able to ascertain, is there any MS. now to be found in this country, or in any of the public libraries abroad. What has become of Buxtorf's copy, which he intended to add to his never printed "Babylonia"—a book devoted to this same subject—we do not know. Lozzatto has lately found such a "Masorah" in a Pentateuch MS., but he only mentions some variants contained in it. Its title must not mislead the reader; it has nothing whatever to do with the Masorah of the Bible, but is a recent work, like the *Masorah of the Talmud*, which has nothing whatever to do with the Talmud Text.

The MSS. of Onkelos are extant in great numbers—a circumstance easily explained by the injunction that it should be read every Sabbath at home, if not in the Synagogue. The Bodleian has 5, the British Museum 2, Vienna 6, Augsburg 1,

Nuremberg 2, Altdorf 1, Casselruhe 3, Stuttgart 2, Erfurt 3, Dresden 1, Leipzig 1, Jena 1, Dussau 1, Helmsstadt 2, Berlin 4, Breslau 1, Brieg 1, Regensburg 1, Hamburg 7, Copenhagen 2, Upsala 1, Amsterdam 1, Paris 8, Molsheim 1, Venice 8, Turin 2, Milan 4, Leghorn 1, Sienna 1, Genoa 1, Florence 5, Bologna 2, Padua 1, Trieste 2, Parma about 40, Rome 18 more or less complete Codd. containing Onkelos.

Editio Princeps, Bologna 1482, fol. (Abr. b. Chajjim) with Hebr. Text and Rashi. Later Edd. Soria 1490, Lisbon 1491, Constantinople 1505: from these were taken the texts in the Complutensian (1517) and the Venice (Bomberg) Polyglotts (1518, 1526, 1547-49), and Buxtorf's Rabbinical Bible (1619). This was followed by the Paris Polyglott (1645), and Walton's (1657). A recent and much emended edition dates Wilna 1852.

Of the extraordinary similarity between Onkelos and the Samaritan version we have spoken under SAMARITAN PENTATEUCH [p. 1114]. There also will be found a specimen of both, taken from the Barberini Codex. Many more points connected with Onkelos and his influence upon later Hermeneutics and Exegesis, as well as his relation to earlier or later versions, we have no space to enlarge upon, desirable as an investigation of these points might be. We have, indeed, only been induced to dwell so long upon this single Targum, because in the first instance a great deal that has been said here will, *mutatis mutandis*, hold good also for the other Targums; and further, because Onkelos is THE CHALDEE VERSION *κατ' ἑξοχὴν*, while, from Jonathan downwards, we more and more leave the province of Version and gradually arrive from Paraphrase to Midrash-Haggadah. We shall therefore not enter at any length into these, but confine ourselves chiefly to main results.

II. TARGUM ON THE PROPHETS

viz. Joshua, Judges, Samuel, Kings, Isaiah, Jeremiah, Ezekiel, and the twelve Minor Prophets,—called TARGUM OF JONATHAN BEN UZZIEL.

Next in time and importance to Onkelos on the Pentateuch stands the Targum on the Prophets, which in our printed Edd. and MSS.—none older, we repeat it, than about 800 years—is ascribed to Jonathan ben Uzziel, of whom the Talmud contains the following statements:—(1.) "Eighty disciples had Hillel the Elder, thirty of whom were worthy that the Shechinah (Divine Majesty) should rest upon them, as it did upon Moses our Lord; peace be upon him. Thirty of them were worthy that the sun should stand still at their bidding as it did at that of Joshua ben Nun. Twenty were of intermediate worth. The greatest of them all was Jonathan b. Uzziel, the least R. Johanan b. Saccai; and it was said of R. Johanan b. Saccai, that he left not (uninvestigated) the Bible, the Mishna, the Gemara, the Halachahs, the Haggadahs, the subtleties of the Law, and the subtleties of the Soferim . . . ; the easy things and the difficult things [from the most awful Divine mysteries to the common popular proverbs] . . . If this is said of the least of them, what is to be said of the greatest, i.e. Jonathan b. Uzziel?" (Bab. Bath. 134 a; comp. Succ. 28 a). (2.) A second passage (see Onkelos) referring more especially to our present subject, reads as follows: "The Targum of Onkelos was made by Onkelos the Proselyte from the mouth of R. Eliezer and R. Jehoshua, and that of the Prophets by Jonathan b. Uzziel from the mouth
5 N 3

of Haggai, Zechariah, and Malachi. And in that hour was the Land of Israel shaken three hundred parangs. . . . And a voice was heard, saying, 'Who is this who has revealed my secrets unto the sons of man?' Up rose Jonathan ben Uzziel and said: 'It is I who have revealed Thy secrets to the sons of man. . . . But it is known and revealed before Thee, that not for my honour have I done it, nor for the honour of my father's house, but for Thine honour; that the disputes may cease in Israel.' . . . And he further desired to reveal the Targum to the Hagiographa, when a voice was heard:—'Enough.' And why?—because the day of the Messiah is revealed therein (Meg. 3a).² Wonderful to relate, the sole and exclusive authority for the general belief in the authorship of Jonathan b. Uzziel, is this second Hagadiatic passage exclusively; which, if it does mean anything, does at all events not mean our Targum, which is found mourning over the "Temple in ruins," full of invectives against Rome (Sam. xi. 5; Is. xxiv. 9, &c. &c.), mentioning Armilus (Is. x. 4) (the Antichrist), Germania (Ez. xxxviii. 6):—not to dwell upon the thousand and one other internal and external evidences against a date anterior to the Christian era. If interpolations must be assumed,—and indeed Rashi speaks already of corruptions in his MSS.—such solitary additions are at all events a very different thing from a wholesale system of intentional and minute interpolation throughout the bulky work. But what is still more extraordinary, this belief—long and partly still upheld most reverentially against all difficulties—is completely modern: that is, not older than at most 600 years (the date of our oldest Targum MSS.), and is utterly at variance with the real and genuine sources: the Talmud, the Midrash, the Babylonian Schools, and every authority down to Hai Gaon (12th cent.). Frequently quoted as this Targum is in the ancient works, it is never once quoted as the Targum of Jonathan. But it is invariably introduced with the formula: "R. Joseph* (bar Chama, the Blind, euphemistically called the clear-sighted, the well-known President of Pumbeditha in Babylonia, who succeeded Rabba in 319 A.D.) says," &c. (Moed Katon 26 a, Pesach. 68 a, Sanh. 94 b). Twice even it is quoted in Joseph's name, and with the addition, "Without the Targum to this verse (due to him) we could not understand it." This is the simple state of the case: and for more than two hundred years critics have lavished all their acumen to defend what never had any real existence, or at best owed its apparent existence to a heading added by a superficial scribe.

The date which the Talmud thus in reality assigns to our Targum fully coincides with our former conclusions as to the date of written Targums in general. And if we may gather thus much from the legend that to write down the Targum to the Prophets was considered a much bolder undertaking—and one to which still more reluctantly leave was given—than a Targum on the Pentateuch, we shall not be far wrong in placing *this* Targum some time, although not long, after Onkelos, or about the middle of the fourth century;—the latter years of R. Joseph, who, it is said, occupied himself chiefly with the Targum when he had become blind. The reason given for

that reluctance is, although by no means expressed perfectly clear: "The Targum on the Prophets revealed the secrets"—that is, it allowed free scope to the wildest fantasy to run riot upon the prophetic passages—tempting through their very obscurity,—and to utter explanations and interpretations relative to present events, and oracles of its own for future times, which might be fraught with grave dangers in more than one respect. The Targum on the Pentateuch (permitted to be committed to writing, Meg. 3 a; Kidd. 69 a) could not but be, even in its written form, more sober, more dignified, more within the bounds of fixed and well known traditions, than any other Targum; since it had originally been read publicly, and been checked by the congregation as well as the authorities present:—as we have endeavoured to explain in the Introduction. There is no proof, on the other hand, of more than fragments from the Prophets having ever been read and translated in the synagogue. Whether, however, R. Joseph was more than the redactor of this the second part of the Bible Targum, which was originated in Palestine, and was reduced to its final shape in Babylon, we cannot determine. He may perhaps have made considerable additions of his own, by filling up gaps or rejecting wrong versions of some parts. As much seems certain, that the schoolmen of his Academy were the collectors and revisers, and he gave it that stamp of unity which it now possesses, spite of the occasional difference of style:—adapted simply to the variegated hues and diction of its manifold biblical originals.

But we do not mean to reject in the main either of the Talmudical passages quoted. We believe that there was such a man as Jonathan b. Uzziel, that he was one of the foremost pupils of Hillel, and that he did translate, either privately or publicly, parts of the prophetic books; chiefly, we should say, in a mystical manner. And so startling were his interpretations—borne aloft by his high fame—that who but prophets themselves could have revealed them to him? And, going a step further, who could reveal prophetic allegories and mysteries of *all* the prophetic books, but those who, themselves the last in the list, had the whole body of sacred oracles before them? This appears to us the only rational conclusion to be drawn from the facts:—as they stand, not as they are imagined. That notwithstanding a few snatches of this *original* paraphrase or Midrash could be embodied in our Targum, we need not urge. Yet for these even we have no proof. Zunz, the *facile princeps* of Targumic as well as Midrashic investigation, who, as late as 18 (*Gottsch. Vortr.*), still believed himself in the modern notion of Jonathan's authorship ("first half of first century, A.D."), now utterly rejects the notion of "our possessing anything of Jonathan ben Uzziel" (Geiger's *Zeitschr.* 1837, p. 250).

Less conservative than our view, however, are the views of the modern School (Rappoport, Luzzatto, Frankel, Geiger, Levy, Bauer, Jahn, Berthmann, Levysohn, &c.), who not only reject the authorship of Jonathan, but also utterly deny that there was any ground whatsoever for assigning a Targum to him, as is done in the Talmud. The passage, they say, is not older, but younger than our Targum, and in fact does apply, erroneously of course, to the and to no other work of a similar kind. The passage is a cry for a great "name, upon which to hang" some Talmudical phraseology—all that is cherished and venerated, and the wish of those eager to singe it

* "Sinal," "Possessor of Wheat," in allusion to his mastery over the traditions.

this Version a lasting authority, found in Jonathan the most fitting person to father it upon. Was he not the greatest of the great, "who had been dusted with the dust of Hillel's feet?" He was the wisest of the wise, the one most imbued with knowledge human and divine, of all those eighty, the least of whom was worthy that the sun should stay its course at his bidding. Nay, such were the flames^a that arose from his glowing spirit, says the hyperbolic Haggadah, that "when he studied in the Law, the very birds that flew over him in the air, were consumed by fire" (*misrephus*—"not, as Landau, in the preface to his *Aruch*, apologetically translates, *became Seraphs*). At the same time we readily grant that we see no reason why the great Hillel himself, or any other much earlier and equally eminent Master of the Law, one of the Soferim perhaps, should not have been fired upon.

Another suggestion, first broached by Drusius, and long exploded, has recently been revived under a somewhat modified form. Jonathan (Godgiven), Drusius said, was none else but Theodotion (God-given), the second Greek translator of the Bible after the LXX., who had become a Jewish proselyte. Considering that the latter lived under Commodus II., and the former at the time of Christ; that the latter is said to have translated the Prophets only (neither the Pentateuch, nor the Hagiographa), while the former translated the whole Bible; that Jonathan translated into Aramaic and Theodotion into Greek,—not to mention the fact that Theodotion was, to say the least, a not very competent translator, since "ignorance or negligence" (Montfaucon, *Pref. to Hexapla*), or both, must needs be laid at the door of a translator, who, when in difficulties, simply transcribes the hard Hebrew words into Greek characters, without troubling himself any further;^d while the mastery over both the Hebrew and the Aramaic displayed in the Jonathanic Version are astounding:—considering all this, we need not like Walton ask caustically, why Jonathan ben Uzziel should not rather be identified with the Emperor Theodosius, whose name also is "Godgiven";—but dismiss the suggestion as Carpent long since dismissed it. We are, however, told now (Luzzatto, Geiger, &c.), that as the Babylonian Targum in the Pentateuch was called a Targum "in the manner of Aquila or Onkelos," i. e. of sterling value, so also the continuation of the Babylonian Targum, which embraced the Prophets, was called a Targum "in the manner of Theodotion"—Jonathan; and by a further stretch, Jonathan-Theodotion became the Jonathan b. Uzziel. We cannot but disagree with this hypothesis also—based on next to nothing, and carried to more than the usual length of speculation. While Akylā is quoted continually in the Talmud, and is deservedly one of the best known and best beloved characters, every trait and incident of whose personal history is told even twice over, not the slightest trace of such a person as Theodotion is to be found anywhere in the Talmudical literature. What, again, was it that could have acquired so transcendent a fame for his translation and himself, that a Version put into the mouths of the very prophets should be called after him, "in order that the people should like it"?—a translation which

was, in fact, deservedly unknown, and, properly speaking, no translation at all. It was, as we learn, a kind of private emendation of some LXX. passages, objectionable to the pious Proselyte in their then corrupted state. It was only the Book of Daniel which was retained from Theodotion's pen, because in this book the LXX. had become past correction. If, moreover, the intention was "to give the people a Hebrew for a Greek name, because the latter might sound too foreign," it was so entirely gratuitous one. Greek names abound in the Talmud, and even names beginning with Theo like Theodorus are to be found there.

On the other hand, the opinion has been broached that this Targum was a post-Talmudical production, belonging to the 7th or 8th cent. A.D. For this point we need only refer to the Talmudical quotations from it. And when we further add, that Ju. Morinus, a man as conspicuous by his want of knowledge as by his most ludicrous attacks upon all that was "Jewish" or "Protestant" (it was he, e.g. who wished to see the "forged" Masoretic Code corrected from the Samaritan Pentateuch, q.v.) is the chief, and almost only, defender of this theory, we have said enough. On the other theory of there being more than one author to our Targum (Elchhorn, Bertholdt, De Wette), combated fiercely by Gesenius, Hävernick, and others, we need not further enlarge, after what we have already said. It certainly is the work, not of one, or of two, but of twenty, of fifty and more Meturgemanim, Haggadists, and Halachists. The edition, however, we repeat it advisedly, has the undeniable stamp of one master-mind; and its individual workings, its manner and peculiarity are indelibly impressed upon the whole labour from the first page to the last. Such, we hold, must be the impression upon every attentive reader; more especially, if he judiciously distinguishes between the first and the last prophets. That in the historical relations of the former, the Version must be, on the whole, more accurate and close (although here too, as we shall show, Haggadah often takes the reins out of the Meturgeman's or editor's hands), while in the obscure Oracles of the latter the Midrash reigns supreme: is exactly what the history of Targumic development leads us to expect.

And with this we have pointed out the general character of the Targum under consideration. Gradually, perceptibly almost, the translation becomes the *תרגומא*, a frame, so to speak, of allegory, parable, myth, tale, and oddly masked history—such as we are wont to see in Talmud and Midrash, written under the bloody censorship of Esau-Rome; interspersed with some lyrical pieces of rare poetical value. It becomes, in short, like the Haggadah, a whole system of Eastern phantasmagorias whirling round the sun of the Holy Word of the Seer. Yet, it is always aware of being a translation. It returns to its verse after long excursions, often in next to no perceptible connexion with it. Even in the midst of the full swing of fancy, awayed to and fro by the many currents of thought that arise out of a single word, snatches of the verse from which the flight was taken will suddenly appear on the surface like a refrain or a keynote, showing that in reality there is a

^a The simile of the fire—"as the Law was given in fire on Sinai"—is a very favourite one in the Midrash.

^b יו"ט.

^c e.g., Lev. vii. 12, יו"ט, T. פתחא, or פתחא, by

way of emendation; Lev. xlii. 8, תתבסס, מנפסס; ib. תתבסס, מנפסס; Lev. xviii. 23, תתבסס, מנפסס; Is. lxiv. 6, תתבסס, מנפסס.

connexion, though hidden to the uninitiated. For long periods again, it adheres most strictly to its text and to its verse, and translates most conscientiously and closely. It may thus fairly be described as holding in point of interpretation and enlargement of the text, the middle place between Onkelos, who only in extreme cases deviates into paraphrase, and the subsequent Targums, whose connexion with their texts is frequently of the most flighty character. Sometimes indeed our Targum coincides so entirely with Onkelos,—being, in fact, of one and the same origin and growth, and a mere continuation and completion as it were of the former work, that this similarity has misled critics into speculations of the priority in date of either the one or the other. Hävernick, e.g. holds—against Zunz—that Onkelos copied, plagiarised in fact, Jonathan. We do not see, quite apart from our placing Onkelos first, why either should have used the other. The three passages (Judg. v. 26 and Deut. xxii. 5; 2 K. xiv. 6 and Dent. xxiv. 16; Jer. xlviii. 45, 46 and Num. xxi. 28, 29) generally adduced, do not in the first place exhibit that literal closeness which we are led to expect, and which alone could be called “copying;” and in the second place, the two last passages are not, as we also thought we could infer from the words of the writers on either side, extraneous paraphrastic additions, but simply the similar translations of similar texts: while in the first passage Jonathan only refers to an injunction contained in the Pentateuch-verse quoted. But even had we found such paraphrastic additions, apparently not belonging to the subject, we should have accounted for them by certain traditions—the common property of the whole generation,—being recalled by a certain word or phrase in the Pentateuch to the memory of the one translator; and by another word or phrase in the Prophets to the memory of the other translator. The interpretation of Jonathan, where it adheres to the text, is mostly very correct in a philosophical and exegetical sense, closely literal even, provided the meaning of the original is easily to be understood by the people. When, however, similes are used, unfamiliar or obscure to the people, it unhesitatingly dissolves them and makes them easy in their mouths like household words, by adding as much of explanation as seems fit; sometimes, it cannot be denied, less sagaciously, even incorrectly, comprehending the original meaning. Yet we must be very cautious in attributing to a Version which altogether bears the stamp of thorough competence and carefulness that which may be single corruptions or interpolations, as we find them sometimes indicated by an introductory “Says the Prophet”¹; although, as stated above, we do not hesitate to attribute the passages displaying an acquaintance with works written down to the 4th century, and exhibiting popular notions current at that time, to the Targum in its original shape. Generally speaking, and holding the difference between: the nature of the Pentateuch (supposed to contain in its very letters and signs Halachistic references, and therefore only to be handled by the Meturgeman with the greatest care) and that of the Prophets (freest Homiletes themselves) steadily in view—the rules laid down above with respect to the discrepancies between Original and Targum,

in Onkelos, hold good also with Jonathan. Antirepomanisms it avoids carefully. Geographical names are, in most cases, retained as in the Original, and where translated, they are generally correct. Its partiality for Israel never goes so far that anything derogatory to the character of the people should be willingly suppressed, although a certain reluctance against dwelling upon its iniquities and punishments longer than necessary, is visible. Where, however, that which redounds to the praise of the individual—more especially of heroes, kings, prophets—and of the community, is contained in the text, there the paraphrase lovingly carries. Future bliss, in this world and the world to come, liberation from the oppressor, restoration of the Sanctuary on Mount Zion, of the Kingdom of Jehovah and the House of David, the re-establishment of the nation and of its full and entire independence, as well as of the national worship, with all the primitive splendour of Priest and Levite, singer and musician and prophet—these are the favourite dreams of the people and of Jonathan, and no link is overlooked by which these strains may be drawn in as variations to the Biblical theme. Of Messianic passages, Jonathan has pointed out those mentioned below²; a number not too large, if we consider how, with the increased misery of the people, their ardent desire to see their Deliverer appear speedily must have tried to find as many places in the Bible as possible, warranting His arrival. So far from their being suppressed (as, by one of those unfortunate accidents that befall sometimes a long string of investigators, who are copying their information at third and fourth hand, has been unblushingly asserted by almost everybody up to Gesenius, who found its source in a *misunderstood sentence of Carpocrates*), they are most prominently, often almost pointedly brought forward. And there is a decided polemical animus inherent in them—temperate as far as appearance goes, but containing many an unspoken word: such as a fervent human mind pressed down by all the woes and terrors, written and unwritten, would whisper to itself in the depths of its despair. These passages extol most rapturously the pomp and glory of the Messiah to come—by way of contrast to the humble appearance of Christ: and all the places where suffering and misery appear to be the lot forecast to the Anointed, it is Israel, to whom the passage is referred by the Targum.

Of further dogmatical and theological peculiarities (and this Targum will one day prove a mine of instruction chiefly in that direction, besides the other vast advantages inherent in it, as in the older Targums, for linguistic, patristic, geographical, historical, and other studies) we may mention briefly the “Stars of God” (Is. xiv. 15; comp. Dan. viii. 10; 2 Macc. ix. 10, being referred—in a similar manner—to “the people of Israel;” the doctrine of the second death (Is. xxii. 14, lxx. 15), &c. As to the general nature of its idiom, what we have said above holds good here. Likewise our remarks on the relation between the text of the Original of Onkelos, and its own text, may stand for Jonathan, who never appears to differ from the Masoretic text without a very cogent reason. Yet, since Jonathan’s MSS., though very much smaller in number, are in a still worse plight than those

¹ מִן הַנְּבוֹנִים.

² 1 Sam. ii. 10; 2 Sam. xxiii. 3; 1 K. iv. 33; Is. iv. 2, & x. 27, xl. 1, 6, xv. 2, xvi. 1, 5, xxviii. 5, xlii. 1,

xliii. 10, xiv. 1, lli. 13, lli. 16; Jer. xxiii. 8, xxx. 21, xxxiii. 13, 15; Hos. ii. 6, xiv. 8; Mic. iv. 8, v. 12, Zeck. iii. 8, iv. 7, vi. 12, x. 4.

of Onkelos, we cannot speak with great certainty on this point. Respecting, however, the individual language and phraseology of the translation, it lacks to a certain, though small, degree, the clearness and transparency of Onkelos; and is somewhat alloyed with foreign words. Not to such a degree, however, that we cannot fully endorse Carpsov's dictum: "Cujus nitor sermonis Chaldaei et dictionis laudatur puritas, ad Onkelosum proxime accedens et parum deflectens a puro torsoque Chaldaismo biblico" (*Crit. Sacr.* p. 461), and incline to the belief of Wolf (*Bibl. Hebr.* ii. 1165): "Quae vero, vel quod ad voces novas et barbaras, vel ad res aetate ejus inferiores, aut futilia nonnulla, quamvis pauca triplicia hujus generis exstant, ibi occurrunt, ex merito famulari cujusdam ingenio adscribuntur." Of the manner and style of this Targum, the few subjoined specimens will we hope give an approximate idea.

In conclusion, we may notice a feature of our Targum, not the least interesting perhaps, in relation to general or "human" literature: viz., that the Shemitic fairy and legendary lore, which for the last two thousand years—as far as we can trace it,—has grown up in East and West to vast glittering mountain-ranges, is to a very great extent to be found, in an embryo state, so to say, in this our Targum. When the literary history of those most wonderful circles of medieval fables—the sole apparent fruit brought home by the crusaders from the Eastern battle-fields—shall come to be written by a competent and thorough investigator, he will have to extend his study of the sources to this despised "fabulous" Targum Jonathan ben Uzziel. And the entire world of pious biblical legend, which Islam has said and sung in the Arabic, Persian, Turkish, and all its other tongues, to the delight of the wise and the simple for twelve centuries now, is contained almost fully developed, from beginning to end, but clearer, purer, and incomparably more poetically conceived, in our Targum-Haggadah.

The *Editio Princeps* dates Leiria, 1494. The later editions are embodied in the Antwerp, Paris, and London Polyglotta. Several single books have likewise been repeatedly edited (comp. Wolff, *Le Lang.* Rosenmüller, &c.).

JUDGES V.

AUTHORISED VERSION.	TARGUM [JONATHAN-BEN-UZZIEL] TO THE PROPHETS.
1 THEN sang Deborah and Barak the son of Abinoam on that day, saying,	1 AND Deborah and Barak the son of Abinoam gave praise for the miracle and the salvation which were wrought for Israel on that day, and spake:
2 Praise ye the Lord for the avenging of Israel, when the people willingly offered themselves.	2 When the children of Israel rebel against the Law, then the nations come over them and drive them out of their cities;
	but when they return to do the Law, then they are mighty over their enemies, and drive them out from the whole territory of the land of Israel. Thus has been broken Sisara and all his armies to his punishment, and to a miracle and a salvation for Israel. Then the wise returned to sit in the houses of the synagogue . . . and to teach unto the people the doctrine of the Law. Therefore praise ye and bless the Lord.

AUTHORISED VERSION.	TARGUM [JONATHAN-BEN-UZZIEL] TO THE PROPHETS.
3 Hear, O ye kings; give ear, O ye princes; I, even I, will sing unto the Lord; I will sing praise to the Lord God of Israel.	3 Hear, ye kings (ye who came with Sisara to the battle-array), listen, ye rulers (ye who were with Jabin the king of Kenaan: not with your armies nor with your power have ye conquered and become mighty over the house of Israel)—said Deborah in prophecy before God: I praise, give thanks and blessings before the Lord, the God of Israel.
4 Lord, when thou wentest out of Seir, when thou marchedst out of the field of Edom, the earth trembled, and the heavens dropped, and the clouds also dropped water.	4 [O Lord, Thy Law which Thou gavest Israel, when they transgress it, then the nations rule over them: but when they return to it, then they become powerful over their enemies.] O Lord, on the day when Thou didst reveal Thyself to give it unto them from Seir, Thou becamest manifest unto them in the splendour of Thy glory over the territories of Edom: the earth trembled, the heavens showered down, the clouds dropped rain.
5 The mountains melted from before the Lord, even that Sinai from before the Lord God of Israel.	5 The mountains trembled before the Lord, the mountains of Tabor, the mountain of Hermon, and the mountain of Carmel, spake with each other, and said one to the other: Upon me the Sheehinah will rest, and to me will it come. But the Sheehinah rested upon Mount Sinai, which is the weakest and smallest of all the mountains. . . . This Sinai trembled and shook, and its smoke went up as goes up the smoke of an oven: because of the glory of the God of Israel which had manifested itself upon it.
6 In the days of Shamgar the son of Anath, in the days of Jael, the highways were unoccupied, and the travellers walked through byways.	6 When they transgressed in the days of Shamgar the son of Anath in the days of Jael, ceased the wayfarers: they who had walked in well-prepared ways had again to walk in furtive paths.
7 The inhabitants of the villages ceased, they ceased in Israel, until that I Deborah arose, that I arose a mother in Israel.	7 Destroyed were the open exits of the land of Israel: their inhabitants were shaken off and driven about, until I, Deborah, was sent to prophecy over the house of Israel.
8 They chose new gods; then was war in the gates: was there a shield or spear seen among forty thousand in Israel?	8 When the children of Israel went to pray unto new idols (errors), which recently had come to be worshipped, with which their fathers did not concern themselves, there came over them the nations and drove them out of their cities: but when they returned to the Law, they could not prevail against them until they made themselves strong, and Sisara went up against them, the enemy and the adversary, with forty thousand chiefs of troops, with fifty thousand holders of the sword, with sixty thousand holders of spears, with seventy thousand holders of shields, with eighty thousand throwers of arrows and slings, besides nine hundred iron chariots which he had with him, and his own chariots. All these thousands and all these hosts could not stand before Barak and the ten thousand men he had with him.

AUTHORISED VERSION.	TARGUM [JONATHAN-BEN-UEZIEL] TO THE PROPHETS.	AUTHORISED VERSION.	TARGUM [JONATHAN-BEN-UEZIEL] TO THE PROPHETS.
9 My heart is toward the governors of Israel, that offered themselves willingly among the people. Bless ye the Lord.	9 Spake Deborah in prophecy: I am sent to praise the scribes of Israel, who, while this tribulation lasted, ceased not to study in the Law: and it redounds well unto them who sat in the houses of congregation, wide open, and taught the people the doctrine of the Law, and praised and rendered thanks before the Lord.	is there any rock like our God.	He will arise with all his armies over Jerusalem, and a great sign will be done with him. There shall fall the corpses at his troops: Therefore praise ye all the peoples and nations and tongues, and cry: There is none holy but God; there is not beside Thee; and Thy people shall say, There is none mighty but our God.
10 Speak, ye that ride on white asses, ye that sit in judgment, and walk by the way.	10 Those who had interrupted their occupations are riding on asses covered with many-coloured caparisons, and they ride about freely in all the territory of Israel, and congregate to sit in judgment. They walk in their old ways, and are speaking of the power Thou hast shown in the land of Israel, &c.	3 Talk no more so exceeding proudly; let not arrogancy come out of your mouth: for the Lord is a God of knowledge, and by him actions are weighed.	3 [Over Nebuchadnezzar the king of Babel did she prophesy and say: Ye Chaldeans, and all nations who will once rule over Israel] Do not speak grandly; let no blasphemy go out from your mouth: for God knows all, and over all his servants he extends his judgment: also from you he will take punishment of your guilt.
JUDGES XI.		4 The bows of the mighty are broken, and they that stumbled are girded with strength.	4 [Over the kingdom Javan she prophesied and said] The bows of the mighty ones [of the Javanites] will be broken. [and those of the house of the Ammonites] who are weak, to them will be done miracles and mighty deeds.
39 And it came to pass, at the end of two months, that she returned unto her father, who did with her according to his vow which he had vowed: and she knew no man. And it was a custom in Israel.	39 And it was at the end of two months, and she returned to her father, and he did unto her according to the vow which he had vowed: and she had known no man. And it became a statute in Israel.	1 SAM. XVII.	
Addition (TARGUM), that no man should offer up his son or his daughter as a burnt-offering, as Jephtha the Gileadite did, who asked not Phinehas the priest. If he had asked Phinehas the priest, then he would have dissolved his vow with money [for animal sacrifices].	Addition (TARGUM), that no man should offer up his son or his daughter as a burnt-offering, as Jephtha the Gileadite did, who asked not Phinehas the priest. If he had asked Phinehas the priest, then he would have dissolved his vow with money [for animal sacrifices].	8 And he stood and cried unto the armies of Israel, and said unto them, Why are ye come out to set your battle in array? Am not I a Philistine, and ye servants of Saul? choose you a man for you, and let him come down to me.	8 And he arose, and he cried unto the armies of Israel, and said unto them: Why have ye put yourselves in battle array? Am I not the Philistine, and ye the servants of Saul? I am Goliath the Philistine from Gath, who have killed the two sons of Eli, the
1 SAM. II.		priests Chofna and Phinehas, and carried captive the ark of the covenant of the Lord, I have carried it to the house of Dagon, we error, and it has been there in the cities of the Philistines seven months. And in every battle which the Philistines have had I went at the head of the army, and we conquered in the battle, and we strew the killed like the dust of the earth, and until now have the Philistines not thought me worthy to become captain of a thousand over them. And you, O children of Israel, what mighty deed has seen the son of Kish from Gibeah do for you that you made him king over you? If he is a valiant man, let him come out and do battle with me; but if he is a weak man, then choose for yourselves a man, and let him come out against me, &c.	
1 And Hannah prayed, and said, My heart rejoiceth in the Lord; mine horn is exalted in the Lord; my mouth is enlarged over mine enemies; because I rejoice in thy salvation.	1 And Hannah prayed in the spirit of prophecy, and said: [Lo, my son Samuel will become a prophet over Israel; in his days they will be freed from the hand of the Philistines; and through his hands shall be done unto them wondrous and mighty deeds: therefore] be strong my heart in the portion which God gave me. [And also Heman the son of Joel, the son of my son Samuel, shall arise, he and his fourteen sons, to say praise with nabla (harps?) and cythars, with their brethren the Levites, to sing in the house of the sanctuary: therefore] Let my horn be exalted in the gift which God granted unto me. [And also on the miraculous punishment that would befall the Philistines who would bring back the ark of the Lord in a new chariot, together with a sin-offering: therefore let the congregation of Israel say] I will open my mouth to speak great things over my enemies; because I rejoice in thy salvation.	1 KINGS XIX.	
2 There is none holy as the Lord: for there is none beside thee, neither	2 [Over Sanherib the king of Ashur did she prophesy, and she said:	11, 12 And he said, Go forth, and stand upon the mount before the Lord. And, behold, the Lord	11, 12 And he said: Arise and stand on the mountain before the Lord. And God revealed

AUTHORISED VERSION.	TARGUM [JONATHAN-BEN-URZIEL] TO THE PROPHETS.
passed by, and a great and strong wind rent the mountains, and brake in pieces the rocks, before the Lord; but the Lord was not in the wind: and after the wind an earthquake; but the Lord was not in the earthquake: And after the earthquake a fire; but the Lord was not in the fire: and after the fire a still small voice.	himself: and before him a host of angels of the wind, cleaving the mountain and breaking the rocks before the Lord; but not in the host of angels was the Shechinah. And after the host of the angels of the wind came a host of angels of commotion; but not in the host of the angels of commotion was the Shechinah of the Lord. And after the host

of the angels of commotion came a host of angels of fire; but not in the host of the angels of fire was the Shechinah of the Lord. But after the host of the angels of the fire came voices singing in silence.

18 And it was so, when Elijah heard it, that he wrapped his face in his mantle, and went out, and stood in the entering in of the cave: and, behold, there came a voice unto him, and said, What doest thou here, Elijah?

18 And it was when Elijah heard this, he hid his face in his mantle, and he went out and he stood at the door of the cave; and, lo! with him was a voice, saying, What doest thou here, O Elijah! &c.

ISAIAH XXXIII.

22 For the Lord is our judge, the Lord is our lawgiver, the Lord is our king; he will save us.

as the doctrine of the Torah from Sinai; the Lord is our king: He will deliver us, and give us righteous restitution from the army of Gog.

22 For the Lord is our judge, who delivered us with his power from Misraim; the Lord is our teacher, for He has given us the doctrine of the Torah from Sinai; the Lord is our king: He will deliver us, and give us righteous restitution from the army of Gog.

JEREM. X.

11 Thus shall ye say unto them, The gods that have not made the heavens and the earth, even they shall perish from the earth, and from under these heavens.

Errors:—O house of Israel, then you shall answer thus, and speak in this wise: The Errors unto which you pray are Errors which are of no use: they cannot rain from heaven; they cannot cause fruit to grow from the earth. They and their worshippers will perish from the earth, and will be destroyed from under these heavens.

11 This is the copy of the letter which Jeremiah the prophet sent to the remaining ancient ones of the captivity in Babel: "And if the nations among whom you are will say unto you, Pray to our

MICAH VI.

4 For I brought thee up out of the land of Egypt, and redeemed thee out of the house of servants; and I sent before thee Moses, Aaron, and Miriam.

thee the tradition of the ordinances; Aaron, to atone for the people: and Miriam, to teach the women.

4 For I have taken thee out from the land of Misraim, and have released thee from the house of thy bondage: and have sent before thee three prophets; Moses, to teach

III. and IV. TARGUM OF JONATHAN-BEN-UZZIEL AND JERUSHALMI-TARGUM ON THE PENTATEUCH.

Onkelos and Jonathan on the Pentateuch and Prophets, whatever be their exact date, place, authorship and editorship, are, as we have endeavoured to show, the oldest of existing Targums, and belong, in their present shape, to Babylon and the Babylonian academies flourishing between the 3rd and 4th centuries A.D. But precisely as two parallel and independent developments of the Oral Law (תלמוד) have sprung up in the Palestinian and Babylonian Talmuds respectively, so also recent investigation has proved to demonstration the existence of two distinct cycles of Targums on the

Written Law (תשבתה)—i. e. the entire body of the Old Testament. Both are the offspring of the old, primitive institution of the public "reading and translating of the Torah," which for many hundred years had its place in the Palestinian synagogues. The one first collected, revised, and edited in Babylon, called—more especially that part of it which embraced the Pentateuch (Onkelos)—the Babylonian, *Ours*, by way of eminence, on account of the superior authority inherent in all the works of the Madinchaḥ (Babylonians, in contradistinction to the Maarbæ or Palestinians). The other, continuing its oral life, so to say, down to a much later period, was written and edited—less carefully, or rather with a much more faithful retention of the oldest and youngest fancies of Meturgemanim and Darshanim—on the soil of Judæa itself. Of this entire cycle, however, the Pentateuch and a few other books and fragmentary pieces only have survived entire, while of most of the other books of the Bible a few detached fragments are all that is known, and this chiefly from quotations. The injunction above mentioned respecting the sabbatical reading of the Targum on the Pentateuch—nothing is said of the Prophets—explains the fact, to a certain extent, how the Pentateuch Targum has been religiously preserved, while the others have perished. This circumstance, also, is to be taken into consideration, that Palestine was in later centuries well-nigh cut off from communication with the Diaspora, while Babylon, and the gigantic literature it produced, reigned paramount over all Judæa, as, indeed, down to the 10th century, the latter continued to have a spiritual leader in the person of the Reah Gelutha (Head of the Golah), residing in Babylon. As not the least cause of the loss of the great bulk of the Palestinian Targum may also be considered the almost uninterrupted martyrdom to which those were subjected who preferred, under all circumstances, to live and die in the Land of Promise.

However this may be, the Targum on the Pentateuch has come down to us; and not in one, but in two recensions. More surprising still, the one hitherto considered a fragment, because of its embracing portions only of the individual books, has in reality never been intended to embrace any further portion, and we are thus in the possession of two Palestinian Targums, preserved in their original forms. The one, which extends from the first verse of Genesis to the last of Deuteronomy, is known under the name of Targum Jonathan (ben Uzziel) or Pseudo-Jonathan on the Pentateuch. The other, interpreting single verses, often single words only, is extant in the following proportions:

a third on Genesis, a fourth on Deuteronomy, a fifth on Numbers, three-twentieths on Exodus, and about one-fourteenth on Leviticus. The latter is generally called *Targum Jerushalmi*, or, down to the 11th century (Hai Gaon, Chananal), *Targum Erets Israel*, Targum of Jerusalem or of the land of Israel. That Jonathan ben Uzziel, the same to whom the prophetic Targum is ascribed, and who is reported to have lived either in the 5th-4th century B.C., or about the time of Christ himself (see above), could have little to do with a Targum which speaks of Constantinople (Num. xxiv. 19, 24), describes very plainly the breaking-up of the West-Roman Empire (Num. xxiv. 19-24), mentions the Turks (Gen. x. 2), and even Mohammed's two wives, Chadija and Fatime (Gen. xxi. 21), and which exhibits not only the fullest acquaintance with the edited body of the Babylonian Talmud, by quoting entire passages from it, but adopts its peculiar phraseology:—not to mention the complete disparity between the style, language, and general manner of the Jonathanic Targum on the Prophets, and those of this one on the Pentateuch, strikingly palpable at first sight,—was recognised by early investigators (Morinus, Pfeiffer, Walton, &c.), who soon overthrew the old belief in Jonathan b. Uzziel's authorship, as upheld by Menahem Rekanati, Asariah de Rossi, Gedaliah, Galatin, Fagius, &c. But the relation in which the two Targums, so similar and yet so dissimilar, stood to each other, how they arose, and where and when—all these questions have for a long time, in the terse words of Zuns, caused many of the learned such dire misery, that whenever the "Targum Hierosolymitanum comes up," they, instead of information on it and its twin-brother, prefer to treat the reader to a round volley of abuse of them. Not before the first half of this century did the fact become fully and incontestably established (by the simple process of an investigation of the sources), that both Targums were in reality one—that both were known down to the 14th century under no other name than Targum Jerushalmi—and that some forgetful scribe about that time must have taken the abbreviation 'T. J.' over one of the two documents, and, instead of dissolving it into Targum-Jerushalmi, dissolved it erroneously into what he must till then have been engaged in copying—viz., Targum-Jonathan, sc. ben Uzziel (on the Prophets). This error, fostered by the natural tendency of giving a well-known and far-famed name—without inquiring too closely into its accuracy—to a hitherto anonymous and comparatively little known version, has been copied again and again, until it found its way, a hundred years later, into print. Of the intermediate stage, when only a few MSS. had received the new designation, a curious fact, which Azariah de Rossi (Cod. 37 b) mentions, gives evidence. "I saw," he says, "two complete Targums on the whole Pentateuch, word for word alike; one in Reggio, which was described in the margin, 'Targum of Jonathan b. Uzziel'; the other in Mantua, described at the margin as 'Targum Jerushalmi.'" In a similar manner quotations from either in the Aruch confound the designation. Benjamin Mussaphia (d. 1674), the author of additions and corrections to the Aruch, has indeed pronounced it as his personal conjecture that both may be one and the same, and Drusius, Mendelssohn, Rappoport, and others shared his opinion. Yet the difficulty of their obvious dissimilarity, if they were identical, remained to be accounted for. Zuns

tries to solve it by assuming that Pseudo-Jonathan is the original Targum, and that the fragmentary Jerushalmi is a collection of variants to it. The circumstance of its also containing portions identical with the codex, to which it is supposed to be a collection of readings, he explains by the negligence of the transcriber. Frankel, however, followed by Traub and Levysohn, has gone a step further. From the very identity of a proportionately large number of places, amounting to about thirty in each book, and from certain palpable and consistent differences which run through both recensions, they have arrived at a different conclusion, which seems to carry conviction on the face of it, viz., that Jerushalmi is a collection of emendations and additions to single portions, phrases, and words of Onkelos, and Pseudo-Jonathan a further emendated and completed edition to the whole Pentateuch of Jerushalmi-Onkelos. The chief incentive to a new Targum on the Pentateuch (that of Onkelos being well known in Palestine), was, on the one hand, the wish to expunge such of the passages as seemed either obscure to themselves or capable of greater adaptation to times; and on the other hand the great and prominent desire for legendary lore, and ethical and symbolical motives, intertwined with the very letter of Scripture, did not and could not feel satisfied with the (generally) strictly literal version of Onkelos, as soon as the time of eccentric, prelix, oral Targums had finally ceased in Palestine too, and written Targums of Babylon were introduced as a substitute, once for all. Hence variants, exactly as found in Jerushalmi, not to the whole of Onkelos, but to such portions as seemed most to require "improvement" in the direction indicated. And how much this thoroughly paraphrastic version was preferred to the literal is, among other signs, plainly visible from the circumstance that it is still joined, for instance, to the reading of the Decalogue on the Feast of Weeks in the synagogues. At a later period the gaps were filled up, and the whole of the existing Jerushalmi was recast, as far again as seemed fitting and requisite. This is the Jonathan, so called for the last four hundred years only. And thus the identity in some, and the divergence in other places finds its most natural solution.

The Jerushalmi, in both its recensions, is written in the Palestinian dialect, the peculiarities of which we have briefly characterised above. It is older than the Masora and the conquest of Western Asia by the Arabs. Syria or Palestine must be its birthplace, the second half of the 7th century its date, since the instances above given will not allow of any earlier time. Its chief aim and purpose is, especially in its second edition, to form an entertaining compendium of all the Halachah and Haggadah, which refers to the Pentateuch, and take its stand upon it. And in this lies its chief use to us. There is hardly a single allegory, parable, or digression, or tale in it which is not found in the other haggadic writings—Mishna, Talmud, Midrash, Sifra, Sifri, &c.; and both Winer and Preussmann, not to mention the older authorities, have wrongly charged it with inventing its interpretations. Even where no source can be indicated, the author has surely only given utterance to the leading notions and ideas of his times, extravagant and abstruse as they may oftentimes appear to our modern Western minds. Little value is inherent in its critical emendations on the exegesis of Onkelos. It sometimes endeavours either to find an entirely new

signification for a word, and then it often falls into grave errors, or it restores interpretations rejected by Onkelos, only it must never be forgotten that translation is quite a secondary object with Jerushalmi. It adheres, however, to the general method followed by Onkelos and Jonathan. It dissolves similes and widens too concise diction. Geographical names it alters into those current in its own day. It avoids anthropomorphisms as well as anthropopathisms. The strict distinction between the Divine Being and man is kept up, and the word לפני "before" is put as a kind of medium between the former and the latter, no less than the other—"Shechinah," "Word," "Glory," &c. It never uses Elohim where the Scripture applies it to man or idols. The same care is taken to extol the good deeds of the people and its ancestors, and to slur over and excuse the evil ones, &c.:—all this, however, in a much more decided and exaggerated form than either in Onkelos or Jonathan. Its language and grammar are very corrupt; it abounds—chiefly in its larger edition, the Pseudo-Jonathan—in Greek, Latin, Persian, and Arabic words; and even making allowances for the many blunders of ignorant scribes, enough will remain to pronounce the diction ungrammatical in very many places.

Thus much briefly of the Jerushalmi as one and the same work. We shall now endeavour to point out a few characteristics belonging to its two recensions respectively. The first, Jerushalmi אשכנזי, knows very little of angels; Michael is the only one ever occurring; in Jonathan, on the other hand, angelology flourishes in great vigour:

to the Biblical Michael, Gabriel, Uriel, are added the Angel of Death, Samael, Sagnugael, Shachama, Usiel; seventy angels descend with God to see the building of the Babylonian tower; nine hundred millions of punishing angels go through Egypt during the night of the Exodus, &c. Jerushalmi makes use but rarely of Halachah and Haggadah, while Jonathan sees the text as it were only through the medium of Haggadah: to him the chief end. Hence Jonathan has many Midrashim not found in Jerushalmi, while he does not omit a single one contained in the latter. There are no direct historical dates in Jerushalmi, but many are found in Jonathan, and since all other signs indicate that but a short space of time intervenes between the two, the late origin of either is to a great extent made manifest by these dates. The most striking difference between them, however, and the one which is most characteristic of either, is this, that while Jerushalmi adheres more closely to the language of the Mishna, Jonathan has greater affinity to that of the Talmud. Of either we subjoin short specimens, which, for the purpose of easier comparison, and reference, we have placed side by side with Onkelos. The Targum Jerushalmi was first printed in Bomberg's Bible, Venice, 1518, ff., and was reprinted in Bomberg's edd., and in Walton, vol. iv. Jonathan to the Pentateuch, a MS. of which was first discovered by Ashur Purina in the Library of the family of the Puas in Venice, was printed for the first time in 1590, as "Targum Jonathan ben Ussiel," at Venice, reprinted at Hama, 1618, Amsterdam, 1640, Prague, 1646, Walton, vol. iv., &c.

GENESIS III. 17-24.

AUTHORISED VERSION.	ONKELOS.	TARGUM JERUSHALMI. <i>First Recension.</i>	TARGUM [JONATHAN-BEN-USIEL] JERUSHALMI. <i>Second Recension.</i>
17 And unto Adam he said, Because thou hast hearkened unto the voice of thy wife, and hast eaten of the tree, of which I commanded thee, saying, Thou shalt not eat of it: cursed is the ground for thy sake; in sorrow shalt thou eat of it all the days of thy life;	17 And to Adam he said, For that thou hast accepted the word of thy wife, and hast eaten from the tree of which I have commanded unto thee, and said, Thou shalt not eat from it: cursed shall the earth be for thy sake; with trouble shalt thou eat of it all the days of thy life;	—	17 And to Adam he said, Because thou hast received the word of thy wife, and hast eaten from the fruit of the tree, of which I commanded thee, Thou shalt not eat from it: cursed be the earth, because it has not shown unto thee thy fault; in sorrow shalt thou eat of it all the days of thy life;
18 Thorns also and thistles shall it bring forth to thee; and thou shalt eat of the herb of the field;	18 And thorne and thistles it shall grow for thee; and thou shalt eat the grass of the field;	18 And thorns and thistles shall it multiply for thee; and thou shalt eat the grass that is on the face of the earth. Then began Adam and said, I pray, through the Mercy that is before Thee, Jehovah, let us not be accounted before Thee as the beasts that eat the grass on the face of the field: may we be permitted to arise and toil with the toil of our hands, and eat food from the fruits of the earth; and thus may there be a difference before Thee between the sons of men and the offspring of cattle.	18 And thorns and thistles shall grow and multiply for thy sake; and thou shalt eat the grass that is on the face of the field. Adam answered and said, I pray, by the Mercy that is before Thee, Jehovah, that we may not be deemed like unto the beasts, that we should eat grass that is on the face of the field; may we be allowed to arise and toil with the toiling of our hands, and eat food from the food of the earth, and thus may there be a distinction now before Thee, between the sons of men and the offspring of cattle.

AUTHORISED VERSION.	ONKELOS.	TARGUM JERUSHALMI. <i>First Recension.</i>	TARGUM [JONATHAN-BEN-USEB?] JERUSHALMI. <i>Second Recension.</i>
19 In the sweat of thy face shalt thou eat bread, till thou return unto the ground; for out of it wast thou taken: for dust thou art, and unto dust shalt thou return.	19 In the sweat of thy face shalt thou eat bread, until thou returnest unto the earth from which thou art created: for dust art thou, and to dust shalt thou return.		19 . . . In the toil of the palm of thy hand shalt thou eat food, until thou returnest unto the earth from which thou art created: for dust art thou, and to dust shalt thou return: for from the dust thou wilt once rise to judgment and account for all that thou hast done on the day of the great Judgment.
20 And Adam called his wife's name Eve; because she was the mother of all living.	20 And Adam called the name of his wife Chavah; for that she was the mother of all sons of man.		20 And Adam called the name of his wife Chavah for she is the mother of all the sons of man.
21 Unto Adam also and to his wife did the Lord God make coats of skins, and clothed them.	21 And Jehovah Elohim made unto Adam and his wife garments of glory, on the skin of their flesh, and clothed them.		21 And Jehovah Elohim made unto Adam and his wife garments of honour from the skin of the serpent which he had cast off of it, on the skin of their flesh, instead of the beauty which they had cast off; and he clothed them.
22 And the Lord God said, Behold, the man is become as one of us, to know good and evil: and now, lest he put forth his hand, and take also of the tree of life, and eat, and live for ever:	22 And Jehovah Elohim said, Behold Adam is the only one in the world knowing good and evil: perchance now he might stretch forth his hand and take also from the tree of life, and eat, and live for evermore.	22 And the Word of Jehovah Elohim said, Lo! man, whom I created, is alone in this world, as I am alone in the highest Heavens; mighty nations will spring from him; from him also will arise a people that will know to distinguish between good and evil: now it is better to expel him from the garden of Eden, before he stretch out his hand and take also from the fruits of the tree of life, and eat, and live for ever.	22 And Jehovah Elohim said to the angels that were ministering before him, Lo! there is Adam alone on the earth, as I am alone in the highest Heavens, and there will spring from him those who know to distinguish between good and evil: he had kept the commandment I commanded, he would have been living and lasting, like the tree of life, for evermore. Now since he has not kept what I commanded, We decree against him and expel him from the garden of Eden, before he may stretch out his hand and take from the fruits of the tree of life, for if he ate therefrom he would live and remain for ever.
23 Therefore the Lord God sent him forth from the garden of Eden, to till the ground from whence he was taken.	23 And Jehovah Elohim sent him from the garden of Eden, to till the earth whence he was created.		23 And Jehovah Elohim expelled him from the garden of Eden, and he went and he settled on the Mount of Moriah, to the earth of which he was created.
24 So he drove out the man; and he placed at the east of the garden of Eden Cherubims, [1] and a flaming sword which turned every way, to keep the way of the tree of life.	24 And he drove out Adam; and he placed before the garden of Eden the Cherubim and the sharp sword, which turns to guard the way to the tree of life.	24 And He expelled Adam, and caused to reside the splendour of His Shechinah from the beginning at the east of the garden of Eden, above the two Cherubim. Two thousand years before the world was created, he created the Law, and prepared Gehinnom [Hell] and Gan Eden [Paradise]: He prepared Gan Eden for the Righteous, that they may eat and delight in the fruits of	24 And He drove out Adam from where He had made to reside the glory of His Shechinah from the beginning between the two Cherubim. Before He created the world He had created the Law: He had prepared the garden of Eden for the Righteous, that they shall eat and delight in the fruits of the tree, because they have acted during their life according to the commandments

AUTH. VERSION.	ONKELOS.	TARGUM JERUSHALMI. <i>First Recension.</i>	TARGUM [JONATHAN-BEN-USZIEL] JERUSHALMI. <i>Second Recension.</i>
		the tree, because they kept the commandments of the Law in this world, and prepared Gehinnom for the wicked, for it is like unto a sharp sword that eats from both sides; He has prepared within it sparks of light and coals which consume the wicked, to punish them in the future world for their not having kept the commandments of the Law. For the tree of life that is the Law; whosoever keeps it in this world, he will live and last like the tree of life: good is the Law to whomsoever keeps it in this world, like the fruit of the tree of life in the world to come.	the Law in this world, and have kept its commandments: He has prepared the Gehinnom for the wicked, which is likened unto a sharp sword that eats from two sides: He prepared within it sparks of light and coals of fire to judge with them the wicked who rebelled in their lives against the doctrine of the Law. Better is this Law to him who acts according to it than the fruits of the tree of life, for the Word of Jehovah has prepared for him who keeps it, that he shall live and walk in the paths of the way of the life of the future world.

THE LAST CHAPTER OF DEUTERONOMY, v. 1-3.

AUTHORISED VERSION.	ONKELOS.	TARGUM JERUSHALMI. <i>First Recension.</i>	TARGUM [JONATHAN-BEN-USZIEL] JERUSHALMI. <i>Second Recension.</i>
1 And Moses went up from the plains of Moab unto the mountain of Nebo, to the top of Pisgah, that is over against Jericho. And the Lord shewed him all the land of Gilead, unto Dan,	1 And Moses ascended from the encampment of Moab to the mountain of Nebo: the head of the height that is opposite Jericho. And Jehovah showed him all the land of Gilead unto Dan.	1 And Moses ascended from the plain of Moab to the mountain of Nebo, the summit of the hill which is opposite Jericho. And God showed him the whole land: Gilead unto Dan of Caesarea.	1 And Moses ascended from the plains of Moab to the mountain of Nebo, the summit of the height which is over against Jericho, and the word of Jehovah showed him all the mighty ones of the land: the powerful deeds which Jephtha from Gilead would do, and the victories of Samson the son of Manoah, from the tribe of Dan.
2 And all Naphtali, and the land of Ephraim, and Manasseh, and all the land of Judah, unto the utmost sea,	2 And all Naphtali and the land of Ephraim and Manasseh, and all the land of Judah to the hindmost sea.	2 And all the land of Naphtali, and the land of Ephraim and Manasseh, and the whole land of Judah, to the hindmost sea.	2 And the thousand princes from the house of Naphtali who joined issue with Balak, and the kings whom Joshua the son of Nun from the tribe of Ephraim, would kill, and the power of Gideon the son of Joash from the tribe of Manasseh, and all the kings of Israel, and the kingdom of the house of Judah who would rule in the land until the second Sanctuary would be laid low.
3 And the south, and the plain of the valley of Jericho, the city of palm trees, unto Zoar.	3 And the west and the plain of the valley of Jericho the city of the palms, unto Zoar.	3 And west, and the plain of the valley of Jericho the city which produces the palms, that is Ze'êr.	3 And the king of the south who would join the king of the north to destroy the inhabitants of the land, and the Ammonites and Moabites, the inhabitants of the valleys who would oppress Israel, and the exile of the disciples of Elija who would be driven out from the plain of Jericho, and the exile of the disciples of Eliha who would be driven out from the city of palms by their brethren, the house of Israel: two hundred thousand men. And the woes of each generation and the punishment of Armilinus [Armilus] the evil one and the battle-array of Gog. And in this great misery Michael will arise with the sword: to save, &c.

V. TARGUMS OF "JOSEPH THE BLIND" ON
THE HAGIOGRAPHIA.

"When Jonathan ben Uzziel began to paraphrase the Cethubim" (Hagiographa), we read in the Talmudical passage before quoted, "a mysterious voice was heard saying: It is enough. Thou hast revealed the secrets of the Prophets - why wouldst

thou also reveal those of the Holy Ghost?"—It would thus appear, that a Targum to these books (Job excepted) was entirely unknown up to a very late period. Those Targums on the Hagiographa which we now possess have been attributed vaguely to different authors, it being assumed in the first instance that they were the work of one man. Now it was Akyha the Greek

translator, mentioned in Bereshith Rabba (see above); now Onkelos, the Chaldee translator of the Pentateuch, his mythical double; now Jonathan b. Uzziel, or Joseph (Jose) the Blind (see above). But the diversity in the different parts of the work warring too palpably against the unity of authorship, the blindness of the last-named authority seemed to show the easiest way out of the difficulty. Joseph was supposed to have dictated it to different disciples at different periods, and somehow every one of the emanations infused part of his own individuality into his share of the work. Popular belief thus fastened upon this Joseph the Blind, since a name the work must needs have, and to him in most of the editions, the Targum is affiliated. Yet, if ever he did translate the Hagiographa, certain it is that those which we possess are not by his or his disciples' hands—that is, of the time of the 4th century. Writers of the 13th century already refuted this notion of Joseph's authorship, for the assumption of which there never was any other ground than that he was mentioned in the Talmud, like Onkelos-Akylas and Jonathan, in connection with Targum; and, as we saw, there is indeed reason to believe that he had a share in the redaction of "Jonathan" to the Prophets, which falls in his time. Between him and our hagiographical Targums, however, many centuries must have elapsed. Yet we do not even venture to assign to them more than an approximate round date, about 1000 A.D. Besides the Targums to the Pentateuch and the Prophets, those now extant range over Psalms, Proverbs, Job, the five Megilloth, *i. e.* Song of Songs, Ruth, Lamentations, Esther, Ecclesiastes; the Chronicles and Daniel. Ezra and Nehemiah alone are left without a Targum at present; yet we can hardly help believing that ere long one will also be found to the latter, as the despaired-of Chronicles was found in the 17th century, and Daniel—a sure trace of it at least—so recently, that as yet nobody has considered it worth his while to take any notice of it. We shall divide these Targums into four groups: Proverbs, Job, Psalms;—Megilloth;—Chronicles;—and Daniel.

1. TARGUM ON PSALMS, JOB, PROVERBS.

Certain linguistic and other characteristics exhibited by these three Targums, lead to the con-

clusion that they are nearly contemporaneous productions, and that their birthplace is, most likely, Syria. While the two former, however, are most paraphrases, the Targum on Proverbs comes near to our idea of a version than almost any Targum, except perhaps that of Onkelos. It adheres closely to the original text as possible. The most remarkable feature about it, however, and which has given rise to endless speculations and discussions, is its extraordinary similarity to the Syriac Version. It would indeed sometimes seem as if they had copied each other—an opinion warmly advocated by Dathe, who endeavoured to prove that the Chaldee had copied or adapted the Syrian, there being passages in the Targum which could, he assumed, only be accounted for by a misunderstanding of the Syriac translation.¹ It has, on the other hand, been argued that there are a greater number of important passages which distinctly show that the Targumist had used an original Hebrew text, varying from that of the Syriac, and had also made use of the LXX. against the latter.² The Syriacs would easily be accounted for by the Aramaic idiom itself, the forms of which vary but little from, and easily merge into, the sister dialect of Syria. Indeed nearly all of them are found in the Talmud, a strictly Aramaic work. It has been supposed by others that neither of these versions, as they are now in our hands, exhibit their original form. A late editor, *sc. v.* were, of the (mutilated) Targum, might have derived his emendations from that version which came nearest to it, both in language and in close adherence to the Hebrew text—viz., the Syriac. and there is certainly every reason to conclude from the woefully faulty state in which this Targum is found (Luzzatto counts several hundred corrupt readings in it), that many and clumsy hands must have been at work upon the later Codd. The most likely solution of the difficulty, however, seems to be that indicated by Frankel—viz., that the LXX is the common source of both versions, but in such a manner that the Aramaic has also made use of the Hebrew and the Greek—of the latter, however, through the Syriac medium. As a specimen of the curious similarity of both versions, the following two verses from the beginning of the book may find a place here:—

CHAP. I. 2-3.

TARGUM (Ver. 2).

למדע חכמתא ומדדותא

לא תבין אמרי ביונתא

Ver. 3.

למקבלא מדדותא דשוכלא

וצדקתא ודינא ותריצותא

Syr. (Ver. 2).

למדע חכמתא ומדדותא

לא תבין אמרי ביונתא

Ver. 3.

למקבלא מדדותא דשוכלא

וצדקתא ודינא ותריצותא

¹ *e. g.* The use of the word אנגלי for angel in Targ. Ps. and Job, the י, affixed to the 3rd p. plur. praef. Peal, the infin. with praef. ב, besides several more or less unusual Greek and Syriac words common to all three.

² *e. g.*, ch. xxi. 5, the Heb. word קרייה, "city," is rendered כנא, "city," in Syr. Targum translates כנא, "a lie," which is only to be accounted for by a misunderstanding or misreading of the Syriac כנא, where for the second e the Chaldee translator read a b, כנא.

¹ Prov. xxi. 10, the Masoretic text reads: מוֹדַע לְכָל חָכָם וְלֹא יִשְׁכַּח עֲוֹנוֹתָיו; LXX. ὁ δὲ δαίμων ἐκείνου ἐκείνην τὴν ὁδὸν ἐκείνην ἐκείνην ἐκείνην (=בשר כסיל); Targ. מוֹדַע לְכָל חָכָם וְלֹא יִשְׁכַּח עֲוֹנוֹתָיו; thus adopting exactly the reading of the LXX. against the received text: xxi. 21, עֲוֹנוֹתָיו עֲוֹנוֹתָיו; in the same manner in Talm. Succah. 52 b; LXX. is ἐκείνην τὴν ὁδὸν ἐκείνην ἐκείνην ἐκείνην; evidently reading עֲוֹנוֹתָיו = Targ. עֲוֹנוֹתָיו. Comp. also xxi. 14, xxi. 20, &c.

Compare also vers. 5, 6, 8, 10, 12, 13; ch. ii. vers. 9, 10, 13-15; iii. 2-9, &c.

We must not omit to observe that no early Jewish commentator—Rashi, Ibn Ezra, &c.—mentions the Targum either to Proverbs, or to Job and Psalms. Nathan ben Jehiel (12th century) is the first who quotes it.

Respecting the two latter Targums of this group, Psalms and Job, it is to be observed that they are, more or less, mere collections of fragments. That there must have existed paraphrases to Job at a very early period follows from the Talmudical passages which we quoted in the introduction—nay, we almost feel inclined to assume that this book, considered by the learned as a mere allegory ("Job never was, and never was created," is the dictum found in the Talmud, Baba Bathra, 15a: i. s. he never had any real existence, but is a poetical, though sacred, invention), opened the list of written paraphrases. How much of the primitive version is embodied in the one which we possess it is of course next to impossible to determine, more especially in the state of infancy in which the investigation of the Targums as yet remains. So much, however, is palpable, that the Targums of both Psalms and Job in their present shape contain relics of different authors in different times: some paraphrasts, some strictly translators. Very frequently a second version of the same passage is introduced by the formula *תרגום אחר*, "another Targum," and varies most widely from its predecessor; while, more especially in the Psalms, a long series of chapters translated literally, is followed by another series translated in the wildest and most fanciful character. The Cod. Erpen. still exhibits these various readings, as such, side by side, on its margin; thence, however, they have in our printed editions found their way into the text. How much of these variants, or of the entire text, belongs to the Palestinian Cycle, which may well have embraced the whole Torah:—or whether they are to be considered exclusively the growth of later times, and have thus but a very slender connexion with either the original Babylonian or the Palestinian Targum-works, future investigation must determine.

The most useful in this group is naturally the Targum on Proverbs, it being the one which translates most closely, or rather the only one which does translate at all. Besides the explanation it gives of difficult passages in the text, its peculiar affinity to the Syriac Version naturally throws some light upon both, and allows of emendations in and through either. As to Job and Psalms, their chief use lies in their showing the gradual dying stages of the idiom in which they are written, and also in their being in a manner guides to the determination of the date of certain stages of Haggadah.

2, 3. TARGUMS ON THE FIVE MEGILLOTH.

These Targums are likewise not mentioned before the 12th century, when the Aruch quotes them severally:—although Esther must have been translated at a very early period, since the Talmud already mentions a Targum on it. Of this, we need hardly add, no trace is found in our present Targum. The freedom of a "version" can go no further than it does in these Targums on the Megilloth. They are, in fact, mere Haggadah, and bear the most striking resemblance to the Midrash on the respective books. Curiously enough, the gradual preponderance of the Paraphrase over the text is noticeable in the following order: Ruth,

Lamentations, Ecclesiastes, Esther, Song of Songs. The latter is fullest to overflowing of those "*nagve atque frivolitates*," which have so sorely tried the temper of the wise and grave. Starting from the almost comical notion that all they found in the books of Mohammedanism and of Judaism, of Rome and of Greece, if it seemed to have any reference to "Religio," however unsupported, and however plainly bearing the stamp of poetry—good or bad—on its face, must needs be a religious creed, and the creed forced upon every single believer:—they could not but get angry with mere 'day-dreams' being interspersed with the sacred literature of the Bible. Delitzsch, a scholar of our generation, says of the Targums in general that "history becomes in them most charming, most instructive poetry; but this poetry is not the invention, the phantasma of the writer, but the old and popular venerable tradition or legend . . . the Targums are poetical, both as to their contents and form" (*Gesch. d. Jüd. Poesie*, p. 27): and further, "The wealth of legend in its gushing fullness did not suffer any formal bounds; legend bursts upon legend, like wave upon wave, not to be dammed in even by any poetical forms. Thus the Jerusalem Targum in its double Recensions [to the Pentateuch], and the Targums on the five Megilloth are the most beautiful national works of art, through which there runs the golden thread of Scripture, and which are held together only by the unity of the idea" (p. 135). Although we do not share Delitzsch's enthusiasm to the full extent, yet we cannot but agree with him that there are, together with stones and dust, many pearls of precious price to be gathered from these much despised, because hardly known, books.

The dialect of these books occupies the mean between the East and West Aramean, and there is a certain unity of style and design about all the five books, which fully justifies the supposition that they are, one and all, the work of one author. It may be that, taken in an inverted series, they mark the successive stages of a poet's life; glowing, rapturous, overflowing in the first; stately, sober, prosy in the last. As to the time of its writing or editing, we have again to repeat, that it is most uncertain, but unquestionably belongs to a period much later than the Talmud. The Book of Esther, enjoying both through its story-like form and the early injunction of its being read or heard by every one on the Feast of Purim, a great circulation and popularity, has been targumised many times, and besides the one embodied in the five Megilloth, there are two more extant (not three, as generally stated: the so-called third being only an abbreviation of the first), which are called respectively the first: a short one without digressions, and the second—(*Targum sheni*): a larger one, belonging to the Palestinian Cycle. The latter Targum is a collection of Eastern romances, broken up and arranged to the single verses: of gorgeous hues and extravagant imagination, such as are to be met with in the Adshab or Chamis, or any Eastern collection of legends and tales.

VI. TARGUM ON THE BOOK OF CHRONICLES.

This Targum was unknown, as we said before, up to a very recent period. In 1690, it was edited for the first time from an Erfurt MS. by M. F. Beck, and in 1715 from a more complete as well as correct MS. at Cambridge, by D. Wilkins. The name of Hungary occurring in it, and its frequent use of the

Jerusalem-Targum to the Pentateuch, amounting sometimes to simple copying (comp. the Genealogical Table in chap. i., &c.), show sufficiently that its author is neither "Jonathan b. Uzziel" nor "Joseph the Blind," as has been suggested. But the language, style, and the Haggadah, with which it abounds, point to a late period and point out Palestine as the place where it was written. Its use must be limited to philological, historical, and geographical studies; the science of exegesis will profit little by it. The first edition appeared under the title *Paraphrasis Chaldaica libr. Chronicorum*, cura M. F. Beckii, 2 tom. Aug. Vind. 1680-83, 4to.; the second by D. Wilkins, *Paraphrasis... auctore R. Josepho*, &c. Amst., 1715, 4to. The first edition has the advantage of a large number of very learned notes, the second that of a comparatively more correct and complete text.

VII. THE TARGUM TO DANIEL.

It is for the first time that this Targum, for the non-existence of which many and weighty reasons were given (that the date of the Messiah's arrival was hidden in it, among others), is here formally introduced into the regular rank and file of Targums, although it has been known for now more than five-and-twenty years. Munk found it, not indeed in the Original Aramaic, but in what appears to him to be an extract of it written in Persian. The MS. (Anc. Fond. No. 45, Imp. Library) is inscribed "History of Daniel," and has retained only the first words of the Original, which it translates likewise into Persian. This language is then retained throughout.

After several legends known from other Targums, follows a long prophecy of Daniel, from which the book is shown to have been written after the first Crusade. Mohammad and his successors are mentioned, also a king who coming from Europe (מלך אשכנז) will go to Damascus, and kill the Ishmaelitic (Mohammedan) kings and princes; he will break down the minarets (מנסרות), destroy the mosques (מסגדות), and no one will after that dare to pronounce the name of the Profane (שם נכבד = Mohammad). The Jews will also have to suffer great misfortunes (as indeed the knightly Crusaders won their spurs by dastardly murdering the helpless masses, men, women, and children, in the Ghettos along the Rhine and elsewhere, before they started to deliver the Holy tomb). By a sudden transition the Prophet then passes on to the "Messiah, son of Joseph," to Gog and Magog, and to the "true Messiah, the son of David." Munk rightly concludes that the book must have been composed in the 12th century, when Christian kings reigned for a brief period over Jerusalem (*Notice sur Saadia*, Par. 1838).

VIII. There is also a Chaldee translation extant of the apocryphal pieces of Esther, which, entirely lying apart from our task, we confine ourselves to mention without further entering into the subject. De Rossi has published them with Notes and Dissertations. Tübingen, 1783, 8vo.

Further fragments of the PALESTINIAN TARGUM.

Besides the complete books belonging to the Palestinian Cycle of Targum which we have mentioned, and the portions of it intersected as "Another Reading," "Another Targum," into the Babylonian Versions, there are extant several independent fragments of it. Nor need we as yet despair of find-

ing still further portions, perhaps one day to see it restored entirely. There is all the more hope for this, as the Targum has not been lost very long yet. Abudraham quotes the Targum Jerusalem to *Samuel* (i. 9, 13). Kimchi has preserved seven passages from it to *Judges* (xi. 1, consisting of 47 words); to *Samuel* (i. 17, 18: 106 words); see *Kings* (i. 22, 21: 68 words; ii. 4, 1: 174 words; iv. 6: 55 words; iv. 7: 72 words; xiii. 21: 7 words), under the simple name of Toseftah, i. e. Addition, or Additional Targum. Luzzatto has also lately found fragments of the same, under the names "Targum of Palestine," "Targum of Jerusalem," "Another Reading," &c., in an Arabic Codex written 5247 A.M. = 1487 A.D., viz. 1 Sam. xviii. 19; 2 Sam. xii. 12; 1 Kings v. 9, v. 11, v. 13, x. 18, x. 25, xiv. 13; to Hosea i. 1; Obad. i. 1.—To Isaiah, Rashi (*Isaaki*, not as yet still persist in calling him, *Jarchi*), Abudraham and Farissol quote it; and a fragment of the Targum to this prophet is extant in Cod. Urb. Vatican. No. 1, containing about 120 words, and begins: "Prophecy of Isaiah, which he prophesied at the end of his prophecy in the days of Manasseh the Son of Hezekiah the King of the Tribe of the House of Judah on the 17th of Tamuz in the hour when Manasseh set up an idol in the Temple," &c. *Isaai* predicts in this his own violent death. Parts of this Targum are also found in Hebrew, in *Pesikta Rabbathi* 6 a, and *Yalkut Isa.* 58 d. A Jerusalem Targum to Jeremiah is mentioned by Kimchi; & Ezekiel by R. Simeon, Nathan (Aruch), and likewise by Kimchi, who also speaks of a further additional Targum to Jonathan for this Book. A "Targum Jerusalem" to Micah is known to Rashi, and a Zechariah a fragment has been published in *Ertes* (Repert. Pt. 15, P. 174) from a Neuchâtelian MS. (Cod. 354, Kennic. 25), written 1106. The passage found as a marginal gloss to Zech. xii. 10, reads as follows:—

"Targum Jerusalem. And I shall pour out upon the House of David and the inhabitants of Jerusalem the spirit of prophecy and of prayer for truth. And after this shall go forth Messiah the Son of Ephraim to wage war against Gog. And Gog will kill him before the city of Jerusalem. They will look up to me and they will ask me wherefore the heathens have killed Messiah the Son of Ephraim. They will then mourn over him as over a father and mother over an only son, and they will wail over him as one wails over a firstborn."—A Targum Jerusalem to the third chapter of *Habakkuk*, quoted by Rashi, is mentioned by de Rossi (Cod. 265 and 405, both 13th century). It has been suggested that a Targum Jerusalem on the Prophets only existed to the Haftarah, which had at one time been translated perhaps, like the portion from the Law, in public; but we have seen that entire books, not to mention single chapters, possessed a Palestinian Targum, which never were intended or used for the purpose of Haftarah. And there is no reason to doubt that the origin of the Targum to the Prophets is precisely similar to, or perhaps contemporaneous with, that which we traced to that portion which embraces the Pentateuch. The Babylonian Version, the "Jonathan" Targum, though paraphrastic, did not satisfy the apparently more imaginative Palestinian public. Thus from heaped-up additions and marginal glosses, the way to a total re-writing of the entire Codex in the manner and taste of the later times and the different locality, was easy enough. From a certain

of the work as such, however, we must naturally keep aloof, as long as we have only the few specimens named to judge from. But its general spirit and tendency are clear enough. So is also the advantage to which even the minimum that has survived may some day be put by the student of Midrashic literature, as we have briefly indicated above.

We cannot conclude without expressing the hope—probably a vain one—that linguistic studies may soon turn in the direction of that vast and most interesting, as well as important, Aramaic literature, of which the Targums form but a small item.

The writer finally begs to observe that the translations of all the passages quoted from Talmud and Midrash, as well as the specimens from the Targum, have been made by him directly from the respective originals.

VERSION, AUTHORISED. The history of the English translation of the Bible connects itself with many points of interest in that of the nation and the Church. The lives of the individual translators, the long struggle with the indifference or opposition of men in power, the religious condition of the people as calling for, or affected by, the appearance of the translation, the time and place and form of the successive editions by which the demand, when once created, was supplied;—each of these has furnished, and might again furnish, materials for a volume. It is obvious that the work now to be done must lie within narrower limits; and it is proposed, therefore, to exclude all that belongs simply to the personal history of the men, or the general history of the time, or that comes within the special province of Bibliography. What will be aimed at will be to give an account of the several reasons as they appeared; to ascertain the qualifications of the translators for the work which they

undertook, and the principles on which they acted; to form an estimate of the final result of their labours in the received Version, and, as consequent on this, of the necessity or desirableness of a new or revised translation; and, finally, to give such a survey of the literature of the subject as may help the reader to obtain a fuller knowledge for himself.

I. EARLY TRANSLATIONS.—It was asserted by Sir Thomas More, in his anxiety to establish a point against Tyndal, that he had seen English translations of the Bible, which had been made before Wycliffe, and that these were approved by the Bishops, and were allowed by them to be read by laymen, and even by devout women (*Dialogues*, ch. viii-iv. col. 82). There seem good grounds, however, for doubting the accuracy of this statement. No such translations—versions, i. e. of the entire Scriptures—are now extant. No traces of them appear in any contemporary writer. Wycliffe's great complaint is, that there is no translation (Forshall and Madden, *Wycliffe's Bible*, Pref. p. xxi. Prolog. p. 59). The Constitutions of Archbishop Arundel (A.D. 1408) mention two only, and these are Wycliffe's own, and the one based on his and completed after his death. More's statement must therefore be regarded either as a rhetorical exaggeration of the fact that parts of the Bible had been previously translated, or as rising out of a mistake as to the date of MSS. of the Wycliffe version. The history of the English Bible will therefore begin, as it has begun hitherto, with the work of the first great reformer. One glance, however, we may give, in passing, to the earlier history of the English Church, and connect some of its most honoured names with the great work of making the truths of Scripture, or parts of the Books themselves, if not the Bible as a whole, accessible to the people. We may think of Caedmon as embodying the whole history of the Bible in the alliterative metre of Anglo-Saxon poetry (Bede, *Hist. Eccl.* iv. 24); of Aldhelm, Bishop of Sherborne, in the 7th century, as rendering the Psalter; of Bede, as translating in the last hours of his life the Gospel of St. John (*Epist. Outhberti*); of Alfred, setting forth in his mother-tongue as the great ground-work of his legislation, the four chapters of Exodus (xx-xxiii.) that contained the first code of the laws of Israel (Pauli's *Life of Alfred*, ch. v.). The wishes of the great king extended further. He desired that "all the free-born youth of his kingdom should be able to read the English Scriptures" (*Ibid.*). Portions of the Bible, some of the Psalms, and extracts from other Books, were translated by him for his own use and that of his children. The traditions of a later date, seeing in him the representative of all that was good in the old Saxon time, made him the translator of the whole Bible (*Ibid.* Supp. to ch. v.).

The work of translating was, however, carried on by others. One Anglo-Saxon version of the four Gospels, interlinear with the Latin of the Vulgate, known as the Durham Book, is found in the Cottonian MSS. of the British Museum, and is referred to the 9th or 10th century. Another, known as the Rushworth Gloss, and belonging to the same period, is in the Bodleian Library at Oxford.

* So Pauli (Eng. transl.). But would "Englic gewrit" mean "the Scriptures" exclusively? Do not the words of freed point to a general as well as a religious education? One interesting fact connected with this version is its text agrees with that of the Codex Bezae where VOL. III.

that MS. differs most from the *status receptus* of the N. T. Another is its publication by Foxe the Martyrologist in 1571, at the request of Abp. Parker. It was subsequently edited by Dr. Marshall in 1646.

It may be noticed, as bearing upon a question afterwards

Another, of a somewhat later date, is in the same collection, and in the library of C. C. College, Cambridge. The name of Aldhelm, Bishop of Sherborne, is connected with a version of the Psalms; that of Aelfric, with an Epitome of Scripture History, including a translation of many parts of the historical Books of the Bible (Lewis, *Hist. of Transl.* ch. i.; Forshall and Madden, *Preface*; Bagster's *English Hexapla*, Pref.). The influence of Norman ecclesiastics, in the reigns that preceded or followed the Conquest, was probably adverse to the continuance of this work. They were too far removed from sympathy with the subjugated race to care to educate them in their own tongue. The spoken dialects of the English of that period would naturally seem to them too rude and uncouth to be the channel of Divine truth. Pictures, mysteries, miracle plays, rather than books, were the instruments of education for all but the few who, in monasteries under Norman or Italian superintendence, devoted themselves to the study of theology or law. In the remoter parts of England, however, where their influence was less felt, or the national feeling was stronger, there were those who carried on the succession, and three versions of the Gospels, in the University Library at Cambridge, in the Bodleian, and in the British Museum, belonging to the 11th or 12th century, remain as attesting their labours. The metrical paraphrase of the Gospel history, known as the Ormulum, in alliterative English verse, ascribed to the latter half of the 12th century, is the next conspicuous monument, and may be looked upon as indicating a desire to place the facts of the Bible within reach of others than the clergy.⁶ The 13th century, a time in England, as throughout Europe, of religious revival, witnessed renewed attempts. A prose translation of the Bible into Norman-French, circ. A.D. 1260, indicates a demand for devotional reading within the circle of the Court, or of the wealthy merchants, or of convents for women of high rank. Further signs of the same desire are found in three English versions of the Psalms—one towards the close of the 13th century; another by Schorham, circ. A.D. 1320; another—with other canticles from the O.T. and N.T.—by Richard Rolle of Hampole, circ. 1349; the last being accompanied by a devotional exposition: and in one of the Gospels of St. Mark and St. Luke, and of all St. Paul's Epistles (the list includes the Apocryphal Epistle to the Laodiceans), in the Library of C. C. College, Cambridge. The fact stated by Archbishop Arundel in his funeral sermon on Anne of Bohemia, wife of Richard II., that she habitually read the Gospels in the vulgar tongue, with divers expositions, was probably true of many others of high rank.⁷ It is interesting to note these facts, not as detracting from the glory of the great Re-

former of the 14th century, but as showing that for him also there had been a preparation; that what he supplied met a demand which had for many years been gathering strength. It is almost needless to add that these versions started from nothing better than the copies of the Vulgate, more or less accurate, which each translator had before him (Lewis, ch. i.; Forshall and Madden *Preface*).

II. WYCLIFFE (b. 1324; d. 1384).—(1). It is singular, and not without significance, that the first translation from the Bible connected with the name of Wycliffe should have been that of part of the Apocalypse.⁸ The *Last Age of the Church* (A.D. 1356) translates and expounds the vision in which the Reformer read the signs of his own times, the sins and the destruction of "Antichrist and his meynee" (=multitude). Shortly after this he completed a version of the Gospels, accompanied by a commentary "so that pore Cristen men may some dele know the text of the Gospel, with the comyn sentence of olde holic doctores" (*Preface*). Wycliffe, however, though the chief, was not the only labourer in the cause. The circle of English readers was becoming wider, and they were not content to have the Book which they looked upon as above all others in a tongue not their own. Another translation and commentary appear to have been made about the same time, in ignorance of Wycliffe's work, and for the "manie lew men that gladlie would kon the Gospels, if it were drughen into the Englisch tung." The fact that many MSS. of this period are extant, containing in English a Monotessaron, or Harmony of the Gospels, accompanied by portions of the Epistles, or portions of the O. T., or an epitome of Scripture history, or the substance of St. Paul's Epistles, or the Catholic Epistles at full length, with indications more or less distinct, of Wycliffe's influence, shows how wide-spread was the feeling, that the time had come for an English Bible. (Forshall and Madden, *Pref.* pp. xiii. xvii.). These preliminary labours were followed up by a complete translation of the N.T. by Wycliffe himself. The O.T. was undertaken by his condisciple, Nicholas de Hereford, but was interrupted probably by a citation to appear before Archbishop Arundel in 1382, and ends abruptly (following so far the order of the Vulgate) in the middle of Baruch. Many of the MSS. of this version now extant present a different recension of the text, and it is probable that the work of Wycliffe and Hereford was revised by Richard Purvey, circ. A.D. 1388. To him also is ascribed the interesting Prologue, in which the translator gives an account both of his purpose and his method. (Forshall and Madden, *Pref.* p. xiv.)

(2). The former was, as that of Wycliffe had been, to give an English Bible to the Eng-

the subject of much discussion, that in this and the other Anglo-Saxon versions the attempt is made to give vernacular equivalents even for the words which, as belonging to a systematic theology, or for other reasons, most later versions have left practically untranslated. Thus baptism is "fylth" (washing); *poenitentia*, "doed-bote" (redress for evil deeds). *Sc scribae* are "bocere" (bookmen). Synagogues "gessamnungum" (meetings); amen, "soth-tes" (in sooth); and phylacteries, "healabec" (neck-wools). See Lewis, *Hist. of Translations*, p. 9.

⁶ The Ormulum, edited by Dr. White, was printed at the Oxford University Press in 1862.

⁷ Chronologically, of course, the Gospels thus referred to may have been Wycliffe's translation; but the strong

opposition of Arundel to the work of the Reformer makes it probable that those which the queen used belonged to a different school, like that of the versions just mentioned.

⁸ The authorship of this book has however been disputed (comp. Todd's *Preface*).

⁹ "One comfort is of knyghtes; they serve us with the Gospels, and have wille to read in Engliche the Gospels of Christes life" (Wycliffe, *Prologue*). Compare the speech ascribed to John of Gaunt (13 Ric. II. c. 1. v.) who was not the dregs of all, seeing other nations have the law of God, which is the law of our faith, written in their own language" (Foxe, *Pref. to Second Volume*, Lewis, p. 29).

people. He appeals to the authority of Bede, of Alfred, and of Grosstete, to the examples of "Frenshe, and Beemers (Bohemians), and Britons." He answers the hypocritical objections that men were not holy enough for such a work; that it was wrong for "idiots" to do what the great doctors of the Church had left undone. He hopes "to make the sentence as trewe and open in Englishe as it is in Latine, or more trewe and open."

It need hardly be said, as regards the method of the translator, that the version was based entirely upon the Vulgate.⁹ If, in the previous century, scholars like Grosstete and Roger Bacon, seeking knowledge in other lands, and from men of other races, had acquired, as they seem to have done, some knowledge both of Greek and Hebrew, the succession had, at all events, not been perpetuated. The war to be waged at a later period with a different issue between Scholastic Philosophy and "Humanity" ended, in the first struggle, in the triumph of the former, and there was probably no one at Oxford among Wycliffe's contemporaries who could have helped him or Purvey in a translation from the original. It is something to find at such a time the complaint that "learned doctoris taken littel heede to the lettre," the recognition that the Vulgate was not all sufficient, that "the texte of oure bokis" (he is speaking of the Psalter, and the difficulty of understanding it) "discordeth much from the Ebreu."¹⁰ The difficulty which was thus felt was increased by the state of the Vulgate text. The translator complains that what the Church had in view was not Jerome's version, but a later and corrupt text; that "the comune Latyne Bibles han more neede to be corrected as manie as I have seen in my life, than hath the Englishe Bible late translated." To remedy this he had recourse to collation. Many MSS. were compared, and out of this comparison, the true reading ascertained as far as possible. The next step was to consult the *Glossa Ordinaria*, the commentaries of Nicholas de Lyra, and others, as to the meaning of any difficult passages. After this (we recognise here, perhaps, a departure from the right order) grammars were consulted. Then came the actual work of translating, which he aimed at making idiomatic rather than literal. As he went on, he submitted his work to the judgment of others, and accepted their suggestions.¹¹ It is interesting to trace these early strivings after the true excellence of a translator; yet more interesting to take note of the spirit, never surpassed, seldom equalled, in later translators, in which the work was done. Nowhere do we find the conditions of the work, intellectual and moral, more solemnly asserted. "A translator hath grete nede to studie well the sentence, both before and after," so that no equivocal words may mislead his readers or himself, and then also "he hath nede to lyve a clene life, and be ful devout in preiers, and have not his wit occupied about worldli thinge, that the Holie

Spiryt, author of all wisdom, and cunnynge and truthe, drese (=train) him in his work, and suffer him not for to err" (Forshall and Madden, *Prolog.* p. 60).

(3). The extent of the circulation gained by this version may be estimated from the fact that, in spite of all the chances of time, and all the systematic efforts for its destruction made by Archbishop Arundel and others, not less than 150 copies are known to be extant, some of them obviously made for persons of wealth and rank, others apparently for humbler readers. It is significant as bearing, either on the date of the two works, or on the position of the writers, that while the quotations from Scripture in Langton's *Vision of Piers Plouman* are uniformly given in Latin, those in the *Persones Tale* of Chaucer are given in English, which for the most part agrees substantially with Wycliffe's translation.

(4). The following characteristics may be noticed as distinguishing this version: (1) The general homeliness of its style. The language of the Court or of scholars is as far as possible avoided, and that of the people followed. In this respect the principle has been acted on by later translators. The style of Wycliffe is to that of Chaucer as Tyndal's is to Surrey's, or that of the A. V. to Ben Jonson's. (2) The substitution, in many cases, of English equivalents for quasi-technical words. Thus we find "fy" or "fog" instead of "Raca" (Matt. v. 22); "they were washed" in Matt. iii. 6; "richesse" for "mammon" (Luke xvi. 9, 11, 13); "bishop" for "high-priest" (*passim*). (3) The extreme literalness with which, in some instances, even at the cost of being unintelligible, the Vulgate text is followed, as in 2 Cor. i. 17-19.

III. TYNDAL.—The work of Wycliffe stands by itself. Whatever power it exercised in preparing the way for the Reformation of the 16th century, it had no perceptible influence on later translations. By the reign of Henry VIII. its English was already obsolescent, and the revival of classical scholarship led men to feel dissatisfied with a version which had avowedly been made at second-hand, not from the original. With Tyndal, on the other hand, we enter on a continuous succession. He is the patriarch, in no remote ancestry, of the Authorised Version. With a consistent, unswerving purpose, he devoted his whole life to this one work; and through dangers and difficulties, amid enemies and treacherous friends, in exile and loneliness, accomplished it. More than Cranmer or Ridley he is the true hero of the English Reformation. While they were slowly moving onwards, halting between two opinions, watching how the Court-winds blew, or, at the best, making the most of opportunities, he set himself to the task without which, he felt sure, Reform would be impossible, which, once accomplished, would render it inevitable. "Ere many years," he said, at the age of thirty-six (A.D. 1520), he would cause "a

⁹ A crucial instance is that of Gen. iii. 15: "She shall treade thy head."

¹⁰ This knowledge is, however, at second hand, "by increase of Jerom, of Lire, and other expositours."

¹¹ It is worth while to give his own account of this process:—"First this simple creature," his usual way of speaking of himself, "bedde myche travaille, with diverse clawis and helpis, to gedere manie elde bibles, and thesre doctoris, and comune glossis, and to make co Latyn thise sumdel trewe, and thenne to studie it of the new, he text with the glose, and others doctoris, as he miste,

and speciall Lire on the elde testament, that helpid full myche in this werk, the thirde tyme to connekt with elde grammarians and elde dyvynis of hardre wordes and hardre sentences how those miste best be understode and translated, the fift tyme to translate as cleerly as he coude to the sentence, and to have manie good felawis and kunnyngs at the correctyng of the translatioun" (*Prolog.* c. xv.). The note at the close of the preface on the grammatical idioms of different languages, the many English equivalents, e.g., for the Latin *absolutus*, shows considerable discernment.

boy that driveth the plough" to know more of Scripture than the great body of the clergy then knew (Foze, in Anderson's *Annals of English Bible*, i. 36). We are able to form a fairly accurate estimate of his fitness for the work to which he thus gave himself. The change which had come over the Universities of Continental Europe since the time of Wycliffe had affected those of England. Greek had been taught in Paris in 1458. The first Greek Grammar, that of Constantine Lascaris, had been printed in 1476. It was followed in 1480 by Craston's Lexicon. The more enterprising scholars of Oxford visited foreign Universities for the sake of the new learning. Grocyn (d. 1519), Linacre (d. 1524), Colet (d. 1519), had, in this way, from the Greeks whom the fall of Constantinople had scattered over Europe, or from their Italian pupils, learnt enough to enter, in their turn, upon the work of teaching. When Erasmus visited Oxford in 1497, he found in these masters a scholarship which even he could admire. Tyndal, who went to Oxford circ. 1500, must have been within the range of their teaching. His two great opponents, Sir Thomas More and Bishop Tunstal, are known to have been among their pupils. It is significant enough that after some years of study, Tyndal left Oxford and went to Cambridge. Such changes were, it is true, common enough. The fame of any great teacher would draw round him men from other Universities, from many lands. In this instance, the reason of Tyndal's choice is probably not far to seek (Walter, *Biog. Notice* to Tyndal's *Doctrinal Treatises*). Erasmus was in Cambridge from 1509 to 1514. All that we know of Tyndal's character and life, the fact especially that he had made translations of portions of the N.T. as early as 1502 (Ofor, *Life of Tyndal*, p. 9), leads to the conclusion that he resolved to make the most of the presence of one who was emphatically the scholar and philologist of Europe. It must be remembered, too, that the great scheme of Cardinal Ximenes was just then beginning to interest the minds of all scholars. The publication of the Complutensian Bible, it is true, did not take place till 1520; but the collection of MSS. and other preparations for it began as early as 1504. In the mean time Erasmus himself, in 1516, brought out the first published edition of the Greek Testament; and it was thus made accessible to all scholars. Of the use made by Tyndal of these opportunities we have evidence in his coming up to London (1522), in the vain hope of persuading Tunstal (known as a Greek scholar, an enlightened Humanist) to sanction his scheme of rendering the N.T. into English, and bringing a translation of one of the orations of Isocrates as a proof of his capacity for the work. The attempt was not successful. "At the last I understood not only that there was no room in my Lord of London's palace to translate the N.T., but also that there was no place to do it in all England" (*Pref. to Five Books of Moses*).

¹ The boast of Bacon, that any one using his method could learn Hebrew and Greek within a week, bold as it is, shews that he knew something of both (*De Laude Nac. script.* c. 28).

² As indicating progress, it may be mentioned that the first Hebrew professor, Robert Wakefield, was appointed at Oxford in 1530, and that Henry VIII.'s secretary, Pace, knew Greek, Hebrew, and Chaldee.

³ The existence of a translation of Jonah by Tyndal,

It is not so easy to say how far at this time any knowledge of Hebrew was attainable at the English universities, or how far Tyndal had used any means of access that were open to him. It is probable that it may have been known, in some measure, to a few bolder than their fellows, at a time far earlier than the introduction of Greek. The body of Jews settled in the cities of England must have possessed a knowledge, more or less extensive, of their Hebrew books. On their abandonment, to the number of 16,000, by Edward I., these books fell into the hands of the monks, superstitiously revered or feared by most, yet drawn some to examination, and then to study. Grocyn, it is said, knew Hebrew as well as Greek. Bacon knew enough to pass judgment on the Vulgate as incorrect and misleading. Then, however, came a period in which linguistic studies were thrown into the background, and Hebrew became an unknown speech even to the best-read scholars. The first signs of a revival meet us towards the close of the 15th century. The remarkable fact that a Hebrew Psalter was printed at Soncino in 1477 (forty years before Erasmus's Greek Testament), the Pentateuch in 1482, the Prophets in 1486, the whole of the O.T. in 1488, that by 1496 four editions had been published, and by 1596 not fewer than eleven (Whitaker, *Hist. and Crit. Inquiry*, p. 22), indicates a demand as the part of the Christian students of Europe, not less than on that of the more learned Jews. Here the progress of the Complutensian Bible we have attracted the notice of scholars. The raised by the "Trojans" of Oxford in 1519 (consisting of the friars, who from the time of Wycliffe had all but swamped the education of the place) against the first Greek lectures—that study that language would make men Pagans, or to study Hebrew would make them Jews—shows that the latter study as well as the former was the object of their dislike and fear (Anderson, i. 34; Hallam, *Lit. of Eur.* i. 403).

Whether Tyndal had in this way gained any knowledge of Hebrew before he left England in 1524 may be uncertain. The fact that in 1534 he published a translation of Genesis, Deuteronomy, and Jonah,³ may be looked on as the first-fruits of his labours, the work of a man who was giving this proof of his power to translate from the original (Anderson, *Annals*, i. 209-288). We may perhaps trace, among other motives for the many wanderings of his exile, a desire to visit the cities Worms, Cologne, Harburg, Antwerp (Anderson, pp. 48-64), where the Jews lived in greatest numbers, and some of which were famous for their Hebrew learning. Of at least a fair acquaintance with that language we have a few years later, abundant evidence in the table of Hebrew words prefixed to his translation of the five books of Moses, and in casual expressions scattered through his other works, e.g. *Marn* (*Parable of Wicked Mammon*, p. 68), *Ch* (*Obedience*, p. 255), *Abel Mizraim* (p. 347). P.

previously questioned by some editors and because it has been placed beyond a doubt by the discovery of a MS. (believed to be unique) in the possession of the Rev. Arthur Hervey. It is described in a letter by him to the *Bury Post* of Feb. 3, 1862, transferred shortly afterwards to the *Athenaeum*.

³ The references to Tyndal are given to the 1st Society edition.

p. 353). A remark (*Preface to Obedience*, p. 148) shows how well he had entered into the general spirit of the language. "The properties of the Hebrew tongue agreeth a thousand times more with the English than with the Latine. The manner of speaking is in both one, so that in a thousand places thou needest not hunt to translate it into English word for word." When Spalatin describes him in 1534 it is as one well-skilled in seven languages, and one of these is Hebrew* (Anderson, i. 397).

The N. T. was, however, the great object of his care. First the Gospels of St. Matthew and St. Mark were published tentatively, then in 1525 the whole of the N. T. was printed in 4to. at Cologne and in small 8vo. at Worms.[†] The work was the fruit of a self-sacrificing zeal, and the zeal was its own reward. In England it was received with denunciations. Tostatus, Bishop of London, preaching at Paul's Cross, asserted that there were at least 2000 errors in it, and ordered all copies of it to be bought up and burnt. An Act of Parliament (35 Hen. VIII. cap. 1) forbade the use of all copies of Tyndal's "false translation." Sir T. More (*Dialogues*, l. c. *Supplication of Souls*, *Confutation of Tyndal's Answer*) entered his lists against it, and accused the translator of heresy, bad scholarship, and dishonesty, of "corrupting Scripture after Luther's counsel." The treatment which it received from professed friends was hardly less annoying. Piratical editions were printed, often carelessly, by trading publishers at Antwerp.[‡] A scholar of his own, George Joye, undertook (in 1534) to improve the version by bringing it into closer conformity with the Vulgate, and made it the vehicle of peculiar opinions of his own, substituting "life after this life," or "verie life," for "resurrection," as the translation of *ἀνάστασις*. (Comp. Tyndal's indignant protest in Pref. to edition of 1534.) Even the most zealous reformers in England seemed disposed to throw his translation overboard, and encouraged Coverdale (*infra*) in undertaking another. In the mean time the work went on. Editions were printed one after another.[§] The last appeared in 1535, just before his death, "diligently compared with the Greek," presenting for the first time systematic chapter-headings, and with some peculiarities in spelling specially intended for the pronunciation of the peasantry (Offor, *Life*, p. 82). His heroic life was brought to a close in 1536. We may cast one look on its end—the treacherous betrayal, the Judaism of the false friend, the imprisonment at Villorden, the last prayer, as the axe was about to fall, "Lord, open the King of England's eyes."[¶]

* Hallam's assertion that Tyndal's version "was avowedly taken from Luther's" originated probably in an inaccurate reminiscence of the title-page of Coverdale's *Lit. of Europe*, l. 526).

† The only extant copy of the 8vo. edition is in the library of the Baptist College at Bristol. It was reproduced in 1862 in *fac-simile* by Mr. Francis Fry, Bristol, the impression being limited to 177 copies. Mr. Fry proves, by a careful comparison of type, size, water-mark, and the like, with those of other books from the same press, that it was printed by Peter Schoeffer of Worms.

‡ In two of these (1534 and 1535) the words, "This cup is the New Testament in my blood," in 1 Cor. xi. were omitted (Anderson, i. 415). By a like process Mr. Antwerp (l. 63) fixes Cologne as the place, and Peter Jument as the printer of the 4to.

§ The localities of the editions are not without interest. Lamburgh, Cologne, Worms, in 1525; Antwerp in 1526, 17, "28"; Mariborow (= Marburg) in 1529; Strasburg Joye's edit. in 1531; Bergen-op-Zoom in 1533 (Joye's); ohn c. vi. at Nuremberg in 1533; Antwerp in 1531 (Cotton,

The work to which a life was thus nobly devoted was as nobly done. To Tyndal belongs the honour of having given the first example of a translation based on true principles, and the excellence of later versions has been almost in exact proportion as they followed his. Believing that every part of Scripture had one sense and one only, the sense in the mind of the writer (*Obedience*, p. 304), he made it his work, using all philological helps that were accessible, to attain that sense. Believing that the duty of a translator was to place his readers as nearly as possible on a level with those for whom the books were originally written, he looked on all the later theological associations that had gathered round the words of the N. T. as hindrances rather than helps, and sought, as far as possible, to get rid of them. Not "grace," but "favour," even in John i. 17 (in edition of 1525); not "charity," but "love;" not "confessing," but "acknowledging;" not "penance," but "repentance;" not "priests," but "seniors" or "elders;" not "salvation," but "health;" not "church," but "congregation," are instances of the changes which were then looked on as startling and heretical innovations (Sir T. More, *l. c.*). Some of them we are now familiar with. In others the later versions bear traces of a reaction in favour of the older phraseology. In this, as in other things, Tyndal was in advance, not only of his own age, but of the age that followed him. To him, however, it is owing that the versions of the English Church have throughout been popular, and not scholastic. All the exquisite grace and simplicity which have endeared the A. V. to men of the most opposite tempers and contrasted opinions—to J. H. Newman (*Dublin Review*, June, 1853) and J. A. Froude—is due mainly to his clear-sighted truthfulness.[¶] The desire to make the Bible a people's book led him in one edition to something like a provincial, rather than a national translation, but on the whole it kept him free from the besetting danger of the time, that of writing for scholars, not for the people; of a version full of "ink-horn" phrases, not in the spoken language of the English nation. And throughout there is the pervading stamp, so often wanting in other like works, of the most thorough truthfulness. No word has been altered to court a king's favour, or please bishops, or make out a case for or against a particular opinion. He is working freely, not in the fetters of prescribed rules. With the most entire sincerity he could say, "I call God to record, against the day we shall appear before our Lord Jesus to give a reckoning of our doings, that I

Printed Editions, pp. 4-6).

* Two names connect themselves sadly with this version. A copy of the edition of 1534 was presented specially to Anne Boleyn, and is now extant in the British Museum. Several passages, such as might be marked for devotional use, are underlined in red ink. Another reforming Lady, Joan Bocher, was known to have been active in circulating Tyndal's N. T. (Neal, i. 43; Strype, *Mem.* l. c. 28).

† The testimony of a Roman Catholic scholar is worth quoting:—"In point of perspicacity and noble simplicity, propriety of idiom and purity of style, no English version has as yet surpassed it" (Wedder, *Prospectus for a new Translation*, p. 49). The writer cannot forbear adding Mr. Froude's judgment in his own words:—"The peculiar genius, if such a word may be permitted, which breathes through it, the mingled tenderness and majesty, the Saxon simplicity, the preternatural grandeur, unequalled, unapproached, in the attempted improvements of modern scholars,—all are here, and bear the impress of the mind of one man, and that man William Tyndal" (*Hist. of Eng. lit.* 94).

never altered one syllable of God's word against my conscience, nor would this day, if all that is in the world, whether it be pleasure, honour, or riches, might be given me" (Anderson, i. 349).

IV. COVERDALE.—(1.) A complete translation of the Bible, different from Tyndal's, bearing the name of Miles Coverdale, printed probably at Zurich, appeared in 1535. The undertaking itself, and the choice of Coverdale as the translator, were probably due to Cromwell. Tyndal's controversial treatises, and the polemical character of his prefaces and notes, had irritated the leading ecclesiastics and embittered the mind of the king himself against him. All that he had written was publicly condemned. There was no hope of obtaining the king's sanction for anything that bore his name. But the idea of an English translation began to find favour. The rupture with the see of Rome, the marriage with Anne Boleyn, made Henry willing to adopt what was urged upon him as the surest way of breaking for ever the spell of the Pope's authority. The bishops even began to think of the thing as possible. It was talked of in Convocation. They would take it in hand themselves. The work did not, however, make much progress. The great preliminary question whether "venerable" words, such as *hostia*, *penance*, *pascha*, *holocaust*, and the like, should be retained, was still unsettled (Anderson, i. 414).^a Not till "the day after doomsday" (the words are Cranmer's) were the English people likely to get their English Bible from the bishops (ib. i. 577). Cromwell, it is probable, thought it better to lose no further time, and to strike while the iron was hot. A divine whom he had patronised, though not, like Tyndal, feeling himself called to that special work (*Pref. to Coverdale's Bible*), was willing to undertake it. To him accordingly it was entrusted. There was no stigma attached to his name, and, though a sincere reformer, neither at that time nor afterwards did he occupy a sufficiently prominent position to become an object of special persecution.^b

(2.) The work which was thus executed was done, as might be expected, in a very different fashion from Tyndal's. Of the two men, one had made this the great object of his life, the other, in his own language, "sought it not, neither desired it," but accepted it as a task assigned him. One prepared himself for the work by long years of labour in Greek and Hebrew. The other is content to make a translation at second hand "out of the Douche" (Luther's German Version) and the Latine.^c The

one aims at a rendering which shall be the truest and most exact possible. The other uses himself in weak commonplace as to the advantage of using many English words for one and the same word in the original, and in practice oscillates between "penance" and "repentance," "love" and "charity," "priests" and "elders," as though one set of words were as true and adequate as the other (*Preface*, p. 19). In spite of these weaknesses, however, there is much to like in the spirit and temper of Coverdale. He is a second-rate man, labouring as such contentedly, not ambitious to appear other than he is. He thinks it a great gain that there should be a diversity of translations. He acknowledges, though he dare not name it, the excellence of Tyndal's version,^d and regrets the misfortune which left it incomplete. He states frankly that he had done his work with the assistance of that and of five others.^e If the language of his dedication to the king, whom he compares to Moses, David, and Josiah, seems to be somewhat fulsome in its flattery, it is, at least, hardly more effusive than that of the Dedication of the A. V., and there was more to palliate it.^f

(3.) An inspection of Coverdale's version serves to show the influence of the authorities he followed.^g The proper names of the O. T. appear for the most part in their Latin form, *Eliab*, *Elaeas*, *Ochozias*; sometimes, as in *Esay* and *Jerem. i.* that which was familiar in spoken English. Some points of correspondence with Luther's version are not without interest. Thus "Cush," which in Wycliffe, Tyndal, and the A. V. is uniformly rendered "Ethiopia," is in Coverdale "Moriana's land" (Ps. lxxviii. 31; Acts viii. 27, *etc.*), after the "Mohrenlande" of Luther, and appears in this form accordingly in the P. B. version of the Psalms. The proper name *Rabahaksh* passes, as in Luther, into the "chief butler" (2 K. xviii. 17; Is. xxxv. 11). In making the sons of David "priests" (2 Sam. viii. 18), he followed both his authorities. "Elders" are "bishops" in Acts xx. 28 ("overseers" in A. V.). "Shiloh," in the prophecy of Gen. xlix. 10, becomes "the worthy," after Luther's "der Held." "They houghed oxen" takes the place of "they digged down a wall," in Gen. xlix. 8. The singular word "Lamia" is taken from the Vulg., as the English rendering of *Ziën* ("wild beasts," A. V.) in Is. xxxiv. 14. The "tabernacle of witness," where the A. V. has "congregation," shows the same influence. In spite of Tyndal, the Vulg. "plebs gratia," in Luke i. 28, leads to "full of grace."

independent judgment against the authority of Luther and the Vulgate (*Hist. and Crit. Enquiry*, p. 82).

^a "If thou [the reader] be fervent in prayer, God shall not only send thee [the Bible] in a better [version] to the ministration of those that began it before, but shall also move the hearts of those that before modified us withal."

^b The five were probably—(1) The Vulgate, (2) Luther's (3) The German Swiss version of Zurich, (4) the Latin of Pagninus, (5) Tyndal's. Others, however, have conjectured a German translation of the Vulgate earlier than Luther's, and a Dutch version from Luther (*Whitaker, Hist. and Crit. Enquiry*, p. 48).

^c He leaves it to the king, a *g.*, "to correct his translation, to amend it, to improve [= condemn] it, yea, and clean to reject it, if your godly wisdom shall thus necessary."

^d Giusburg (*App. to Collected*) has shown that, with regard to one book at least of the O. T., Coverdale followed the German-Swiss version printed at Zurich in 1531, with an almost servile obsequiousness.

^a A list of such words, 89 in number, was formally laid before Convocation by Gardiner in 1542, with the proposal that they should be left untranslated, or Englished with as little change as possible (Lewis, *Hist.* ch. 2).

^b It is uncertain where this version was printed, the title-page being silent on that point. Zurich, Cologne, and Frankfort have all been conjectured. Coverdale is known to have been abroad, and may have come in contact with Luther.

^c There seems something like an advertising tact in this title-page. A scholar would have felt that there was no value in any translation but one from the original. But the "Douché" would serve to attract the Reforming party, who held Luther's name in honour; while the "Latine" would at least conciliate the conservative feeling of Gardiner and his associates. Whitaker, however, maintains that Coverdale knew more Hebrew than he chose, at this time, to acknowledge, and refers to his translation of one difficult passage ("Ye take your pleasure under the oaks and under all green trees, the children berynge saine in the valleys," Is. lvii. 8) as proving an

while we have, on the other hand, "congregation" throughout the N. T. for *ἐκκλησία*, and "love" instead of "charity" in 1 Cor. xiii. It was the result of the same indecision that his language as to the Apocrypha lacks the sharpness of that of the more zealous reformers. "Baruch" is placed with the canonical books, after "Lamentations." Of the rest he says that they are "placed apart," as "not held by ecclesiastical doctors in the same repute" as the other Scriptures, but this is only because there are "dark sayings" which seem to differ from the "open Scripture." He has no wish that they should be "despised or little set by." "Patience and study would show that the two were agreed."

(4.) What has been stated practically disposes of the claim which has sometimes been made for this version of Coverdale's, as though it had been made from the original text (Anderson, i. 564; Whitaker, *Hist. and Crit. Inquiry*, p. 58). It is not improbable, however, that as time went on he added to his knowledge. The letter addressed by him to Cromwell (*Remains*, p. 492, Parker Soc.) obviously asserts, somewhat ostentatiously, an acquaintance "not only with the standing text of the Hebrew, with the interpretation of the Chaldee and the Greek," but also with "the diversity of reading of all texts." He, at any rate, continued his work as a pains-taking editor. Fresh editions of his Bible were published, keeping their ground in spite of rivals, in 1537, 1539, 1550, 1553. He was called in at a still later period to assist in the Geneva version. Among smaller facts connected with this edition may be mentioned the appearance of Hebrew letters—of the name Jehovah—in the title-page (יהוה), and again in the margin of the alphabetic poetry of Lamentations, though not of Ps. cxix. The plural form "Biblia" is retained in the title-page, possibly however in its later use as a singular feminine [comp. BIBLE]. There are no notes, no chapter-headings, no divisions into verses. The letters A, B, C, D, in the margin, as in the early editions of Greek and Latin authors, are the only helps for finding places. Marginal references point to parallel passages. The O. T., especially in Genesis, has the attraction of woodcuts. Each book has a table of contents prefixed to it.⁴

V. MATTHEW.—(1.) In the year 1537, a large folio Bible appeared as edited and dedicated to the king, by Thomas Matthew. No one of that name appears at all prominently in the religious history of Henry VIII., and this suggests the inference that the name was pseudonymous, adopted to conceal the real translator. The tradition which connects this Matthew with John Rogers, the proto-martyr of the Marian persecution, is all but undisputed. It rests (1) on the language of the indictment and sentence which describe him (Foxe, *Acts and Monuments*, p. 1029, 1563; Chester, *Life of Rogers*, pp. 418-423), as Joannes Rogers alias Matthew, as if it were a matter of notoriety; (2) the testimony of Foxe himself, as representing, if not personal knowledge, the current belief of his time; (3) the occurrence at the close of a short exhortation to the Study of Scripture in the Preface, of the initials J. R.;⁵ (4) internal evidence. This subdivides itself. (a.) Rogers, who had graduated at Pembroke Coll. Cambridge in 1525, and had sufficient fame to be invited to the new Cardinal's College at Oxford, accepted the office of chaplain to the mer-

chant adventurers of Antwerp, and there became acquainted with Tyndal, two years before the latter's death. Matthew's Bible, as might be expected, if this hypothesis were true, reproduces Tyndal's work, in the N. T. entirely, in the O. T. as far as 2 Chr., the rest being taken with occasional modifications from Coverdale. (b.) The language of the Dedication is that of one who has mixed much, as Rogers mixed, with foreign reformers. "This hope have the godlie even in strange countries, in your grace's godliness."

(2.) The printing of the book was begun apparently abroad, and was carried on as far as the end of Isaiah. At that point a new pagination begins, and the names of the London printers, Grafton and Whitechurch, appear. The history of the book was probably something like this: Coverdale's translation had not given satisfaction—least of all were the more zealous and scholar-like reformers contented with it. As the only complete English Bible, it was, however, as yet, in possession of the field. Tyndal and Rogers, therefore, in the year preceding the imprisonment of the former, determined on another, to include O. T., N. T., and Apocrypha, but based throughout on the original. Left to himself, Rogers carried on the work, probably at the expense of the same Antwerp merchant who had assisted Tyndal (Poynts), and thus got as far as Isaiah. The enterprising London printers, Grafton and Whitechurch, then came in (Chester, *Life of Rogers*, p. 29). It would be a good speculation to enter the market with this, and so drive out Coverdale's, in which they had no interest. They accordingly embarked a considerable capital, 500*l.*, and then came a stroke of policy which may be described as a miracle of audacity. Rogers's name, known as the friend of Tyndal, is suppressed, and the simulacrum of Thomas Matthew disarms suspicion. The book is sent by Grafton to Cranmer. He reads, approves, rejoices. He would rather have the news of its being licensed than a thousand pounds (Chester, pp. 425-427). Application is then made both by Grafton and Cranmer to Cromwell. The king's license is granted, but the publisher wants more. Nothing less than a monopoly for five years will give him a fair margin of profit. Without this, he is sure to be undersold by piratical, inaccurate editions, badly printed, on inferior paper. Failing this, he trusts that the king will order one copy to be bought by every incumbent, and six by every abbey. If this was too much, the king might, at least, impose that obligation on all the popishly-inclined clergy. That will bring in something, besides the good it may possibly do them (Chester, p. 430). The application was, to some extent, successful. A copy was ordered, by royal proclamation, to be set up in every church, the cost being divided between the clergy and the parishioners. This was, therefore, the first Authorised Version. It is scarcely conceivable, however, that Henry could have read the book which he thus sanctioned, or known that it was substantially identical with what had been publicly stigmatised in his Acts of Parliament (*ut supra*). What had before given most offence had been the polemic character of Tyndal's annotations, and here were notes bolder, and more thorough still. Even the significant W. T. does not appear to have attracted notice.

* A careful reprint, though not a fac-simile, of Coverdale's version has been published by Bagster (1838).

* These ornamental initials are curiously selected.

H. R. for the king's name, W. T. (at the end of the O. T.) for William Tyndal, R. G. for Richard Grafton the printer.

(3.) What has been said of Tyndal's Version applies, of course, to this. There are, however, signs of a more advanced knowledge of Hebrew. All the technical words connected with the Psalms, Neginoth, Shiggaion, Sheminith, &c., are elaborately explained. Ps. ii. is printed as a dialogue. The names of the Hebrew letters are prefixed to the verses of Lamentations. Reference is made to the Chaldee Paraphrase (Job vi.), to Rabbi Abraham (Job xix.), to Kimchi (Ps. iii.). A like range of knowledge is shown in the N. T. Strabo is quoted to show that the Magi were not kings, Macrobius as testifying to Herod's ferocity (Matt. ii.), Erasmus's Paraphrase on Matt. xiii., xv. The popular identification of Mary Magdalene with "the woman that was a sinner" is discussed, and rejected (Luke x.). More noticeable even than in Tyndal is the boldness and fullness of the exegetical notes scattered throughout the book. Strong and earnest in asserting what he looked on as the central truths of the Gospel, there was in Rogers a Luther-like freedom in other things which has not appeared again in any authorised translation or popular commentary. He guards his readers against looking on the narrative of Job i. as literally true. He recognises a definite historical starting-point for Ps. xlv. ("The sons of Korah praise Solomon for the beauty, eloquence, power, and nobleness, both of himself and of his wife"), Ps. xxii. ("David declareth Christ's dejection . . . and all, under figure of himself"), and the Song of Solomon ("Solomon made this balade for himself and his wife, the daughter of Pharaoh, under the shadow of himself, figuring Christ" &c.). The chief duty of the Sabbath is "to minister the fodder of the Word to simple souls," to be "pitiful over the weariness of such neighbours as laboured sore all the week long." "When such occasions come as turn our rest to occupation and labour, then ought we to remember that the Sabbath was made for man, and not man for the Sabbath" (Jer. xvii.). He sees in the Prophets of the N. T. simply "expounders of Holy Scripture" (Acts xv.). To the man living in faith, "Peter's fishing after the resurrection, and all deeds of matrimony are pure spiritual;" to those who are not, "learning, doctrine, contemplation of high things, preaching, study of Scripture, founding of churches and abbeys, are works of the flesh" (*Pref. to Romans*).¹ "Neither is outward circumcision or outward baptism worth a pin of themselves, save that they put us in remembrance to keep the covenant" (1 Cor. vii.). "He that desireth honour, gaspeth after lucre. . . . castles, parks, lordships . . . desireth not a work, much less a good work, and is nothing less than a bishop" (1 Tim. iii.). Ex. xxxv. is said to be "against bishops and curates that despise the flock of Christ" The *ἄγγελος ἐκκλησίας* of Rev. ii. and iii. appears (as in Tyndal) as "the messenger of the congregation." Strong protests against Purgatory are found in notes to Ex. xviii. and 1 Cor. iii., and in the "Table of Principal Matters" it is significantly stated under the word Purgatory that "it is not in the Bible, but the purgation and remission of our sins is made us by the abundant mercy of God." The *Preface* to the Apocrypha explains the name, and distinctly asserts the inferiority of the books. No notes are added, and the translation is taken

from Coverdale, as if it had not been worth while to give much labour to it.

(4.) A few points of detail remain to be noticed. In the order of the books of the N. T. Rogers follows Tyndal, agreeing with the A. V. as far as the Epistle to Philemon. This is followed by the Epistles of St. John, then that to the Hebrews, then those of St. Peter, St. James, and St. Jude. Woodcuts, not very freely introduced elsewhere are prefixed to every chapter in the *Apocrypha*. The introduction of the "Table" mentioned above gives Rogers a claim to be the Patriarch of Concordances, the "father" of all such as write in Dictionaries of the Bible. Reversion for the Hebrew text is shown by his striking out the three verses which the Vulgate has added to Ps. xiv. In a later edition, published at Paris, not by Rogers himself, but by Grafton, under Coverdale's superintendence, in 1539, the obnoxious Prologue and Prefaces were suppressed, and the notes systematically expurgated and toned down. The book was in advance of the age. Neither booksellers nor bishops were prepared to be responsible for it.

VI. TAVERNER (1539). (1.) The boldness of the pseudo-Matthew had, as has been said, frightened the ecclesiastical world from its propriety. Coverdale's Version was, however, too inaccurate to keep its ground. It was necessary to find another editor, and the printers applied to Richard Taverner. But little is known of his life. The fact that, though a layman, he had been chosen as one of the canons of the Cardinal's College at Oxford indicates a reputation for scholarship, and this is confirmed by the character of his translation. It professes, in the title-page, to be "newly recognised, with great diligence, after the most faithful exemplars." The editor acknowledges "the labours of others" (i. e. Tyndal, Coverdale, and Matthew, though he does not name them) who have neither undiligently nor unlearnedly travelled, "owns that the work is not one which can be done 'absolutely'" (i. e. completely; by one or two persons, but requires "a deeper conferring of many learned wittes together, and also a juster time, and longer leisure;" but the task had to be done; he had been asked to do it. He had "used his talent" as he could.

(2.) In most respects this may be described as an expurgated edition of Matthew's. There is a Table of Principal Matters, and there are notes: but the notes are briefer, and less polemical. The passages quoted above are, e. g. omitted wholly or in part. The Epistles follow the same order as before.

VII. CRANMER. (1.) In the same year as Taverner's, and coming from the same press, appeared an English Bible, in a more stately half-printed with a more costly type, bearing a higher name than any previous edition. The title-page is an elaborate engraving, the spirit and power of which indicate the hand of Holbein. The king, seated on his throne, is giving the *Verbum Dei* to the bishops and doctors, and they distribute it to the people, while doctors and people are all joining in cries of "Vivat Rex." It declares the book to be "truly translated after the verity of the Hebrew and Greek texts" by "divers excellent learned men, expert in the foresaid tongues." A preface, in April, 1540, with the initials T. C., implies the archbishop's sanction. In a later edition (Nov. 1540), his name appears on the title-page, and the names of his coadjutors are given, Cuthbert (Tonstal) Bishop of Durham, and Nicholas (Heath) Bishop of Rochester.

¹ The long preface to the Romans (seven folio pages) was substantially identical with that in Tyndal's edition of 1534.

but this does not exclude the possibility of others having been employed for the first edition.

(2.) *Cranmer's Version* presents, as might be expected, many points of interest. The prologue gives a more complete ideal of what a translation ought to be than we have as yet seen. Words not in the original are to be printed in a different type. They are added, even when "not wanted by the sense," to satisfy those who have "missed them" in previous translations, i. e. they represent the various readings of the Vulgate where it differs from the Hebrew. The sign * indicates diversity in the Chaldee and Hebrew. It had been intended to give all these, but it was found that this would have taken too much time and space, and the editors purposed therefore to print them in a little volume by themselves. The frequent hands (☞) in the margin, in like manner, show an intention to give notes at the end; but *Matthew's Bible* had made men cautious, and, as there had not been time for "the King's Council to settle them," they were omitted, and no help given to the reader beyond the marginal references. In absence of notes, the lay-reader is to submit himself to the "godly-learned in Christ Jesus." There is, as the title-page might lead us to expect, a greater display of Hebrew than in any previous version. The Books of the Pentateuch have their Hebrew names given, *Bereschith* (Genesis), *Velle Schemoth* (Exodus), and so on. 1 and 2 Chr. in like manner appear, as *Dibre Haimmim*. In the edition of 1541, many proper names in the O. T. appear in the fuller Hebrew form, as e. g. Amaziahu, Jeremiahu. In spite of this parade of learning, however, the edition of 1539 contains, perhaps, the most startling blunder that ever appeared under the sanction of an archbishop's name. The editors adopted the Preface which, in *Matthew's Bible*, had been prefixed to the Apocrypha. In that preface the common traditional explanation of the name was concisely given. They appear, however, to have shrunk from offending the conservative party in the Church by applying to the books in question so damnable an epithet as Apocrypha. They looked out for a word more neutral and respectful, and found one that appeared in some MSS. of Jerome so applied, though in strictness it belonged to an entirely different set of books. They accordingly substituted that word, leaving the preface in all other respects as it was before, and the result is the somewhat ludicrous statement that the "books were called *Hagiographa*," because "they were read in secret and apart"!

(3.) A later edition in 1541 presents a few modifications worth noticing. It appears as "authorised" to be "used and frequented" in every church in the kingdom. The introduction, with all its elaborate promise of a future perfection disappears, and, in its place, there is a long preface by *Cranmer*, avoiding as much as possible all references to other translations, taking a safe *Via Media* tone, blaming those who "refuse to read," on the one hand, and "inordinate reading," on the other. This neutral character, so characteristic of *Cranmer's* policy, was doubtless that which enabled it to keep its ground during the changing moods of Henry's later years. It was reprinted again and again, and was the Authorised Version of the English Church till 1568—the interval of Mary's reign excepted. From it, accordingly, were taken most, if not all, the portions of Scripture in the Prayer Books of 1549 and 1552.

The Psalms, as a whole, the quotations from Scripture in the Homilies, the sentences in the Communion Services, and some phrases elsewhere, still preserve the remembrance of it. The oscillating character of the book is shown in the use of "love" instead of "charity" in 1 Cor. xiii.; and "congregation" instead of "church" generally, after Tyndal; while in 1 Tim. iv. 14, we have the singular rendering, as if to gain the favour of his opponents, "with authority of priesthood." The plan of indicating doubtful texts by a smaller type was adhered to, and was applied, among other passages, to Ps. xiv. 5, 6, 7, and the more memorable text of 1 John v. 7. The translation of 1 Tim. iii. 16, "All Scripture given by inspiration of God, is profitable," &c., anticipated a construction of that text which has sometimes been boasted of, and sometimes attacked, as an innovation. In this, however, Tyndal had led the way.

VIII. GENEVA.—(1.) The experimental translation of the Gospel of St. Matthew by Sir John Cheke into a purer English than before (*Strype, Life of Cheke*, vii. 3), had so little influence on the version that followed that it hardly calls for more than a passing notice, as showing that scholars were as yet unsatisfied. The reaction under Mary gave a check to the whole work, as far as England was concerned; but the exiles who fled to Geneva entered on it with more vigour than ever. *Cranmer's* Version did not come up to their ideal. Its size made it too costly. There were no explanatory or dogmatic notes. It followed Coverdale too closely; and where it deviated, did so, in some instances, in a retrograde direction. The Geneva refugees—among them Whittingham, Goodman, Pullain, Sampson, and Coverdale himself—laboured "for two years or more, day and night." They entered on their "great and wonderful work" with much "fear and trembling." Their translation of the N. T. was "diligently revised by the most approved Greek examples" (MSS. or editions?) (*Preface*). The N. T., translated by Whittingham, was printed by Conrad Badius in 1557, the whole Bible in 1560.

(2.) Whatever may have been its faults, the Geneva Bible was unquestionably, for sixty years the most popular of all versions. Largely imported in the early years of Elizabeth, it was printed in England in 1561, and a patent of monopoly given to James Bodleigh. This was transferred, in 1576, to Barker, in whose family the right of printing Bibles remained for upwards of a century. Not less than eighty editions, some of the whole Bible, were printed between 1558 and 1611. It kept its ground for some time even against the A. V., and gave way, as it were, slowly and under protest. The causes of this general acceptance are not difficult to ascertain. The volume was, in all its editions, cheaper and more portable—a small quarto, instead of the large folio of *Cranmer's* "Great Bible." It was the first Bible which laid aside the obsolescent black letter, and appeared in Roman type. It was the first which, following the Hebrew example, recognised the division into verses, so dear to the preachers or hearers of sermons. It was accompanied, in most of the editions after 1578, by a Bible Dictionary of considerable merit. The notes were often really helpful in dealing with the difficulties of Scripture, and were looked on as spiritual and evangelical. It was accordingly the version specially adopted by the great Puritan party through the whole reign of Elizabeth, and far into that of James. As might be expected, it was based on Tyndal's Version, often

* Such, e. g., as "worthy fruits of penance."

returning to it where the intermediate renderings had had the character of a compromise.

(3.) Some peculiarities are worthy of special notice:—(1) It professes a desire to restore the "true writing" of many Hebrew names, and we meet accordingly with forms like Izbak (Isaac), Jacob, and the like. (2) It omits the name of St. Paul from the title of the Epistle to the Hebrews; and, in a short Preface, leaves the authorship an open question. (3) It avows the principle of putting all words not in the original in Italics. (4) It presents, in a Calendar prefixed to the Bible, something like a declaration of war against the established order of the Church's lessons, commemorating Scripture facts, and the deaths of the great Reformers, but ignoring saints' days altogether. (5) It was the first English Bible which entirely omitted the Apocrypha. (6) The notes were characteristically Swiss, not only in their theology, but in their politics. They made allegiance to kings dependent upon the soundness of their faith, and in one instance (note on 2 Chr. xv. 16) at least seemed, to the easily startled James I., to favour tyrannicide.^a

(4.) The circumstances of the early introduction of the Geneva Version are worth mentioning, if only as showing in how different a spirit the great fathers of the English Reformation, the most conservative of Anglican theologians, acted from that which has too often animated their successors. Men talk now of different translations and various readings as likely to undermine the faith of the people. When application was made to Archbishop Parker, in 1565, to support Bodleigh's application for a licence to reprint the Geneva Version in 12mo., he wrote to Cecil in its favour. He was at the time looking forward to the work he afterwards accomplished, of "one other special Bible for the Churches, to be set forth as convenient time and leisure should permit;" but in the mean time it would "nothing hinder, but rather doo much good, to have diversity of translations and readings" (Strype, *Life of Parker*, iii. 6).^b In many of the later reprints of this edition the N. T. purports to be based upon Beza's Latin Version; and the notes are said to be taken from Joac. Camer, P. Leusler, Villerius, and Fr. Junius.

IX. THE BISHOPS' BIBLE.—(1.) The facts just stated will account for the wish of Archbishop Parker, in spite of his liberal tolerance, to bring out another version which might establish its claims against that of Geneva. Great preparations were made. The correspondence of Parker with his Suffragans presents some points of interest, as showing how little agreement there was as to the true theory of a translation. Thus while Sandys, Bishop of Worcester, finds fault with the "common translation" (Geneva?), as "following Munster too much," and so "swerving much from the Hebrew," Guest, Bishop of St. David's, who took the Psalms, acted on the principle of translating them so as to agree with the N. T. quotations, "for the avoiding of offence;" and Cox, Bishop of Ely, while laying

down the sensible rule that "Inkhorn terms were to be avoided," also went on to add "that the usual terms were to be retained so far forth as the Hebrew will well bear" (Strype, *Parker*, iii. 6). The principle of pious frauds, of distorting the truth for the sake of edification, has perhaps often been acted on by other translators. It has not often been so explicitly avowed as in the first of these suggestions.

(2.) The bishops thus consulted, eight in number, together with some deans and professors, brought out the fruit of their labours in a magnificent folio (1568 and 1572). Everything had been done to make it attractive. A long erudite preface vindicated the right of the people to read the Scriptures, and (quoting the authority of Bishop Fisher) admitted the position which later divines have often been slow to admit, that "there be yet in the Gospel many dark places which, without all doubt, to the posterity shall be made much more open." Wood-engravings of a much higher character than those of the Geneva Bible were scattered profusely, especially in Genesis. Three portraits of the Queen, the Earl of Leicester, and Lord Burleigh, beautiful specimens of copperplate engraving, appeared on the titlepages of the several parts.^c A map of Palestine was given, with degrees of latitude and longitude, in the edition of 1572. A most elaborate series of genealogical tables, prepared by Hugh Broughton, the great Rabbi of the age (of whom more hereafter), but ostensibly by Speed the antiquary (Broughton's name being in disfavour with the bishops), was prefixed (Strype, *Parker*, iv. 20; Lightfoot, *Life of Broughton*). In some points it followed previous translations, and was avowedly based on Cranmer's "A new edition was necessary." "This had led some well-disposed men to recognize it again, not as condemning the former translation, which has been followed mostly of any other translation, excepting the original text" (Pref. of 1572). Cranmer's Prologue was reprinted. The Geneva division into verses was adopted throughout.

(3.) Some peculiarities, however, appear for the first and last time. (1) The Books of the Bible are classified as legal, historical, sapiential, and prophetic. This was easy enough for the O. T., but the application of the same idea to the N. T. produced some rather curious combinations. The Gospels, the Catholic Epistles, and those to Titus, Philemon, and the Hebrews, are grouped together as legal; St. Paul's other Epistles as sapiential; the Acts appear as the one historical, the Revelation as the one prophetic Book. (2) It is the only Bible in which many passages, sometimes nearly a whole chapter, have been marked for the express purpose of being omitted when the chapters were read in the public service of the Church. (3) One edition contained the older version of the Psalms from Matthew's Bible, in parallel columns with that now issued, a true and practical acknowledgment of the benefit of a diversity of translations. (4) The initials of the translators were attached to the Books which they had severally undertaken. The work was done on the plan

^a The note "Hersin be showed that he lacked seal, for she ought to have died," was probably one which Scotch fanatics had bandied in connexion with the name of James's mother.

^b The Geneva Version, as published by Barker, is that popularly known as the *Breeches Bible*, from its rendering of Gen. iii. 7. It had however been preceded in this by a *volaille* a.

^c The fitness of these illustrations is open to question. Others still more incongruous found their way into the text of the edition of 1572, and the feelings of the Puritans were shocked by seeing a woodcut of Neptune in the initial letters of Jonah, Micah, and Nahum, while that of the Ep. to the Hebrews went so far as to give Lam and the Swan. There must, to say the least, have been very slovenly editorship to permit this.

of limited, not joint liability. (5) Here, as in the Geneva, there is the attempt to give the Hebrew proper names more accurately, as, e. g., in Heva, Isahac, Uaiahu, &c.

(4.) Of all the English versions, the Bishop's Bible had probably the least success. It did not command the respect of scholars, and its size and cost were far from meeting the wants of the people. Its circulation appears to have been practically limited to the churches which were ordered to be supplied with it. It had however, at any rate, the right to boast of some good Hebrew scholars among the translators. One of them, Bishop Alley, had written a Hebrew Grammar; and though vehemently attacked by Broughton (Townley, *Literary History of the Bible*, iii. 190), it was defended as vigorously by Fulke, and, together with the A. V., received from Selden the praise of being "the best translation in the world" (*Table Talk, Works*, iii. 2009).

X. RHEIMS AND DOUAY.—(1.) The successive changes in the Protestant versions of the Scriptures were, as might be expected, matter of triumph to the controversialists of the Latin Church. Some saw in it an argument against any translation of Scripture into the spoken language of the people. Others pointed derisively to the want of unity which these changes displayed. There were some, however, who took the line which Sir T. More and Gardiner had taken under Henry VIII. They did not object to the principle of an English translation. They only charged all the versions hitherto made with being false, corrupt, heretical. To this there was the ready retort, that they had done nothing: that their bishops in the reign of Henry had promised, but had not performed. It was felt to be necessary that they should take some steps which might enable them to turn the edge of this reproach, and the English refugees who were settled at Rheims—Martin, Allen (afterwards cardinal), and Bristow—undertook the work. Gregory Martin, who had graduated at Cambridge, had signalled himself by an attack on the existing versions,² and had been answered in an elaborate treatise by Fulke, Master of Catherine Hall, Cambridge (*A Defence of the Sincere and True Translation, &c.*). The charges are mostly of the same kind as those brought by Sir T. More against Tyndal. "The old time-honoured words were discarded. The authority of the LXX. and Vulgate was set at nought when the translator's view of the meaning of the Hebrew and Greek differed from what he found in them." The new model translation was to avoid these faults. It was to command the respect at once of priests and people. After an incubation of some years it was published at Rheims in 1582. Though Martin was competent to translate from the Greek, it professed to be based on "the authentic text of the Vulgate." Notes were added, as strongly dogmatic as those of the Geneva Bible, and often keenly controversial. The work of translation was completed somewhat later by the publication of the O. T. at Douay in 1609. The language was precisely what might have been expected from men who adopted Gardiner's ideal of what a translation ought to be. At every page we stumble on "strange ink-horn words," which never had been English, and never

could be, such, e. g., as "the Pasche and the Azymes" (Mark xvi. 1), "the arch-synagogue" (Mark v. 35), "in prepuce" (Rom. iv. 9), "Joan rate with the fallacie of sin" (Heb. iii. 13), "a greater hoste" (Heb. xi. 4), "this is the annuntiation" (1 John v. 5), "pre-ordinate" (Acts xii. 48), "the justifications of our Lord" (Luke i. 6), "what is to me and thee" (John ii. 4), "longanimity" (Rom. ii. 4), "purge the old leaven that you may be a new paste, as you are azymes" (1 Cor. iv. 7), "you are evacuated from Christ" (Gal. v. 4), and so on.³

(2.) A style such as this had, as might be expected, but few admirers. Among those few, however, we find one great name. Bacon, who leaves the great work of the reign of James unnoticed, and quotes almost uniformly from the Vulgate, goes out of his way to praise the Rheims Version for having restored "charity" to the place from which Tyndal had expelled it, in 1 Cor. xiii. (*Of the Pacification of the Church*).

XI. AUTHORISED VERSION.—(1.) The position of the English Church in relation to the versions in use at the commencement of the reign of James was hardly satisfactory. The Bishop's Bible was sanctioned by authority. That of Geneva had the strongest hold on the affections of the people. Scholars, Hebrew scholars in particular, found grave fault with both. Hugh Broughton, who spoke Hebrew as if it had been his mother-tongue, denounced the former as being full of "traps and pitfalls," "overthrowing all religion," and proposed a new version to be effected by an English Septuagint (72), with power to consult gardeners, artists, and the like, about the words connected with their several callings, and bound to submit their work to "one qualified for difficulties." This ultimate referee was, of course, to be himself (Strype, *Whitgift*, iv. 19, 23). Unhappily, neither his temper nor his manners were such as to win favour for this suggestion. Whitgift disliked him, worried him, drove him into exile. His feeling was, however, shared by others; and among the demands of the Puritan representatives at the Hampton Court Conference in 1604 (Dr. Reynolds being the spokesman), was one for a new, or, at least, a revised translation. The special objections which they urged were neither numerous (three passages only—Ps. cv. 28, cvi. 30, Gal. iv. 25 were referred to) nor important, and we must conclude either that this part of their case had not been carefully got up, or that the bullying to which they were exposed had had the desired effect of throwing them into some confusion. The bishops treated the difficulties which they did raise with supercilious scorn. They were "trivial, old, and often answered." Bancroft raised the cry of alarm which a timid Conservatism has so often raised since. "If every man's humour were to be followed, there would be no end of translating" (Cardwell, *Conferences*, p. 188). Cranmer's words seemed likely to be fulfilled again. Had it been left to the bishops, we might have waited for the A. V. "till the day after doomsday." Even when the work was done, and the translators acknowledged that the Hampton Court Conference had been the starting-point of it, they could not

but the devil's."

² Even Roman Catholic divines have felt the superiority of the A. V., and Challoner, in his editions of the N. T. to 1748, and the Bible, 1763, often follows it in preference to the Rheims and Douay translations.

³ "A discovery of the manifold corruptions of Holy scriptures by the Heretikes of our days, specially of the English sectaries." The language of this and other like works was, as might be expected, very abusive. The Bible, in Protestant translations, was "not God's word,

resist the temptation of a fling at their opponents. The objections to the Bishops' Bible had, they said, been nothing more than a shift to justify the refusal of the Puritans to subscribe to the Communion Book (*Preface to A.V.*). But the king disliked the politics of the Geneva Bible. Either repeating what he had heard from others, or exercising his own judgment, he declared that there was as yet no good translation, and that that was the worst of all. Nothing, however, was settled at the Conference beyond the hope thus held out.

(2.) But the king was not forgetful of what he thought likely to be the glory of his reign. The work of organising and superintending the arrangements for a new translation was one specially congenial to him, and in 1606 the task was accordingly commenced. The selection of the fifty-four scholars* to whom it was entrusted, seems, on the whole, to have been a wise and fair one. Andrews, Saravia, Overal, Montague, and Barlow, represented the "higher" party in the Church; Reynolds, Chaderton, and Lively that of the Puritans. Scholarship unconnected with party was represented by Henry Savile and John Boys. One name is indeed conspicuous by its absence. The greatest Hebrew scholar of the age, the man who had, in a letter to Cecil (1595), urged this very plan of a joint translation, who had already translated several books of the O.T. (Job, Ecclesiastes, Daniel, Lamentations) was ignominiously excluded. This may have been, in part, owing to the dislike with which Whitgift and Bancroft had all along regarded him. But in part, also, it was owing to Broughton's own character. An unmanageable temper showing itself in violent language, and the habit of stigmatising those who differed from him, even on such questions as those connected with names and dates, as heretical and atheistic, must have made him thoroughly impracticable; one of the men whose presence throws a Committee or Conference into chaos.

(3.) What reward other than that of their own consciences and the judgment of posterity were the men thus chosen to expect for their long and laborious task? The king was not disposed to pay them out of his state revenue. Gold and silver were not always plentiful in the household of the English Solomon, and from him they received nothing (Heywood, *State of Auth. Bibl. Revision*). There remained, however, an ingenious form of liberality, which had the merit of being inexpensive. A king's letter was sent to the archbishops and bishops, to be transmitted by them to their chapters, commending all the translators to their favourable notice. They were exhorted to contribute in all 1000 marks, and the king was to be informed of each man's liberality. If any livings in their gift, or in the gift of private persons, became vacant, the king was to be informed of it, that he might nominate some of the translators to the vacant preferment. Heads of colleges, in like manner, were enjoined to give free board and lodging to such divines as were summoned from the

country to labour in the great work (Strype *Whitgift*, iv.). That the king might take in place as the director of the whole, a copy of fifteen instructions was sent to each translator, and apparently circulated freely in both Universities.

(4.) The instructions thus given will be found in Fuller (*l. c.*), and with a more accurate text a Burnet (*Reform. Records*). It will not be necessary to give them here in full; but it will be interesting to note the bearing of each clause upon the work in hand, and its relation to previous versions.

(1) The Bishops' Bible was to be followed, and a little altered as the original will permit. This was intended probably to quiet the alarm of those who saw, in the proposal of a new version, a condemnation of that already existing. (2) The names of prophets and others were to be retained, as nearly as may be as they are vulgarly used. This was to guard against forms like *Ishak*, *Jeremias*, &c., which had been introduced in some versions, and which some Hebrew scholars were willing to introduce more copiously. To it we owe probably the forms *Jeremy*, *Eliab*, *Osee*, *Core*, in the N.T. (3) The old ecclesiastical words to be kept as the word Church not to be translated Congregation. The rule was apparently given for the sake of its special application. "Charity," in 1 Cor. xiii. was probably also due to it. The earlier versions it will be remembered, had gone on the opposite principle. (4) When any word hath divers significations, that to be kept which hath been most commonly used by the most eminent fathers, be agreeable to the propriety of the place and the analogy of faith. This, like the former, tends to confound the functions of the preacher and the translator, and substitutes ecclesiastical traditions for philological accuracy. (5) The division of the chapters to be altered either not at all, or as little as possible. Here, again, convenience was more in view than truth and accuracy, and the result that divisions are perpetuated which are manifestly arbitrary and misleading. (6) No marginal notes to be affixed but only for the explanation of Hebrew and Greek words. This was obviously directed against the Geneva notes, as the special object of the king's aversion. Practically, however, whatever feeling it originated, we may be thankful that the A.V. came out as it did, without notes or comment. The open Bible was placed in the hands of all readers. The work of interpretation was left free. Had an opposite course been adopted, it might have had the tremendous evil of a whole body of Exegesis imposed upon the Church by authority, reflecting the Calvinism of the Synod of Dort, the absolutism of James, the high-church prelaty of Bancroft. (7) Such quotations of place to be marginally set down as may serve for reference of one Scripture to another. The principle that Scripture is its own best interpreter was thus recognised, but practically the marginal references of the A.V. of 1611 were somewhat scanty, most of those now printed having been added in later editions. (8 and 9) State plan of translation.

* Only forty-seven names appear in the king's list (Burnet, *Reform. Records*). Seven may have died, or declined to act; or it may have been intended that there should be a final Committee of Revision. A full list is given by Fuller (*Ch. Hist.* x.); and is reproduced, with biographical particulars, by Todd and Anderson.

† This side was, however, weakened by the death of Reynolds and Lively during the progress of the work.

The loss of the latter, Hebrew professor at Cambridge at thirty years, was every way deplorable.

‡ It deserves notice that Broughton is the only English translator who has adopted the *Ateram* as the equivalent for *Jehovah*, as in the French version. To him we owe perhaps more than to any other divine, we owe the first interpretation of the Descent into Hell.

each company of translators is to take its own books; each person to bring his own corrections. The company to discuss them, and having finished their work, to send it on to another company, and so on. (10) Provides for differences of opinion between two companies by referring them to a general meeting. (11) Gives power, in cases of difficulty, to consult any scholars. (12) Invites suggestions from any quarter. (13) Names the directors of the work: Andrews, Dean of Westminster; Barlow, Dean of Chester; and the Regius Professors of Hebrew and Greek at both Universities. (14) Names translations to be followed when they agree more with the original than the Bishops' Bible, *sc.* Tyndal's, Coverdale's, Matthew's, Whitchurch's, (Cranmer's), and Geneva. (15) Authorises Universities to appoint three or four overseers of the work.

(5.) It is not known that any of the correspondence connected with this work, or any minute of the meetings for conference is still extant. Nothing is more striking than the silence with which the version that was to be the inheritance of the English people for at least two centuries and a half was ushered into the world. Here and there we get glimpses of scholars coming from their country livings to their old college haunts to work diligently at the task assigned them (Peck, *Desiderata Curiosa*, i. 87). We see the meetings of translators, one man reading the chapter which he has been at work on, while the others listen, with the original, or Latin, or German, or Italian, or Spanish versions in their hands (Selden, *Table Talk*). We may represent to ourselves the differences of opinion, settled by the casting vote of the "odd man," or by the strong overbearing temper of a man like Bancroft,* the minority comforting themselves with the thought that it was no new thing for the truth to be outvoted (Gell, *Essay towards Amendment of last Eng. transl. of Bible*, p. 321).† Dogmatic interests were in some cases allowed to bias the translation, and the Calvinism of one party, the prelatist views of another, were both represented at the expense of accuracy (Gell, *l. c.*)‡

(6.) For three years the work went on, the separate companies comparing notes as directed. When the work drew towards its completion it was necessary to place it under the care of a select few. Two from each of the three groups were accordingly elected, and the six met in London, to superintend the publication. Now, for the first time, we find any more definite remuneration than the shadowy promise held out in the king's letter, of a share in the 1000 marks which Deans and Chapters would not contribute. The matter had now reached its

business stage, and the Company of Stationers thought it expedient to give the six editors thirty pounds each, in weekly payments, for their nine months' labour. The final correction, and the task of writing the arguments of the several books, was given to Bilson, bishop of Winchester, and Dr. Miles Smith, the latter of whom also wrote the Dedication and the Preface. Of these two documents the first is unfortunately familiar enough to us, and is chiefly conspicuous for its servile adulation. James I. is "that sanctified person," "enriched with singular and extraordinary graces," that had appeared "as the sun in his strength." To him they appeal against the judgment of those whom they describe, in somewhat peevish accents, as "Popish persons or self-conceited brethren." The Preface to the Reader, is more interesting, as throwing light upon the principles on which the translators acted. They "never thought that they should need to make a new translation, nor yet to make of a bad one a good one." "Their endeavour was to make a good one better, or out of many good ones one principal good one." They claim credit for steering a middle course between the Puritans who "left the old ecclesiastical words," and the obscurity of the Papists "retaining foreign words of purpose to darken the sense." They vindicate the practice, in which they indulge very freely, of translating one word in the original by many English words, partly on the intelligible ground that it is not always possible to find one word that will express all the meanings of the Greek or Hebrew, partly on the somewhat childish plea that it would be unfair to choose some words for the high honour of being the channels of God's truth, and to pass over others as unworthy.

(7.) The version thus published did not all at once supersede those already in possession. The fact that five editions were published in three years, shows that there was a good demand. But the Bishops' Bible probably remained in many Churches, (Andrews takes his texts from it in preaching before the king as late as 1621), and the popularity of the Geneva Version is shown by not less than thirteen reprints, in whole or in part, between 1611 and 1617. It is not easy to ascertain the impression which the A. V. made at the time of its appearance. Probably, as in most like cases, it was far less for good or evil than friends or foes expected. The Puritans, and the religious portion of the middle classes generally, missed the notes of the Geneva book (Fuller, *Ch. Hist.* x. 50, 51). The Romanists spoke as usual, of the unsettling effect of these frequent changes, and of the marginal readings as leaving men in doubt what was the truth of Scripture.¶ One frantic cry

* Miles Smith, himself a translator and the writer of the Preface, complained of Bancroft that there was no outvoting him (Beard, *Revised Eng. Bible*).

† Gell's evidence, as having been chaplain to Archbishop Abbot, carries some weight with it. His works are to be found in the Brit. Mus. Library. Mr. Scrivener's statement to the contrary being apparently an oversight (*Supplement to A. V. of N. T.* p. 101).

‡ The following passages are those commonly referred to in support of this charge: (1) The rendering "such as should be saved," in Acts ii. 47. (2) The insertion of the words "any man" in Heb. x. 38 ("the just shall live by faith, but if any man draw back," &c.), to avoid an inference unfavourable to the doctrine of Final Perseverance. (3) The use of "bishopric," in Acts i. 20, of "over-sight," in 1 Pet. v. 2, of "bishop," in 1 Tim. iii. 1, &c. and "overseers," in Acts xx. 28, in order to avoid the identification of Bishops and Elders. (4) The chapter-

heading of Ps. cxlix. in 1611 (since altered), "The Prophet exhorteth to praise God for that power which he hath given the Church to bind the consciences of men." Blunt (*Duties of a Parish Priest*, Lect. II.) appears, in this question, on the side of the prosecution; Trench (*On the A. V. of the N. T. &c.* x.) on that of the defence. The charge of an undue bias against Rome in 1 Cor. xi. 27, Gal. v. 6, Heb. xiii. 4, is one on which an acquittal may be pronounced with little or no hesitation.

¶ It may be at least pleaded, in mitigation, that the flattery of the translators is outdone by that of Francis Bacon.

¶ Whitaker's answer, by anticipation, to the charge is worth quoting: "No inconvenience will follow if interpretations or versions of Scripture, when they have become obsolete, or ceased to be intelligible, may be afterwards changed or corrected" (*Dissert. on Script.* p. 252, Parker Soc. ed.). The wiser divines of the English Church had not then learnt to raise the cry of finality.

was heard from Hugh Broughton the rejected (*Works*, p. 661), who "would rather be torn in pieces by wild horses than impose such a version on the poor churches of England." Selden, a few years later, gives a calmer and more favourable judgment. It is "the best of all translations as giving the true sense of the original." This, however, is qualified by the remark that "no book in the world is translated as the Bible is, word for word, with no regard to the difference of idioms. This is well enough so long as scholars have to do with it, but when it comes among the common people, Lord! what gear do they make of it!" (*Table-Talk*). The feeling of which this was the expression, led even in the midst of the agitations of the Commonwealth to proposals for another revision, which, after being brought forward in the Grand Committee of Religion in the House of Commons in Jan. 1656, was referred to a sub-committee, acting under Whitelocke, with power to consult divines and report. Conferences were accordingly held frequently at Whitelocke's house, at which we find, mingled with less illustrious names, those of Walton and Cudworth. Nothing, however, came of it (Whitelocke, *Memorials*, p. 564; Collier, *Ch. Hist.* ii. 9). No report was ever made, and with the Restoration the tide of conservative feeling, in this as in other things, checked all plans of further alteration. Many had ceased to care for the Bible at all. Those who did care were content with the Bible as it was. Only here and there was a voice raised, like R. Geil's (*ut supra*), declaring that it had defects, that it bore in some things the stamp of the dogmatism of a party (p. 321).

(8.) The highest testimony of this period is that of Walton. From the editor of the Polyglott, the few words "inter omnes eminent" meant a good deal (*Pref.*). With the reign of Anne the tide of glowing panegyric set in. It would be easy to put together a long *catena* of praises stretching from that time to the present. With many, of course, this has been only the routine repetition of a traditional boast. "Our unrivalled Translation," and "our incomparable Liturgy," have been, equally, phrases of course. But there have been witnesses of a far higher weight. In proportion as the English of the 18th century was infected with a Latinised or Gallicised style, did those who had a purer taste look with reverence to the strength and purity of a better time as represented in the A. V. Thus Addison dwells on its ennobling the coldness of modern languages with the glowing phrases of Hebrew (*Spectator*, No. 405), and Swift confesses that "the translators of the Bible were masters of an English style far fitter for that work than any we see in our present writings" (*Letter to Lord Oxford*). Each half-century has naturally added to the prestige of these merits. The language of the A. V. has intertwined itself with the controversies, the devotion, the literature of the English people. It has gone, wherever they have gone, over the face of the whole earth. The most solemn and tender of individual memories are, for the most part, associated with it. Men leaving the Church of England for the Church of Rome turn regretfully with a yearning look at that noble "well of English undefiled," which they are about to exchange for the uncouth monstrosities of Rheims and Douay. In this case too, as in so many others, the position of the A. V. has been strengthened, less by the skill of its defenders than by the weakness of its assailants. While from time to time, scholars and divines

(Lowth, Newcome, Waterland, Trench, Elliott), have admitted the necessity of a revision, there has been no general attack on the present version and produced ones have been, for the most part, men of narrow knowledge and defective taste (Purver, and Harwood, and Bellamy, and Conquest), just able to pick out a few obvious faults, and showing the competence for the task by entering on the work of translating or revising the whole Bible single-handed. One memorable exception must not, however, be passed over. Hallam (*Lit. of Europe*, iii. ch. 2, *ad fin.*) records a brief but emphatic protest against the "enthusiastic praise" which has been lavished on this translation. "It may, in the eyes of many, be a better English, but it is not the English of Daniel, or Raleigh, or Bacon, . . . it abounds, in fact, especially in the O. T., with obsolete phraseology, and with single words long since abandoned, or retained only in provincial use." The statement may, it is believed, be accepted as an encomium. If it had been the English of the first letters of James's reign, would it have retained as it has done, for two centuries and a half, its hold on the mind, the memory, the affections of the English people?

XII. SCHEMES FOR A REVISION.—(1.) A series of the attempts which have been made at various times to bring about a revision of the A. V. must necessarily be brief and imperfect, may not be worthy its use for future labourers. The first half of the 18th century was not favourable for such a work. An almost solitary *Essay for a New Translation* by H. R. (Ross), 1702, attracted little or no notice (Todd, *Life of Walton*, i. 134). A Greek Testament with an English translation, singularly vulgar and offensive, was published in 1729, of which extracts are given by Lewis (*Hist. of Transl. ch. v.*). With the slight revival of learning among the scholars of the latter half of that period the subject was again mooted. Lowth in a *Visitation Sermon* (1758), and Secker in a Latin Speech intended for Convocation (1761), recommended it. Matt. Pilkington in his *Remarks* (1759), and Dr. Thomas Brett, in an *Essay on Ancient Versions of the Bible* (1780), dwelt on the importance of consulting them with reference to the O. T. as well as the N. T., with a view to a more accurate text than that of the Masoretic Hebrew, the former insisting also on the obsolete words which are scattered in the A. V., and giving a useful Alphabetical list of them. A folio *New and literal translation of the whole Bible* by Anthony Purver, a Quaker (1764), was a more ambitious attempt. He dwells at some length on the "obsolete, uncouth, clownish" expressions which disfigure the A. V. He includes in his list such words as "joyous," "solace," "dames," "day-spring," "bereaved," "marvels," "bombers." He substitutes "he hearkened to what he said," "he hearkened to his voice," "eat victuals," "eat bread" (Gen. iii. 19); "was in favour with" for "found grace in the eyes of," "was angry" for "his wrath was kindled." In spite of its defective taste, however, the work has considerable merit, is based upon a careful study of the original, and of many of the best commentators, and may be contrasted favourably with most of the single-handed translations that have followed. It was, at any rate, far above the depths of degradation and folly which was reached in Harwood's *Lateral Translation of the N. T.* "with freedom, spirit, and elegance" (1766). Here again, a few samples are enough to show the character of the whole. "The young lady is not

lead" (Mark v. 39). "A gentleman of splendid family and opulent fortune had two sons" (Luke xv. 11). "The clergyman said, You have given him the only right and proper answer" (Mark xii. 32). "We shall not pay the common debt of nature, but by a soft transition, &c." (1 Cor. xv. 51).

(2.) Biblical revision was happily not left entirely in such hands as these. A translation by Worsley "according to the present idiom of the English tongue" (1770) was, at least, less offensive. Durell (*Preface to Job*), Lowth (*Preface to Isaiah*), Blayney (*Pref. to Jeremiah*, 1784), were all strongly in favour of a new, or revised translation. Durell dwells most on the arbitrary additions and omissions in the A. V. of Job, on the total absence in some cases, of any intelligible meaning. Lowth speaks chiefly of the faulty state of the text of the O. T., and urges a correction of it, partly from various readings, partly from ancient versions, partly from conjecture. Each of the three contributed, in the best way, to the work which they had little expectation of seeing accomplished, by labouring steadily at a single book and committing it to the judgment of the Church.⁷ Kennicott's labours in collecting MSS. of the O. T. issued in his *State of the present Hebrew Text* (1753, 59), and excited expectations that there might before long be something like a basis for a new version in a restored original.

A more ambitious scheme was started by the Roman Catholic Dr. Geddes, in his *Prospectus for a New Translation* (1786). His remarks on the history of English translations, his candid acknowledgment of the excellences of the A. V., and especially of Tyndal's work as pervading it, his critical notes on the true principles of translation, on the A. V. as falling short of them, may still be read with interest. He too like Lowth finds fault with the superstitious adherence to the Masoretic text, with the undue deference to lexicons, and disregard of versions shown by our translators. The proposal was well received by many Biblical scholars, Lowth, Kennicott, and Barrington, being foremost among its patrons. The work was issued in parts, according to the terms of the Prospectus, but did not get further than 2 Chron. in 1792, when the death of the translator put a stop to it. Partly perhaps owing to its incompleteness, but still more from the extreme boldness of a Preface, anticipating the conclusions of a later criticism,⁸ Dr. Geddes's translation fell rapidly into disfavour. A Sermon by White (famous for his Bampton Lectures) in 1779, and two pamphlets by J. A. Symonds, Professor of Modern History at Cambridge, the first on the Gospels and the Acts, in 1789; the second on the Epistles, in 1794, though attacked in an *Apology for the Liturgy and Church of England* (1795), helped to keep the discussion from oblivion.

(3.) The revision of the A. V., like many other salutary reforms, was hindered by the French Revolution. In 1792, Archbishop Newcome had published an elaborate defence of such a scheme, citing a host of authorities (Dodderidge, Wesley, Campbell, in addition to those already mentioned), and taking

the same line as Lowth. Revised translations of the N. T. were published by Wakefield in 1795, by Newcome himself in 1796, by Scarlett in 1798, Campbell's version of the Gospels appeared in 1788, that of the Epistles by Macknight in 1795. But in 1796 the note of alarm was sounded. A feeble pamphlet by George Burges (*Letter to the Lord Bishop of Ely*), took the ground that "the present period was unfit," and from that time, Conservatism, pure and simple, was in the ascendant. To suggest that the A. V. might be inaccurate, was almost as bad as holding "French principles." There is a long interval before the question again comes into anything like prominence, and then there is a new school of critics in the *Quarterly Review* and elsewhere, ready to do battle vigorously for things as they are. The opening of the next campaign was an article in the *Classical Journal* (No. 36), by Dr. John Bellamy, proposing a new translation, followed soon afterwards by its publication under the patronage of the Prince Regent (1818). The work was poor and unsatisfactory enough, and a tremendous battery was opened upon it in the *Quarterly Review* (Nos. 37 and 38), as afterwards (No. 46) upon an unhappy critic, Sir J. B. Burges, who came forward with a Pamphlet in its defence (*Reasons in favour of a New Translation*, 1819). The rash assertion of both Bellamy and Burges that the A. V. had been made almost entirely from the LXX. and Vulgate, and a general deficiency in all accurate scholarship, made them easy victims. The personal element of this controversy may well be passed over, but three less ephemeral works issued from it, which any future labourer in the same field will find worth consulting. Whitaker's *Historical and Critical Inquiry*, was chiefly an able exposure of the exaggerated statement just mentioned. H. J. Todd, in his *Vindication of the Authorised Translation* (1819), entered more fully than any previous writer had done into the history of the A. V., and gives many facts as to the lives and qualifications of the translators not easily to be met with elsewhere.⁹ The most masterly, however, of the manifestoes against all change, was a pamphlet (*Remarks on the Critical Principles, &c.*, Oxford, 1820), published anonymously, but known to have been written by Archbishop Laurence. The strength of the argument lies chiefly in a skilful display of all the difficulties of the work, the impossibility of any satisfactory restoration of the Hebrew of the O. T., or any settlement of the Greek of the N. T., the expediency therefore of adhering to a *Textus receptus* in both. The argument may not be decisive, but the scholarship and acuteness brought to bear on it make the book instructive, and any one entering on the work of a translator ought at least to read it, that he may know what difficulties he has to face.¹⁰

(4.) A correspondence between Herbert Marsh, bishop of Peterborough, and the Rev. H. Walter, in 1828, is the next link in the chain. Marsh had spoken (*Lectures on Biblical Criticism*, p. 295) with some contempt of the A. V. as based on Tyndal's, Tyndal's on Luther's, and Luther's on

⁷ Whatever be the demerits of Lowth's *Isaiah*, it deserves something better than the sarcasm of Hurd, that "its only use was to shew how little was to be expected from any new translation." As the Boswell of Warburton, Hurd could not resist the temptation of attacking an old antagonist of his master's.

⁸ "I will not pretend to say that it [the history of the Pentateuch] is entirely unmixt with the leaves of the heroic ages. Let the father of Hebrew be tried by the

same rules of criticism as the father of Greek history."

⁹ A short epitome of this portion of Todd's book has been published by the S. P. C. K. as a tract, and will be found useful.

¹⁰ About this period also (1819) a new edition of Newcome's version was published by Belsham and other Unitarian ministers, and, like Bellamy's attempt on the O. T., had the effect of stiffening the resistance of the great body of the clergy to all proposals for a revision.

Munster's *Luxur*, which was itself based on the Vulgate. There was, therefore, on this view, no real translation from the Hebrew in any one of these. Substantially this was what Bellamy had said before, but Marsh was a man of a different calibre, and made out a stronger case. Walter, in his answer, proves what is plain enough, that Tyndal knew some Hebrew, and that Luther in some instances followed Rabbinical authority and not the Vulgate; but the evidence hardly goes to the extent of showing that Tyndal's version of the O. T. was entirely independent of Luther's, or Luther's of the Latin.

(5.) The last five-and-twenty years have seen the question of a revision from time to time gaining fresh prominence. If men of second-rate power have sometimes thrown it back by meddling with it in wrong ways, others, able scholars and sound theologians, have admitted its necessity and helped it forward by their work. Dr. Conquest's Bible, with "20,000 emendations" (1841), has not commanded the respect of critics, and is almost self-condemned by the silly ostentation of its title. The motions which have from time to time been made in the House of Commons by Mr. Heywood, have borne little fruit beyond the display of feeble Liberalism and yet feebler Conservatism by which such debates are, for the most part, characterised; nor have the discussions in Convocation, though opened by a scholar of high repute (Professor Selwyn), been much more productive. Dr. Beard's *A revised English Bible the Want of the Church* (1857), though tending to overstate the defects of the A. V., is yet valuable as containing much information, and representing the opinions of the more learned Nonconformists. Far more important, every way, both as virtually an authority in favour of revision, and as contributing largely to it, are Professor Scholefield's *Hints for an Improved Translation of the N. T.* (1832). In his second edition, indeed, he disclaims any wish for a new translation, but the principle which he lays down clearly and truly in his preface, that if there is "any adventitious difficulty resulting from a defective translation, then it is at the same time an act of charity and of duty to clear away the difficulty as much as possible," leads legitimately to at least a revision; and this conclusion Mr. Selwyn in the last edition of the *Hints* (1857), has deliberately adopted. To Bishop Elliott also belongs the credit of having spoken at once boldly and wisely on this matter. Putting the question whether it would be right to join those who oppose all revision, his answer is, "God forbid. . . . It is in vain to cheat our own souls with the thought that these errors (in A. V.) are either insignificant or imaginary. There are errors, there are inaccuracies, there are misconceptions, there are obscurities . . . and that man who, after being in any degree satisfied of this, permits himself to lean to the counsels of a timid or popular obstructiveness, or who, intellectually unable to test the truth of these allegations, nevertheless permits himself to denounce or deny them, will . . . have to sustain the tremendous charge of having dealt deceitfully with the inviolable word of God" (*Pref. to Pastoral Epistles*). The translations appended by Dr. Elliott to his editions of St. Paul's

Epistles, proceed on the true principle of altering the A. V. "only where it appears to be incorrect, inexact, insufficient, or obscure," uniting a profound reverence for the older translators with a full truthfulness in judging of their work. The collation of all the earlier English versions makes this part of his book especially interesting and valuable. Dr. Trench (*On the A. V. of the N. T.* 1858), in like manner, states his conviction that "a revision ought to come," though as yet, he thinks, "the Greek and the English necessary to bring it to a successful issue are alike wanting." The work itself, it need hardly be said, is the first contradiction possible of this somewhat despondent statement, and supplies a good store of material for use when the revision actually comes. Dr. *Revision of the A. V. by Five Clergymen* (Barrow, Dr. Moberly, Dean Alford, Mr. Humphreys, and Dr. Elliott), represents the same school. Conservative progress, has the merit of adhering to the clear, pure English of the A. V., and does not deserve the censure which Dr. Beard passes on it as "promising little and performing less." As yet this series includes only the Gospel of St. John, and the Epistles to the Romans and Corinthians. The publications of the American Bible Union are such that there also the same want has been felt. The translations given respectively by Alford, Stauffer, Jowett, and Conybeare and Howson, in their respective Commentaries, are in like manner, and contain admissions of the necessity of the work, and contributions towards it. Mr. Sharpe (1840) and Mr. Highton (1862) have ventured on the wider work of translations of the entire N. T. Mr. Colenso has published the Gospel of St. Matthew as Part I of a like undertaking. It might almost seem as if at last there was something like a consensus of scholars and divines on this question. That assumption would, however, be too hasty. First the *vis inertiae*, which in a large body like the clergy of the English Church, is always met partly the fear of ulterior consequences, partly the indifference of the majority of the laity, would probably, at the present moment give at least a numerical majority to the opponents of a revision. Writers on this side are naturally less numerous, but the feeling of Conservatism, pure and simple, has found utterance in four men representing different sections, and of different calibre,—Mr. Scrivener (*Supp. to A. Eng. V. of N. T.*), Dr. McCall (*Reasons for holding fast the Authorized English Version*), Mr. C. S. Malan (*A Vindication, &c.*), and Dr. Cumming (*Revision and Translation*).

XIII. PRESENT STATE OF THE QUESTION.—

(1.) To take an accurate estimate of the extent to which the A. V. requires revision would call for nothing less than an examination of each single Book and would therefore involve an amount of labour incompatible with our present limits. To give a few instances only, would practically fix attention on a part only of the evidence, and so would lead to a false rather than a true estimate. No attempt, therefore, will be made to bring together individual passages as needing correction. A few remarks on the chief questions which must necessarily come before those who undertake a revision will be

* Mr. Mosan's careful translation of the chief Oriental and other versions of the Gospel according to St. John, and Mr. Scrivener's notes on St. Matthew, deserve to be reckoned as valuable contributions towards the work which they deprecate. A high American authority, Mr.

George P. Marsh, may also be referred to as throwing the weight of his judgment into the scale against revision at the present moment (*Lectures on the English Language*, Lect. xxviii).

perhaps, be out of place. Examples, classified under corresponding heads, will be found in the book by Dr. Trench already mentioned, and, scattered in the form of annotations, in that of Professor Scholfield.

(2.) The translation of the N. T. is from a Text confessedly imperfect. What editions were used is a matter of conjecture; most probably, one of those published with a Latin version by Beza between 1565 and 1598, and agreeing substantially with the *Textus receptus* of 1633. It is clear, on principle, that no revision ought to ignore the results of the textual criticism of the last hundred years. To shrink from noticing any variation, to go on printing as the inspired Word that which there is a preponderant reason for believing to be an interpolation or a mistake, is neither honest nor reverential. To do so for the sake of greater edification is simply to offer to God the unclean sacrifice of a lie. The authority of the A. V. is at any rate in favour of the practice of not anpressing facts. In Matt. i. 11, xvi. 26; Luke xvii. 36; John viii. 6; Acts xiii. 18; Eph. vi. 9; Heb. ii. 4; James ii. 18; 1 John ii. 23; 1 Pet. ii. 21; 2 Pet. ii. 11, 18; 2 John 8, different readings are given in the margin, or, as in 1 John ii. 23, indicated by a different type. In earlier versions, as has been mentioned, 1 John v. 7 was printed in smaller letters. The agree to which this should be done will, of course, require discernment. An apparatus like that in Tischendorf or Alford would obviously be out of place. Probably the useful Greek Testament edited by Mr. Scrivener might serve as an example of a middle course.

(3.) Still less had been done at the commencement of the 17th century for the text of the O. T. The Jewish teachers, from whom Protestant divines derived their knowledge, had given currency to the belief that in the Masoretic text were contained the *ipsissima verba* of Revelation, free from all risks of error, from all casualties of transcription. The conventional phrases, "the authentic Hebrew," "the Hebrew verity," were the expression of this undiscerning reverence.⁴ They refused to apply the same rules of judgment here which they applied to the text of the N. T. They assumed that the Masoretes were infallible, and were reluctant to acknowledge that there had been any variations since. Even Walton did not escape being attacked as unsound by the great Puritan divine, Dr. John Owen, for having called attention to the fact of discrepancies (*Proleg. cap. vi.*). The materials for a revised text are, of course, scantier than with the N. T.; but the labours of Kennicott, De Rossi, J. H. Michaelis, and Davidson have not been fruitless, and here as there, the older versions must be admitted as at least evidence of variations which once existed, but which were suppressed by the rigorous uniformity of the later Rabbis. Conjectural emendations, such as Newcome, Lowth and Ewald have so freely suggested, ought to be ventured on in such places only as are quite unintelligible without them.

(4.) All scholars worthy of the name are now agreed that as little change as possible should be

made in the language of the A. V. Happily there is little risk of an enasculated elegance such as might have infected a new version in the last century. The very fact of the admiration felt for the A. V., and the general revival of a taste for the literature of the Elizabethan period, are safeguards against any like tampering now. Some words, however, absolutely need change, as being altogether obsolete; others, more numerous, have been slowly passing into a different, often into a lower or a narrower meaning, and are therefore no longer what they once were, adequate renderings of the original.

(5.) The self-imposed law of fairness which led the A. V. translators to admit as many English words as possible to the honour of representing one in the Hebrew or Greek text has, as might be expected, marred the perfection of their work. Sometimes the effect is simply the loss of the solemn emphasis of the repetition of the same word. Sometimes it is more serious, and affects the meaning. While it would be simple pedantry to lay down unconditionally that but one and the same word should be used throughout for one in the original, there can be no doubt that such a limitation is the true principle to start with, and that instances to the contrary should be dealt with as exceptional necessities. Side by side with this fault, there is another just the opposite of it. One English word appears for several Greek or Hebrew words, and thus shades of meaning, often of importance to the right understanding of a passage, are lost sight of. Taken together, the two forms of error, which meet us in well-nigh every chapter, make the use of an English Concordance absolutely misleading.*

(6.) Grammatical inaccuracy must be noted as a defect pervading, more or less, the whole extent of the present version of the N. T. Instances will be found in abundance in Trench and Scholfield (*passim*), and in any of the better Commentaries. The true force of tenses, cases, prepositions, articles, is continually lost, sometimes at the cost of the finer shades which give vividness and emphasis, but sometimes also entailing more serious errors. In justice to the translators of the N. T., it must be said that, situated as they were, such errors were almost inevitable. They learnt Greek through the medium of Latin. Lexicons[†] and grammars were alike in the universal language of scholars; and that language was poorer and less inflected than the Greek, and failed utterly to represent, e. g. the force of its article, or the difference of its aorist and perfect tenses. Such books of this nature as were used by the translators were necessarily based upon a far scantier induction, and were therefore more meagre and inaccurate than those which have been the fruits of the labours of later scholars. Recent scholarship may in many things fall short of that of an earlier time, but the introduction of Greek lexicons and grammars in English has been beyond all doubt a change for the better.

(7.) The field of the O. T. has been far less adequately worked than that of the N. T., and Hebrew scholarship has made far less progress than

* The Judaizing spirit on this matter culminated in the *Formula Helvetici Consensus*, which pronounces the existing O. T. Text to be "tum quoad consonas, tum quoad vocalia, sive puncta ipsa, sive punctorum potestatem, tum quoad res, tum quoad verba, *depravatos*."

† The *Englishman's Hebrew Concordance* and the *Englishman's Greek Concordance*, published by Walton and Facer, deserve mention as useful helps for the student.

⁴ See III.

of the A. V. in overcoming this difficulty.

† Constantine's and Scalpa's were the two principally used. During the half century that preceded the A. V. the study of Greek had made great progress, was taught at all the great schools in 1588, and made part of the system of new ones then founded. Nowell, Dean of St Paul's, published a Greek version of the Catechism. The Grammar chiefly in use was probably Cole's (†).

Greek. Relatively, indeed, there seems good ground for believing that Hebrew was more studied in the early part of the 17th century than it is now. It was newer and more popular. The reverence which men felt for the perfection of the "Hebrew verity" made them willing to labour to learn a language which they looked upon as half-divine. But here also there was the same source of error. The early Hebrew lexicons represented partly, it is true, a Jewish tradition; but partly also were based upon the Vulgate (Bishop Marsh, *Lectures*, II. App. 61). The forms of cognate Shemitic languages had not been applied as a means for ascertaining the precise value of Hebrew words. The grammars, also in Latin, were defective. Little as Hebrew professors have, for the most part, done in the way of exegesis, any good commentary on the O. T. will show that here also there are errors as serious as in the N. T. In one memorable case, the inattention, real or apparent, of the translators to the force of the *Hiphil* form of the verb (*Lev. iv. 12*) has led to a serious attack on the truthfulness of the whole narrative of the Pentateuch (Coleman, *Pentateuch Critically Examined*, Part I. ch. vii.).

(8.) The division into chapters and verses is a matter that ought not to be passed over in any future revision. The former, it must be remembered, does not go further back than the 13th century. The latter, though answering, as far as the O. T. is concerned, to a long-standing Jewish arrangement, depends, in the N. T., upon the work of Robert Stephens. [BIBLE.] Neither in the O. T. nor in the N. T. did the verse-division appear in any earlier English edition than that of Geneva. The inconveniences of changing both are probably too great to be risked. The habit of referring to chapter and verse is too deeply rooted to be got rid of. Yet the division, as it is, is not seldom artificial, and sometimes is absolutely misleading. No one would think of printing any other book, in prose or poetry, in short clauses like the verses of our Bibles, and the tendency of such a division is to give a broken and discontinuous knowledge, to make men good textuaries but bad divines. An arrangement like that of the Paragraph Bibles of our own time, with the verse and chapter divisions relegated to the margin, ought to form part of any authoritative revision.^a

(9.) Other points of detail remain to be noticed briefly: (1) The chapter headings of the A. V. often go beyond their proper province. If it is intended to give an authoritative commentary to the lay reader, let it be done thoroughly. But if that attempt is abandoned, as it was deliberately in 1611, then for the chapter-headings to enter, as they do, upon the work of interpretation, giving, as in Canticles, Psalms, and Prophets, *passim*, mystical meanings, is simply an inconsistency.

^a As examples of what may be said on both sides on this point, the reader may be referred to an article on *Paragraph Bibles* in No. 208 of the *Edinburgh Review* (subsequently reprinted by the Rev. W. Harnack, 1855) and the Pamphlet by Dr. McCaul (*Reasons for holding fast*) already mentioned. Reeves's Bibles and Testaments (1802) and Boothroyd's translation (1824) should be mentioned as having set the example followed by the Religious Tract Society in their *Paragraph Bible*.

^b In all these points there has been, to a much larger extent than is commonly known, a work of unauthorized revision. Neither Italics, nor references, nor readings, nor chapter-headings, nor, it may be added, punctuation, are the same now as they were in the A. V. of 1611. The

What should be a mere table of contents becomes a gloss upon the text. (2) The use of italics in printing the A. V. is at least open to some risk. At first they seem an honest confession on the part of the translators of what is or is not in the original. On the other hand, they tempt to a loose translation. Few writers would think it necessary to use them in translating other books. If the words do not do more than represent the sense of the original, then there is no reason for treating them as if they were added at the discretion of the translators. If they go beyond that, they are of the nature of a gloss, altering the force of the original, and have no right to be there at all, while the fact that they appear as additions from the translator from the sense of responsibility. (3) Good as the principle of marginal references is, the margins of the A. V., as now printed, are somewhat inconveniently crowded, and the references, being often merely verbal, tend to defeat their own purpose, and to make the reader weary of referring. They need, accordingly, a careful sifting; and though it would not be desirable to go back to the scanty number of the original edition of 1611, something intermediate between that and the present over-abundance would be an improvement. (4) Marginal readings, on the other hand, indicating variations in the text, or differences in the judgment of translators, might be profitably increased in number. The results of the labors of scholars would thus be placed within the reach of all intelligent readers, and so many difficulties and stumbling-blocks might be removed.^b

(10.) What has been said will serve to show at once to what extent a new revision is required, and what are the chief difficulties to be encountered. And the work, it is believed, ought not to be delayed much longer. Names will occur to every one of more competent to undertake the work as far as the N. T. is concerned; and if such alterations were to be introduced as commanded the assent of at least two-thirds of a chosen body of twenty or thirty scholars, while a place in the margin was given to such renderings only as were adopted by at least one-third, there would be, it is believed, at once a great change for the better, and without any shock to the feelings or even the prejudices of the great mass of readers. Men fit to undertake the work of revising the translation of the O. T. are confessedly fewer, and, for the most part, occupied in other things. The knowledge and the power, however, are there, though in less measure, and even though the will be for the time almost summons to enter on the task from those whose authority they are bound to respect, would, we cannot doubt, be listened to. It might have the result of directing to their proper task and fruitful issue energies which are too often waste-

chief alterations appear to have been made first in 1601 and afterwards in 1769, by Dr. Blayney, under the sanction of the Oxford Delegates of the Press (*Gentleman's Magazine*, Nov. 1769). A like work was done about the same time by Dr. Paris at Cambridge. There had, however, been some changes previously. The edition of 1629, in particular, shows considerable augmentations in the text (Tarton, *Text of the English Bible*, 1833, pp. 91, 126). Dr. Blayney also we owe most of the notes on weights and measures, and coins, and the explanation, whence the text seems to require it, of Hebrew proper names. The whole question of the use of Italics is discussed eloquently by Tarton in the work just mentioned.

drawn to ephemeral and unprofitable controversies. As the revised Bible would be for the use of the English people, the men appointed for the purpose ought not to be taken exclusively from the English Church, and the learning of Nonconformists should, at least, be fairly represented. The changes recommended by such a body of men, under conditions such as those suggested, might safely be allowed to circulate experimentally for two or three years. When they had stood that trial, they might without risk be printed in the new Authorized Version. Such a work would unite reverence for the past with duty towards the future. In undertaking it we should be, not slighting the translators on whose labours we have entered, but following in their footsteps. It is the wisdom of the Church to bring out of its treasures things new and old. [E. H. P.]

VILLAGES. It is evident that *chatsar*, "a village," lit., an enclosure, a collection of huts, is often used, especially in the enumeration of towns in Josh. xii., xv., xix., to imply unwall'd suburbs outside the walled towns. And so it appears to mean when we compare Lev. xxv. 31 with v. 34. *Migrash*,^a A. V. "suburbs," i. e. a place thrust out from the city (see also Gen. xii. 48). Arab villages, as found in Arabia, are often mere collections of stone huts, "long, low, rude hovels, roofed only with the stalks of palm-leaves," or covered for a time with tent-cloths, which are removed when the tribe change their quarters. Others are more solidly built, as are most of the modern villages of Palestine, though in some the dwellings are mere mud-huts (Robinson, i. 167, ii. 13, 14, 44, 387; Hasselquist, *Trav.* p. 155; Stanley, *S. & P.* p. 233, App. §83, p. 525). Arab villages of the Hedjaz and Yemen often consist of huts with circular roofs of leaves or grass, resembling the description given by Sallust of the Numidian *mapalia*, viz. ships with the keel uppermost (Sallust, *Jug.* 18; Shaw, *Trav.* p. 220; Niebuhr, *Descr. de l'Ar.* p. 54).

There is little in the O. T. to enable us more precisely to define a village of Palestine, beyond the fact that it was destitute of walls or external defences. Persian villages are spoken of in similar terms (Est. xxxviii. 11; Esth. ix. 19).

By the Talmudists a village was defined as a place destitute of a synagogue (Lightfoot, *Chorogr. Century*, ch. xcvi.). Galilee, in our Lord's time, contained many villages and village-towns,^a and Josephus says that in his time there were in Galilee 204 towns and villages,^a some of which last had walls (Joseph. *Vit.* § 45). At present the country is almost depopulated (Raumer, *Pal.* p. 105; Stanley, *S. & P.* p. 384). Most modern Turkish and Persian villages have a *Mensel* or

Medhfeh, a house for travellers (Burkhardt, *Syria*, p. 295; Robinson, ii. 19; Martyn, *Life*, p. 437).

The places to which in the O. T. the term *chatsar* is applied were mostly in the outskirts of the country (Stanley, p. 526). In the N. T. the term *κῆμα* is applied to Bethphage (Matt. xxi. 2), Bethany (Luke x. 38; John xi. 1), Emmaus (Luke xxiv. 13), Bethlehem (John vii. 42). A distinction between city or town (*πόλις*) and village (*κῆμα*) is pointed out (Luke viii. 1). On the other hand, Bethsaida is called *πόλις* (John i. 45; Luke ix. 10), and also *κῆμα* (Mark viii. 23, 26), unless by the latter word we are to understand the suburbs of the town, which meaning seems to belong to "country" (Mark vi. 56). The relation of dependence on a chief town of a district appears to be denoted by the phrase "villages of Caesarea Philippi" (Mark viii. 27).

In the Hebrew language the prefix *Caphtar* implied a regular village, as Capernaum, which place, however, had in later times outgrown the limits implied by its original designation (Lightfoot, *l. c.*; Stanley, pp. 521-527; 1 Macc. vii. 31). [H. W. P.]

VINE. The well-known valuable plant (*Vitis vinifera*), very frequently referred to in the Old and New Testaments, and cultivated from the earliest times. The first mention of this plant occurs in Gen. ix. 20, 21, where Noah is represented as having been its first cultivator. The Egyptians say that Osiris first taught men the use of the vine. That it was abundantly cultivated in Egypt is evident from the frequent representations on the monuments, as well as from the Scriptural allusions. See Gen. xl. 9-11, Pharaoh's dream; and Num. xx. 5, where the Israelites complain that the wilderness was "no place of figs or of vines," evidently regretting that they had left the vines of Egypt. Comp. also Ps. lxxviii. 47: "He destroyed their vines with hail" (see on this subject Calaneo, *Hierob.* ii. p. 412).

The vines of Palestine were celebrated both for luxuriant growth and for the immense clusters of grapes which they produced. When the spies were sent forth to view the promised land, we are told that on their arrival at the valley of Eshcol they cut down a branch with one cluster of grapes, and bare it between two on a staff (Num. xiii. 23). This they did no doubt for convenience of carriage, and in order that the grapes on that splendid cluster might not be bruised. Travellers have frequently testified to the large size of the grape-clusters of Palestine. Schulz (*Leitungen des Hschaten*, v. p. 265, quoted by Rosenmüller, *Bib. Bot.* p. 223) speaks of snipping at Beitahin, a village near Ptolemais, under a vine whose stem was about a foot and a half in diameter, and whose

^a 1. *Bath*. See DAUGHTER.

2. *צָרַת*; *ἐκκλησία, κῆμα*; *villa, castellum, oppidum*, especially described as unwall'd, Lev. xxv. 31. (Stanley, *S. & P.* App. §87.)

3. (a) *צָרַת*, from *צָרַת*, "cover" (Gen. 706); *κῆμα*; *villa*. (b) *צָרַת*, only once, Neh. vi. 2; *κῆμα*; *vicius*. (c) *צָרַת*, only once, 1 Sam. vi. 18; *κῆμα*; *villa*.

4. (a) *צָרַת*, from *צָרַת* (Gen. 1125, "to separate," also "to judge," like *κρίνω*; once "village," i. e. a place of separated dwellings, Hab. iii. 14); *δυσίοντος*; *bellator*. See FRAZZETTA. (b) *צָרַת*, Judg. v. 7, 11; A. V. following Targ., "villages;" lit., rulers or warriors. (c) *צָרַת*,

πόλις (unwall'd), Est. xxxviii. 11. (d) *צָרַת*, properly a dweller in the country, *paganus*; *φεισάιος*; *oppidum*.

5. *צָרַת*; *ἐκκλησία*; *vicius*; Num. xxxii. 41, Deut. iii. 14, Judg. x. 4: a word applied by modern Bedouins to their own villages (Stanley, p. 527). See HATTON-JAIR.

6. *צָרַת*; *περιστέρια*; *suburbana*; i. e., pastures for flocks (Gen. pp. 306-7).

In N. T. the word *κῆμα* is also rendered "town."

7. *צָרַת*, from *צָרַת*, "drive out."

8. *καμπούλας*, *vicos et civitates*, Mark i. 32.

9. *πόλις καὶ κῆμα*.

10. *ἀγροί*.

height was about thirty feet, which by its branches formed a hut upwards of thirty feet broad and long. "The clusters of these extraordinary vines," he adds, "are so large that they weigh ten or twelve pounds, and the berries may be compared with our small plums." See also Belon, *Observat.* ii. p. 340: "Les sèpes des vignes sont fort gros et les rameaux fort spacieux. Les habitants entendent bien comme il la faut gouverner. Car ils la plantent si le long l'une de l'autre, qu'on pourroit mener une charrette entre deux. Ce n'est pas grande merveille si les raisins sont si beaux et le vin si puissant." Strabo states that it is recorded that there are vines in Margiana whose stems are such as would require two men to span round, and whose clusters are two cubits long (*Geograph.* i. p. 112, ed. Kramer). Now Margiana is the modern district of Ghilan in Persia, south-west of the Caspian Sea, and the very country on whose hills the vine is believed to be indigenous. Nothing would be easier than to multiply testimonies relative to the large size of the grapes of Palestine, from the published accounts of travellers such as Elliot, Laborde, Mariti, Dandini (who expresses his surprise at the extraordinary size of the grapes of Lebanon), Russell, &c. We must be content with quoting the following extract from Kitto's *Physical History of Palestine*, p. 330, which is strikingly illustrative of the spies' mode of carrying the grapes from Eshcol:—"Even in our own country a bunch of grapes was produced at Welbeck, and sent as a present from the Duke of Rutland to the Marquis of Rockingham, which weighed nineteen pounds. It was conveyed to its destination—more than twenty miles distant—on a staff by four labourers, two of whom bore it in rotation." The greatest diameter of this cluster was nineteen inches and a half, its circumference four feet and a half, and its length nearly twenty-three inches.

Especially mention is made in the Bible of the vines of Eshcol (Num. xiii. 24, xxii. 9), of Sibraah, Heshbon, and Elealeh (Is. xvi. 8, 9, 10; Jer. xlviii. 32), and Engedi (Cant. i. 14). Prof. Stanley thus speaks of the vineyards of Judah, which he saw along the slopes of Bethlehem:—"Here, more than elsewhere in Palestine, are to be seen on the sides of the hills, the vineyards marked by their watchtowers and walls, seated on their ancient terraces—the earliest and latest symbol of Judah. The elevation of the hills and table-lands of Judah is the true climate of the vine. He 'bouned his foal to the vine, and his ass's colt to the choice vine; he washed his garments in wine, and his clothes in the blood of grapes.' It was from the Judean valley of Eshcol, 'the torrent of the cluster,' that the spies cut down the gigantic cluster of grapes. 'A vineyard on a hill of olives,' with the 'fence,' and 'the stones gathered out,' and 'the tower in the midst of it,' is the natural figure which, both in the prophetic and evangelical records, represents the kingdom of Judah" (*S. and P.* p. 164). From the abundance and excellence of the vines, it may readily be understood how frequently this plant is the subject of metaphor in the Holy Scriptures. Thus Israel is a vine brought from Egypt, and planted by the Lord's hand in the land of promise; room had been prepared for it (compare with this the passage from Belon quoted above); and where it took root it filled the land, it covered the hills with its shadow, its boughs were like the goodly cedars (Is. lxx. 8, 10). Comp. Gmelin (*Travels through*

Russia and N. Persia, iii. p. 431), who speaks of the vines of Ghilan:—"It is found in forests, . . . and is frequently found about promontories, and their lower part is almost entirely covered with it. There, higher than the eye can reach, it winds itself about the loftiest trees; and its tendrils, which here have an arm's thickness, so spread and mutually entangle themselves far and wide, that in places where it grows in the most luxuriant wildness it is very difficult to find a passage." To dwell under the vine and fig-tree is an emblem of domestic happiness and peace (1 K. iv. 25; Mic. iv. 4; Ps. cxxviii. 3); the rebellious people of Israel are compared to "wild grapes," "an empty vine," "the degenerate plant of a strange vine," &c. (Is. v. 2, 4, but see COCKLE; Hos. x. 1; Jer. ii. 21). It is a vine which our Lord selects to show the spiritual union which subsists between Himself and his members (John xv. 1-6).

The following Hebrew words denote the vine:—

1. *Gephon* (גֶּפֶן), or, more definitely, *gephon hayayin* (גֶּפֶן הָאֵינָן), of frequent occurrence in the Bible, and used in a general sense. Indeed *gephon* sometimes is applied to a plant that resembles a vine in some particulars, as *ḡēphon sādā* (גֶּפֶן סָדָא) 2 K. iv. 39, i. e. probably the *Colocynthis* plant [GOURD, App. A], or *ḡēphon sādām* (גֶּפֶן סָדָם), the vine of Sodom, certainly not a vine. (See below.)

2. *Sérék* (סֵרֶק), or *sérékāh* (סֵרֶקָה), is a term expressive of some choice kind of vine (Jer. ii. 21; Is. v. 2; Gen. xlix. 11), supposed to be identical with that now called in Morocco *serki*, and in Persia *kishmish*, with small round dark berries, and soft stones. (See Niebuhr, *Descript. de l'Arabie*, p. 147; and Oedmann, *Sammlung*, ii. 97.) From the passage in Jeremiah, it is clear that the *sérék* denotes not another species of vine, but the common vine which by some process of cultivation attained a high state of excellence.

3. *Názir* (נָזִיר), originally applied to a Nazirite who did not shave his hair, expresses an "undressed vine" (A. V.), i. e. one which every seventh and every fiftieth year was not pruned. (See *Genesis*, *Thes.* s. v.)

Grapes are designated by various names: (1) *Eshcol* (אֶשְׁכּוֹל) is either "a cluster," ripe or unripe, like *racemus*, or a "single grape" (as in Is. lxxviii. 8, Mic. vii. 1). (2) *'Eṣṣ* (אֶשֶׁץ; Arab.

عَسَب, "a cluster"). (3) *Bōser* (בֹּסֵר), sour, i. e. unripe grapes (Is. xviii. 5). (4) *Zemérāh* (זֶמֶרָה), "a grape cut off." "The blossom" of the vine is called *semadar* (סֶמְדָר), Cant. ii. 13, 15. "Grape-stones" are probably meant by *cheremim* (חֶרֶמִּים); A. V. "kernel," Num. vi. 4. "The cuticle" of the grape is denominated *adā* (אֲדָ), Num. i. c.; "the tendrils" by *sārṣim* (סָרְסִים), Joel i. 7.

The ancient Hebrews probably all wed the vine to grow trailing on the ground, or upon supports. This latter mode of cultivation appears to be alluded to by Ezekiel (xix. 11, 12): "her strong rods were broken and withered." Dr. Robinson

who has given us much information on the vines of Palestine, thus speaks of the manner in which he saw them trained near Hebron:—"They are planted snugly in rows, eight or ten feet apart in each direction. The stock is suffered to grow up large to the height of six or eight feet, and is then fastened in a sloping position to a strong stake, and the shoots suffered to grow and extend from one plant to another, forming a line of festoons. Sometimes two rows are made to slant towards each other, and thus form by their shoots a sort of arch. These shoots are pruned away in autumn" (*Bib. Res.* ii. 80, 81).

The vintage, *bātsr* (בָּצֵר), which formerly was a season of general festivity, as is the case more or less in all vine-growing countries, commenced in September. The towns are deserted, and the people live among the vineyards (בָּצֵר) in the lodges and tents (*Bib. Res.* i. c.; comp. *Judg.* ix. 27; *Jer.* xxv. 30; *Is.* xvi. 10). The grapes were gathered with shouts of joy by the "grape-gatherers" (בָּצֵר) (*Jer.* xxv. 30), and put into baskets (see *Jer.* vi. 9). They were then carried on the head and shoulders, or slung upon a yoke, to the "wine-press" (נֶזֶב). [WINE.] Those intended for eating were perhaps put into flat open baskets of wickerwork, as was the custom in Egypt (*Wilkinson, Anc. Egypt.* i. 43). In Palestine at present the finest grapes, says Dr. Robinson, are dried as raisins, *tsimmak* (צִמְמָק), and the juice of the remainder, after having been trodden and pressed, "is boiled down to a syrup which, under the name of *dibs* (דִּבֵּס), is much used by all classes, wherever vineyards are found, as a condiment with their food." For further remarks on the modes of making fermented drinks, &c., of the juice of the grape, see under WINE. The vineyard (בֵּיתֶינָה), which was generally on a hill (*Is.* v. 1; *Jer.* xxi. 5; *Amos* ix. 13), was surrounded by a wall or hedge in order to keep out the wild boars (*Ps.* lxxx. 13), jackals, and foxes (*Num.* xxii. 24; *Cant.* ii. 15; *Neb.* iv. 3; *Ex.* xiii. 4, 5; *Matt.* xxi. 33), which commit sad havoc amongst the vines, both by treading them down and by eating the grapes. Within the vineyard was one or more towers of stone in which the vine-dressers, *oḡrēmim* (עֹרְמִים), lived (*Is.* i. 8, v. 2; *Matt.* xxi. 33; see also Robinson, *Bib. Res.* i. 213; ii. 81). The press, *gath* (גֶּת), and vat, *ykeb* (יָקֵב), which was dug (*Matt.* xxi. 33) or hewn out of the rocky soil, were part of the vineyard furniture (*Is.* v. 2). See WINE, p. 1774, for a figure of a large footpress with vat, represented in operation. The winepress of the Hebrews was probably of the form there depicted. [*FAT*, p. 614 α.]

The vine in the Mosaic ritual was subject to the usual restrictions of the "seventh year" (*Ex.* xxiii. 11), and the jubilee of the fiftieth year (*Lev.* xxv. 11). The gleanings, *olēlāth* (אֵלֵלָא), were to be left for the poor and stranger (*Jer.* xlix. 9; *Deut.* xxiv. 21). The vineyard was not to be sown "with divers seeds" (*Deut.* xxii. 9), but fig-trees were sometimes planted in vineyards (*Luke* xiii. 6). Comp. 1 K. iv. 25: "Every man under his vine and under his fig-tree." Persons passing through a vineyard were allowed to eat the grapes therein, but not to carry any away (*Deut.* xxiii. 24).

besides wild-boars, jackals, and foxes, other ene-

mies, such as birds, locusts, and caterpillars, occasionally damaged the vines.

Beth-haccerem, "the house of the vine" (*Jer.* vi. 1; *Neh.* iii. 14), and Abel-ceramin, "the plain of the vineyards," took their respective names from their vicinity to vineyards. Gophna (now *Jifna*), a few miles N. of Jerusalem, is stated by Eusebius (*Onom.* *Ἐδραγὶς Βότρυος*) to have derived its name from its vines. But see OPHNI. [W. H.]

VINE OF SODOM (סִדְוֹן נֶזֶב, *gophen Sōdōm*·

ἄμπελος Σοδόμων: *vinea Sodomorum*) occurs only in *Deut.* xxii. 32, where of the wicked it is said—"their vine is of the vine of Sodom, and of the fields of Gomorrah." It is generally supposed that this passage alludes to the celebrated apples of Sodom, of which Josephus (*Bell. Jud.* iv. 8, §4) speaks, and to which apparently Tacitus (*Hist.* v. 6) alludes. Much has been written on this curious subject, and various trees have been conjectured to be that which produced those

"Dead Sea fruits that tempt the eye,
But turn to ashes on the lips,"

of which Moore and Byron sing.

The following is the account of these fruits, as given by Josephus: speaking of Sodom, he says—"It was of old a happy land, both in respect of its fruits, and the abundance of its cities. But now it is all burnt up. Men say that, on account of the wickedness of its inhabitants, it was destroyed by lightning. At any rate, there are still to be seen remains of the divine fire and traces of fine cities, and moreover ashes produced in the fruits, which indeed resemble edible fruit in colour, but, on being plucked by the hand, are dissolved into smoke and ashes." Tacitus is more general, and speaks of all the herbs and flowers, whether growing wild or planted, turning black, and crumbling into ashes.

Some travellers, as Maandrell (*Early Trav. in Palestine*, p. 454, Bonn, 1848), regard the whole story as a fiction, being unable either to see or hear of any fruit that would answer the required description. Pococke supposed the apples of Sodom to be pomegranates, "which, having a tough, hard rind, and being left on the trees two or three years, may be dried to dust inside, and the outside may remain fair." Hasselquist (*Trav.* p. 287) seeks to identify the apples in question with the egg-shaped fruit of the *Solanum melongena* when attacked by some species of *lentredo*, which converts the whole of the inside into dust, while the rind remains entire and keeps its colour. Seetzen in his letters to Baron Zach (*Monat. Correspond.* xviii. p. 442) thought he had discovered the apples of Sodom in the fruit of a kind of cotton-tree, which grew in the plain of El Ghor, and was known by the name of *Aschkar*. The cotton is contained in the fruit, which is like a pomegranate, but has no pulp. Chateaubriand concludes the long-sought fruit to be that of a thorny shrub with small taper leaves, which in size and colour is exactly like the little Egyptian lemon; when dried, this fruit yields a blackish seed, which may be compared to ashes, and which in taste resembles bitter pepper. Burckhardt (*Trav. in Syria*, p. 392) and Irby and Mangles believe that the tree which produces these celebrated apples is one which they saw abundantly in the Ghor to the east of the Dead Sea, known by the vernacular name of *ashayr* or *ashar*. This tree bears a fruit of a reddish-yellow colour, about three inches in diameter, which contains a white substance resembling the finest silk, and enveloping

some seeds. This silk is collected by the Arabs, and twisted into matches for their firelocks. Dr. Robinson (*Bib. Res.* i. 523), when at 'Ain Jidy, without knowing at the moment whether it had been observed by former travellers or not, instantly pronounced in favour of the 'Gher fruit being the apples of Sodom. His account of this tree is minute, and may well be quoted:—"The 'Gher of the Arabs," which he identifies with the *Asclepias* (*Calotropis*) *procera* of botanists, "is found in abundance in Upper Egypt and Nubia, and also in Arabia Felix; but seems to be confined in Palestine to the borders of the Dead Sea. We saw it only at 'Ain Jidy; Hasselquist found it in the desert between Jericho and the northern shore; and Irby and Mangles met with it of large size at the south end of the sea, and on the isthmus of the peninsula. We saw here several trees of the kind, the trunks of which were six or eight inches in diameter, and the whole height from ten to fifteen feet. It has a greyish cork-like bark, with long oval leaves . . . it discharges copiously from its broken leaves and flowers a milky fluid. The fruit greatly resembles externally a large smooth apple or orange, hanging in clusters of three or four together, and when ripe is of a yellow colour. It was now fair and delicious to the eye, and soft to the touch; but, on being pressed or struck, it explodes with a puff, like a bladder or puff-ball, leaving in the hand only the shreds of the thin rind and a few fibres. It is indeed filled chiefly with air, which gives it the round form . . . after a due allowance for the marvellous in all popular reports, I find nothing which does not apply almost literally to the fruit of the 'Gher, as we saw it. It must be plucked and handled with great care, in order to preserve it from bursting."

Mr. Walter Elliot, in an article "on the *Poma Sodomitica*, or Dead-Sea apples" (*Trans. of the Entomol. Soc.* ii. p. 14, 1837-1840), endeavours to show that the apples in question are oak galls, which he found growing plentifully on dwarf oaks (*Quercus infectoria*) in the country beyond the Jordan. He tells us that the Arabs asked him to bite one of these galls, and that they laughed when they saw his mouth full of dust. "That these galls are the true Dead-Sea apples," it is added, "there can no longer be a question: nothing can be more beautiful than their rich, glossy, purplish-red exterior; nothing more bitter than their porous and easily pulverized interior" (p. 16). The opinion of Pockocke may, we think, be dismissed at once as being a most improbable conjecture. The objection to the *Solanum melongena* is that the plant is not peculiar to the shores or neighbourhood of the Sea of Sodom, but is generally distributed throughout Palestine, besides which it is not likely that the fruit of which Josephus speaks should be represented by occasional diseased specimens of the fruit of the egg-apple;

* You do not mention the *Solanum Sodomaceum*, which I thought had been quoted as one apple of the Dead Sea, and which is the plant I always thought to be as probably the fruit in question as any other. The objection to *S. melongena* is, that it is a cultivated plant; to the oak gall, that it is wholly absent from the Dead Sea district, though it answers the description best, so far as its beautiful exterior and powdery bitter interior are concerned.

"The Vine of Sodom, again, I always thought might refer to *Cucumis colocynthis* [see GORDON, App. A], which is bitter and powdery inside; the term *vine* would scarcely be given to any but a trailing or other plant of the habit of a vine. The objection to the *Calotropis*

we must look for some plant, the normal character of whose fruit comes somewhere nearer to the required conditions. Seetzen's plant is the same as that mentioned by Burckhardt, Irby and Mangles and Robinson, i. e. the 'Gher. Chateaubriand's thorny shrub, with fruit like small lemons, may be the *Zukhum* (*Balanites Aegyptiaca*), but it certainly cannot be the tree intended. It is not at all probable that the oak-galls of which Mr. Elliot speaks should be the fruit in question; because these being formed on a tree so generally known as an oak, and being common in all countries, would not have been a subject worthy of especial remark, or have been noticed as something peculiar to the district around the Sea of Sodom. The fruit of the 'Gher appears to have the best claim to represent the apples of Sodom; the *Calotropis procera* is an Indian plant, and thrives in the warm valley of 'Ain Jidy, but is scarcely to be found elsewhere in Palestine. The readiness with which its fruit, "fair to the eye," bursts when pressed, agrees well with Josephus's account; and although there is a want of antithesis between "the few fibres" of Robinson, and the "smoke and ashes" of the Jewish historian, yet, according to a note by the editor of Seetzen's Letters, the fruit of the *Calotropis* in winter contains a yellowish dust, in appearance resembling certain fungi, but of pungent quality." [W. H.]

VINEGAR (יֶזַע: *8tes: acetum*). The Hebrew term *chomets* was applied to a beverage, consisting generally of wine or strong drink turned sour (whence its use was proscribed to the Nazirite, Num. vi. 3), but sometimes artificially made by an admixture of barley and wine, and thus liable to fermentation (*Mishn. Pes.* 3, §1). It was acid even to a proverb (*Prov.* x. 26), and by itself formed a nauseous draught (*Ps.* lix. 21), but was serviceable for the purpose of sopping bread, as used by labourers (*Ruth* ii. 14). The degree of its acidity may be inferred from *Prov.* xxv. 20, where its effect on nitre is noticed. Similar to the *chomets* of the Hebrews was the *acetum* of the Romans,—a thin, sour wine, consumed by soldiers (*Veget. Re. Mil.* iv. 7) either in a pure state, or, more usually, mixed with water, when it was termed *posca* (*Plin.* xix. 29; *Spart. Hadr.* 10). This was the beverage of which the Saviour partook in His dying moments (*Matt.* xxvii. 48; *Mark* xv. 36; *John* xix. 29, 30), and doubtless it was refreshing to His exhausted frame, though offered in derision either on that occasion or previously (*Luke* xxiii. 36). The same liquid, mingled with gall (as St. Matthew states, probably with the view of marking the fulfilment of the prediction in *Ps.* lix. 21), or with myrrh (as St. Mark states with an eye to the exact historical fact^b), was offered to the Saviour at an earlier stage

procera (*Asclep. gigantea*, Linn.) is, that it is very scarce and not characteristic of the district, being found in one spot only. The beautiful silky cotton would never suggest the idea of anything but what is exquisitely lovely—it is impossible to imagine anything more beautiful: to assume that a diseased state of it was intended, is arguing *ad ignotum ab ignoto*, and a very far-fetched idea." [J. D. BOONER.]

Dr. Hooker's remark, that the term *vine* must refer to some plant of the habit of a vine, is conclusive against the claims of all the plants hitherto identified with the Vine of Sodom. The *C. colocynthis* alone possesses the required condition implied in the name. [W. H.]

^b St. Mark terms it *oleum hyssopaceum*. There is no

VINEYARDS, PLAIN OF THE

of His sufferings, in order to deaden the perception of pain (Matt. xvii. 34; Mark xv. 23). [W. L. B.]

VINEYARDS, PLAIN OF THE (בְּרֶחַב הַכֶּרֶם)

בְּרֶחַב הַכֶּרֶם: 'Εβελχαρμεις; Alex. Αβελ αμπελωνων: *Abel quas est vineis consita*). This place, mentioned only in Judg. xi. 33, has been already noticed under ABEL (5: see vol. i. p. 4a). To what he has there said, the writer has only to call attention to the fact that a ruin bearing the name of *Beit el Kerm*,—"house of the vine," was encountered by De Saulcy to the north of *Kerak* (Narr. i. 353). This may be the *Abel ceramim* of Jephthah, if the *Arzer* named in the same passage is the place of that name on the Arnon (*W. Moab*). It is however by no means certain; and indeed the probability is that the Ammonites, with the instinct of a nomadic or semi-nomadic people, betook themselves, when attacked, not to the civilized and cultivated country of Moab (where *Beit-el-Kerm* is situated), but to the spreading deserts towards the east, where they could disperse themselves after the usual tactics of such tribes. [G.]

VIOL. For an explanation of the Hebrew word translated "viol" see PSALTERY. The old English viol, like the Spanish *viguela*, was a six-stringed guitar. Mr. Chappell (*Pop. Mus.* i. 246) says "the position of the fingers was marked on the fingerboard by frets, as in guitars of the present day. The 'Chest of Viols' consisted of three, four, five, or six of different sizes; one for the treble, others for the mean, the counter-tenor, the tenor, and perhaps two for the bass." Etymologically *viol* is connected with the Dan. *Fiol* and the A. S. *fleole*, through the Fr. *viola*, Old Fr. *vielle*, Med. Lat. *vitella*. In the *Promptorium Parvulorum* we find "Fyuele, viella, fidicina, vitella." Again, in North's Plutarch (*Antonius*, p. 980, ed. 1595) there is a description of Cleopatra's barge, "the poop whereof was of gold, the sails of purple, and the oars of silver, which kept stroke in rowing after the sound of the musick of flutes, howboyes, cytherns, *vyolls*, and such other instruments as they played vpon in the barge." [W. A. W.]

VIPER. [SERPENT.]

VOPHSI (וֹפְסִי): Zafî; Alex. 'Iaßî: Vapsi).

Father of Nabhi, the spy selected from the tribe of Naphtali (Num. xiii. 14).

VOWS.* The practice of making vows, i. e. incurring voluntary obligations to the Deity, on fulfilment of certain conditions, such as deliverance from death or danger, success in enterprises, and the like, is of extremely ancient date, and common in all systems of religion. The earliest mention of a vow is that of Jacob, who, after his vision at Beth-el, promised that in case of his safe return he would dedicate to Jehovah the tenth of his goods, and make the place in which he had set up the memorial stone a place of worship (Gen. xxviii. 18-22, xxxi. 13). Vows in general are also mentioned in the Book of Job (xxii. 27).

Among instances of heathen usage in this respect the following passages may be cited: Jer. xiv. 25, and Jonah i. 16; Hom. *Il.* i. 64, 93, vi. 93, 306; *Odys.* iii. 382; Xen. *Anab.* iii. 2, §12; Virg.

difficulty in the application of οἶκος and ἕδος to the same substance; but whether the παρά χαλῆς μνησθέντος of St. Matthew can in any way be identified with the ἱερὸν οἶκος of Mark is doubtful. The term χαλῆ

VOWS

1687

Georg. i. 436; *Act.* v. 234; *Hor. Carm.* i. 5, 13, iii. 29, 59; *Liv.* xxii. 9, 10; *Cic. Att.* viii. 16; *Justin* xxi. 3; a passage which speaks of immoral vows; *Vall. Pat.* ii. 48.

The Law therefore did not introduce, but regulated the practice of vows. Three sorts are mentioned—I. Vows of devotion, *Neder*; II. Vows of abstinence, *Esar* or *Iaar*; III. Vows of destruction, *Cherem*.

I. As to vows of devotion, the following rules are laid down: A man might devote to sacred uses possessions or persons, but not the first-born either of man or beast, which was devoted already (*Lev.* xxvii. 26.) [FIRST-BORN.]

a. If he vowed land, he might either redeem it or not. If he intended to redeem, two points were to be considered, 1. the rate of redemption; 2. the distance, prospectively and retrospectively, from the year of jubilee. The price of redemption was fixed at 50 shekels of silver for the quantity of land which a homer of barley (eight bushels) would suffice to sow (*Lev.* xxvii. 16; see Knobel). This payment might be abated under the direction of the priest according to the distance of time from the jubilee-year. But at whatever time it was redeemed, he was required to add to the redemption-price one-fifth (20 per cent.) of the estimated value. If he sold the land in the mean time, it might not then be redeemed at all, but was to go to the priests in the jubilee-year (ver. 20).

The purchaser of land, in case he devoted and also wished to redeem it, was required to pay a redemption-price according to the priestly valuation first mentioned, but without the additional fifth. In this case, however, the land was to revert in the jubilee to its original owner (*Lev.* xxvii. 16; 24, xxv. 27; *Keil, Hebr. Arch.* §66, 80).

The valuation here laid down is evidently based on the notion of annual value. Supposing land to require for seed about 3 bushels of barley per acre, the homer, at the rate of 32 pecks, or 6 bushels, would be sufficient for about 2½ or 3 acres. Fifty shekels, 25 ounces of silver, at five shillings the ounce, would give 6*l.* 5*s.*, and the yearly valuation would thus amount to about 2*l.* per acre.

The owner who wished to redeem, would thus be required to pay either an annual rent or a redemption-price answering to the number of years short of the jubilee, but deducting Sabbatical years (*Lev.* xxv. 3, 15, 16), and adding a fifth, or 20 per cent. in either case. Thus, if a man devoted an acre of land in the jubilee year, and redeemed it in the same year, he would pay a redemption price of 49 - 6 = 43 years' value, + 20 per cent. = 103*l.* 4*s.*, or an annual rent of 2*l.* 8*s.*; a rate by no means excessive when we consider, 1. the prospect of restoration in the jubilee; 2. the undoubted fertility of the soil, which even now, under all disadvantages, sometimes yields an hundredfold (*Burckhardt, Syria*, p. 297).

If he refused or was unable to redeem, either the next of kin (*Goel*) came forward, as he had liberty to do, or, if no redemption was effected, the land became the property of the priests (*Lev.* xxv. 25, xxvii. 21; *Ruth* iii. 12, iv. 1, &c.).

In the case of a house devoted, its value was to

may well have been applied to some specific substance.

* וָדָם, from דָּם, "to make vow" (*Gen.* 28:5). See also ARATHENA.

he assessed by the priest, and a fifth added to the redemption price in case it was redeemed (Lev. xvii. 15). Whether the rule held good regarding houses in walled cities, viz., that the liberty of redemption lasted only for one year, is not certain; but as it does not appear, that houses devoted but not redeemed became the property of the priests, and as the Levites and priests had special towns assigned to them, it seems likely that the price only of the house, and not the house itself, was made over to sacred uses, and thus that the act of consecration of a house means, in fact, the consecration of its value. The Mishna, however, says, that if a devoted house fell down, the owner was not liable to payment, but that he was liable if he had devoted the value of the house (*Erac.* v. 5).

b. Animals fit for sacrifice, if devoted, were not to be redeemed or changed, and if a man attempted to do so, he was required to bring both the devotee and the changeling (Lev. xvii. 9, 10, 33). They were to be free from blemish (Mal. i. 14). An animal unfit for sacrifice might be redeemed, with the addition to the priest's valuation of a fifth, or it became the property of the priests, Lev. xvii. 12, 13. [OFFERING.]

c. The case of persons devoted stood thus: A man might devote either himself, his child (not the first-born), or his slave. If no redemption took place, the devoted person became a slave of the sanctuary—see the case of Absalom (2 Sam. xv. 8; Michaelis, §124, ii. 166, ed. Smith). [NAZARITE.] Otherwise he might be redeemed at a valuation according to age and sex, on the following scale (Lev. xvii. 1-7):

A. 1. A male from one month to 5 years old,	£. s. d.
8 shekels	= 0 12 6
2. From 5 years to 20 years, 20 shekels	= 2 10 0
3. From 20 years to 60 years, 60 shekels	= 6 5 0
4. Above 60 years, 15 shekels	= 1 17 6
B. 1. Females from one month to 5 years,	
3 shekels	= 0 7 6
2. From 5 years to 20 years, 10 shekels	= 1 5 0
3. From 20 years to 60 years, 30 shekels	= 3 15 0
4. Above 60 years, 10 shekels	= 1 0 0

If the person were too poor to pay the redemption price, his value was to be estimated by the priest, not, as Michaelis says, the civil magistrate (Lev. xvii. 8; Deut. xxi. 5; Mich. §145, ii. 283).

Among general regulations affecting vows, the following may be mentioned:—

1. Vows were entirely voluntary, but once made were regarded as compulsory, and evasion of performance of them was held to be contrary to true religion (Num. xxx. 2; Deut. xxiii. 21; Eccl. v. 4).

2. If persons in a dependent condition made vows, as (a) an unmarried daughter living in her father's house, or (b) a wife, even if she afterwards became a widow, the vow, if (a) in the first case her father, or (b) in the second, her husband heard and disallowed it, was void; but if they heard without disallowance, it was to remain good (Num. xxx. 3-16). Whether this principle extended to all children and to slaves is wholly uncertain, as no mention is made of them in Scripture, nor by Philo when he discusses the question (*de Spec. Leg.* 8, ii. 274, ed. Mangey). Michaelis thinks the omission of sons implies absence of power to control them (§83, i. 447).

3. Votive offerings arising from the produce of any impure traffic were wholly forbidden (Deut. xxiii. 18). A question has risen on this part of the subject as to the meaning of the word *celeb*,

dog, which is understood to refer either to immoral intercourse of the grossest kind, or literally and simply to the usual meaning of the word. The prohibition against dedication to sacred uses of gain obtained by female prostitution was doubtless directed against the practice which prevailed in Phœnicia, Babylonia, and Syria, of which mention is made in Lev. xix. 29; Baruch vi. 43; Herod. i. 199; Strabo, p. 561; August. *de civ. Dei*, 17. 10, and other authorities quoted by Spencer, (*de leg. Hebr.* ii. 35, p. 566). Following out this view, and bearing in mind the mention made in 2 K. xxiii. 7, of a practice evidently connected with idolatrous worship, the word *celeb* has been sometimes rendered *cinædus*; some have understood it to refer to the first-born, but Spencer himself, ii. 35, p. 572; Josephus, *Ant.* iv. 8, §9; Gesen. ii. 685, and the Mishna, *Témurah*, vi. 3, all understand dog in the literal sense. [DOG.]

II., III. For vows of abstinence, see CORBAS; and for vows of extermination, ANATHEMA, and Ear. x. 8; Mic. iv. 13.

Vows in general and their binding force as a test of religion are mentioned—Job xxii. 27; Prov. vii. 14; Ps. xlii. 25, l. 14, lvi. 12, lxxi. 13, cxvi. 14; Is. xix. 21; Nah. i. 15.

Certain refinements on votive consecrations are noticed in the Mishna, e.g.:

1. No evasion of a vow was to be allowed which substituted a part for the whole, as, "I vowed a sheep but not the bones" (*Nedar.* ii. 5).

2. A man devoting an ox or a house, was not liable if the ox was lost, or the house fell down; but otherwise, if he had devoted the value of the one or the other of these.

3. No devotions might be made within two years before the jubilee, nor redemptions within the year following it. If a son redeemed his father's land, he was to restore it to him in the jubilee (*Erac.* vii. 3).

4. A man might devote some of his flock, herd, and heathen slaves, but not all these (*ibid.* viii. 4).

5. Devotions by priests were not redeemable, but were transferred to other priests (ib. 6).

6. A man who vowed not to sleep on a bed, might sleep on a skin if he pleased (*Otho, Lex. Rob.* p. 673).

7. The sums of money arising from votive consecrations were divided into two parts, sacred (1. to the altar; 2. to the repairs of the Temple (*Reland, Ant.* c. x. §4).

It seems that the practice of shaving the head at the expiration of a votive period, was not limited to the Nazaritic vow (Acts xviii. 18, xxi. 24).

The practice of vows in the Christian Church, though evidently not forbidden, as the instance just quoted serves to show, does not come within the scope of the present article (see Bingham, *Anst.* xvi. 7, 9, and Suicer, *etx*4). [H. W. P.]

VULGATE, THE. (LATIN VERSIONS OF THE BIBLE.) The influence which the Latin Versions of the Bible have exercised upon Western Christianity is scarcely less than that of the LXX. upon the Greek Churches. But both the Greek and the Latin Vulgates have been long neglected. The revival of letters, bringing with it the study of the original texts of Holy Scripture, checked for a time the study of these two great bulwarks of the Greek and Latin Churches, for the LXX. in fact belongs rather to the history of Christianity than to the history of Judaism, and, in spite of recent labours, their importance is even now hardly recog-

used. In the case of the Vulgate, ecclesiastical controversies have still further impeded all efforts of liberal criticism. The Romanist (till lately) regarded the Clementine text as fixed beyond appeal; the Protestant shrank from examining a subject which seemed to belong peculiarly to the Romanist. Yet, apart from all polemical questions, the Vulgate should have a very deep interest for all the Western Churches. For many centuries it was the only Bible generally used; and, directly or indirectly, it is the real parent of all the vernacular versions of Western Europe. The Gothic Version of Ulphilas alone is independent of it, for the Slavonic and modern Russian versions are necessarily not taken into account. With England it has a peculiarly close connexion. The earliest translations made from it were the (lost) books of Bede, and the Glosses on the Psalms and Gospels of the 8th and 9th centuries (ed. Thorpe, Lond. 1835, 1842). In the 10th century Aelfric translated considerable portions of the O. T. (*Heptateuchus*, &c., ed. Thwaites, Oxon. 1698). But the most important monument of its influence is the great English Version of Wiclif (1324-1384, ed. Forsball and Madden, Oxfd. 1850), which is a literal rendering of the current Vulgate text. In the age of the Reformation the Vulgate was rather the guide than the source of the popular versions. The Romanist translations into German (Michaelis, ed. Marsh, H. 107), French, Italian, and Spanish, were naturally derived from the Vulgate (R. Simon, *Hist. Crit. N. T.* Cap. 28, 29, 40, 41). Of others, that of Luther (N. T. in 1523) was the most important, and in this the Vulgate had great weight, though it was made with such use of the originals as was possible. From Luther the influence of the Latin passed to our own Authorised Version. Tyndale had spent some time abroad, and was acquainted with Luther before he published his version of the N. T. in 1526. Tyndale's version of the O. T., which was unfinished at the time of his martyrdom (1536), was completed by Coverdale, and in this the influence of the Latin and German translations was predominant. A proof of this remains in the Psalter of the Prayer Book, which was taken from the "Great English Bible" (1539, 1540), which was merely a new edition of that called Matthew's, which was itself taken from Tyndale and Coverdale. This version of the Psalms follows the Gallican Psalter, a revision of the Old Latin, made by Jerome, and afterwards introduced into his new translation (comp. § 22), and differs in many respects from the Hebrew text (e. g. Ps. xiv.). It would be out of place to follow this question into detail here. It is enough to remember that the first translators of our Bible had been familiarised with the Vulgate from their youth, and could not have cast off the influence of early association. But the claims of the Vulgate to the attention of scholars rest on wider grounds. It is not only the source of our current theological terminology, but it is, in one shape or other, the most important early witness to the text and interpretation of the whole Bible. The materials available for the accurate study of it are unfortunately at present as scanty as those yet unexamined are rich and varied (comp. § 39). The chief original works bearing on the Vulgate generally are—

R. Simon, *Histoire Critique du V. T.* 1678-85: V. T. 1689-93.

Hody, *De Bibliorum textibus originalibus*, Bonn 1705.

Martianay, *Hieron. Opp.* (Frie, 1693, with the prefaces and additions of Vallarsi, Verona, 1734, and Mailli, Venice, 1787).

Bianchini (*Blanchinus* not *Blanchet*), *Vindictus Canon. SS. Vulg. Lat. Edit.* Romae, 1740.

Bukentop, *Lux de Lucis* . . . Brunellii, 1710.

Sabatier, *Bibl. SS. Lat. Vers. Ant.*, Hemi, 1743.

Van Eas, *Pragmatisch-kritische Gesch. d. Vulg.* Tübingen, 1824.

Vercellone, *Variae Lectiones Vulg. Lat. Bibliorum*, tom. i., Romae, 1860; tom. ii., pars prior, 1862.

In addition to these there are the controversial works of Mariana, Bellarmin, Waitaker, Fulke, &c., and numerous essays by Calmet, D. Schulz, Fleck, Riegler, &c., and in the N. T. the labours of Bentley, Sanfil, Griesbach, Schulz, Luchmann, Tregelles, and Tischendorf, have collected a great amount of critical materials. But it is not too much to say that the noble work of Vercellone has made an epoch in the study of the Vulgate, and the chief results which follow from the first instalment of his collations are here for the first time incorporated in its history. The subject will be treated under the following heads:—

I. THE ORIGIN AND HISTORY OF THE NAME VULGATE. §§ 1-3.

II. THE OLD LATIN VERSIONS. §§ 4-13. *Origin*, 4-5. *Character*, 6. *Canon*, 7. *Revisions*: *Itala*, 8-11. *Remains*, 12-13.

III. THE LABOURS OF JEROME. §§ 14-30. *Occasion*, 14. *Revision of Old Latin of N. T.*, 15. *Gospels*, 15-16. *Acts, Epistles, &c.*, 17. *Revision of O. T. from the LXX.*, 18, 19. *Translation of O. T. from the Hebrew*, 20.

IV. THE HISTORY OF JEROME'S TRANSLATION TO THE INTRODUCTION OF PRINTING. §§ 21-24. *Corruption of Jerome's text*, 21-22. *Revision of Alcuin*, 23. *Later revisions: divisions of the text*, 24.

V. THE HISTORY OF THE PRINTED TEXT. §§ 25-29. *Early editions*, 25. *The Sixtine and Clementine Vulgates*, 26. *Their relative merits*, 27. *Later editions*, 28, 29.

VI. THE MATERIALS FOR THE REVISION OF JEROME'S TEXT. §§ 30-32. *MSS. of O. T.*, 30, 31. *Of N. T.*, 32.

VII. THE CRITICAL VALUE OF THE LATIN VERSIONS. §§ 33-39. *In O. T.*, 33. *In N. T.*, 34-38. *Jerome's Revision*, 34-36. *The Old Latin*, 37. *Interpretation*, 39.

VIII. THE LANGUAGE OF THE LATIN VERSIONS. §§ 40-45. *Provincialisms*, 41, 42. *Gracisms*, 43. *Influence on Modern Language*, 45.

I. THE ORIGIN AND HISTORY OF THE NAME VULGATE.—1. The name *Vulgate*, which is equivalent to *Vulgata editio* (the current text of Holy Scripture), has necessarily been used differently in various ages of the Church. There can be no doubt that the phrase originally answered to the *κοινή εκδοχή* of the Greek Scriptures. In this sense it is used constantly by Jerome in his Commentaries, and his language explains sufficiently the origin of the term: "Hoc juxta LXX. interpretes diximus, quorum editio toto orbe vulgata est" (*Hieron. Commun. in Is. lxx. 20*). "Multum in hoc loco LXX. editio Hebraicumque discordant. Primum ergo de *Vulgata editione* tractabimus et postea sequemur ordinem veritatis" (id. xxx. 22). In some places Jerome distinctly quotes the Greek

text: "Porro in editione Vulgata dupliciter legimus; quidam enim codices habent $\delta\eta\lambda\omicron\varsigma$ $\epsilon\lambda\epsilon\omega$, hoc est manifesti sunt; alii $\delta\epsilon\iota\lambda\alpha\iota\epsilon\iota$ $\epsilon\lambda\epsilon\omega$, hoc est meticulousi sive miseri sunt" (*Comm. in Osee*, vii. 13; comp. 8-11, *ib.*). But generally he regards the Old Latin, which was rendered from the LXX., as substantially identical with it, and thus introduces Latin quotations under the name of the LXX. or *Vulgata editio*: "... miror quomodo *vulgata editio* ... testimonium alia interpretatione subvertit: *Congregabor et glorificabor coram Domino*. ... Illud autem quod in LXX. legitur: *Congregabor et glorificabor coram Domino* ..." (*Comm. in Is.* xlix. 5). So again: "Philistheos ... *alienigenas* Vulgata scribit editio" (*ib.* xiv. 29). "... Palaestinis, quos indifferenter LXX. *alienigenas* vocant" (*in Ezek.* xvi. 27). In this way the transference of the name from the current Greek text to the current Latin text became easy and natural; but there does not appear to be any instance in the age of Jerome of the application of the term to the Latin Version of the O. T. without regard to its derivation from the LXX., or to that of the N. T.

2. Yet more: as the phrase $\kappa\omicron\upsilon\tau\eta$ $\epsilon\kappa\theta\epsilon\omicron\iota\varsigma$ came to signify an uncorrected (and so corrupt) text, the same secondary meaning was attached to *vulgata editio*. Thus in some places the *vulgata editio* stands in contrast with the true Hexaplaric text of the LXX. One passage will place this in the clearest light: "... breviter admoneo aliam esse editionem quam Origenes et Caesariensis Eusebius, omnesque Graeciae translatores $\kappa\omicron\upsilon\tau\eta$, id est, *communem* appellant, atque *vulgatam*, et a plerique nunc $\Lambda\omicron\upsilon\tau\iota\kappa\alpha\iota\varsigma$ dicunt; aliam LXX. interpretum quae in $\epsilon\zeta\alpha\pi\lambda\omicron\iota\varsigma$ codicibus reperitur, et a nobis in Latinum sermonem fideliter versa est. ... $\kappa\omicron\upsilon\tau\eta$ autem ista, hoc est, *communis editio*, ipsa est quae et LXX., sed hoc interest inter utramque, quod $\kappa\omicron\upsilon\tau\eta$ pro locis et temporibus et pro voluntate scriptorum vetus corrupta editio est; ea autem quae habetur in $\epsilon\zeta\alpha\pi\lambda\omicron\iota\varsigma$ et quam nos vertimus, ipsa est quae in eruditum libris incorrupta et immaculata LXX. interpretum translatio reservatur" (*Ep. cvi. ad Sun. et Fret.* § 2).

3. This use of the phrase *Vulgata editio* to describe the LXX. (and the Latin Version of the LXX.) was continued to later times. It is supported by the authority of Augustine, Ado of Vienne (A.D. 860), R. Bacon, &c.; and Bellarmine distinctly recognizes the application of the term, so that Van Es is justified in saying that the Council of Trent erred in a point of history when they described Jerome's Version as "*vetus et vulgata editio*, quae longo tot saeculorum usu in ipsa ecclesia probata est" (*Van Es, Gesch.* 34). As a general rule, the Latin Fathers speak of Jerome's Version as "*our*" Version (*nostra editio, nostri codices*); but it was not unnatural that the Tridentine Fathers (as many later scholars) should be misled by the associations of their own time, and adapt to new circumstances terms which had grown obsolete in their original sense. And when

the difference of the (Greek) "*Vulgate*" of the early Church, and the (Latin) "*Vulgate*" of the modern Roman Church has once been apprehended, no further difficulty need arise from the identity of name. (Compare Augustine, *Ed. Benedict.* Paris 1836, tom. V. p. xxxiii.; Sabatier, i. 792; Van Es, *Gesch.* 24-42, who gives very full and conclusive references, though he fails to perceive that the *Old Latin* was practically identified with the LXX.)

II. THE OLD LATIN VERSIONS.—4. The history of the earliest Latin Version of the Bible is lost in complete obscurity. All that can be affirmed with certainty is that it was made in Africa.^a During the first two centuries the Church of Rome, to which we naturally look for the source of the version now identified with it, was essentially Greek. The Roman bishops bear Greek names; the earliest Roman liturgy was Greek; the few remains of the Christian literature of Rome are Greek.^b The same remark holds true of Gaul (comp. Westcott, *Hist. of Canon of N. T.* pp. 269, 270, and *ref.*); but the Church of N. Africa seems to have been Latin-speaking from the first. At what date this Church was founded is uncertain. A passage of Augustine (*c. Donat. Ep.* 37) seems to imply that Africa was converted late; but if so, the Gospel spread there with remarkable rapidity. At the end of the second century Christians were found in every rank, and in every place; and the master-spirit of Tertullian, the first of the Latin Fathers, was then raised up to give utterance to the passionate thoughts of his native Church. It is therefore from Tertullian that we must seek the earliest testimony to the existence and character of the *Old Latin* (*Vetus Latina*).

5. On the first point the evidence of TERTULLIAN, if candidly examined, is decisive. He distinctly recognizes the general currency of a Latin Version of the N. T., though not necessarily of every book at present included in the Canon, which even in his time had been able to mould the popular language (*adv. Prax.* 5: In usu est nostrorum per simplicitatem interpretationis. . . . *De Monog.* 11: Sciamus plane non sic esse in Graeco authentico quomodo in usum exiit per duarum syllabarum aut callidam aut simplicem eversionem. . . .). This was characterized by a "rudeness" and "simplicity," which seems to point to the nature of its origin. In the words of Augustine (*De doctr. Christ.* ii. 16 (11)), "any one in the first ages of Christianity who gained possession of a Greek MS., and fancied that he had a fair knowledge of Greek and Latin, ventured to translate it." (Qui scripturas ex Hebraea lingua in Graecam verterunt numerari possunt; Latini autem interpretes nullo modo. Ut enim cuiusvis primis fidei temporibus in manus venit Codex Graecus, et aliquantulum facultatis sibi utriusque linguae habere videbatur, ausus est interpretari.)^c Thus the version of the N. T. appears to have arisen from individual and successive efforts; but it does not follow by any means that numerous versions were simultaneously circulated, or that the several parts of the version were made independently.^d Even if it

^a This has been established with the greatest fulness by Card. Wiseman, *Two Letters on 1 John* v. 7, addressed to the editor of the *Catholic Magazine*, 1832-3; republished with additions, Rome, 1835; and again in his collected *Essays*, vol. i. 1863. Eichhorn and Hug had maintained the same opinion; and Lechmann has further confirmed it (*N. T. i. Pref.*).

^b In the absence of all evidence it is impossible to say how far the Christians of the Italian provinces used the Greek or Latin language habitually.

^c Card. Wiseman has shown (*Essays*, i. 34, 26) that "interpretor" and "verbo" may be used of a revision; but in connexion with *primis fidei temporibus* they seem certainly to describe the origin of the Version.

^d It would be out of place here to point out minute differences in rendering which show that the translation was the work of different hands. Mill (*Proleg.* 521 ff.) has made some interesting collections to establish the result, but he places too much reliance on the version of D₁ (Cod. Bezae).

had been so, the exigencies of the public service must soon have given definiteness and substantial unity to the fragmentary labours of individuals. The work of private hands would necessarily be subject to revision for ecclesiastical use. The separate books would be united in a volume; and thus a standard text of the whole collection would be established. With regard to the O. T. the case is less clear. It is probable that the Jews who were settled in N. Africa were confined to the Greek towns; otherwise it might be supposed that the Latin Version of the O. T. is in part anterior to the Christian era, and that (as in the case of Greek) a preparation for a Christian Latin dialect was already made when the Gospel was introduced into Africa. However this may have been, the substantial similarity of the different parts of the Old and New Testaments establishes a real connexion between them, and justifies the belief that there was one popular Latin version of the Bible current in Africa in the last quarter of the second century. Many words which are either Greek (*machæra, sophia, perizoma, poderis, agonizo, &c.*) or literal translations of Greek forms (*vivifico, justifico, &c.*) abound in both, and explain what Tertullian meant when he spoke of the "simplicity" of the translation (compare below § 43).

6. The exact literality of the Old Version was not confined to the most minute observance of order and the accurate reflection of the words of the original: in many cases the very forms of Greek construction were retained in violation of Latin usage. A few examples of these singular anomalies will convey a better idea of the absolute certainty with which the Latin commonly indicates the text which the translator had before him, than any general statements: Matt. iv. 13, *habitavit in Capharnaum navitimum*; id. 15, *terra Neptalim viam maris*; id. 15, ab Jerusalem . . . et trans Jordanem; v. 22, *ecce erit in gehennam ignis*; vi. 19, *ubi tinea et omesura exterminat*. Mark xii. 31, *magis horum praeceptorum aliud non est*. Luke x. 19, *nihil vos iocabit*. Acts xix. 26, *non solum Ephesi sed paene totius Asiae*. Rom. ii. 15, *inter se cogitationum*

accusantium vel etiam defendentium. 1 Cor. vii. 32, *solicitus est quæ sunt Domini*. It is obvious that there was a continual tendency to alter expressions like these, and in the first age of the Version it is not improbable that the continual Græcism which marks the Latin texts of D₁ (*Cod. Bezae*), and E₂ (*Cod. Laud.*), had a wider currency than it could maintain afterwards.

7. With regard to the African Canon of the N. T. the old Version offers important evidence. From considerations of style and language it seems certain that the Epistle to the Hebrews, James, and 2 Peter, did not form part of the original African Version, a conclusion which falls in with that which is derived from historical testimony (comp. *The Hist. of the Canon of the N. T.* p. 282 ff.). In the O. T., on the other hand, the Old Latin erred by excess and not by defect; for as the Version was made from the current copies of the LXX., it included the Apocryphal books which are commonly contained in them, and to these 2 Eadras was early added.

8. After the translation once received a definite shape in Africa, which could not have been long after the middle of the second century, it was not publicly revised. The old text was jealously guarded by ecclesiastical use, and was retained there at a time when Jerome's version was elsewhere almost universally received. The well-known story of the disturbance caused by the attempt of an African bishop to introduce Jerome's "*cucurbita*" for the old "*hedera*" in the history of Jonah (*August. Ep. civ. ap. Hieron. Epp.*, quoted by Tregelles, *Introduction*, p. 242) shows how carefully intentional changes were avoided. But at the same time the text suffered by the natural corruptions of copying, especially by interpolations, a form of error to which the Gospels were particularly exposed (comp. § 15). In the O. T. the version was made from the unrevised edition of the LXX., and thus from the first included many false readings, of which Jerome often notices instances (*e. g.* Ep. cvi. ad *Sus. et Fret.*). In Table A two texts of the Old Latin are placed for comparison with the Vulgate of Jerome.

TABLE A. DAN. ix. 4-8.*

<i>Cod. Wirob.</i>	<i>August. Ep. cvi. ad Victor.</i>	<i>Vulgata rom.</i>
recatus sum Dominum Deum meum et dixi: Domine Deus, magne et mirabilis,	Proccatus sum Dominum Deum meum, et confusus sum et dixi: Domine Deus, magne et mirabilis,	Oravi Dominum Deum meum, ¹ et confensus sum ² et dixi: Obsecro Domine Deus, magne et ter- ribilis,
qui servas testamentum tuum, et misericordiam diligentibus te, et servantibus præcepta tua: Peccavimus, fecimus injurias, occidimus et declinavimus	et qui servas testamentum tuum, et misericordiam diligentibus te, et servantibus præcepta tua: Peccavimus, aduersus apem fecimus, imple egimus et recessimus et de- clinavimus	<i>custodiens pactum,</i> et misericordiam diligentibus te, et <i>custodientibus mandata tua:</i> Peccavimus, iniquitatem ³ fecimus, imple egimus, et recessimus et de- clinavimus
præceptis tuis et a iudiciis tuis, et non exaudivimus servos tuos pro- phetas, et loquebantur ad reges nostros,	a præceptis tuis et a iudiciis tuis, et non exaudivimus servos tuos pro- phetas, qui loquebantur in nomine tuo ad reges nostros,	a mandatis tuis ac iudiciis. Non obedivimus servis tuis pro- phetis, qui locuti sunt in nomine tuo regibus nostris,
et ad omnes populos terræ. Tibi, Domine, iustitia: obis autem, et fratribus nostris, confusio faciei; Sicut dies hie viro Judæ et habitantibus Hierusalem, et omni Israel, et proximi sunt et qui longe sunt, et quæ eos dissemi- nasti ibi,	et ad omnem populum terræ. Tibi, Domine, iustitia: nobis autem confusio faciei; Sicut dies hie viro Judæ, et habitantibus Jerusalem, et omni Israel, qui proximi sunt et qui longe sunt, in omni terra in qua eos dissemi- nasti ibi, propter contumaciam eorum, quia improbaerunt te, Domine.	principibus nostris, patribus nostris, omniq[ue] populo terræ. Tibi, Domine, iustitia: nobis autem ⁴ confusio faciei; Sicut est hodie viro Judæ ⁵ et habitatoribus Jerusalem, et omni Israel, his qui prope sunt, et his qui procul in universis terris ad quas eiecisti eos propter iniquitates eorum, in quibus peccaverunt in te.

* The differences in the two first columns are marked by Italics. The
alike in col. 3 mark where the text of Jerome differs from both the other
two.

9. The Latin translator of Irenæus was probably contemporary with Tertullian,¹ and his renderings of the quotations from Scripture confirm the conclusions which have been already drawn as to the currency of (substantially) one Latin version. It does not appear that he had a Latin MS. before him during the execution of his work, but he was so familiar with the common translation that he reproduces continually characteristic phrases which he cannot be supposed to have derived from any other source (Lachmann, *N. T.* i. pp. x, xi.). CYPRIAN († A.D. 257) carries on the chain of testimony far through the next century; and he is followed by Lactantius, Juvencus, J. Firmicus Maternus, HILARY the deacon (Ambrosiaster), HILARY of Poitiers († A.D. 449), and LUCIFER of Cagliari († A.D. 370). Ambrose and Augustine exhibit a peculiar recension of the same text, and Jerome offers some traces of it. From this date MSS. of parts of the African text have been preserved (§12), and it is unnecessary to trace the history of its transmission to a later time.

10. But while the earliest Latin Version was preserved generally unchanged in N. Africa, it fared differently in Italy. There the provincial rudeness of the version was necessarily more offensive, and the comparative familiarity of the leading bishops with the Greek texts made a revision at once more feasible and less startling to their congregations. Thus in the fourth century a definite ecclesiastical recension (of the Gospels at least) appears to have been made in N. Italy by reference to the Greek, which was distinguished by the name of *Itala*. This Augustine recommends on the ground of its close accuracy and its perspicuity (*Aug. De Doctr. Christ.* 15, in *ipsis interpretationibus Italaæ cæteris præferatur, nam est verborum tenacior cum perspicuitate sententiæ*), and the text of the Gospels which he follows is marked by the latter characteristic when compared with the African. In the other books the difference cannot be traced with accuracy; and it has not yet been accurately determined whether other national recensions may not have existed (as seems certain from the evidence which the writer has collected) in Ireland (Britain), Gaul, and Spain.

11. The *Itala* appears to have been made in some degree with authority: other revisions were made for private use, in which such changes were introduced as suited the taste of scribe or critic. The next stage in the deterioration of the text was the intermixture of these various revisions; so that at the close of the fourth century the Gospels were in such a state as to call for that final recension which was made by Jerome. What was the nature of this confusion will be seen from the accompanying tables (B and C, on opposite page) more clearly than from a lengthened description.

12. The MSS. of the Old Latin which have been

¹ It should be added that Dodwell places him much later, at the close of the 4th cent. Comp. Grabe, *Proleg.* xii. rem. ii. § 3.

² It is unnecessary now to examine the conjectures which have been proposed, *usitata-quæ, illa-quæ*. They were made at a time when the history of the Old Latin was unknown.

³ To these must probably be added the MSS. of Genesis and the Psalter in the possession of Lord Ashburnham, said to be "of the fourth century."

The text of the Oxford MS. (No. 12) is extremely interesting, and offers many coincidences with the earliest

preserved exhibit the various forms of that version which have been already noticed. Those 42 Gospels, for the reason which has been given, present the different types of text with unmistakable clearness. In the O. T. the MSS. remains are too scanty to allow of a satisfactory classification.

i. MSS. of the *Old Latin* Version of the O. T.

1. Fragments of Gen. (xxviii., xxxviii., xl., xli., xlviii.-l., parts) and Ex. (x., xi., xv., xvii., xviii.-xvii., parts) from Cod. E of the Vulgate: Vercellense, i. pp. 1-4, 307-10.
2. Fragments (scattered verses) of the Pentateuch: Münster, *Miscell. Hefn.* 1821, pp. 89-95.
3. Fragments (scattered verses) of 1, 2 Sam. and 1, 2 Kings, and the Canticles, given by Sabatier.
4. Corbei. 7, Sac. xiii. (Sabatier), Esther.
5. Pechianus (Sabatier), *Fragm. Esther*.
6. Orat. (Sabatier), Esther i.-iii.
7. Majoris Monast. Sac. xii. (Martianay, Sabatier), Job.
8. Sangerm. Paul. Sac. vii. (Sabatier).
9. Fragments of Jeremiah (xiv.-xli., scattered verses), Ezekiel (xi.-xviii., detached fragments), Daniel (iii. 15-23, 33-50, viii. 1-11, fragments), Hosea (ii.-vi., fragments); was a palimpsest MS. at Würzburg (Sac. v. vii.): Münster, *Miscell. Hefn.* 1821.
11. Fragments Hos. Am. Mich. E. Raake, 1858, &c. (This book the writer has not seen.)
12. Bodl. Auc. F. 4, 32. Fragments of Deuteronomy and the Prophets, "Græcæ Latine litteræ Saxonicæ," Sac. viii. ii. 8.

ii. MSS. of the Apocryphal books.

1. Reg. 3564, Sac. ix. (Sabatier), Tob. and Jud.
- 2, 3. Sangerm. 4, 15, Sac. ix. (Sabatier), Tob. and Jud.
4. Vatic. (Reg. Sac.), Sac. vii., Tob.
5. Corbei. 7 (Sabatier), Jud.
6. Pechian. (Sabatier), Sac. x., Jud.

The text of the remaining books of the *Vetus Latina* not having been revised by Jerome is retained in MSS. of the Vulgate.

iii. MSS. of the N. T.

(1.) Of the Gospels.

African (i. e. unrevised) text.

- a. *Cod. Vercellensis*, at Vercelli, written by Eusebius, bishop of Vercelli in the 4th cent. Published by Irici, 1745, and Bianchini, *Ev. Quadr.* 1749.
- b. *Cod. Veronensis*, at Verona, of the 4th or 5th cent. Published by Bianchini (as above).
- c. *Cod. Colbertinus*, in Bibl. Imp. Paris, of the 11th cent. Published by Sabatier, *Versiones antiquæ*.

African readings. The passages contained in it are (a) Dent. xxxi. 7; 24-30; xxxii. 1-4. (b) Hos. ii. 1-3 a; 9 a; vi. 10, 2; 16; x. 15 a; xii. 6; viii. 1. Amos iii. 8; v. 3; 14. Mich. iii. 2; iv. 1, 2; 5 (part). v. 2; vi. 9; vii. 6, 7. Joel iii. 18. Obad. iii. 18, 19. Nah. iii. 13. Hab. ii. 4 b; iii. 3. Zephaniah. i. 1-18 (part). Agg. ii. 7, 8. Zech. i. 4 (part); viii. 18, 19, 20 ix. 9; xiii. 6; 7. Mal. i. 6 (part), 10 b, 11; ii. 7; iii. 1. Zech. ii. 8 b; Mal. iv. 2, 13; 5, 6 a. (y) Gen. i. 1-2, 3; ii. xiv. 24-xv. 2. Ia. iv. 1-v. 7; iv. 1-6; Is. xlii. 1-4; xlvi. 1-10.

9. The Latin translator of Irenaeus was probably contemporary with Tertullian,¹ and his renderings of the quotations from Scripture confirm the conclusions which have been already drawn as to the currency of (substantially) one Latin version. It does not appear that he had a Latin MS. before him during the execution of his work, but he was so familiar with the common translation that he reproduces continually characteristic phrases which he cannot be supposed to have derived from any other source (Lachmann, *N. T.* i. pp. x. xi.). CYPRIAN († A.D. 257) carries on the chain of testimony far through the next century; and he is followed by Lactantius, Juvencus, J. What was the nature of this confusion will be seen from the accompanying tables (B and C, on opposite page) more clearly than from a lengthened description.

12. The MSS. of the Old Latin which have been

¹ It should be added that Dodwell places him much later, at the close of the 4th cent. Comp. Grabe, *Prolegg.* ad *ren.* ii. § 3.

² It is unnecessary now to examine the conjectures which have been proposed, *usitatae quae, illa quae*. They were made at a time when the history of the Old Latin was unknown.

³ To these must probably be added the MSS. of Genesis and the Psalter in the possession of Lord Ashburnham, said to be "of the fourth century."

The text of the Oxford MS. (No. 12) is extremely interesting, and offers many coincidences with the earliest

preserved exhibit the various forms of that version which have been already noticed. Those of the Gospels, for the reason which has been given, present the different types of text with unmistakable clearness. In the O. T. the MS. remains are too scanty to allow of a satisfactory classification.

i. MSS. of the *Old Latin Version* of the O. T.

1. Fragments of Gen. (xxvii., xxxviii., xli, xlv., xlviii.-l., parts) and Ex. (x., xi., xvi., xvii., xxiii.-xxvii., parts) from Cod. E (§39) of the Vulgate: Vercellone, i. pp. 183-4, 307-10.
2. Fragments (scattered verses) of the Pentateuch: Münster, *Miscell. Havn.* 1821, pp. 89-95.
3. Fragments (scattered verses of 1, 2 Sam. and 1, 2 Kings, and the Canticles), given by Sabatier.
4. Corbei. 7, Saec. xiii. (Sabatier), Esther.
5. Pechianus (Sabatier), *Fragm. Esther*.
6. Orat. (Sabatier), Esther i.-iii.
7. Majoris Monast. Saec. xii. (Martineau, Sabatier), Job.
8. Sangerm. Pauli, Saec. vii. (Sabatier).
9. Fragments of Jeremiah (xiv.-xli., detached verses), Ezekiel (xl.-xlviii., detached fragments), Daniel (iii. 15-23, 33-50, viii., x., fragments), Hosea (ii.-vi., fragments), from a palimpsest MS. at Würzburg (Saec. vii. vii.): Münster, *Miscell. Havn.* 1821.
11. Fragmenta Hos. Am. Mich. . . . ed. E. Ranka, 1858, &c. (This book the writer has not seen.)
12. Bodl. Auct. F. 4, 32. Fragments of Deuteronomy and the Prophets, "*Græce et Latine litteris Saxonica*," Saec. viii. ix.³

ii. MSS. of the Apocryphal books.

1. Reg. 3564, Saec. ix. (Sabatier), Tob. and Jud.
 - 2, 3. Sangerm. 4, 15, Saec. ix. (Sabatier), Tob. and Jud.
 4. Vatic. (Reg. Suec.), Saec. vii., Tob.
 5. Corbei. 7 (Sabatier), Jud.
 6. Pechian. (Sabatier), Saec. x., Jud.
- The text of the remaining books of the *Vetus Latina* not having been revised by Jerome is retained in MSS. of the Vulgate.

iii. MSS. of the N. T.

(1.) Of the Gospels.

African (i.e. unrevised) text.

- a. *Cod. Vercellensis*, at Vercelli, written by Eusebius, bishop of Vercelli in the 4th cent. Published by Irici, 1748, and Bianchini, *Ec. Quadr.* 1749.
- b. *Cod. Veronensis*, at Verona, of the 4th or 5th cent. Published by Bianchini (as above).
- c. *Cod. Colbertinus*, in Bibl. Imp. et Paris, of the 11th cent. Published by Sabatier, *Versiones antiquae*.

African readings. The passages contained in it are (a) *Deut.* xxxi. 7; 24-30; xxxii. 1-4. (b) *Hos.* ii. 10 a; iv. 1-3 a; 9 a; vi. 10, 2; 16; x. 12 a; xli. 6; xlii. 3 a; Amos iii. 8; v. 3; 14. Mich. iii. 2; iv. 1, 2; 5 (part); v. 2; vi. 8; vii. 6, 7. Joel iii. 18. Obad. 16. Jon. i. 6 a, 9. Nah. iii. 13. Hab. ii. 6 b; iii. 3. Zephania. i. 14-16, 18 (part). Agg. ii. 7, 8. Zech. i. 4 (part); viii. 16, 17, 19 a; ix. 8; xiii. 6; 7. Mal. i. 6 (part), 10 b, 11; ii. 7; iii. 1. Zech. ii. 6 b; Mal. iv. 2, 13; 5, 6 a. (y) Gen. i. 1-4 3; Ex. xiv. 24-xv. 2. Is. iv. 1-7 7; iv. 1-6; Ps. xli. 1-4; Gen. xlii. 1-10.

VULGATE, THE

- (a.) Cambridge Univ. Libr. Kk. 1, 24. Sæc. viii. ? St. Luke, i. 15-end, and St. John, i. 18-xx. 17. Bentley's X. Capitula wanting in St. Luke; xiv. in St. John. No Ammonian Sections. (Plate ii. fig. 1.)
- (β.) Cambridge Univ. Libr. Tl. 6, 32. Sæc. viii.-x. *The Book of Deer*. St. Matt. i.-vii. 23. St. Mark, i. 1, v. 36. St. Luke, i. 1, iv. 2. St. John, entire. Very many old and peculiar readings. Nearer Vulg. than (a), but very carelessly written. No Ammonian Sections or Capitula. Belonged to monks of Deer in Aberdeenshire. Comp. Mr. H. Bradshaw in the *Printed Catalogue*.¹
- (γ.) Lichfield, *Book of St. Chad*. Sæc. viii. St. Matt., St. Mark, and St. Luke, i.-iii. 9. Bentley's ξ.
- (δ.) Oxford, Bodl. D. 24 (3948). Sæc. viii. *The Gospels of Mac Regol*, or the *Rushworth MS.* Bentley's χ. No Capit., Sect., or Prefaces. A collation of the Latin text in the Lindisfarne text of St. Matt. and St. Mark (comp. p. 1711, note 8), together with the Northumbrian gloss, has been published by Rev. J. Stevenson. Deficient Luke iv. 29-viii. 38.²
- (ε.) Oxford, C. C. Coll. 122. Sæc. x., xi? Bentley's C. Has Canons and Prefaces, but no Sect. or Capit.
- (ζ.) Hereford (*Saxon*) *Gospels*. Sæc. viii. (ix.). The four Gospels, with two small lacunae. Without Prefaces, Canons, Capitula, or Sections. A very important copy, and probably British in origin.* (Plate ii. fig. 5.)
- (η.) *The Book of Armagh* (all N. T.), Trin. Coll. Dublin: written A.D. 807. Comp. *Proceedings of R. I. A.* iii. pp. 316, 358. Sir W. Betham, *Irish Antiq. Researches*, ii.*
- (θ.) A copy found in the *Domhnach*

pected from his foreign training, gives in the main a pure Vulgate text in his quotations from the Vulgate. When he differs from it (e.g. Luke x. 19, 20; John xi. 43 *predi*), he often appears to quote from memory, and differs from all MSS.

The quotations given at length in the British copy of *Juvenius* (Camb. Univ. Libr. Fl. 4, 43) would probably repay a careful examination.

¹ This MS., in common with many Irish MSS. (e.g. Brit. Mus. Harl. 1802, 2796, the Book of MacDurnan, and some others, as Harl. 1718, Cotton. Tib. A ii.), separates the genealogy in St. Matt. from the rest of the Gospel, closing v. 17 with the words *Finis Prologus*, and then adding *Incipit Evangelium*.

² The reading of this MS. in Matt. xxi. 29 ff. is very remarkable: *Homo quidam habebat duos filios et accedens ad primum dixit fili vade operare in vitem* * *meum. Ille autem respondens dixit eo dñe et non lit accedens autem ad alterum dixit similiter at ille respondens ait solo. postea autem poenitentia motus abiit in vintam.* * *quile ex duob: fecit voluntatem patris. dicunt* * *novissimum.*

* For the opportunity of examining this MS the writer is indebted to the kindness of the Rev. J. Jebb, D.D., Canon of Hereford.

* This MS. contains the Ep. to the *Lacedæmones*, with the note *Sed Hieronymus cum negat esse /'auli*: Betham

VULGATE, THE 1695

Airgid (Royal I. Acad.), Sæc. v. vi. Comp. Petrie, *Transactions of R. I. A.*, xviii., 1838. O'Curry's *Lectures*, Dublin, 1861, pp. 321 ff., where a facsimile is given.

- (κ.) (κ.) Two copies in Trin. Coll. Dublin, said to be "ante-Hieronymian, Sæc. vii."³

To these must be added a large number of Irish, including under this term North British MSS., which exhibit a text more nearly approaching the Vulgate, but yet with characteristic old readings. Such are:—

- Brit. Mus., Harl. 1802. Sæc. x.-xii. A.D. 1138? Prefaces all at the beginning. No Capitula or Sections. Bentley's W. (Plate ii. fig. 4.)
- Brit. Mus., Harl. 1023. Sæc. x.-xii? No Capitula or Sections. (Plate ii. fig. 3.)
- Lambeth. *The Book of Mac Durnan*.⁴ Sæc. x. Has Sections, but no Prefaces or Canons.
- Dublin, T. C. C. *The Book of Kells*. Sæc. viii.
- Dublin, T. C. C. *The Book of Durrow*. Sæc. viii.
- Dublin, T. C. C. *The Book of Dimma*. Sæc. viii.
- Dublin, T. C. C. *The Book of Moling*. Sæc. viii.⁵

Gallican (?) revision.*

- Brit. Mus., Egerton, 609, formerly *Majorus Monasterii*; iv. Gospp. deficient from Mark vi. 58 to Luke xi. 1. This MS. is called *mm*, and classified under Vulgate MSS. in the editions of the N. T., but it has been used only after Calmet's very imperfect collation, and offers a distinct type of text. *Præf. Can.* No Capitula.

- (2.) Of the Acts and Epistles.

n. *Cod. Bobbiensis*, at Vienna. A few fragments of the Acts and Cath. Epp. Edited by Tischendorf, *Jahrbücher d. Lit.* i. c.

ii. p. 263. The stichometry is as follows: *Matheus versus habet MMDCC, Marcus MDCC, Lucas MMDCCC, Johannis MNCCC. Id.* p. 318⁶

³ Dr. Reeves undertook to publish the text of the Book of Armagh, with collations of ε, α, and other MSS. in T. C. D., but the writer has been unable to learn whether he will carry out his design. The MSS. η-α the writer knows only by description, and very imperfectly.

⁴ Facsimiles of many of these "Irish" MSS. are given in Westwood's *Paleographia Sacra* and in O'Curry's *Lectures*. The text of most of them (even of those collated by Bentley) is very imperfectly known, and it passes by a very gradual transition into the ordinary type of Vulgate. The whole question of the general character and the specific varieties of these MSS. requires careful investigation. The Table (F) will give some idea of their variations from the common text. The Stow St. John, at present in Lord Ashburnham's collection, probably belongs to this family.

⁵ These four MSS. I know only by Mr. Westwood's descriptions in his *Palaeographia Sacra*; and to Mr. Westwood belongs the credit of first directing attention to Irish MSS. after the time of Bentley.

⁶ The text of this recension, which I believe to be contained also in *g*, and Bentley's *p* (comp. p. 1713, note*) is closely allied to the British type. As to the Spanish text I have no sufficient materials to form an estimate of its character.

- o. *Cod. Corbei.*, a MS. of Ep. of St. James. Published by Martianay, 1695.
 p. (Of St. Paul's Epp.) *Cod. Clarom.*, the Latin text of D₄. Published by Tischendorf.
 q. (Of St. Paul's Epp.) *Cod. Sangerm.*, the Latin text of E₂, said to have an independent value, but imperfectly known.
 r. (Of St. Paul's Epp.) *Cod. Boern.*, the Latin text of G₂, is in the main an old copy, adapted in some points to the Greek.
 s. (See Gospels).
 t. Fragments of St. Paul's Epistles transcribed at Munich by Tischendorf.
 u, v. (Acts) the Latin text of D₁ and E₂ (Cod. Bezae and Cod. Laud).

To these must be added, from the result of a partial collection:—

- x. Oxford, *Bodl. MS.* 418 (Selden, 30). Acts. Saec. viii., vii. An uncial MS. of the highest interest. Deficient xiv. 26, *fidet*—xv. 32, *cum essent*. Benti. Xc. Among its characteristic readings may be noticed: v. 34, *foras modicum apostolos secedere*; ix. 40, *surge in nomine Domini Ihu Xti.*; xi. 17, *ne daret illis Spiritum Sanctum credentibus in nomine Ihu Xti.*; xiii. 14, *Paulus et Barnabas*; xvi. 1, *et cum circuisset has nationes pervenit in Derben*. (Plate i. fig. 4).
 xi. Oxford, *Bodl. Laud. Lat.* 108 (E, 67). Saec. ix. St. Paul's Epp. in Saxon letters. Ends Hebr. xi. 34, *aciem gladii*. Corrected apparently by three hands. The original text was a revision of the Old Latin, but it has been much erased. In many cases it agrees with *d* almost or quite alone: e. g. Rom. ii. 14, 16, iii. 22, 26, x. 20, xv. 13, 23, 27, 30. The Epistles to Thess. are placed before the Ep. to Coloss. This arrangement, which is given by Augustine (*De Doctr. Christ.* ii. 13), appears to have prevailed in early English MSS., and occurs in the Saxon Cambridge MS., and several other MSS. of the Bible quoted by Hody, p. 664. Comp. §31 (2) 8.*

The well-known *Harleian MS.* 1772 (§32, (2) 3) ought to be reckoned rather among the Old than the Vulgate texts. A good collection of its more striking variations is given in the Harleian Catalogue. In the Acts and Epistles (no less than in the Gospels) there are indications of an unrevised (African) and revised texts, but the materials are as yet too imperfect to allow of an exact determination of the different types.

(3.) In the Apocalypse the text depends on *m* and early quotations, especially in Primasius.

* A very interesting historical notice of the use of the Old Latin in the North of England is given by Bede, who says of Ceolfrid, a contemporary abbot, "Bibliothecam structuravit in monasteriis [Wearmouth and Jarrow] magna

13. It will be seen that for the chief part of the O. T., and for considerable parts of the N. T. (e. g. Apoc. Acts), the old text rests upon early quotations (principally Tertullian, Cyprian, Lucie of Cagliari, for the African text, Ambrose and Augustine for the Italic). These were collected by Sabatier with great diligence up to the date of his work; but more recent discoveries (e. g. of the Roman *Speculum*) have furnished a large number of new materials which have not yet been fully employed. (The great work of Sabatier, already often referred to, is still the standard work on the Latin Versions. His great fault is his neglect to distinguish the different types of text, African, Italic, British, Gallic; a task which yet remains to be done. The earliest work on the subject was by Flaminii Nobilius, *Vetus Test. sec. LXX. Lat. redditum* . . . Romae, 1588. The new collection made by Tischendorf, Mai, Mänter, Ceriani, has been noticed separately.)

III. THE LABOURS OF JEROME.—14. It has been seen that at the close of the 4th century the Latin texts of the Bible current in the Western Church had fallen into the greatest corruption. The evil was yet greater in prospect than at the time; for the separation of the East and West, politically and ecclesiastically, was growing imminent, and the risk of the perpetuation of false and conflicting Latin copies proportionately greater. But in the hour of danger the great scholar was raised up who probably alone for 1500 years possessed the qualifications necessary for producing an original version of the Scriptures for the use of the Latin Church. Jerome—Eusebius Hieronymus—was born in 347 A.D. at Stridon in Dalmatia, and died at Bethlehem in 420 A.D. From his early youth he was a vigorous student, and age removed nothing from his zeal. He has been well called the Western Origen (Hody, p. 350), and if he wanted the largeness of heart and generous sympathies of the great Alexandrine, he had more chastened critical skill and closer concentration of power. After long and self-denying studies in the East and West, Jerome went to Rome A.D. 382, probably at the request of Damasus the Pope, to assist in an important synod (Ep. cviii. 6), where he seems to have been at once attached to the service of the Pope (Ep. cxiii. 10). His active biblical labours date from this epoch, and in examining them it will be convenient to follow the order of time, noticing: (1) the Revision of the Old Latin Version of the N. T.; (2) the Revision of the Old Latin Version (from the Greek) of the O. T.; (3) the New Version of the O. T. from the Hebrew.

(1.) *The Revision of the Old Latin Version of the N. T.*—15. Jerome had not been long at Rome (A.D. 383) when Damasus consulted him on points of Scriptural criticism (Ep. xix. "Dilectissime est ut ardentis illo strenuitatis ingenio . . . vivo sensu scribas"). The answers which he received (Epp. xx., xxi.) may well have encouraged him to seek for greater services; and apparently the same year he applied to Jerome for a revision of the current Latin version of the N. T. by the help of the Greek original. Jerome was very sensible of the prejudices which such a work would excite among those "who thought that ignorance

geminae industria. Ita ut tres Pandectas novae translationis, ad unum vetustae translationis, quoniam de iis attulerat, ipse superaddideret . . ." (*Hist. Abbat. . .* Vulg. et Græcorum. Quoted by Hody, *de Test. p. 100*.)

was holiness" (*Ep. ad Marc. xviii.*), but the need of it was urgent. "There were," he says, "almost as many forms of text as copies" ("tot sunt exemplaria pene quot codices," *Praef. in Ev.*). Mistakes had been introduced "by false transcription, by clumsy corrections, and by careless interpolations" (*id.*), and in the confusion which had ensued the one remedy was to go back to the original source (Graeca veritas, Graeca origo). The Gospels had naturally suffered most. Thoughtless scribes inserted additional details in the narrative from the parallels, and changed the forms of expression to those with which they had been originally familiarized (*id.*). Jerome therefore applied himself to these first ("haec praesens praefatiuncula pollicetur quatuor tantum Evangelia"). But his aim was to revise the Old Latin, and not to make a new version. When Augustine expressed to him his gratitude for "his translation of the Gospel" (*Ep. civ. 6*, "non parvas Deo gratias agimus de opere tuo quo Evangelium ex Graeco interpretatus es"), he tacitly corrected him by substituting for this phrase "the correction of the N. T." (*Ep. cxii. 20*, "Si me, ut dicis, in N. T. emendatione suscipis . . ."). For this purpose he collated early Greek MSS., and preserved the current rendering wherever the sense was not injured by it ("... Evangelia . . . codicum Graecorum emendata collatione sed veterum. Quae ne multum a lectionis Latinae consuetudine discrepant, ita calamo temperavimus (oll. imperavimus) ut his tantum quae sensum videbantur mutare, correctis, reliqua manere pateremur ut fuerant," *Praef. ad Dan.*). Yet although he proposed to himself this limited object, the various forms of corruption which had been introduced were, as he describes, so numerous that the difference of the Old and Revised (Hieronymian) text is throughout clear and striking. Thus in Matt. v. we have the following variations:—

Vetus Latina. ^a	Vulgata nova (Hieron.).
7 Ipse miserabitur Deus.	1 Ipse misericordiam consequetur.
11 dixerint . . . — propter justitiam.	11 dixerint . . . meritis.
12 ante vos patres eorum (Luke vi. 28).	12 ante vos.
17 non veni solvere legem aut prophetas.	17 non veni solvere.
16 stant: coelum et terra transibunt, verba autem mea non praeteribunt.	18. stant.
22 fratri tuo sine causa.	22 fratri tuo.
25 es cum illo in ira.	25 es in via cum eo (and often).
29 est in gehennam.	29 mittatur in gehennam.
37 quod autem amplius.	37 quod totum his abundantius.
41 adhuc alia duo.	41 et alia duo.
43 odia.	43 odio habetis.
44 vestros, et benedicite qui maledicunt vobis et benedicite.	44 vestros benedicite.

Of these variations those in vers. 17, 44, are only partially supported by the old copies, but they illustrate the character of the interpolations from which the text suffered. In St. John, as might be expected, the variations are less frequent. The 6th chapter contains only the following:—

2 aequabatur autem.	2 et aequabatur.
21 (volebant).	21 (voluerunt).
23 (quem benedixerat Dominus (alii alter)).	23 (gratias agente Domino).
30 haec est prima.	30 haec est autem.

^a In giving the readings of *Vetus Latina* the writer has throughout confined himself to those which are supported VOL. III.

Vetus Latina.

30 (Patris mel).
53 (manducare).
56 (a patre).
57 ex hoc ergo.

Vulgata nova (Hieron.).

30 (Patris mel qui manducavit me).
53 (ad manducandum).
56 (a patre meo).
57 ex hoc.

16. Some of the changes which Jerome introduced were, as will be seen, made purely on linguistic grounds, but it is impossible to ascertain on what principle he proceeded in this respect (comp. §35). Others involved questions of interpretation (Matt. vi. 11, *supersubstantialis* for *eioberos*). But the greater number consisted in the removal of the interpolations by which the synoptic Gospels especially were disfigured. These interpolations, unless his description is very much exaggerated, must have been far more numerous than are found in existing copies; but examples still occur which show the important service which he rendered to the Church by checking the perpetuation of apocryphal glosses: Matt. iii. 3, 15 (v. 12); (ix. 21), xx. 28; (xiv. 36); Mark i. 3, 7, 8; iv. 19; xvi. 4; Luke (v. 10); viii. 48; ix. 43, 50; xi. 36; xii. 38; xiii. 48; John vi. 56. As a check upon further interpolation he inserted in his text the notation of the Eusebian Canons [NEW TESTAMENT, §21]; but it is worthy of notice that he included in his revision the famous *pericope*, John vii. 53, viii. 11, which is not included in that analysis.

17. The preface to Damasus speaks only of a revision of the Gospels, and a question has been raised whether Jerome really revised the remaining books of the N. T. Augustine (A.D. 403) speaks only of "the Gospel" (*Ep. civ. 6*, quoted above), and there is no preface to any other books, such as is elsewhere found before all Jerome's versions or editions. But the omission is probably due to the comparatively pure state in which the text of the rest of the N. T. was preserved. Damasus had requested (*Praef. ad Dan.*) a revision of the whole, and when Jerome had faced the more invidious and difficult part of his work there is no reason to think that he would shrink from the completion of it. In accordance with this view he enumerates (A.D. 398) among his works "the restoration of the (Latin version of the) N. T. to harmony with the original Greek" (*Ep. ad Lucin. lxxi. 5*: "N. T. Graecae reddidi auctoritati, ut enim Veterum Librorum fides de Hebraeis voluminibus examinanda est, ita novorum Graecae (?) sermonis normam desiderat." *De Vir. Ill. cxxxv.*: "N. T. Graecae fidel reddidi. Vetus juxta Hebraicam transtuli.") It is yet more directly conclusive as to the fact of this revision, that in writing to Marcella (cir. A.D. 385) on the charges which had been brought against him for "introducing changes in the Gospels," he quotes three passages from the Epistles in which he asserts the superiority of the present Vulgate reading to that of the Old Latin (Rom. xii. 11, *Dominio servientes*, for *tempori servientes*; 1 Tim. v. 19, add. nisi sub duobus aut tribus testibus; 1 Tim. i. 15, *fidelis sermo*, for *humanus sermo*). An examination of the Vulgate text, with the quotations of ante-Hieronymian fathers and the imperfect evidence of MSS., is itself sufficient to establish the reality and character of the revision. This will be apparent from a collation of a few chapters taken from several of the later books of the N. T.; but it will also be obvious that the revision was hasty and imperfect; and in later times the line between

by a combination of authorities, avoiding the peculiarities of single MSS., and (if possible) of a single family.

the Hieronymian and Old texts became very indistinct. Old readings appear in MSS. of the Vulgate, and on the other hand no MS. represents a pure African text of the Acts and Epistles.

ACTS i. 4-25.

Terre Totus.*	Vulg.

* See note *, p. 1696.

† The Latin readings of Cod. Aug. have been added, as affording an interesting example of the admixture of a few old readings with the revised text. Those of Cod. Boern. differ, as will be seen, very widely from them.

(2.) The Revision of the O. T. from the LXX.

—18. About the same time (cir. A.D. 383) at which he was engaged on the revision of the N. T., Jerome undertook also a first revision of the Psalter. This he made by the help of the Greek, but the work was not very complete or careful, and the work as which he describes it may, perhaps, be extended without injustice to the revision of the later books of the N. T.: "Psalterium Romanum . . . emendatum et juxta LXX. interpretis, licet curam maximam illud ex parte correxeram" (*Præf. in Lib. Ps.*). This revision obtained the name of the Roman Psalter, probably because it was made for the use of the Roman Church at the request of Damasus where it was retained till the pontificate of Pius V. (A.D. 1566), who introduced the Gallican Psalter generally, though the Roman Psalter was still retained in three Italian churches (Hody, p. 383, "in una Romæ Vaticana ecclesia, et extra urbem in Mediolanensi et in ecclesia S. Marci, Venetiis"). In a short time "the old error prevailed over the new correction," and at the urgent request of Paula and Eustochium Jerome commenced a new and more thorough revision (*Gallican Psalter*).¹ The exact date at which this was made is not known, but it may be fixed with great probability very shortly after A.D. 387, when he retired to Bethlehem, and certainly before 391, when he had begun his new translations from the Hebrew. In the new revision Jerome attempted to represent as far as possible, by the help of the Greek versions, the real reading of the Hebrew. With this view he adopted the notation of Origen [SEPTUAGINT; compare *Præf. in Gen., &c.*], and thus indicated all the additions and omissions of the LXX text reproduced in the Latin. The additions were marked by an obelus (—); the omissions, which he supplied, by an asterisk (*). The omitted passages he supplied by a version of the Greek of Theodotion, and not directly from the Hebrew ("utique . . . ubique viderit virgulum præcedentem (—) ab ea usque ad duo puncta (") quæ impressæ sunt, sciatis in LXX. interpretibus plus haberi. Ubi autem stellæ (*) similitudinem perspexerit, de Hebræis voluminibus additum novit, neque usque ad duo puncta, juxta Theodotionis duntaxat editionem, per simplicitatem sermonis a LXX. interpretibus non discordat," *Præf. ad Ps.*; compare *Præf. in J. A. Paralip. Libr. Solom. juxta LXX. Int. Ep. c. ad Sen. et Fret.*). This new edition soon obtained a wide popularity. Gregory of Tours is said to have introduced it from Rome into the public services in France, and from this it obtained the name of the Gallican Psalter. The comparison of one or two passages will show the extent and nature of the corrections which Jerome introduced into this second work, as compared with the Roman Psalter. (See Table D, opposite.)

How far he thought change really necessary may appear from a comparison of a few verses of his translation from the Hebrew with the earlier revised septuagintal translations. (See Table E.)

Numerous MSS. remain which contain the Latin Psalter in two or more forms. Thus *Bibl. Aul. Laud.* 35 (Sæc. x.?) contains a triple Psalter, Gallican, Roman, and Hebrew: *Coll. C. C. v. xii.* (Sæc. xv.) Gallican, Roman, Hebrew: *Id. x.*

¹ In one place Jerome seems to include these two revisions in one work: "Psalterium . . . certa emendatione juxta LXX. interpretis nostro labore datum. Roman accipit" . . . (*Apol. Joh. Rev.* 1. 30).

(Saec. xiv.) Gallican, Hebrew, Hebr. text with interlinear Latin: *Brit. Mus.* Harl. 634, a double Psalter, Gallican and Hebrew: *Brit. Mus.* Arund. 155 (Saec. xi.) a Roman Psalter with Gallican corrections: *Coll. SS. Trin. Cambr.*, R. 17, 1, a triple Psalter, Hebrew, Gallican, Roman (Saec. xii.): Id. R. 8, 6, a triple Psalter, the Hebrew text with a peculiar interlinear Latin version, Jerome's Hebrew, Gallican. An example of the unrevised Latin, which, indeed, is not very satisfactorily distinguished from the Roman, is found

with an Anglo-Saxon interlinear version, *Univ. Libr. Cambr.*, Ff. I. 23 (Saec. xi.). H. Stephens published a "*Quincuplex Psalterium, Gallicum, Rhomaicum, Hebraicum, Vetus, Concoliatum* . . . Paris, 1513," but he does not mention the MSS. from which he derived his texts.

19. From the second (Gallican) revision of the Psalms Jerome appears to have proceeded to a revision of the other books of the O. T., restoring all, by the help of the Greek, to a general conformity with the Hebrew. In the Preface to the

TABLE D.

In Tables D, E, and F, the passages are taken from Martianay's and Sabatier's texts, without any reference to MBE., so that the variations cannot be regarded as more than approximately correct.

Ps. viii. 4-6.

<i>Vetus Latina.</i>	<i>Psalt. Romanum.</i>	<i>Psalt. Gallicanum.</i>
	Quoniam videbo coelos, opera digitorum tuorum: tumena et stellas quas tu fundasti. Quid est homo, quod memor es ejus? aut filius hominis, quoniam visitas eum? Miseristi eum paulo minus ab angelis; gloria et honore coronasti eum: et constituisti eum super opera manuum tuarum.	Quoniam videbo coelos " tuos " opera digitorum tuorum; lumina et stellas quas + tu " fundasti. Quid est homo, quod memor es ejus? aut filius hominis, quoniam visitas eum? Miseristi eum paulo minus ab angelis; gloria et honore coronasti eum, + et " constituisti eum super opera manuum tuarum.

Ps. xxxix. 1-4.

<i>repperit me.</i> <i>deprecationem.</i>	Expectans expectavi Dominum: et repperit me; et exaudivit deprecationem meam; et eduxit me de lacu miseriae, et de luto facies. Et statuit super petram pedes meos; + et direxit gressus meos. Et innuisti in os meum canticum novum: Agnus Dei nostro.	Expectans expectavi Dominum: et intendit mihi; et + exaudivit preces meas; et eduxit me de lacu miseriae, + et " de luto facies. Et statuit super petram pedes meos; + et " direxit gressus meos. Et innuisti in os meum canticum novum: cursus Dei nostro.
--	---	---

Ps. xvi. (xv.) 8-11 (ACTS II. 25-28).

<i>(Domine.)</i> <i>fundatum.</i> <i>apud inferos.</i>	Providebam Dominum in conspectu meo semper, quoniam a dextris est mihi, ne commovear. Propter hoc delectatus est cor meum, et exultavit lingua mea: in super et caro mea requiescit in spe. Quoniam non derelinques animam meam in inferno (cum); neque dabis Sanctum tuum videre corruptionem. Notas mihi fecisti vias vitae: adimplebis me laetitia cum vultu tuo: delectationes in dextera tua, usque in finem.	Providebam Dominum in conspectu meo semper, quoniam a dextris est mihi, ne commovear. Propter hoc letatus est cor meum, et exultavit lingua mea: + in super " et caro mea requiescit in spe. Quoniam non derelinques animam meam in inferno; neque dabis Sanctum tuum videre corruptionem. Notas mihi fecisti vias vitae: adimplebis me laetitia cum vultu tuo: delectationes in dextera tua + usque " in finem.

TABLE E.

Ps. xxxiii. (xxiv.) 12-16 (1 PET. III. 10-12).

<i>Vetus Latina.</i>	<i>Vulgata.</i>	<i>Jerome's transl. from the Hebr.</i>
quis est homo qui vult vitam, et cupit videre dies bonos? Custode linguam tuam a malo: et labia tua ne loquantur dolum. Recede a malo et fac bonum: inquire pacem et sequere eam. Oculi Domini super justos et aures ejus ad preces eorum. Vultus Domini super facientes mala.	Quis est homo qui vult vitam, diligat dies videre bonos? Prohibe linguam tuam a malo: et labia tua ne loquantur dolum. Diverge a malo et fac bonum: inquire pacem, et persequere eam. Oculi Domini super justos et aures ejus in preces eorum. Vultus autem Domini super facientes mala.	Quis est vir qui velit vitam diligens dies videre bonos? Custodi linguam tuam a malo, et labia tua ne loquantur dolum. Recede a malo et fac bonum: quaere pacem et persequere eam. Oculi Domini ad justos et aures ejus ad clamores eorum. Vultus Domini super facientes ma- la.

Ps. xxxix. (xl.) 6-8 (HEBR. x. 5-10).

Sacrificium et oblationem noluisti: aures autem perficisti mihi. Holocausta etiam pro delicto non postulasti. Tunc dixi: Ecce venio. In capite libri scriptum est de me ut facias voluntatem tuam.	Sacrificium et oblationem noluisti: aures autem perficisti mihi. Holocaustum et pro peccato non postulasti: Tunc dixi: Ecce venio. In capite libri scriptum est de me, ut facerem voluntatem tuam.	Victima et oblatio non indiget. aures perficisti mihi. Holocaustum et pro peccato non petisti. Tunc dixi: Ecce venio. In volumine libri scriptum est de me ut facerem placitum tibi.
--	--	--

Ps. xviii. (xix.) 5 (ROM. x. 18).

In omnem terram exiit sonus eorum: et in finibus orbis terrae verba eorum	In omnem terram exiit sonus eorum: et in finibus orbis terrae verba eorum	In universam terram exiit sonus eorum: et in finibus orbis verba eorum.
--	---	---

Revision of Job, he notices the opposition which he had met with, and contrasts indignantly his own labours with the more mechanical occupations of monks which excited no reproaches ("Si aut fascellam junco texerem aut palmarum folis complicarem . . . nullus morderet, nemo reprehenderet. Nunc autem . . . corrector vitiorum falsarius vocor"). Similar complaints, but less strongly expressed, occur in the Preface to the Books of Chronicles, in which he had recourse to the Hebrew as well as to the Greek, in order to correct the innumerable errors in the names by which both texts were deformed. In the preface to the three Books of Solomon (Proverbs, Ecclesiastes, Canticles) he notices no attacks, but excuses himself for neglecting to revise Ecclesiasticus and Wisdom, on the ground that "he wished only to amend the Canonical Scriptures" ("tantummodo Canonicae Scripturas vobis emendandas desiderans"). No other prefaces remain, and the revised texts of the Psalter and Job have alone been preserved; but there is no reason to doubt that Jerome carried out his design of revising all the "Canonical Scriptures" (comp. *Ep.* cxii. *ad August.* (cir. A.D. 404), "Quod autem in aliis quæris epistolis: cur prior mea in libris Canonicis interpretatio asteriscos habet et virgulas prænotatas . . ."). He speaks of this work as a whole in several places (e.g. *adv. Ruf.* ii. 24, "Ego contra LXX. interpretes aliquid sum locutus, quos ante annos plurimos diligentissime emendatos meae linguae studiosius dedi . . . ?" Comp. *Id.* iii. 25; *Ep.* lxxi. *ad Lucian.*, "Septuaginta interpretum editionem et te habere non dubito, et ante annos plurimos (he is writing A.D. 398) diligentissime emendatam studiosis tradidi"), and distinctly represents it as a Latin version of Origen's Hexaplar text (*Ep.* cvi. *ad Sun. et Fret.*, "Ea autem quæ habetur in Ἐξαπλόῃς et quam non vertimus"), if, indeed, the reference is not to be confined to the Psalter, which was the immediate subject of discussion. But though it seems certain that the revision was made, there is very great difficulty in tracing its history, and it is remarkable that no allusion to the revision occurs in the Preface to the new translation of the Pentateuch, Joshua (Judges, Ruth), Kings, the Prophets, in which Jerome touches more or less plainly on the difficulties of his task, while he does refer to his former labours on Job, the Psalter, and the Books of Solomon in the parallel prefaces to those books, and also in his Apology against Rufinus (ii. 27, 29, 30, 31). It has, indeed, been supposed (Vallarsi, *Praef. in Hier.* c.) that these six books only were published by Jerome himself. The remainder may have been put into circulation surreptitiously. But this supposition is not without difficulties. Augustine, writing to Jerome (cir. A.D. 405), earnestly begs for a copy of the revision from the LXX., of the publication of which he was then only lately aware (*Ep.* xvi. 34, "Deinde nobis mittas, obsecro, interpretationem tuam de Septuaginta, quam te edidisse nesciebam;" comp. §34). It does not appear whether the request was granted or not, but at a much later period (cir. A.D. 416) Jerome says that he cannot furnish him with "a copy of the LXX. (i.e. the Latin Version of it) furnished with asterisks and obeli, as he had lost the chief part of his former labour by some person's treachery" (*Ep.* cxxxiv.,

* A question has been raised whether Daniel was not translated at a later time (comp. 172. *Hieron.* xxi.), as Jerome does not include him among the prophets in the *Prolog. Gal.*; but in a letter written A.D. 394 (*Ep.* lili.

"Pleraque prioris laboris fraude cuiusdam amissimus"). However this may have been, Jerome could not have spent more than four (or five) years on the work, and that too in the midst of other labours, for in 491 he was already engaged on the versions from the Hebrew which constitute his great claim on the lasting gratitude of the Church.

(3.) *The Translation of the O. T. from the Hebrew.*—20. Jerome commenced the study of Hebrew when he was already advanced in middle life (cir. A.D. 374), thinking that the difficulties of the language, as he quaintly paints them, would serve to subdue the temptations of passion to which he was exposed (*Ep.* cxrv. § 12; comp. *Praef. in Dan.*). From this time he continued the study with unabated zeal, and availed himself of every help to perfect his knowledge of the language. His first teacher had been a Jewish convert; but afterwards he did not scruple to seek the instruction of Jews, whose services he secured with great difficulty and expense. This excessive zeal (as it seemed) exposed him to the misrepresentations of his enemies, and Rufinus indulges in a silly pun on the name of one of his teachers, with the intention of showing that his work was not "supported by the authority of the Church, but only of a second Barabbas" (*Ruf. Apol.* ii. 12; *Hieron. Apol.* i. 13; comp. *Ep.* lxxiv. § 3, and *Praef. in Paral.*). Jerome, however, was not deterred by opposition from pursuing his object, and it were only to be wished that he had surpassed his critics as much in generous courtesy as he did in honest labour. He soon turned his knowledge of Hebrew to use. In some of his earliest critical letters he examines the force of Hebrew words (*Ep.* xviii., xx., A.D. 381, 383); and in A.D. 384, he had been engaged for some time in comparing the version of Aquila with Hebrew MSS. (*Ep.* xxxii. § 1), which a Jew had succeeded in obtaining for him from the synagogue (*Ep.* xxxvi. § 1). After retiring to Bethlehem, he appears to have devoted himself with renewed ardour to the study of Hebrew, and he published several works on the subject (cir. A.D. 389; *Quæst. Hebr. in Gen. &c.*). These essays served as a prelude to his New Version, which he now commenced. This version was not undertaken with any ecclesiastical sanction, as the revision of the Gospels was, but at the urgent request of private friends, or from his own sense of the imperious necessity of the work. Its history is told in the main in the Prefaces to the several instalments which were successively published. The *Books of Samuel and Kings* were issued first, and to these he prefixed the famous *Prologus galentis*, addressed to Paula and Eustochium, in which he gives an account of the Hebrew Canon. It is impossible to determine why he selected these books for his experiment, for it does not appear that he was requested by any one to do so. The work itself was executed with the greatest care. Jerome speaks of the translation as the result of constant revision (*Prolog. Gal.*, "Lege ergo primum Samuel et Malachim meum: meum, inquam, meum. Quid enim crebrius vertendo et emendando sollicitus et didicimus et tenemus nostrum est"). At the time when this was published (cir. A.D. 391, 392) other books seem to have been already translated (*Prolog. Gal.*, "omnibus libris quos de Hebræo vertimus"); and in 393 the sixteen prophets* were in *ad Paul.* he places him distinctly among the four greatest prophets. The Preface to Daniel contains no mark of this. It appears only that the translation was made after that of Tobit, when Jerome was not yet familiar with *Chabab.*

circulation, and Job had lately been put into the hands of his most intimate friends (*Ep. xlix. ad Pamnoch.*). Indeed, it would appear that already in 392 he had in some sense completed a version of the O. T. (*De Vir. Ill. cxxxv.*, "Vetus juxta Hebraicum transtuli." This treatise was written in that year);³ but many books were not completed and published till some years afterwards. The next books which he put into circulation, yet with the provision that they should be confined to friends (*Praef. in Est.*), were Ezra and Nehemiah, which he translated at the request of Dominica and Rogatianus, who had urged him to the task for three years. This was probably in the year 394 (*Vit. Hieron. xxi. 4*), for in the Preface he alludes to his intention of discussing a question which he treats in *Ep. lvii.*, written in 395 (*De optimo Gen. inter. pref.*). In the Preface to the Chronicles (addressed to Chromatius), he alludes to the same Epistle as "lately written," and these books may therefore be set down to that year. The three Books of Solomon followed in 398,⁴ having been "the work of three days" when he had just recovered from a severe illness, which he suffered in that year (*Praef.* "Itaque longa aegrotatione fractus . . . tridui opus domini vestro [Chromatio et Heliodoro] consecravi." *Cump. Ep. lxxiii. 10*). The *Octateuch* now alone remained (*Ep. lxxi. 5*, i. e. *Pentateuch*, Joshua, Judges, Ruth, and Esther, *Praef. in Jos.*). Of this the *Pentateuch* (inscribed to Desiderius) was published first, but it is uncertain in

what year. The Preface, however, is not quoted in the Apology against Rufinus (A.D. 400), as those of all the other books which were then published, and it may therefore be set down to a later date (Hody, p. 357). The remaining books were completed at the request of Eustochium, shortly after the death of Paula, A.D. 404 (*Praef. in Jos.*). Thus the whole translation was spread over a period of about fourteen years, from the sixtieth to the seventy-sixth year of Jerome's life. But still parts of it were finished in great haste (e. g. the Books of Solomon). A single day was sufficient for the translation of Tobit (*Praef. in Tob.*); and "one short effort" (*una lucubratiuncula*) for the translation of Judith. Thus there are errors in the work which a more careful revision might have removed, and Jerome himself in many places gives renderings which he prefers to those which he had adopted, and admits from time to time that he had fallen into error (Hody, p. 362). Yet such defects are trifling when compared with what he accomplished successfully. The work remained for eight centuries the bulwark of Western Christianity; and as a monument of ancient linguistic power the translation of the O. T. stands unrivalled and unique. It was at least a direct rendering of the original, and not the Version of a version. The Septuagintal tradition was at length set aside, and a few passages will show the extent and character of the differences by which the new translation was distinguished from the *Old Latin* which it superseded

TABLE F.

MIC. v. 2 (MATT. ii. 6).

Vetus Latina.
Et in Bethlehem domus Ephrata
sequebatur minimas et ut sis in millibus Judae.
et tibi egredietur
ut sis in principem Israel,
et egressus ejus ab initio,
et diebus saeculi.

Vulgata nova.
Et in Bethlehem Ephrata,
parvulus es in millibus Judae:
ex te mihi egredietur
qui sis dominator in Israel,
et egressus ejus ab initio,
a diebus aeternitatis.

JER. xxxviii. (xxxi.) 15 (MATT. ii. 18).

Vox in Rhama audita est,
lamentatio et fletus et luctus,
Rachel plorantis filios suos,
et noluit conquesecere,
quia non sunt.

Vox in excelsis audita est
lamentationis luctus et fletus,
Rachel plorantis filios suos;
et nolentis [noluit] consolari
super eis [s. filiis suis], quia non sunt.

IS. ix. i. 2 (MATT. iv. 15, 16).

Hoc primum bibe velociter fac
regio Zabulon, terra Neptalim;
et reliqui qui juxta mare caelis
trans Jordanem Galilaeae gentium
l'opulus qui ambulabat in tenebris
vidit lucem magnam:
qui habitatis in regione at umbra mortis
lux orietur vobis.

Primo tempore alleviata est
terra Zabulon et terra Nephthali:
et novissimo aggravata est via maris
trans Jordanem Galilaeae gentium.
Populus qui ambulabat in tenebris
vidit lucem magnam;
habitantibus in regione umbrae mortis
lux orta est eis.

IS. liii. 4 (MATT. viii. 17).

Iste peccata nostra portat
et pro nobis dolet.

Vere languores nostros ipse tulit,
et dolores nostros ipse portavit.

ZECH. ix. 9 (MATT. xxi. 5).

Gaude vehementer, filia Sion,
gaudias filia Jerusalem:
Ecce Rex tuus veniet tibi justus et salvans:
ipse mansuetus et ascendens super
subjugalem et pullum novum.

Exsulta satis, filia Sion,
fubula filia Jerusalem.
Ecce Rex tuus veniet tibi justus et salvans:
ipse pauper et ascendens super
asinum et super pullum filium armae.

IS. lxi. 1, 2 (LUKE iv. 18, 19).

Spiritus Domini super me,
propter quod unxit me:
evangelizans pauperibus misit me,
sanare contritos corde,

Spiritus Domini (al. add. Dei) super me,
eo quod unxit Dominus me:
ad annuntiandum mansuetis misit me,
ut mederer contritis corde,

³ Sophronius (*De Vir. Ill. cxxxiv.*) had also then translated into Greek Jerome's version of the Psalms and Prophets.

⁴ The date given by Hody (A.D. 388) rests on a false reference (p. 366).

Is. lxi. 1, 2 (LUKE iv. 18, 19).—continued.

Vetus Latina.

praedicare captivis remissionem,
et caecis ut viderent:
vocare annum acceptabilem Domine

et diem retributionis:
consolari omnes lugentes.

Vulgata mens.

et praedicarem captivis indulgentiam,
et claudis apertiones:
ut praedicarem (al. et annuncierem) annum piace-
bilium Domino
et diem ultionis Deo nostro:
ut consolari omnes lugentes.

Hos. ii. 24 (ROM. ix. 25).

Et dicam non populo meo:
Populus meus es tu.
Et ipse dicet:
Domineus Deus meus es tu.

Et dicam non populo meo.
Populus meus es tu.
Et ipse dicet:
Deus meus es tu.

Hos. i. 10 (ROM. ix. 26).

Et erit in loco ubi dictum est eis:
Non populus meus vos:
Vocabuntur Filii Dei viventes.

Et erit in loco ubi dicitur eis:
Non populus meus vos:
Dicitur eis: Filii Dei viventes.

Is. xxviii. 16 (ROM. x. 11).

Fecit ego in iudiciis in fundamentis Sion lapidem . . .
et qui crediderit non confundetur.

Ego ego mitam in fundamentis Sion lapidum
qui crediderit non confundetur.

Hos. xiii. 14 (1 COR. xv. 55).

De morte redimam illos:
ubi est os tuum mors?
ubi est oculus tuus, Inferus?

De morte redimam eos:
ero mors tua, o mors,
morsus tuus ero, Inferus.

JOB iv. 15-21.

Et spiritus in faciem meam occurrit,
Horruerunt capilli mei et carnes.
Exsurrexi et non cognovi:
inspexi, et non erat signum ante faciem meam:
sed antrum tantum et vocem audiebam.
Quid enim? Nunquid homo coram Domino mundus
erit,
aut ab operibus suis sine macula vir?
Si contra servos suos non credit,
et adversus angelos suos pravum quid reperit.
Habitantes autem domos intus,
de quibus et nos ex eodem intro sumus,
percutit illos tanquam tineas,
et a mane usque ad vespem ultra non sunt;
et quod non possent sibi ipsa subvenire perierunt.
Afflavit enim nos et aruerunt,
interierunt, quia non habebant sapientiam.

Et cum spiritus me praesente transiret,
inhorrerunt pili carnis meae.
Stetit quidam, cuius non agnoscebam vultum
imago coram oculis meis,
et vocem quasi aene lenis audivi.
Nunquid homo Dei comparatione iustificabitur

aut factore suo purior erit vir?
Ego qui servum et non sunt stabiles:
et in angelis meis reperit pravitatem.
Quanto magis hi qui habitant domos intus,
qui terrenum habent fundamentum,
convenitur velut a tineas?
De mane usque ad vespem succidentur:
et quis nullus intelligit in aeternum perirent.
Qui autem reliqui fuerint auferentur ex eis:
Moriuntur, et non in sapientia.

IV. THE HISTORY OF JEROME'S TRANSLATION TO THE INVENTION OF PRINTING.—21. The critical labours of Jerome were received, as such labours always are received by the multitude, with a loud outcry of reproach. He was accused of disturbing the repose of the Church and shaking the foundations of faith. Acknowledged errors, as he complains, were looked upon as hallowed by ancient usage (*Proef. in Job. ii.*); and few had the wisdom or candour to acknowledge the importance of seeking for the purest possible text of Holy Scripture. Even Augustine was carried away by the popular prejudices, and endeavoured to discourage Jerome from the task of a new translation (*Ep. civ.*), which seemed to him to be dangerous and almost profane. Jerome, indeed, did little to smooth the way for the reception of his work. The violence and bitterness of his language is more like that of the rival scholars of the 16th century than of a Christian Father; and there are few more touching instances of humility than that of the young Augustine bending himself in entire submission before the contemptuous and impatient reproof of the veteran scholar (*Ep. cxii. s. f.*). But even Augustine could not overcome the force of early habit. To the

last he remained faithful to the Italic text which he had first used; and while he notices in his *Retractiones* several faulty readings which he had formerly embraced, he shows no tendency to substitute generally the New Version for the Old.⁴ In such cases Time is the great reformer. Clamour based upon ignorance soon dies away; and the New translation gradually came into use equally with the Old, and at length supplanted it. In the 5th century it was adopted in Gaul by Eucherius of Lyons, Vincent of Lerins, Sedulius and Claudianus Mamertus (*Hody, p. 398*); but the Old Latin was still retained in Africa and Britain (*id.*). In the 6th century the use of Jerome's Version was universal among scholars except in Africa, where the other still lingered (Junilius); and at the close of it Gregory the Great, while commenting on Jerome's Version, acknowledged that it was admitted equally with the Old by the Apostolic See (*Proef. in Job. ad Leandrum*, "Novam translationem disero, sed ut comprobationis causa exigit, nunc Novam, nunc Veterem, per testimonia assumo; ut quia sedes Apostolica (cui auctore Deo praesideo) utraque utitur mei quoque labor studii ex utraque fulciatur"). But the Old Version was not

⁴ When he quotes it, he seems to consider an explanation necessary (*De doctr. Christ. iv. 7, 18*): "Ex illius prophetiae libro potissimum hoc faciam . . . non autem secundum LXX. interpretes, qui etiam ipsi divino spiritus interpretati, ob hoc aliter videntur nonnulla divina, ut ad spiritualem sensum magis admoneretur lectoris intentio . . . sed sicut ex Hebraeo in Latinum eloquium

presbytero Hieronymo utraque linguae perito interpretante, translate sunt." In his *Retractiones* there is no definite reference, as far as I have observed, to Jerome's critical labours. He notices, however, some false readings: *Lob. i. vii.*; *Ps. xlii. 22* (*Rom. viii. 36*); *Wisd. vii. 1*, *Eccles. i. 2*; *id. xix. 4*; *Matt. v. 22* (see note: *Lob. ii. xii.*; *Matt. xx. 17* (*duodecim* for *decem*)).

authoritatively displaced, though the custom of the Roman Church prevailed also in the other churches of the West. Thus Isidore of Seville, (*De Offic. Eccles.* i. 12), after affirming the inspiration of the LXX., goes on to recommend the Version of Jerome, "which," he says, "is used universally, as being more truthful in substance and more perspicuous in language." "[Hieronymi] editiones generaliter omnes ecclesie usquequaque utuntur, pro eo quod veracior sit in sententiis et clarior in verbis:" (Hody, p. 402). In the 7th century the traces of the Old Version grow rare. Julianus of Toledo (A.D. 676) affirms with a special polemical purpose the authority of the LXX., and so of the Old Latin; but still he himself follows Jerome when not influenced by the requirements of controversy (Hody, pp. 405, 406). In the 8th century Bede speaks of Jerome's Version as "our edition" (Hody, p. 408); and from this time it is needless to trace its history, though the Old Latin was not wholly forgotten.^a Yet throughout, the New Version made its way without any direct ecclesiastical authority. It was adopted in the different Churches gradually, or at least without any formal command. (Compare Hody, pp. 411 ff. for detailed quotations.)

22. But the Latin Bible which thus passed gradually into use under the name of Jerome was a strangely composite work. The books of the O. T., with one exception, were certainly taken from his Version from the Hebrew; but this had not only been variously corrupted, but was itself in many particulars (especially in the Pentateuch) at variance with his later judgment. Long use, however, made it impossible to substitute his Psalter from the Hebrew for the Gallican Psalter; and thus this book was retained from the Old Version, as Jerome had corrected it from the LXX. Of the Apocryphal books Jerome hastily revised or translated two only, Judith and Tobit. The remainder were retained from the Old Version against his judgment; and the Apocryphal additions to Daniel and Esther, which he had carefully marked as apocryphal in his own Version, were treated as integral parts of the books. A few MSS. of the Bible faithfully preserved the "Hebrew Canon," but the great mass, according to the general custom of copyists to omit nothing, included everything which had held a place in the Old Latin. In the N. T. the only important addition which was frequently interpolated was the apocryphal Epistle to the Laodiceans. The text of the Gospels was in the main Jerome's revised edition; that of the remaining books his very incomplete revision of the Old Latin. Thus the present Vulgate contains elements which belong to every period and form of the Latin Version—(1.) *Unrevised Old Latin*: Wisdom, Ecclesi., 1, 2 Macc., Baruch. (2.) *Old Latin revised from the LXX.*: Psalter. (3.) *Jerome's free translation from the original text*: Judith, Tobit. (4.)

^a Thus Bede, speaking of a contemporary abbot, says that he increased the library of two monasteries with great zeal, "ita ut tres Pandectas" (the name for the collection of the Holy Scriptures adopted by Alcuin, in place of *Bibliotheca*) "novas translationes ad unum venustas translationis, quam de Roma attulerat, ipse superdungeret..." (Hody, p. 400).

^b Jerome notices this fruitful source of error: "Si quis ro studio ex laere additum est non debet poni in corpore, e priorem translationem pro scribentium voluntate conserbat" (*Ep. cvl. ad Rom. et Prisc.*). Bede, Walafrid Strabo, and others, complain of the same custom.

^c Hieron. *Quæst. in Gen.* xiv. 2. *C. sum in Eccles.* ix. 16; *id.* xli. 490.

Jerome's translation from the Original: O. T. except Psalter. (5.) *Old Latin revised from Greek MSS.*: Gospels. (6.) *Old Latin cursorily revised*: the remainder of N. T.

The Revision of Alcuin.—23. Meanwhile the text of the different parts of the Latin Bible was rapidly deteriorating. The simultaneous use of the Old and New Versions necessarily led to great corruptions of both texts. Mixed texts were formed according to the taste or judgment of scribes, and the confusion was further increased by the changes which were sometimes introduced by those who had some knowledge of Greek.^f From this cause scarcely any Anglo-Saxon Vulgate MS. of the 8th or 9th centuries which the writer has examined is wholly free from an admixture of old readings. Several remarkable examples are noticed below (§ 32); and in rare instances it is difficult to decide whether the text is not rather a revised *Vetus* than a corrupted *Vulgata nova* (e.g. *Brit. Mus. Reg. i. E. vi.*; *Addit.* 5483). As early as the 6th century, Cassiodorus attempted a partial revision of the text: (Psalter, Prophets, Epistles) by a collation of old MSS. But private labour was unable to check the growing corruption; and in the 8th century this had arrived at such a height, that it attracted the attention of Charlemagne. Charlemagne at once sought a remedy, and entrusted to Alcuin (cir. A.D. 802) the task of revising the Latin text for public use. This Alcuin appears to have done simply by the use of MSS. of the Vulgate, and not by reference to the original texts (*Porson, Letter vi. to Travis*, p. 145). The passages which are adduced by Hody to prove his familiarity with Hebrew, are in fact only quotations from Jerome, and he certainly left the text unaltered, at least in one place where Jerome points out its inaccuracy (*Gen. xiv. 8*).^g The patronage of Charlemagne gave a wide currency to the revision of Alcuin, and several MSS. remain which claim to date immediately from his time.^h According to a very remarkable statement, Charlemagne was more than a patron of sacred criticism, and himself devoted the last year of his life to the correction of the Gospels "with the help of Greeks and Syrians" (*Van Ham*, p. 159, quoting Theganus, *Script. Hist. Franc.* ii. p. 277).ⁱ

24. However this may be, it is probable that Alcuin's revision contributed much towards preserving a good Vulgate text. The best MSS. of his revision do not differ widely from the pure Hieronymian text, and his authority must have done much to check the spread of the interpolations which reappear afterwards, and which were derived from the intermixture of the Old and New Versions. Examples of readings which seem to be due to him occur: Deut. i. 9, add. *solitudinem*; *venimusque*, for *etis*; id. 4, *ascendimus*, for *ascendemus*; ii. 24, *in manus tua*, for *in manus tuas*; iv. 33, *vidisti*, for *vixisti*; vi. 13, *ipsi*, add. *et*; xv. 9, *oculos*, for

^h Among these is that known as Charlemagne's Bible, *Brit. Mus. Add.* 10,546, which has been described by Hug. Bial. §128. Another is in the library of the Oratory at Rome (comp. §30, Cod. D.). A third is in the Imperial Library at Paris. All of these, however, are later than the age of Charlemagne, and date probably from the time of Charles the Bald, A.D. 875.

ⁱ Mr. H. Bradshaw suggests that this statement derives some confirmation from the Preface which Charlemagne added to the collection of Homilies arranged by Paulus Diaconus, in which he speaks "of the pains which he had taken to set the church books to rights." A copy of this collection, with the Preface (xii. cent.), is preserved in the Library of St. Peter's Coll. Cantab.

base; xvii. 20, *filios*, for *filii*; xxi. 6, add. *venient*; xxvi. 18, *at*, for *et*. But the new revision was gradually deformed, though later attempts at correction were made by Lanfranc of Canterbury (A.D. 1089, Hody, p. 416), Card. Nicolaus (A.D. 1150), and the Cistercian Abbot Stephanus (cir. A.D. 1150). In the 13th century *Correctoria* were drawn up, especially in France, in which varieties of reading were discussed;¹ and Roger Bacon complains loudly of the confusion which was introduced into the

¹ Vercellone has given the readings of three Vatican *Correctoria*, and refers to his own essay upon them in *Atti della Pontif. Acad. Rom. di Archeologia*, xiv. There is a *Correctorium* in *Brit. Mus. Reg. 1 A. viii*.

= The divisions of the Latin Versions into *capitula* were very various. Cassiodorus († 560 A.D.) mentions an ancient division of some books existing in his time ("Octateuchi [i. e. Pentateuch, Joshua, Judges, Ruth] titulos . . . credidimus imprimendos a majoribus nostris ordioe corrente descriptos." *De Inst. Div. Litt.* i.), and in other books (1, 2 Chron., the Books of Solomon), he himself made a corresponding division. Jerome mentions *capitula*, but the sections which he indicates do not seem to establish the existence of any generally received arrangement; and the variety of the capitulation in the best existing MSS. of his Version proves that no one method of subdivision could claim his authority. The divisions which are given in MSS. correspond with the summary of contents by which the several books are prefaced, and vary considerably in length. They are called indiscriminately *capitula*, *breves*, *tituli*. Marianus, in his edition of the *Bibliotheca*, gives a threefold arrangement, and assigns the different terms to the three several divisions; thus Genesis has xxxviii *tituli*, xvi *breves*, lxxxi (or cliv) *capitula*. But while Jerome does not appear to have fixed any division of the Bible into chapters, he arranged the text in lines (*versus*, *στίχοι*) for convenience in reading and interpretation; and the lines were combined in marked groups (*membra*, *κῆλα*). In the poetical books a further arrangement marked the parallelism of the answering clauses (Marianus, *Prolegg.* iv. *Ad Div. Bibl.*). The number of lines (*versus*) is variously given in different MSS. (Comp. Vercellone, *Var. Lect. App. ad Jos.*) For the origin of the present division of the Vulgate, see BIALS, i. 213.

An abstract of the *capitula* and *versus* given in the Alcuin MS., known as "Charlemagne's Bible" (*Brit. Mus. Addit.* 10,846), will give a satisfactory idea of the contents, nomenclature, and arrangement of the best copies of the Latin Bible.

An argumentum is given before each of the books.

V. THE HISTORY OF THE PRINTED TEXT.—25. It was a noble omen for the future progress of printing that the first book which issued from the press was the Bible; and the splendid pages of the Mazarin Vulgate (Mainz, Gutenberg and Fust) stand yet unsurpassed by the latest efforts of typography. This work is referred to about the year 1455, and presents the common text of the 15th century. Other editions followed in rapid succession (the first with date, Mainz, 1462, Fust and Schoeffer), but they offer nothing of critical interest. The first collection of various readings appears in a Paris edition of 1504, and others followed at Venice and Lyons in 1511, 1513; but Cardinal Ximenes (1502-1517) was the first who seriously revised the Latin text ("... contulimus cum quamplurimis exemplaribus venerandae vetustatis; nec his maxime, quae in publica Complutensis nostrae Universitatis bibliotheca reconduntur, quae supra octingentesimum abhinc annum litteris Gothicis conscriptae, ea sunt sinceritate ut nec apicis lapsus possit in eis deprehendi," *Praef.*), to which he assigned the middle place of honour in his Polyglott between the Hebrew and Greek texts [comp. NEW TESTAMENT, p. 521]. The Complutensian text is said to be more correct than those which preceded it, but still it is very far from being pure. This was followed in 1528 (2nd edition 1532) by an edition of R. Stephens, who had bestowed great pains upon the work, consulting three MSS. of high character and the earlier editions, but as yet the best materials were not open for use. About the same time various attempts were made to correct the Latin from the original texts (Erasmus, 1516; * Pagninus, 1518-28; Card. Cajetanus; Steuchius, 1529; Clarius, 1542), or even to make a new Latin version (Jo. Campensis, 1533). A more important edition of R. Stephens followed in 1540, in which he made use of twenty MSS. and introduced considerable alterations into his

former text. In 1541 another edition was published by Jo. Benedictus at Paris, which was based on the collation of MSS. and editions, and was often reprinted afterwards. Vercellone speaks much more highly of the *Biblia Ordinaria*, with glosses, &c., published at Lyons, 1545, as giving readings in accordance with the oldest MSS., though the sources from which they are derived are not given (*Variae Lect.* xcix.). The course of controversy in the 16th century exaggerated the importance of the differences in the text and interpretation of the Vulgate, and the confusion called for some remedy. An authorized edition became a necessity for the Romish Church, and, however gravely later theologians may have erred in explaining the policy or intentions of the Tridentine Fathers on this point, there can be no doubt that (setting aside all reference to the original texts) the principle of their decision—the preference, that is, of the oldest Latin text to any later Latin version—was substantially right.²

The Sixtine and Clementine Vulgates.—26. The first session of the Council of Trent was held on Dec. 13th, 1545. After some preliminary arrangements the Nicene Creed was formally promulgated as the foundation of the Christian faith on Feb. 4th, 1546, and then the Council proceeded to the question of the authority, text, and interpretation of Holy Scripture. A committee was appointed to report upon the subject, which held private meetings from Feb. 20th to March 17th. Considerable varieties of opinion existed as to the relative value of the original and Latin texts, and the final decree was intended to serve as a compromise.³ This was made on April 8th, 1546, and consisted of two parts, the first of which contains the list of the canonical books, with the usual anathema on those who refuse to receive it; while the second, "On the Edition and Use of the Sacred Books," contains no anathema, so that its contents are not articles of faith.⁴ The wording of the decree itself contains

the N. T. except the Catholic Epistles and the Ep. to the Laodiceans, and the whole MS. closes with sixty-eight hexameter Latin verses.

The divisions agree generally with *Brit. Mus.* Harl. 2806, and *Lambeth* 3. 4. In the Valliscellan Alcuin MS. (comp. p. 1710 D) the apocryphal Ep. to the Laodiceans is not found; but it occurs in the same position in the great Bible in the King's Library (1 E. vii. viii.), with four capitula.

Many examples of the various divisions into capitula are given at length by Thomasius, *Opera*, l. ed. Venzosi, Romae, 1747. The divisions of the principal MSS. which the writer has examined are given below, §30.

Bentley gives the following stichometry from *Cod. Sangerm.* (G):—

- Ep. ad Rom., *Scripta de Chorinthia*. Versus DCCCL. (so two other of R's MSS.).
ad Cor. I., *Scripta de Philippis*. Versus DCCCLXX.
ad Cor. II., *Scripta de Macedoniis*. Versus DLXX. (sic).
ad Galat., *Scripta de urbe Roma*. Versus CCLXXIII. (sic).
ad Ephes., *Scripta de urbe Roma*. Versus CCCCII.
ad Philipp., *Scripta de urbe Roma*. Versus CCCC.
ad Coloss., *Scripta de urbe Roma*. Versus CCCCIII.
ad Thess. I., *Scripta de Athenis*. Versus CLXXIII.
ad Thess. II., *Scripta de urbe Roma*. Versus CXXIII.
ad Tim. I., *Scripta de Laodicea*. Versus CCCCXX.
ad Tim. II., *Scripta a Roma*. Versus CLXXII.
ad Tit., *Scripta de Nicopolin*. Versus LXXVII.
ad Philem., *Scripta de urbe Roma*. Versus XXXIII.
ad Hebr., *Scripta de Roma*. Versus DCC.

M's verses are given from this MS. for the other books.

* The copy which is here alluded to is still in the library at Alcalá, but the writer is not aware that it has been re-examined by any scholar. There is also a second copy of the Vulgate of the 12th cent. A list of Biblical MSS. at Alcalá is given in Dr. Tregelles' *Printed Text of N. T.*, pp. 15-18.

† Erasmus himself wished to publish the Latin text as he found it in MSS.; but he was dissuaded by the advice of a friend, "urgent rather than wise" ("amicus consilium improbis verius quam felicibus").

‡ Bellarmin justly insists on this fact, which has been strangely overlooked in later controversies (*De Verbo Dei*, x. ap. Van Ess, §27): "Nec enim Patres [Tridentini] fontium ullam mentionem fecerunt. Sed solum ex tot latinis versionibus, quae nunc circumferuntur, unam delegerunt, quam ceteris anteponebant. . . . antiquam novis, probatam longo usu recentibus adhuc, ac ut sic loquar crudis. . . ."

§ The original authorities are collected and given at length by Van Ess, §17.

¶ Insuper eadem Sacrosancta Synodus considerans non parum utilitatis accedere posse ecclesiae Dei, si ex omnibus latinis editionibus, quae circumferuntur sacrorum librorum, quatenus pro authentica habenda sit, innotescat, statuit et declarat, ut haec ipsa vetus et vulgata editio, quae longo tot seculorum usu in ipsa ecclesia probata est, in publicis lectionibus, disputationibus, praedicationibus et expositionibus pro authentica habeatur; et ut nemine illam rejicere quovis praetextu audeat vel praesumat. . . . Sed et imprimendis modum. . . . imprimere votens. . . . decrevit et statuit ut posthac sacra scriptura potissimum vero haec ipsa vetus et vulgata editio quam emendatissimam imprimatur.

several marks of the controversy from which it arose, and admits of a far more liberal construction than later glosses have affixed to it. In affirming the authority of the 'Old Vulgate' it contains no estimate of the value of the original texts. The question decided is simply the relative merits of the current *Latin* versions ("si ex omnibus Latinis versionibus quae circumferuntur . . ."), and this only in reference to *public exercises*. The object contemplated is the advantage (still as) of the Church, and not anything essential to its constitution. It was further enacted, as a check to the licence of printers, that "Holy Scripture, but especially the old and common (Vulgate) edition (evidently without excluding the original texts), should be printed as correctly as possible." In spite, however, of the comparative caution of the decree, and the interpretation which was affixed to it by the highest authorities, it was received with little favour, and the want of a standard text of the Vulgate practically left the question as unsettled as before. The decree itself was made by men little fitted to anticipate the difficulties of textual criticism, but afterwards these were found to be so great that for some time it seemed that no authorized edition would appear. The theologians of Belgium did something to meet the want. In 1547 the first edition of Hentenius appeared at Louvain, which had very considerable influence upon later copies. It was based upon the collation of Latin MSS. and the Stephanic edition of 1540. In the Antwerp Polyglott of 1568-72 the Vulgate was borrowed from the Complutensian (Vercellone, *Var. Lect. ci.*); but in the Antwerp edition of the Vulgate of 1573-4 the text of Hentenius was adopted with copious additions of readings by Lucas Brugensis. This last was designed as the preparation and temporary substitute for the Papal edition: indeed it may be questioned whether it was not put forth as the "correct edition required by the Tridentine decree" (comp. Lucas Brug. ap. Vercellone, *cit.*). But a Papal board was already engaged, however desultorily, upon the work of revision. The earliest trace of an attempt to realise the recommendations of the Council is found fifteen years after it was made. In 1561 Paulus Manutius (son of Aldus Manutius) was invited to Rome to superintend the printing of Latin and Greek Bibles (Vercellone, *Var. Lect. &c.*, i. Prol. xix. n.). During that year and the next several scholars (with Sirletus at their head) were engaged in the revision of the text. In the pontificate of Pius V. the work was continued, and Sirletus still took a chief part in it (1569, 1570, Vercellone, *l. c.* xx. n.), but it was currently reported that the difficulties of publishing

an authoritative edition were insuperable. Nothing further was done towards the revision of the Vulgate under Gregory XIII., but preparations were made for an edition of the LXX. This appeared in 1587, in the second year of the pontificate of Sixtus V., who had been one of the chief promoters of the work. After the publication of the LXX., Sixtus immediately devoted himself to the production of an edition of the Vulgate. He was himself a scholar, and his imperious genius led him to face a task from which others had shrunk. "He had felt," he says, "from his first accession to the papal throne (1585), great grief, or even indignation (iniquae ferentes), that the Tridentine decree was still unsatisfied;" and a board was appointed, under the presidency of Card. Orsini, to arrange the materials and offer suggestions for an edition. Sixtus himself revised the text, rejecting or confirming the suggestions of the board by his absolute judgment; and when the work was printed he examined the sheets with the utmost care, and corrected the errors with his own hand.² The edition appeared in 1585, with the famous constitution *Aeternus ille* (dated March 1st, 1589) prefixed, in which Sixtus affirmed with characteristic decision the plenary authority of the edition for all future time. "By the fulness of Apostolical power" (such are his words) "we decree and declare that this edition . . . approved by the authority delivered to us by the Lord, is to be received and held as true, lawful, authentic, and unquestioned, in all public and private discussion, reading, preaching, and explanation."³ He further forbade expressly the publication of various readings in copies of the Vulgate, and pronounced that all readings in other editions and MSS. which vary from those of the revised text "are to have no credit or authority for the future" (as in his *quae hinc nostrae editioni non consenserint, nullam in posterum fidem, nullamque auctoritatem habitura esse decernimus*). It was also enacted that the new revision should be introduced into all missals and service-books; and the greater communication was threatened against all who in any way contravened the constitution. Had the life of Sixtus been prolonged, there is no doubt but that his iron will would have enforced the changes which he thus peremptorily proclaimed; but he died in Aug. 1590, and those whom he had alarmed or offended took immediate measures to hinder the execution of his designs. Nor was this without good reason. He had changed the readings of those whom he had employed to report upon the text with the most arbitrary and unskilful hand; and it was scarcely an exaggeration to say that his precipitate "self-reliance had brought the Church into the most

² The original words are both interesting and important: "Nos . . . ipsius Apostolorum Principia auctoritate confisi . . . haudquaquam gravati sumus . . . hunc quoque non mediocrem accuratae lucubrationis laborem suscipere, atque ea omnia perlegere quae alii collegerant aut senuerant, diversarum lectionum rationes perpendere, sanctorum doctorum sententias recognoscere: quae quibus anteferenda essent judicare, adeo ut in hoc laboriosissimae emendationis curricula, in quo operam quotidianam, eamque pluribus acria collocandam duximus, aliorum quidem labor fuerit in consulendo, noster autem in eo quod ex pluribus esset optimum deligendo: Ita tamen ut veterum multis in Ecclesia abhinc mensulis receptam lectionem omnino restituerimus. Novam interea Typographiam in Apostolico Vaticano Palatio nostro . . . struximus . . . et in ea emendatum jam Bibliorum volumen excuderetur: eaque rursus quo magis incorrupte

perficeretur, nostra nos ipsi manu correctimus, et quae praelo vitia obreperant, et quae confusa aut facile confundi posse videbantur . . . distinximus" (Hody, p. 486; Van Eas, p. 273).

³ " . . . ex certa nostra scientia, deque Apostolicis potestatis plenitudine statuis et declaramus, eam Vulgatam sacrae, tam veteris, quam novi Testamenti paginae Latinam editionem, quae pro authentica a Concilio Tridentino recepta est, sine ulla dubitatione, aut controversia censendam esse hanc ipsam, quam nunc, prout optime fieri poterit, emendam et in Vaticana Typographia impressam in universa Christiana Republica, atque in omnibus Christianis Ecclesiis Ecclesiastica legatione, evulgamus, decernentes eam . . . pro vera, legitima authentica et indubitata, in omnibus publicis privatisque disputationibus, lectionibus, praedicationibus, et explanationibus recipiendam, et tenendam esse."

serious peril." During the brief pontificate of Urban VIII. nothing could be done; but the reaction was not long delayed. On the accession of Gregory XIV. some went so far as to propose that the edition of Sixtus should be absolutely prohibited; but Bellarmine suggested a middle course. He proposed that the erroneous alterations of the text which had been made in it ("quæ male mutata erant") should be corrected with all possible speed and the Bible reprinted under the name of Sixtus, with a prefatory note to the effect that errors (aliqua errata) had crept into the former edition by the carelessness of the printers.²⁶ This pious fraud, or rather daring falsehood, for it can be called by no other name, found favour with those in power. A commission was appointed to revise the Sixtine text, under the presidency of the Cardinal Colonna (Colonna). At first the commissioners made but slow progress, and it seemed likely that a year would elapse before the revision was completed (Ungarelli, in Vercellone, *Proleg.* lviii.). The mode of proceedings was therefore changed, and the commission moved to Zagarolo, the country seat of Colonna; and, if we may believe the inscription which still commemorates the event, and the current report of the time, the work was completed in nineteen days. But even if it can be shown that the work extended over six months, it is obvious that there was no time for the examination of new authorities, but only for making a rapid revision with the help of the materials already collected. The task was hardly finished when Gregory died (Oct. 1591), and the publication of the revised text was again delayed. His successor, Innocent IX., died within the same year, and at the beginning of 1592 Clement VIII. was raised to the papedom. Clement entrusted the final revision of the text to Toletus, and the whole was printed by Aldus Manutius (the grandson)

before the end of 1592. The Preface, which is moulded upon that of Sixtus, was written by Bellarmine, and is favourably distinguished from that of Sixtus by its temperance and even modesty. The text, it is said, had been prepared with the greatest care, and though not absolutely perfect was at least (what is no idle boast) more correct than that of any former edition. Some readings indeed, it is allowed, had, though wrong, been left unchanged, to avoid popular offence.²⁷ But yet even here Bellarmine did not scruple to repeat the fiction of the intention of Sixtus to recal his edition, which still disgraces the front of the Roman Vulgate by an apology no less needless than untrue.²⁸ Another edition followed in 1593, and a third in 1598, with a triple list of errata, one for each of the three editions. Other editions were afterwards published at Rome (comp. Vercellone, *civ.*), but with these corrections the history of the authorized text properly concludes.

27. The respective merits of the Sixtine and Clementine editions have been often debated. In point of mechanical accuracy, the Sixtine seems to be clearly superior (Van Ess, 365 ff.), but Van Ess has allowed himself to be misled in the estimate which he gives of the critical value of the Sixtine readings. The collections lately published by Vercellone²⁹ place in the clearest light the strange and uncritical mode in which Sixtus dealt with the evidence and results submitted to him. The recommendations of the Sixtine correctors are marked by singular wisdom and critical tact, and in almost every case where Sixtus departs from them he is in error. This will be evident from a collation of the readings in a few chapters as given by Vercellone. Thus in the first four chapters of Genesis the Sixtine correctors are right against Sixtus: i. 2, 27, 31; ii. 18, 20; iii. 1, 11, 12, 17, 21, 22; iv.

²⁶ Bellarmine to Clement VIII.: "Novit beatitudo vestra cum se totamque ecclesiam disordinari commiserit Sixtus V. dum *secundum proprias doctrinas sensus sacrorum biblicorum emendationem aggressus est*; nec satis scio an gravius unquam periculum occurrerit" (Van Ess, p. 290).

²⁷ The following is the original passage quoted by Van Ess from the first edition of Bellarmine's *Autobiography* (p. 291), anno 1591: "Cum Gregorius XIV. cogitaret quid agendum esset de biblia a Sixto V. edita, in quibus erant *per multa perperam mutata*, non deerant viri graves, qui censerent ea biblia esse publice prohibenda, sed N. (Bellarmine) contra pontificis demonstravit, biblia illa non esse prohibenda, sed esse ita corrigenda, ut salvo honore Sixti V. pontificis biblia illa emendata proderentur, quod fieri si quam celerrime tollerentur *quæ male mutata erant*, et biblia recuderentur sub nomine ejusdem Sixti, et addita præfatione qua significaretur in prima editione Sixti *græcæ festinatione irreperisse aliqua errata*, vel typographorum vel aliorum incuria, et sic N. reddidit Sixto pontifici bona pro malis." The last words refer to Sixtus' condemnation of a thesis of Bellarmine, in which he denied "Papam esse dominum directum totius orbis;" and it was this whole passage, and not the Preface to the Clementine Vulgate, which cost Bellarmine his canonization (Van Ess, from the original documents, pp. 291-316). It will be observed that Bellarmine first describes the errors of the Sixtine edition really as *deliberate alterations*, and then proposes to represent them as *errors*.

²⁸ The evidence collected by Van Ess (pp. 286 ff.), and even the cautious admissions of Ungarelli and Vercellone (pp. xxxix.-xlv.), will prove that this language is not too strong.

²⁹ This fact Bellarmine puts in stronger light when writing to Lucas Brugensis (1603) to acknowledge his critical collations on the text of the Vulgate: "De libello ad hoc misso gratias ago, sed scias velim biblia vulgata

non esse a nobis accuratissime castigata, multa enim de industria justis de causis pertransivimus, quæ correctione indigere videbantur."

²⁹ The original text of the passages here referred to is full of interest: "Sixtus V. . . . opus tandem confectum typis mandari jussit. Quod cum jam esset excusum et ut in lucem emitteretur, idem Pontifex operam daret [implying that the edition was not published], animadvertens non parca in Sacra Biblia præli vitia irreperisse, quæ literata diligentia indigere viderentur, totum opus sub incudem revocandum censuit atque decrevit [of this there is not the faintest shadow of proof]. Accipe igitur, Christiane lector ex Vaticana typographia veterem ac vulgatam sacre scripturæ editionem, quanta fieri potuit diligentia castigatam: quam quidem sicut oculibus numeris absolutam, pro humanâ imbecillitate affirmare difficile est, ita ceteris omnibus quæ ad hanc usque diem prodierunt emendatiorum, puriorumque esse, minime dubitandum. In hac tamen pervulgata lectione sicut nonnulla consilio mutata, ita etiam alia, quæ mutanda videbantur, consilio immutata relicta sunt, tam quod ita faciendum esse ad offensionem populorum vitandam S. Hieronymus non semel admonuit tum quod . . ." The candour of these words contrasts strangely with the folly of later champions of the edition.

In consequence of a very amusing mistranslation of a phrase of Hug. it has been commonly stated in England that this Preface gained, instead of cost, Bellarmine his canonization: (Hug. *Rn.* l. 490, "Welehe ihm um seine Heiligsprechung gebracht haben soll"). The real offence lay in the words quoted above (note²⁶).

³⁰ The most important of these is the *Codex Bezae Cantabrigiæ*, a copy of the Antwerp edition of 1583, with the MS. corrections of the Sixtine board. This was found by Ungarelli in the Library of the Roman College of SS. Ildefonso and Charles. Comp. Vercellone, *Proleg.* xl.

1, 5, 7, 8, 9, 15, 16, 19; and on the other hand Sixtus is right against the correctors in l. 15. The Gregorian correctors, therefore (whose results are given in the Clementine edition), in the main simply restored readings adopted by the Sixtine board and rejected by Sixtus. In the Book of Deuteronomy the Clementine edition follows the Sixtine correctors where it differs from the Sixtine edition: i. 4, 19, 31; ii. 21; iv. 6, 22, 28, 30, 33, 39; v. 24; vi. 4; viii. 1; ix. 9; x. 3; xi. 3; xii. 11, 12, 15, &c.; and every change (except probably vi. 4; xii. 11, 12) is right; while on the other hand in the same chapters there are, as far as I have observed, only two instances of variation without the authority of the Sixtine correctors (xi. 10, 32). But in point of fact the Clementine edition errs by excess of caution. Within the same limits it follows Sixtus against the correctors wrongly in ii. 33; iii. 10, 12, 13, 16, 19, 20; iv. 10, 11, 28, 42; vi. 3; xi. 28; and in the whole book admits in the following passages arbitrary changes of Sixtus: iv. 10; v. 24; vi. 13; xii. 15, 32; xviii. 10, 11; xix. 23.* In the N. T., as the report of the Sixtine correctors has not yet been published, it is impossible to say how far the same law holds good; but the following comparison of the variations of the two editions in continuous passages of the Gospels and Epistles will show that the Clementine, though not a pure text, is yet very far purer than the Sixtine, which often gives Old Latin readings, and sometimes appears to depend simply on patristic authority* (i. e. pp. ii.) :—

Sixtine.	Clementine.
Matt. i. 23, vocabitur (pp. ii.)	— vocabunt.
ii. 6, Jude (gat. num. &c.)	— Judae.
13, surge, accipe (?)	— surge et accipe.
iii. 2, appropinquabit (iv. 17) (MSS. Gallic. pp. ii.)	— appropinquavit.
3, de quo dictum est (tol. lt.)	— qui dictus est.
10, arboris (Tert.)	— arborum.
iv. 6, ut . . . tollant (lt.)	— et . . . tollent.
7, Jesus rursum.	— Jesus: Rursum.
16, Galilaeae (lt. am. &c.)	— Galilaea.
16, ambulabat (?)	— sedebat.
v. 11, vobis homines (gat. mm. &c.)	— vobis.
30, absconde (?)	— absconde.
40, in iudicio (lt.)	— iudicio.
vi. 7, etn. factum (lt.)	— ethnel.
30, cultu (lt.)	— autem.
vii. 1, et non iudicabimini, nolite condemnare et non condemnabimini (?)	— et non iudicabimini.
4, sine, frater (lt. pp. ii.)	— sine.
23, a me omnes (lt. pp. ii.)	— a me.

* The common statement that the Clementine edition follows the revision of Alcuin, while the Sixtine gives the true text of Jerome, is apparently a mere conjectural assertion. In Deuteronomy, Sixtus gives the Alcuinian reading in the following passages: i. 19; iv. 30, 33; xxi. 6; and I have not observed one passage where the Clementine text agrees with that of Alcuin unless that of Sixtus does also.

Passages have been taken from the Pentateuch, because in that Vercellone has given complete and trustworthy materials. The first Book of Samuel, in which the later corrections are very extensive, gives results generally of the same character. Great and obvious interpolations are preserved both in the Sixtine and Clementine editions: xv. 1; v. 6; x. 1; xiii. 15; xiv. 22, 41; xv. 3, 12; xvii. 36; xx. 18 &c. &c. (the LXX.). The Sixtine text gives from the Clementine: iii. 2, 3; v. 25. The Clementine restores

Sixtine.	Clementine.
Matt. vii. 25, supra (pp. ii. tol. &c.)	— super.
29, scribae (lt.)	— scribae eorum.
viii. 9, alto (lt. am. &c.)	— alti.
12, ubi (pp. ii.)	— ibi.
18, iussit discipulos (lt.)	— iussit.
20, caput suum (lt. tol.)	— caput.
28, venisset Jesus (lt.)	— venisset.
32, magno impetu (lt.)	— impetu.
33, haec omnia (?)	— omnia.
34, rogabant eum ut Jesus (?)	— rogabant ut.
Ephes. i. 15, in Christo J. (pp. ii. Bodi.)	— in Domino J.
21, dominationem (?)	— et dominationem.
ii. 1, vos convificavit (pp. ii.)	— vos.
11, vos eratis (pp. ii. Bodi. &c.)	— vos.
—, dicebamini (pp. ii.)	— dicebamini.
12, qui (pp. ii. Bodi. &c.)	— quod.
22, Spiritu Sancto (pp. ii. Sang. &c.)	— Spiritu.
iii. 8, mihi enim (pp. ii.)	— mihi.
—, virtutem (lt.)	— virtute.
—, in interiore homine (pp. ii. Bodi.)	— in interioribus hominum.
iv. 22, deponite (lt.)	— deponere.
30, in die (pp. ii. Bodi. &c.)	— in diebus.
v. 26, mundans eam (pp. ii.)	— mundans.
27, in gloriam (?)	— gloriosam.
vi. 16, in preparationem (lt.)	— in praeparationem.
20, in catena lata (lt. ?)	— in catena tra.

(Some of the readings of Bodi. (§12, (3) &c.) are added. *lt.* is used, as is commonly done, for the old texts generally; and the notation of the MSS. is that usually followed.)

28. While the Clementine edition was still recent some thoughts seem to have been entertained of revising it. Lucas Brugensis made important collections for this purpose, but the practical difficulties were found to be too great, and the study of various readings was reserved for scholars (Bellarmine ad Lucam Brug. 1606). In the next generation war and controversy gave a sanctity to the authorized text. Many, especially in Spain, pronounced it to have a value superior to the originals, and to be inspired in every detail (comp. Van Ess, 401, 402; Hody, iii. ii. 15); but it is useless to dwell on the history of such extravagancies, from which the Jesuits at least, following their great champion Bellarmine, wisely kept aloof. It was a more serious matter that the universal acceptance of the papal text checked the critical study of the materials which it was professedly based. At length, however, in 1706, Martineau published a new, and a

the old reading against Sixtus: i. 9, 19; ii. 11, 17, 24, 30; iv. 9 (?), (21); vi. 9; ix. 7; x. 12; xii. 6, 11, 15, 23; xiv. 15; xiv. 2 (?), 14, 16. Thus in fifteen chapters Clementine alone gives the old readings sixteen times. Sixtus gave five times. Vercellone, in the second part of his *Vetus Lectiones*, which was published after this article was printed, promises a special discussion of the interpolations of 1 Sam., which were, as might have been expected, expunged by the Sixtine correctors. Vercellone ad 1 Reg. iv. 1.

* The variations between the Sixtine and Clementine editions were collated by T. James, *Bellarmine papale, a cordia discors* . . . Lond. 1600; and more completely with a collation of the Clementine editions, by H. de Bætztop, *Luc de Luc*, lib. iii. pp. 315 ff. Vercellone, correcting earlier critics, reckons that the whole number of variations between the two revisions is about 2000 (1 vol. xviii. nota).

the more better text, chiefly from original MSS., in his edition of Jerome. Vallarsi added fresh collations in his revised issue of Martianay's work, but in both cases the collations are imperfect, and it is impossible to determine with accuracy on what MS. authority the text which is given depends. Sabatier, though professing only to deal with the Old Latin, published important materials for the criticism of Jerome's Version, and gave at length the readings of Lucas Brugensis (1743). More than a century elapsed before anything more of importance was done for the text of the Latin version of the O. T., when at length the fortunate discovery of the original revision of the Sixtine correctors again directed the attention of Roman scholars to their authorised text. The first-fruits of their labours are given in the volume of Vercellone already often quoted, which has thrown more light upon the history and criticism of the Vulgate than any previous work. There are some defects in the arrangement of the materials, and it is unfortunate that the editor has not added either the authorised or corrected text; but still the work is such that

* The materials which Bentley collected (see p. 1711, note f) are an invaluable help for investigation, but they will not supersede it. It is, indeed, impossible to determine on what principle be inserted or omitted variations. Sometimes he notes with the greatest care discrepancies of orthography, and at other times he neglects important differences of text. Thus in John I. 18-61 he gives correctly 23 variations of the Cambridge MS. (Kk. 1, 24) and omits 81; and in Luke 1. 1-39 he gives 13 variations of St. Chad's Gospels and omits 30; and there is nothing in the character of the readings recorded which can have determined the selection, as the variations which are neglected are sometimes noted from other MSS., and are in themselves of every degree of importance. A specimen from each of the volumes which contain his collations will show the great amount of labour which he bestowed upon the work; and, hitherto, no specimen has been published. The student may find it interesting to compare the variations noted with those in Table B.

[illegible]

every student of the Latin text must wait anxiously for its completion.

29. The neglect of the Latin text of the O. T. is but a consequence of the general neglect of the criticism of the Hebrew text. In the N. T. far more has been done for the correction of the Vulgate, though even here no critical edition has yet been published. Numerous collations of MSS., more or less perfect, have been made. In this, as in many other points, Bentley pointed out the true path which others have followed. His own collation of Latin MSS. was extensive and important (comp. Ellis, *Bentley Critica Sacra*, xxv. ff.).* Griesbach added new collations, and arranged those which others had made. Lachmann printed the Latin text in his larger edition, having collated the *Codex Fuldenus* for the purpose. Tischendorf has labored among Latin MSS. only with less zeal than among Greek. And Tregelles has given in his edition of the N. T. the text of *Cod. Amiatinus* from his own collation with the variations of the Clementine edition. But in all these cases the study of the Latin was merely ancillary to that of the Greek text.

vobis sal, et pacem habete inter vos.

The collations in this volume are, as will be seen, somewhat confused. Many are Bentley's hand, who has added numerous emendations of the Latin text in B. 17. 14. Thus, on the same page from which this example is taken, we find: Mart. ix. 20, ad *infantia*. to leg. ad *infantia*. *trahitur*. x. 14, *Quos quoniam videret*. forte leg. *Quod cū videret* (sic s. p. m. O: s later note). x. 34, *ad baptismum* quo ego. leg. *ad baptismum*, quod ego. *fit* the MSS. quoted, see the lists already referred to.

probably from the great antiquity and purity of the *Codd. Amiatinus* and *Fuldensis*, there is comparatively little scope for criticism in the revision of Jerome's Version; but it could not be an unprofitable work to examine more in detail than has yet been done the several phases through which it has passed, and the causes which led to its gradual corruption. (A full account of the editions of the Vulgate is given by Mauch [Le Long], *Bibliotheca Sacra*, 1778-80. Copies of the Sixtine and Clementine editions are in the Library of the British Museum.)

VI. THE MATERIALS FOR THE REVISION OF JEROME'S TEXT.—30. Very few Latin MSS. of the O. T. have been collated with critical accuracy. The Pentateuch of Vercellone (*Romae*, 1860) is the first attempt to collect and arrange the materials for determining the Hieronymian text in a manner at all corresponding with the importance of the subject. Even in the N. T. the criticism of the Vulgate text has always been made subsidiary to that of the Greek, and most of the MSS. quoted have only been examined cursorily. In the following list of MSS., which is necessarily very imperfect, the notation of Vercellone (from whom most of the details, as to the MSS. which he has examined, are derived) has been followed as far as possible; but it is much to be regretted that he marks the readings of MSS. Correctoria and editions in the same manner.

1. MSS. of Old Test. and Apocrypha.

A (*Codex Amiatinus*, Bibl. Laurent. Flor.) at Florence, written about the middle of the 6th cent. (cir. 541, Tischdf.) with great accuracy, so that both in age and worth it stands first among the authorities for the Hieronymian text. It contains Jerome's Psalter from the Hebrew, and the whole Latin Bible, with the exception of Baruch. The variations from the Clementine text in the N. T. have been edited by F. F. Fleck (1840); and Tischendorf and Tregelles separately collated the N. T. in 1843 and 1846, the former of whom published a complete edition (1850; 2nd ed. 1854) of this part of the MS., availing himself also of the collation of Tregelles. The O. T. has been now collated by Vercellone and Palmieri for Vercellone's *Variae Lectiones* (Vercellone, i. p. lxxxiv.). The MS. was rightly valued by the Sixtine correctors, who in many places follow its authority alone, or when only feebly supported by other evidence: e.g. Gen. ii. 18, v. 28, vi. 21, vii. 3, 5, ix. 18, 19, x. 1.

B (*Codex Toletanus*, Bibl. Eccles. Tolet.), at Toledo, written in Gothic letters about the 8th cent. The text is generally pure, and closely approaches to that of A, at least in O. T. A collation of this MS. with a Louvain edition of the Vulgate (1569, fol.) was made by Christopher Palomares by the command of Sixtus V., and the Sixtine correctors set a high value upon its readings: e.g. Gen. vi. 4. The collation of Palomares was published by Bianchini (*Vindiciæ*, pp. lv. ff.), from whom it has been reprinted by Migne (*Hieron. Opp.* x. 875 ff.). Vercellone has made use of the original collation preserved in the Vatican Library, which is not always correctly transcribed by Bianchini; and at the same time he had noted the various readings which have been neglected owing to the difference between the Louvain and Clementine texts. The MS. contains all the Latin Bible (the Psalter from the Hebrew), with the exception of Baruch. A new collation of the MS. is still desirable; and for

the N. T. at least the work is one which might easily be accomplished.

C (*Codex Paulinus*, v. *Carolinus*, Romae. Mo. S. Benedict. ap. Basil. S. Paulli extr. monast.), MS. of the whole Latin Bible, with the exception of Baruch. Vercellone assigns it to the 9th century. It follows the recension of Alcuin, and was one of the MSS. used by the original board appointed by Pius IV. for the revision of the Vulgate. It has been collated by Vercellone.

D (*Codex Vallicellianus olim Stationis*, Romae, Bibl. Vallicell. Orat. B. vi.), an Alcuinian MS. of the Bible also used by the Roman correctors, of the same date (or a little older) and character as C. Comp. Vallart, *Praef. ad Hieron.* ix. 15 (ed. Migne, 2nd note ^a, p. 1703). Collated by Vercellone.

E (*Codex Ottobonianus olim Corvinianus*, Vatic. 60), a MS. of a portion of the O. T., imperfect at the beginning, and ending with Judg. xiii. 30. It is of the 8th century, and gives a text older than Alcuin's recension. It contains also important fragments of the Old Version of Genesis and Exodus published by Vercellone in his *Variae Lectiones*. Coll. by Vercellone.

F (*Romae*, Coll. SS. Blasii et Caroli), a MS. of the entire Latin Bible of the 10th century. It follows, in the main, the recension of Alcuin, with some variations, and contains the Roman Psalter. Coll. by Vercellone.

G (*Romae*, Coll. SS. Blasii et Caroli), a MS. of the 13th century, of the common late type. Coll. by Vercellone.

H, L, P, Q, are used by Vercellone to mark the readings given by Martianay, Hentenius, Costellanus, and R. Stephanus, in editions of the Vulgate.

I, Saec. xiii. Collated in part by C. J. Bens, Elchhorn, *Repertorium*, xvii.

K (Monast. SS. Trina. Cavae), a most important MS. of the whole Bible, belonging to the monastery of La Cava, near Salerno. An exact copy of it was made for the Vatican Library (num. 8444) by the command of Leo XII., and this has been used by Vercellone for the books after Leviticus. For the three first books of the Pentateuch he had only an imperfect collation. The MS. belongs to the 6th or 7th century (Mai, *Novae Patrum Bibl.* i. 2, 7; *Spiciol. Rom.* ix. Praef. xxiii.), and presents a peculiar text. Tischendorf has quoted it at 1 John v. 7, 8.

M, N, O, are Correctoria in the Vatican Library. R, S (*Romae*, Coll. SS. Blasii et Caroli), Saec. xiv., of the common late type given in the editions of the 15th century. T, Saec. x., xi.; U, Saec. x., two MSS. of the type of the recension of Alcuin.

V (*Romae*, Coll. SS. Blasii et Caroli), Saec. xii., akin to F.

These MSS., of which Vercellone promises complete collations thus represent the three great types of the Hieronymian text: the original text in various stages of decadence (A, B, K); the recension of Alcuin (C, D, F, T, U, V); and the current late text (E, G, R, S). But though perhaps no MS. will ever surpass A in general purity, it is to be hoped that many more MSS., representing the anti-Alcuinian text, may yet be examined.

31. Martianay, in his edition of the *Divina Bibliotheca*, quotes, among others, the following MSS. but he uses them in such a way that it is impossible to determine throughout the reading of any particular MS.:

Codex Memmianus, Saec. x.

Codex Caracassanensis, Saec. x.

- Codex Sangermanensis* (1), Saec. x.
Codex Regius, 3563-4.
Codex Sangermanensis (2), a fragment.
Codex Norbonensis. (*Index MSS. Codd.*
 Hieron. ix. pp. 135 ff. ed. Migne.)

To these, Vallarsi, in his revised edition, adds a collation, more or less complete, of other MSS. for the Pentateuch (Joshua, Judges)—of

- Cod. Palatinus*, 3.
Cod. Urbina.

For the Books of Samuel and Kings.

- Cod. Veronensis*, a MS. of the very highest value. (Comp. Vallarsi, *Præf.* 19 ff. ed. Migne.)

For the Psalms.

- Codd. Reg. Saec.* ii. 1286.

- Cod. Vatic.* 154.

- Cod. S. Crucis* (or 104, *Cisterciensis*), (the most valuable).

For Daniel.

- Cod. Palat.* 3.

- Cod. Vatic.* 333.

For Esther, Tobit, and Judith.

- Cod. Reg. Saec.* 7.

- Cod. Vatic. Palat.* 24.

But of all these only special readings are known. Other MSS. which deserve examination are:—

1. *Brit. Mus. Addit.* 10, 546. Saec. ix. (Charlemagne's Bible) an Alcuinian copy. Comp. p. 1704, note ^m.

2. *Brit. Mus. Reg.* 1 E, vii. viii. Saec. ix. x. (Bentley's MS. R).^f

3. *Brit. Mus. Addit.* 24, 142. Saec. ix. x. (Important: apparently taken from a much older copy. The Psalter is Jerome's Version of the Hebrew. The Apocryphal books are placed after the Hagiographa, with the heading: *Incipit quartus ordo eorum librorum qui in Veteri Testamento extra Canonem Hebraeorum sunt.* The MS. begins Gen. xlix. 6.)

^f Bentley procured collations of upwards of sixty English and French Latin MSS. of the N. T., which are still preserved among his papers in Trin. Coll. Cambridge, B. 17, 5, and B. 17, 14. A list of these, as given by Bentley, is printed in Ellis's *Pentateuch Critica Sacra*, pp. xxxv. ff. I have identified and noticed the English MSS. below (comp. p. 1712). Of Bibles Bentley gives more or less complete collations of the N. T. from Paris. *Bibl. Reg.* 2862 (A.D. 876); 3661, Saec. ix.; 3683-4, Saec. ix.; 3684^a, Saec. ix., x. All appear to be Alcuinian.

Sir F. Madden has given a list of the chief MSS. of the Latin Bible (19 copies) in the *Gentleman's Magazine*, 1836, pp. 580 ff. This list, however, might be increased.

^e For all critical purposes the Latin texts of this edition are worthless. In one chapter taken at random (Mark viii.) there are *seventeen* errors in the text of the Lindisfarne MS., including the omission of one line with the corresponding gloss.

^b The accompanying Plates will give a good idea of the external character of some of the most ancient and precious Latin MSS. which the writer has examined. For permission to take the tracings, from which the facsimiles were made, his sincere thanks are due to the various institutions in whose charge the MSS. are placed.

Pl. 1. *Fig. 1. Brit. Mus. Harl.* 1775. Matt. xxi. 30, 31, *Et domine—et matricibus*. This MS. (like *figs. 2, 3*) exhibits the arrangement of the text in lines (*versus, orijes*). The original reading *novissimus* has been changed by a late hand into *primus*. A characteristic error of sound will be noticed, but for *ivt* (b for e), which occurs also in *fig. 2*.

Fig. 2. Brit. Mus. Add. 5463. Matt. xxi. 30, 31, *et—novissimus*. This magnificent MS. shows the beginning of contraction (*duob*) and punctuation

4. *Brit. Mus. Harl.* 2805 to Psalms with some lacunae. Saec. ix.

5. *Brit. Mus. Egerton* 1046. Saec. viii. Prov. Eccles. Cant. Sap. Ecclesi. (with some lacunae) Good Vulgate.

6. *Lambeth*, 3, 4. Saec. xii.

32. ii. *MSS. of the N. T.*

A, B, C, D, F, &c., as enumerated before. To these must be added the *Codex Fuldensis* of the whole N. T., which, however, contains the Gospels in the form of a Harmony. The text of the MS. is of nearly equal value with that of A, and both seem to have been derived from the same source (Tischd. *Prolegg. Cod. Am.* p. xxiii.). The MS. has been collated by Lachmann and Buttmann, and a complete edition is in preparation by E. Ranke.

Other Vulgate MSS. of parts of the N. T. have been examined more or less carefully. Of the Gospels, Tischendorf (*Proleg. oeculix. ff.*) gives a list of a considerable number, which have been examined very imperfectly. Of the more important of these the best known are:—

For. Prag. (at Prague and Venice). Published by Bianchini, in part after Dobrowsky.

Harl. (*Brit. Mus. Harl.* 1775). Saec. vii. Coll

in part by Griesbach (*Symb. Crit.* i. 305 ff.).

Per. Fragments of St. Luke, edited by Bianchini.

Brit. Mus. Cotton. Nero D, iv. Saec. viii.

(Bentl. Y). The Lindisfarne (St. Cuthbert) Gospels

with interlinear Northumbrian gloss. Ed. by Stevenson, for *Surtess Society* (St. Matt.; St. Mark).

The Northumbrian gloss by Bouterwek, 1857.

Stevenson has added a collation of the Latin of the

Rushworth Gospels (p. 1695, No. 3).

The following, among many others in the United Kingdom, deserve examination:—

- (1.) Of the Gospels.

1. *Brit. Mus. Harl.* 1775. Saec. vii. (Griesbach's *Harl.* Bentley's Z). A new an.

Fig. 3. Stonyhurst. John xix. 15-17, *non habemus—crucem*. This MS., unlike the former, seems to have been prepared for private use. It is written throughout with the greatest regularity and care. The large capitals probably indicate the beginnings of *membra (cola)*. The words are here separated.

Fig. 4. Oxf. Bodl. 2418. Acts viii. 36, 37, *et aut—stare*.

Pl. II. *Fig. 1. Cambr. Univ. Libr.* Kk. i. 24. John v. 4, *omnes fecit—domo ibi*. This MS. offers a fine example of the semi-uncial "Irish" character, with the characteristic dotted capitals, which seems to have been used widely in the 8th century throughout Ireland and central and northern England. The text contains a most remarkable instance of the incorporation of a marginal gloss into the body of the book (*non in Oracis exemplaribus non habetur*), without any mark of separation by the original hand. This clause also offers a distinct proof of the revision of the copy from which the MS. was derived by Greek MSS. The contraction for *autem* is worthy of notice.

Fig. 2. Brit. Mus. Reg. 1 B. vii. Another type of "Saxon" writing.

Fig. 3, 4. Brit. Mus. Harl. 1023. Matt. xxvii. 49, with

the addition *Alles autem—et sanguis*. Ibid. 1802. Matt.

xxi. 30, 31, *et non sit—pupillam*. Two characteristic

specimens of later Irish writing. The contractions for

sum, autem, quia, et, aqua, in *fig. 3*, and for *et, non, enim*,

quia in *fig. 4*, are noticeable.

Fig. 5. Hereford Gospels. John i. 2, 4, *factum est—compræhenderunt*. Probably a British type of the "Irish" character. The symbol for *est* (→), and the *gh* for *h*, are to be observed.

- complete collation of this most precious MS. is greatly to be desired. It contains the *Prefaces*, *Canons*, and *Sections*, with blank places for the *Capitula*.¹ (Plate I., fig. 1.)
2. Brit. Mus. Reg. 1 E. vi. Saec. vii. (Bentley's P). A very important English MS., with many old readings. *Praef. Can.* (no Sections), *Cap. Mt. xxviii. Mc. xii. (?) Lc. xx. Joh. xiv.* Supposed to have formed part of the *Biblia Gregoriana*: Westwood, *Archaeological Journal*, xl. p. 292.
 3. Brit. Mus. Reg. 1 B. vii. Saec. viii. (Bentley's H). Another very important MS., preserving an old text.² *Praef. Can.* (Sect.) *Cap. Mt. lxxvii. (sic). Mc. xli. Lc. xciv. Joh. xiv.* (Plate II., fig. 2.)
 4. Brit. Mus. Cotton. Otho C V. Saec. viii. (Fragments of Matt. and Mark. Bentley's ϕ). Injured by fire: restored and mounted, 1848. The complement of 24.
 5. Brit. Mus. Addit. 5463. Saec. viii. (Bentley's F). A magnificent (Italian) uncial MS. with many old readings. *Praef. Can.* (Sect.) *Cap. Mt. xxviii. Mc. xiii. Lc. xx. Joh. xiv.* (Plate I., fig. 2.)
 6. Brit. Mus. Harl. 2788. Saec. viii., ix. (Codex aureus I. Bentley's M_2). Good Vulgate.
 7. Brit. Mus. Harl. 2797. Saec. viii. ix. (Codex aureus II.) Vulgate of late type.
 8. Brit. Mus. Reg. 2 A. xx. Saec. viii. (Lectiones quaedam ex Evangelis.) Good Vulgate.
 9. Brit. Mus. Harl. 2790, cir. 850. A fine copy, with some old readings.
 10. Brit. Mus. Harl. 2795. Saec. ix. (In red letters.) Vulgate of late type.
 11. Brit. Mus. Harl. 2823. Saec. ix. Good Vulgate, with *versus*.
 12. Brit. Mus. Harl. 2826. Saec. ix. viii. (Bentley's H_2). Good Vulgate.
 13. Brit. Mus. Reg. 1 A. xviii. Saec. ix. x. (Cod. Athelstani. Bentley's O). Many old and peculiar readings.
 14. Brit. Mus. Reg. 1 D. viii. Saec. x. Like 13, but most carelessly written.

¹ The varying divisions into *capitula* probably indicate different families of MSS., and deserve attention, at least in important MSS. The terms *breviarium*, *capitula*, *breves*, appear to be used quite indiscriminately. One term is often given at the beginning and another at the end of the list. Brit. Mus. Addit. 9381 gives *tituli* (a division into smaller sections) as well as *capitula*.

² This MS. contains the addition, after Matt. xx. 28, in the following form:—

Vos autem quaeritis de modico
creatore et de maximo minui
Cum autem introieritis
ad coenam vocati
Nolite recumbere in superioribus
locis [veniat
Ne forte dignior te asper
et accedens is qui te invitavit
Dicat tibi adhuc inferior
accede et confundaris
Si autem recuberis in inferiori
loco et venerit hic
melior te
Dicet tibi qui te invitavit
accede adhuc superius et
erit tibi hoc utilius.

15. Brit. Mus. Addit. 11,848. Saec. ix. One fully written and corrected. Closely resembling 20.
16. Brit. Mus. Addit. 11,849. Saec. ix. Vulgate of late type.
17. Brit. Mus. Egerton, 768. Saec. ix. (St. Luke and St. John.) Some important readings.
18. Brit. Mus. Egerton, 873. Saec. ix. Good Vulgate. *Praef. Can.* (Sect.) *Cap. Mt. xxviii. Mc. xiii. Lc. xxi. Joh. xiv.*
19. Brit. Mus. Addit. 9381. Saec. ix. From St. Petroc's, Bodmin. Some peculiar readings. *Praef. Can.* (Sect.) *Tituli. Mt. edii. (Cap. lxxiv. versus lxxxv.). Mc. clxxv. Lc. cccxl. Joh. cccxvi.*
20. Brit. Mus. Cotton. Tib. A. ii. Saec. x. (The Coronation Book. Bentley's E). Many old readings in common with 1, 3, 5, but without great interpolations.³
21. Brit. Mus. Reg. 1 D. ix. Saec. xi. (Canute's Book. Bentley's A). Good Vulgate.
22. Cambridge Univ. Libr. Ll. i. 10. (*Passio et Resurrectio ex iv. Evv.*). Saec. viii. Written (apparently) for Ethelwald, Bp. of Lindisfarne.
23. Cambridge, C. C. C. Libr. cclxxxvi. (iv. Gospels, with Eusebian Canons.) Saec. vi., vii. Supposed by many to have been sent by Gregory the Great to Augustine. *Cap. Mt. xxviii. Mark xiii. Luke xx. Joh. xiv.* Vulgate with many old readings. It has been corrected by a very pure Vulgate text. Described and some readings given by J. Goodwin, *Publ. of Camb. Antiquarian Society*, 1847.⁴
24. Cambridge, C. C. C. Libr. ccxvii. (Fragments of St. John and St. Luke, extending over John i. 1-x. 29, and Luke iv. 5-xxiii. 26, with Eusebian Canons.) Saec. viii. The fragments of St. John were published by J. Goodwin, *l. c.* A curiously mixed text, forming a connecting link between the "Irish" text and the Vulgate, but without any great interpolations. See No. 4. Comp. p. 1694.
25. Cambridge, Trin. Coll. B. 10, 4, iv.

The same addition is given in the first hand of Oxford Bodl. 867, and in the second hand of B.M. Add. 24,142, with the following variations: *introieritis, advenit, invitavit*. In B.M. Reg. A. xviii. the variations are much more considerable: *pusilla, majori, minoris, cas, introeuntes autem et rogati ad coenam, lecti emensioribus, clarior, om. is, ad coenam vocati, decursum, in l. inf. rec., supervenerit, ad coenam vocavit, adhuc versus accede, om. hoc*.

³ Bentley has also given a collation of another Cottonian MS. (Otho. B. ix.) very similar to this, which almost perished in the fire in 1731. Mr. E. A. Bond, Deputy Keeper of the MSS., to whose kindness the writer is greatly indebted for important help in examining the magnificent collection of Latin MSS. in the British Museum, has shown him fragments of a few leaves of this MS. which were recovered from the wreck of the fire. By a singular error Bentley calls this MS. and not Tib. A. ii., the *Coronation Book*. Comp. Smith, *Cotton. Cat.*

⁴ A complete edition of this text, with collations of London Brit. Mus. Harl. 1775. Reg. 1 E. vi., 1 B. vii.; Addit. 5463; Oxford, Bodl. 867, in, I believe, in preparation by the Rev. G. Williams, Fellow of King's College Cambridge.

5. Hereford Gospels.

quod factum ē in ipso uita est et uita
 erat lux hominum et lux in tenebris luce
 et tenebre eam non comprehenderunt :-

- Gospels, Saec. ix. (*Cap.*) Matt. xxvii. Ma. xiii. Lc. xxi. Joh. xiv. Good Vulgate, with some old readings. (Bentley's T.)
26. Cambridge, *Coll. D. Joh. C.* 23. The Bedish Gospels, Saec. ix. Good Vulgate, very carefully written.
27. Oxford, *Bodl.* 857 (D. 2. 14). Saec. vii. Begins, Matt. iv. 14, ut adim.—ends John xxi. 15, with a lacuna from Matt. viii. 29, dicentes — ix. 18, defuncta est. *Seof. Præf. (Cap.)* Mc. xiii. Lc. xx. Joh. xiv. Closely akin to 23.*
28. Durham, "Codex Evangeliorum plus mille annorum, litteris capitalibus ex Bibliotheca Dunelmensi." (Bentley's K.) Ends John i. 27.
29. Durham, "Codex Evangeliorum plus mille annorum, sed imperfectus." (Bentley's L.) Begins Mark i. 12. Two very important MSS. Both have many old readings in common with 1, 3, 4, 5.
30. Stonyhurst, *St. Cuthbert's St. John*, found in 1105 at the head of St. Cuthbert when his tomb was opened. Saec. vii. Very pure Vulgate, agreeing with *Cod. Am.* in many very remarkable readings: e.g. i. 15, dixi vobis; ii. 4, tibi et mihi; iv. 10, respondit Jesus dixit; iv. 16, et veni, om. *huc, &c.* (Plate I. fig. 3.)
- (2.) Of the Acts and Epistles and Apoc. :—
1. Oxford, *Bodl.* *Seld.* 30 (Acts). See §12, (2). (Plate I. fig. 4.)
 2. Oxford, *Bodl.* *Laud.* E, 67 (Epp. Paul). See §12, (2).
 3. Brit. Mus., *Hart.* 1772. (Epp. Paul. et Cath. (except 3 Jo. Jud.) Apoc.). Saec. viii. Griestbach, *Symb. Crit.* i. 326 ff., a most important MS. (Bentley's M.) See §12, (2).
 4. Brit. Mus. *Hart.* 7551. (Fragm. of Cath. Epp. and St. Luke.) Saec. viii. (Bentley's n, γ.)

* By a very strange mistake Tischendorf describes this MS. as "multorum Nl. 7. fragmentum."

† It may be interesting to give a rough classification of these MSS., all of which the writer has examined with more or less care. Many others of later date may be of equal value; and there are several early copies in private collections (as at Middlehill) and at Dublin (e.g. the (Vulgate) Book of St. Columba, Saec. vii. Westwood, *l'ad. Sacra*) which he has been obliged to leave unexamined.

Group I. *Vulgate text approaching closely on the whole to the Cod. Amiat.* 6, 8, 11, 12, 13, 21, 22, 25, 26, 28.

Group II. *Vulgate text of a later type:* 7, 10, 16.

Group III. *A Vulgate text mainly with old readings:* 1, 9, 17, 18, 23, 27.

Group IV. *A mixed text, in which the old readings are numerous and important:* 2, 3, 4 (24), 5, 12, 14, 15, 20, 23, 29.

A more complete collation might modify this arrangement, but it is (I believe) approximately true.

† This MS. contains the Epistle to the Laodiceans after that to the Hebrews, and also the addition 1 Joh. v. 7, in the following form: *Quia tres sunt qui testimonium dant sps, et aqua, et sanguis, et tres unum sunt. Sicut in cæcis tres sunt, pater verbum et sps, et tres unum sunt.* It is remarkable that the two other oldest authorities in support of this addition, also support the Epistle to the Laodiceans—the MS. of La Cava, and the Speculum published by Mai.

* A fragment containing prefatory excerpts to a copy VOL. III.

5. Brit. Mus. *Addit.* 11,852. Saec. ix. Epp. Paul. Act. Cath. Epp. Apoc. Good Vulgate.*
6. Brit. Mus. *Reg.* 1 A. xvi. Saec. xi. Good Vulgate.
7. Cambridge, *Coll. SS. Trin.* B. 10, 5. Saec. ix. (Collated by F. J. A. Hort. Bentley's S.) In Saxon letters: akin to 2.*
8. Cambridge, *Coll. SS. Trin. Cod. Aug. (F₈)* Published by F. H. Scrivener, 1859.*
9. "Codex ecclesiae Lincolnensis 800 annorum." (Bentley's L, Act. Apoc.)
10. Brit. Mus. *Reg.* 2 F. i. Saec. xii. (Bentley's B.) Paul. Epp. xiv. cum commentario. Many old readings.

A Lectionary quoted by Sabatier (Saec. viii.), and the Mosarabic Liturgy, are also of great critical value.

In addition to MSS. of the Vulgate, the Anglo-Saxon Version which was made from it is an important help towards the criticism of the text. Of this the *Heptateuch* and *Job* were published by E. Thwaites, Oxfr. 1699; the (Latin-Saxon) *Psalter*, by J. Spelman, 1640, and B. Thorpe, 1835; the *Gospels*, by Archbp. Parker, 1571, T. Marshall, 1665, and more satisfactorily by B. Thorpe, 1842, and *St. Matt.* by J. M. Kemble (and C. Hardwick) with two Anglo-Saxon texts, formed on a collation of five MSS., and the Lindisfarne text and gloss. Comp. also the Frankish Version of the Harmony of Ammonius, ed. Schmeller, 1841.

VII. THE CRITICAL VALUE OF THE LATIN VERSIONS.—33. The Latin Version, in its various forms, contributes, as has been already seen, more or less important materials for the criticism of the original texts of the Old and New Testaments, and of the Common and Hexaplaric texts of the LXX. The bearing of the Vulgate on the LXX, will not be noticed here, as the points involved in the inquiry more properly belong to the history of the LXX. Little, again, need be said on the value of the

of St. Paul's epistles written in a hand closely resembling this is found B.M. Cotton. Vitell. C. vii.

* From an examination of Bentley's unpublished collations, it may be well to add that of the eighteen French MSS., which he caused to be compared with the Clementine text (*Letat. Paris. apud Claudium Somnium. MDCCXVII.* See *Trin. Coll. Camb.* B. 17, 5), the following are the most important, and would repay a complete collation. The writer has retained Bentley's notation: some of the MSS. may probably have passed into other collections.

a. *S. Germain à Paris* Saec. viii. Gold uncials on purple vellum. Matt. vi. 2, ut—to end. Mark ix. 47, *et*—xi. 13, *vidisset*. xii. 23, *resurrexerunt*—to end. Good Vulgate.

μ. *S. Germain à Paris*. (g^o of Tischdf. &c.) A very important MS., containing part of O.T., the whole of N.T. (of Gallican text), and "tria folia *Parteris*." Existing collations are very incomplete. At the end of the Epistle to the Hebrews, which precedes the Shepherd, the MS. has (according to Bentley) the following note: *Reptitum ad Hebraeos Laps cum pace. Bibliotheca Hieronymi Presbyteri Bathoni secundum Græcorum et emendatiss. mss. exemplaribus collatus* (&c.).

v. *S. Germain à Paris*, i. 2, A.D. 809.

α. *Bibl. Regiæ*, Paris. 3704. 4 Gosp. Saec. ix. Many old readings.

π. *Bibl. Regiæ*, Paris. 3706 (23). 4 Gosp., with some lacunae. Saec. viii. Many old readings.

ρ. *S. Martin à Paris*. Lit. aurea. Saec. viii. An important MS. (Gallican). Comp. p. 1696, note *

translation of Jerome for the textual criticism of the O. T. As a whole his work is a remarkable monument of the substantial identity of the Hebrew text of the 4th century with the present Masoretic text; and the want of trustworthy materials for the exact determination of the Latin text itself, has made all detailed investigation of his readings impossible or unsatisfactory. The passages which were quoted in the premature controversies of the 16th and 17th centuries, to prove the corruption of the Hebrew or Latin text, are commonly of little importance as far as the text is concerned. It will be enough to notice those only which are quoted by Whitaker, the worthy antagonist of Bellarmio (*Disputation on Scripture*, pp. 163, ff., ed. Paik. Soc.).

Gen. i. 30, *om.* all green herbs (in Vet. L.);
iii. 15, *Ipsa* conteret caput tuum. There seems good reason to believe that the original reading was *ipse*. Comp. Vercellone, *ad loc.* See also Gen. iv. 16.

iii. 17, in opera tuo. כַּעֲבוֹרָךְ for כַּעֲבוֹרָךְ.

iv. 10, *om.* Nod, which is specially noticed in Jerome's *Quaest. Hebr.*

vi. 6, *add.* et praecavens in futurum. The words are a gloss, and not a part of the Vulgate text.

viii. 4, *vicesimo septimo, for septimo decimo.* So LXX.

Id. 7, egrediebatur et non revertebatur. The *non* is wanting in the best MSS. of the Vulgate, and has been introduced from the LXX.

xi. 13, *trecentis* tribus, for *quadringentis* tribus. So LXX.

ix. 1, *fundetur sanguis illius.* *Om.* "by man."

xxvii. 2, *Sedecim* for *septemdecim*. Probably a transcriptional error.

xxxix. 8, *om.* "Wherefore he left—Joseph."

xl. 5, *om.* "The butler—prison."

xlix. 10. Comp. Vercellone *ad loc.*

33, *om.*

In xxiv. 6, xxvii. 5, xxxiv. 29, the variation is probably in the rendering only. The remaining passages, ii. 8; iii. 6; iv. 6, 13, 26; vi. 3; xiv. 3; xvii. 16; xix. 18; xxi. 9; xxiv. 22; xxv. 34; xxvii. 33; xxxi. 32; xxxviii. 5, 23; xlix. 22, contain differences of interpretation; and in xxxvi. 24, xli. 45, the Vulgate appears to have preserved important traditional renderings.

34. The examples which have been given show the comparatively narrow limits within which the Vulgate can be used for the criticism of the Hebrew text. The Version was made at a time when the present revision was already established; and the freedom which Jerome allowed himself in rendering the sense of the original, often leaves it doubtful whether in reality a various reading is represented by the peculiar form which he gives to a particular passage. In the N. T. the case is far different. In this the critical evidence of the Latin is separable into two distinct elements, the evidence of the Old Latin and that of the Hieronymian revision. The latter, where it differs from the former, represents the received Greek text of the 4th century, and so far claims a respect (speaking roughly) equal to that due to a first-class Greek MS.; and it may be fairly concluded, that any reading opposed to the combined testimony of the oldest Greek MSS. and the true Vulgate text, either arose later than the 4th century, or was previously confined within a very narrow range. The corrections of Jerome do not carry us back beyond the age of existing Greek MSS., but, at the same time, they supplement the

original testimony of MSS. by an independent witness. The substance of the Vulgate, and the *usus* of the Old Latin, have a more venerable authority. The origin of the Latin Version dates, as has been seen, from the earliest age of the Christian Church. The translation, as a whole, was practically one and current more than a century before the transcription of the oldest Greek MS. Thus it is a witness to a text more ancient, and, therefore, *ceteris paribus*, more valuable, than is represented by any other authority, unless the Peshito in its present form be excepted. This primitive text was not, as far as can be ascertained, free from serious corruptions (at least in the synoptic Gospels from the first, and was variously corrupted afterwards. But the corruptions proceeded in a different direction and by a different law from those of Greek MSS., and, consequently, the two authorities mutually correct each other. What is the nature of these corruptions, and what the character and value of Jerome's revision, and of the Old Latin, will be seen from some examples to be given in detail.

35. Before giving these, however, one preliminary remark must be made. In estimating the critical value of Jerome's labours, it is necessary to draw a distinction between his different works. His mode of proceeding was by no means uniform; and the importance of his judgment varies with the object at which he aimed. The three versions of the Psalter represent completely the three different methods which he followed. At first he was contented with a popular revision of the current text (the *Roman Psalter*); then he instituted an accurate comparison between the current text and the original (the *Gallian Psalter*; and in the next place he translated independently, giving a direct version of the original (the *Hebrew Psalter*). These three methods follow one another in chronological order, and answer to the wider views which Jerome gradually gained of the functions of a biblical scholar. The revision of the N. T. belongs unfortunately to the first period. When it was made, Jerome was as yet unused to the Law, and he was anxious not to arouse popular prejudice. His aim was little more than to remove obvious interpolations and blunders; and in doing this he likewise introduced some changes of expression which softened the roughness of the old version, and some which seemed to be required for the true expression of the sense (e. g. Matt. vi. 11, *super-substantialem* for *quotidianum*). But while he accomplished much, he failed to carry out even this limited purpose with thorough completeness. A rendering which he commonly altered was still suffered to remain in some places without any obvious reason (e. g. *μυστήριον*, *secretum*, *secretum*; and the textual emendations which he introduced apart from the removal of glosses) seem to have been made after only a partial examination of Greek copies, and those probably few in number. The result was such as might have been expected. The greater corruptions of the Old Latin, whether by addition or omission, are generally corrected in the Vulgate. Sometimes, also, Jerome gave the true reading in details which had been lost in the Old Latin: Matt. i. 25, *cognoscetis*; i. 23, *prophetas*; v. 22, *om. eliq;*; ix. 15, *Agave*; John iii. 8; Luke ii. 33, *et verba*; iv. 12; but not rarely he leaves a false reading uncorrected (Matt. ix. 28, *vobis*; x. 42), or adapts a true reading where the true one was also current; Matt.

xvi. 6; xviii. 29; xix. 4; John i. 3, 16; vi. 64. Even in graver variations he is not exempt from error. The famous *pericope*, John vii. 53-viii. 11, which had gained only a partial entrance into the Old Latin, is certainly established in the Vulgate. The additions in Matt. xxvii. 35, Luke iv. 19, John v. 4, 1 Pet. iii. 22, were already generally or widely received in the Latin copies, and Jerome left them undisturbed. The same may be said of Mark xvi. 9-20; but the "heavenly testimony" (1 John v. 7), which is found in the editions of the Vulgate, is, beyond all doubt, a later interpolation, due to an African gloss; and there is reason to believe that the interpolations in Acts viii. 37, ix. 5, were really erased by Jerome, though they maintained their place in the mass of Latin copies.

36. Jerome's revision of the Gospels was far more complete than that of the remaining parts of the N. T. It is, indeed, impossible, except in the Gospels, to determine any substantial difference in the Greek texts which are represented by the Old and Hieronymian Versions. Elsewhere the differences, as far as they can be satisfactorily established, are differences of expression and not of text; and there is no sufficient reason to believe that the readings which exist in the best Vulgate MSS., when they are at variance with other Latin authorities, rest upon the deliberate judgment of Jerome. On the contrary, his Commentaries show that he used copies differing widely from the recension which passes under his name, and even expressly condemned as faulty in text or rendering many passages which are undoubtedly part of the Vulgate. Thus in his Commentary on the Galatians he condemns the additions, iii. 1, *veritati non obedire*; v. 21, *homicidia*; and the translations, i. 16, *non acquievi carni et sanguini* (for *non contuli cum carne et sanguine*); v. 9, *medicum fermentum totam massam corrumpit* (for *medicum fermentum totam conspersione fermentat*); v. 11, *evacuatum est* (for *cessavit*); vi. 3, *seipsum (seipse) seducit* (for *mentem suam decipit*). And in the text of the Epistle which he gives there are upwards of fifty readings which differ from the best Vulgate text, of which about ten are improvements (iv. 21; v. 13, 23; vi. 13, 15, 16, &c.), as many more inferior readings (iv. 17, 26, 30, &c.), and the remainder differences of expression: *malis* for *nequam*, *recto pede incedunt* for *rectis ambulanti*, *rumorem* for *sternum*. The same differences are found in his Commentaries on the other Epistles: *ad Ephes.* i. 6; iii. 14; iv. 19; v. 22, 31; *ad Tit.* iii. 15. From this it will be evident that the Vulgate text of the Acts and the Epistles does not represent the critical opinion of Jerome, even in the restricted sense in which this is true of the text of the Gospels. But still there are some readings which may with probability be referred to his revision: Acts xiii. 18, *mores eorum sustinuit* for *nutrit* (*aluit*) *eos*. Rom. xii. 11, *Domino* for *tempori*. Eph. iv. 19, *illuminabit te Christus* for *continget Christum*. Gal. ii. 5, *neque ad horam cessimus* for *ad horam cunctis*. 1 Tim. v. 19, *add. nisi sub duobus aut tribus testibus*.

37. The chief corruptions of the Old Latin consist in the introduction of glosses. These, like the corresponding additions in the *Codex Bezae* (D), are sometimes indications of the venerable antiquity of the source from which it was derived, and seem to carry us back to the time when the evangelic tradition had not yet been wholly superseded by the written Gospels. Such are the interpolations

at Matt. iii. 15; xx. 28; Luke iii. 12 (compare also Luke i. 46; xii. 38); but more frequently they are derived from parallel passages, either by direct transference of the words of another evangelist, or by the reproduction of the substance of them. These interpolations are frequent in the synoptic Gospels; Matt. iii. 3; Mark xvi. 4; Luke i. 29, vi. 10; ix. 43, 50, 54; xi. 2; and occur also in St. John vi. 58, &c. But in St. John the Old Latin more commonly errs by defect than by excess. Thus it omits clauses certainly or probably genuine: iii. 31; iv. 9; v. 36; vi. 23; viii. 58, &c. Sometimes, again, the renderings of the Greek text are free: Luke i. 29; ii. 15; vi. 21. Such variations, however, are rarely likely to mislead. Otherwise the Old Latin text of the Gospels is of the highest value. There are cases where some Latin MSS. combine with one or two other of the most ancient witnesses to support a reading which has been obliterated in the mass of authorities: Luke vi. 1; Mark xvi. 9 ff.; v. 3; and not unfrequently (comp. § 35) it preserves the true text which is lost in the Vulgate: Luke xiii. 19; xiv. 5; xv. 28.

38. But the places where the Old Latin and the Vulgate have separately preserved the true reading are rare, when compared with those in which they combine with other ancient witnesses against the great mass of authorities. Every chapter of the Gospels will furnish instances of this agreement, which is often the more striking because it exists only in the original text of the Vulgate, while the later copies have been corrupted in the same way as the later Greek MSS.: Mark ii. 16; iii. 25 (?); viii. 13, &c.; Rom. vi. 8; xvi. 24, &c. In the first few chapters of St. Matthew, the following may be noticed: i. 18 (*bis*); ii. 18; iii. 10; v. 4, 5, 11, 30, 44, 47; vi. 5, 13; vii. 10, 14, 29; viii. 32 (x. 8), &c. It is useless to multiply examples which occur equally in every part of the N. T.: Luke ii. 14, 40; iv. 2, &c.; John i. 52; iv. 42, 51; v. 16; viii. 59; xiv. 17, &c.; Acts ii. 30, 31, 37, &c.; 1 Cor. i. 1, 15, 22, 27, &c. On the other hand, there are passages (comp. § 35) in which the Latin authorities combine in giving a false reading: Matt. vi. 15; vii. 10; viii. 28 (?), &c.; Luke iv. 17; xiii. 23, 27, 31, &c.; Acts iii. 20, &c.; 1 Tim. iii. 16, &c. But these are comparatively few, and commonly marked by the absence of all Eastern corroborative evidence. It may be impossible to lay down definite laws for the separation of readings which are due to free rendering, or carelessness, or glosses, but in practice there is little difficulty in distinguishing the variations which are due to the idiosyncrasy (so to speak) of the Version from those which contain real traces of the original text. And when every allowance has been made for the rudeness of the original Latin, and the haste of Jerome's revision, it can scarcely be denied that the Vulgate is not only the most venerable but also the most precious monument of Latin Christianity. For ten centuries it preserved in Western Europe a text of Holy Scripture far purer than that which was current in the Byzantine Church; and at the revival of Greek learning, guided the way towards a revision of the late Greek text, in which the best biblical critics have followed the steps of Bentley, with ever-deepening conviction of the supreme importance of the coincidence of the earliest Greek and Latin authorities.

39. Of the *interpretative* value of the Vulgate little need be said. There can be no doubt that in dealing with the N. T., at least, we are now

in possession of means infinitely more varied and better suited to the right elucidation of the text than could have been enjoyed by the original African translators. It is a false humility to rate as nothing the inheritance of ages. If the investigation of the laws of language, the clear perception of principles of grammar, the accurate investigation of words, the minute comparison of ancient texts, the wide study of antiquity, the long lessons of experience, have contributed nothing towards a fuller understanding of Holy Scripture, all trust in Divine Providence is gone. If we are not in this respect far in advance of the simple peasant or half-trained scholar of North Africa, or even of the laborious student of Bethlehem, we have proved false to their example, and dishonour them by our indolence. It would be a thankless task to quote instances where the Latin Version renders the Greek incorrectly. Such faults arise most commonly from a servile adherence to the exact words of the original, and thus that which is an error in rendering proves a fresh evidence of the scrupulous care with which the translator generally followed the text before him. But while the interpreter of the N. T. will be fully justified in setting aside without scruple the authority of early versions, there are sometimes ambiguous passages in which a version may preserve the traditional sense (John i. 3, 9, viii. 25, &c.) or indicate an early difference of translation; and then its evidence may be of the highest value. But even here the judgment must be free. Versions supply authority for the text, and opinion only for the rendering.

VIII. THE LANGUAGE OF THE LATIN VERSIONS. — 40. The characteristics of Christian Latinity have been most unaccountably neglected by lexicographers and grammarians. It is, indeed, only lately that the full importance of provincial dialects in the history of languages has been fully recognised, and it may be hoped that the writings of Tertullian, Arnobius, and the African Fathers generally, will now at length receive the attention which they justly claim. But it is necessary to go back one step further, and to seek in the remains of the Old Latin Bible the earliest and the purest traces of the popular idioms of African Latin. It is easy to trace in the patristic writings the powerful influence of this venerable Version; and, on the other hand, the Version itself exhibits numerous peculiarities which were evidently borrowed from the current dialect. Generally it is necessary to distinguish two distinct elements both in the Latin Version and in subsequent writings: (1) Provincialisms and (2) Graecisms. The former are chiefly of interest as illustrating the history of the Latin language; the latter as marking, in some degree, its power of expansion. Only a few remarks on each of these heads, which may help to guide inquiry, can be offered here; but the careful reading of some chapters of the Old Version (e. g. Psalms, Ecclesi., Wisdom, in the modern Vulgate) will supply numerous illustrations.¹

(1.) *Provincialisms*. — 41. One of the most interesting facts in regard to the language of the Latin Version is the reappearance in it of early forms which are found in Plautus or noted as

archaisms by grammarians. These establish in a signal manner the vitality of the popular as distinguished from the literary idiom, and, from the great scarcity of memorials of the Italian dialects, possess a peculiar value. Examples of words, forms, and constructions will show the extent to which this phenomenon prevails.

(a) *Words*:

Stultiloquium, *multiloquium*, *conuloprus* (Plautus); *stabilimentum* (id.); *datus* (subst. id.); *condignus* (id.); *aratuscula* (id.); *versipellis* (id.); *auratus* (id.); *stactis* (id.); *cordatus* (Ennius); *custoditio* (Festus); *decipula*, *depro* (Plautus); *exenhero* (id.); *scius* (l'ac.) *mino* (to drive, Festus).

(B) *Forms*:

Deponents as Passive: *consolor*, *hortor*, *promoveor* (Heb. xiii. 16); *ministro*. Irregular inflections: *partibor* *abscopus* conversely, *erics*, &c. *tapetis* (Plautus), *huc* (fem. pl.) Unusual forms: *pascua* (fem.); *numm* (masc.); *sal* (neut.); *retis* (sing.); *certor*, *odio*, *cornum*, *placor* (subst.). *dulcor*.

(γ) *Constructions*:

Emigro with acc. (Ps. lxi. 7, *emigrabit de tabernaculo*); *dominor* with gen.; *noceo* with acc.; *suus* for *ejus*, &c.; *non* for *ne* prohibitive; *capet* Imperis.

42. In addition to these there are many other peculiarities which evidently belong to the African (or common) dialect, and not merely to the Christian form of it. Such are the words *minorare*, *minoratio*, *improperium*, *franca* (a sword), *ablactatio*, *annualis*, *alleviare*, *pectusculum*, *antennarum*, *pustifloa*, *paratura*, *tortura*, *tribulare* (met.), *tribulatio*, *valefacere*, *veredarius*, *viare*, *victualia*, *viretum* (viretum), *vilulamen*, *volutilia* (subst.), *quaternus*, *rectinatorum*, *scutinium*, *sponsare*, *strabus* (subst.), *sufferentia*, *sufficiens*, *superabundantia*, *suadentia*, *cartallus*, *cassidie*, *collectanum*, *consulcare*, *genimen*, *grossitudo*, *refectio* (carduus), *extermium*, *defunctio* (decease), *substantia* (ala), *incolatus*.

New verbs are formed from adjectives: *passinare*, *proxinare*, *approxinare*, *assiduare*, *pigrari*, *salvare* (*salvator*, *salvatio*), *obviare*, *jucundare*, and especially a large class in *-ficio*: *mortifico*, *vifico*, *sanctifico*, *glorifico*, *clarifico*, *beatifico*, *castifico*, *gratifico*, *fructifico*.

Other verbs worthy of notice are: *appropriare*, *appretiare*, *tenebrare*, *indulcare*, *implorare* (plānus), *manicare*.

In this class may be reckoned also many

(1) New substantives derived from adjectives: *possibilitas*, *praeclaritas*, *paternitas*, *praescientia*, *religiositas*, *natiuitas*, *superacuitas*, *magnanimitas*, or verbs: *requiescit*, *respectio*, *creatura*, *sublatio*, *extollentia*.

(2) New verbals: *accessibilis*, *acceptabilis*, *ambibilis*, *productibilis*, *passibilis*, *receptibilis*, *reprehensibilis*, *suadibilis*, *subjectibilis*, *arrepitibilis*; and participial forms: *pidoratus*, *angustatus*, *timoratus*, *sensatus*, *disciplinatus*, *magnatus*, *linguatus*.

¹ Card. Wiseman (*Two Letters*, &c., republished in *Reprints*, i. pp. 46-64) has examined this subject in some detail, and the writer has fully availed himself of his expositions, in addition to those which he had himself col-

lected. The *Thesaurus* of Faber (ed. 1749) is the most complete for Ecclesiastical Latin; and Darius's Concordance is, as far as the writer has observed, complete for the authorised Clementine text.

(3) New adjectives: *animusqueus*, *temporaneus*, *venustus*, *querulosus*; and adverbs, *terribiliter*, *vaninior*, *spiritualiter*, *cognoscibiliter*, *fiducialiter*.

The series of negative compounds is peculiarly worthy of notice: *inmemoratio*, *increditiō*, *inconsummatio*; *inhonorare*; *incausiliatus*, *indeficiens*, *inconfundibilis*, *importabilis*.

Among the characteristics of the late stage of a language must be reckoned the excessive frequency of compounds, especially formed with the prepositions. These are peculiarly abundant in the Latin Version, but in many cases it is difficult to determine whether they are not direct translations of the late LXX. forms, and not independent forms: e. g. *adlocinare*, *adinvicere*, *adincrescere*, *pereffluere*, *permandare*, *propurgare*, *superexaltare*, *superinvalere*, *supererogare*, *reinvolare*, *rememoratio*, *reproptitiari*, *subinferre*. Of these many are the direct representatives of Greek words: *superaddita* (1 Cor. vii. 36), *supereminare* (Matt. xiii. 25), *comparticipes*, *concupiscentes*, *complamatus*, &c. (*supersubstantialis*, Matt. vi. 11); and others are formed to express distinct ideas: *suboneriticius*, *subnervare*, &c.¹¹

(2.) *Graecisms*.—43. The "simplicity" of the Old Version necessarily led to the introduction of very numerous Septuagintal or N. T. forms, many of which have now passed into common use. In this respect it would be easy to point out the difference which exists between Jerome's own work and the original translation, or his revision of it. Examples of Greek words are: *zelare*, *perizoma*, *pythion*, *pythonissa*, *proselytus*, *prophetes* -*tissa* -*tisare* -*tare*, *poderis*, *pompatica*, *thesaurizare*, *anathematizare*, *agonizare*, *agonia*, *aromatizare*, *angelus* -*icus*, *peribolus*, *pistionis*, *probatia*, *papyrio*, *pastophoria*, *telonium*, *eucharis*, *acharis*, *romphaea*, *bravium*, *dithalamus*, *doma* (*thronus*), *thymiatarium*, *tristega*, *scandalum*, *sitaricia*, *blasphemare*, &c., besides the purely technical terms: *patriarcha*, *Paraclete*, *Pascha*, *Paradoctus*. Other words based on the Greek are: *aporior*, *angario*, *apostatatare*, *apostolatus*, *aosior* (*ἀσσία*).

Some close renderings are interesting: *amado* (*ἀντὶ τούτου*), *propitiatorum* (*ἱλαστήριον*), *indignum* (*ἀντὶ τοῦ αἵματος*), *rationalis* (*λογικός*, Ex. xxviii. 15, &c.), *seconfactorius* (Acts xviii. 3), *seminivertibus* (Acts xvii. 18), *subintroductus* (Gal. ii. 4), *supercentari* (Jude 3), *civilis* (Acts xvii. 28), *intimator malorum* (Jam. i. 18). To this head also must be referred such constructions as *zelare* with *accus.* (*ἐπὶ τινι*); *fuere* with *inf.* (*πρῶτον . . . γυνεσθαι*); *potestas* with *inf.* (*ἐξουσία ἀφείναι*); the use of the *inf.* to express an end (Acts vii. 43, *ἐπιφέρει προσηκουσιν*) or a result (Luke i. 25, *ἐπὶ τὸν ἀφελῶν, respondeat auferre*); the introduction of *quia* for *ἵνα* in the sense of *that* (Luke i. 58, *audierunt . . . quia*), or for *ἵνα* *recitationum* (Matt. vii. 23, *Confitebor illis quia . . .*); the dat. with *amiqui* (Luke i. 3, *παρὰ πολλοῦ* V. L.); the use of the *gen.* with the comparative (John i. 50, *maiora horum*); and such Hebraisms as *vir cordis* (1 K. ii. 26). Comp. § 11.

Generally it may be observed that the Vulgate Latin bears traces of a threefold influence derived

from the original text; and the modifications of form which are capable of being carried back to this source, occur yet more largely in modern languages, whether in this case they are to be referred to the plastic power of the Vulgate on the popular dialect, or, as is more likely, we must suppose that the Vulgate has preserved a distinct record of powers which were widely working in the times of the Empire on the common Latin. These are (1) an extension of the use of prepositions for simple cases, e. g. in the renderings of *ἐν*, Col. iii. 17, *facere ἐν verbo*, &c.; (2) an assimilation of pronouns to the meaning of the Greek article, e. g. 1 John i. 2, *ipsa vita*; Luke xiv. 9, *illis undecim*, &c.; and (3) a constant employment of the definitive and epithetic genitive, where classical usage would have required an adjective, e. g. Col. i. 13, *filius caritatis suae*; iii. 12, *viscera misericordiae*.

44. The peculiarities which have been enumerated are found in greater or less frequency throughout the Vulgate. It is natural that they should be most abundant and striking in the parts which have been preserved least changed from the Old Latin, the Apocrypha, the Acts, Epistles, and Apocalypse. Jerome, who, as he often says, had spent many years in the schools of grammarians and rhetoricians, could not fail to soften down many of the asperities of the earlier version, either by adopting variations already in partial use, or by correcting faulty expressions himself as he revised the text. An examination of a few chapters in the Old and New Versions of the Gospels will show the character and extent of the changes which he ventured to introduce:—Luke i. 60, *ὅχι, non*, Vet. L. *nequaquam*, Vulg.; id. 65, *ἐν δὲ τῇ ὁρατῇ, in omni montana*, Vet. L. *super omnia montana*, Vulg.; ii. 1, *profiteretur, confessio*, Vet. L. *describeretur, descriptio*, Vulg.; id. 13, *exercitus caelestis*, Vet. L. *militiae caelestis*, Vulg.; id. 34, *quod contradicetur*, Vet. L. *cui contr.* Vulg.; id. 49, *in propria Patris mei*, Vet. L. *in his quas patris mei sunt*, Vulg. Some words he seems to have changed constantly, though not universally: e. g. *obauditiō*, *obaudio* (*obedientia*, *obedio*); *mensurare* (*metiri*); *dilectio* (*caritas*); *sacramentum* (*mysterium*), &c. And many of the most remarkable forms are confined to books which he did not revise: *ehucidare*, *inultare* (*jucundari*); *fumigabundus*, *illamentatus*, *indisciplinatus*, *inuspiciabilis*; *exsecrumentum* (*extermium*), *gaidimonium*; *extollentia*, *honorificentia*; *horripilatio*, *inhonoratio*.

45. Generally it may be said that the Scriptural idioms of our common language have come to us mainly through the Latin; and in a wider view the Vulgate is the connecting link between classical and modern languages. It contains elements which belong to the earliest stage of Latin, and exhibits (if often in a rude form) the flexibility of the popular dialect. On the other hand, it has furnished the source and the model for a large portion of current Latin derivatives. Even a cursory examination of the characteristic words which have been given will show how many of them, and how many corresponding forms, have passed into living languages.¹²

¹¹ It would be interesting to trace the many striking parallels between the Vulgate and the African Apocrypha (e. g. *incredibilis* (act.), *inffugibilis*, *molatere*, &c.), or the Spanish Seneca (e. g. *inquietudo*, *impunitus*, &c.).

¹² Probably the most remarkable example of the in-

fluence of theology upon popular language, is the entire suppression of the correlatives of *rebus* to all the Romance languages. The forms occur in the religious technical sense (the Word), but otherwise they are replaced by the representatives of *parabola* (*parola*, *parole* &c.). Compare Dies, *Etym. W676*. 253.

To follow out this question in detail would be out of place here; but it would furnish a chapter in the history of language fruitful in results and hitherto cowritten. Within a more limited range, the authority of the Latin Versions is undeniable, though its extent is rarely realised. The vast power which they have had in determining the theological terms of Western Christendom can hardly be overrated. By far the greater part of the current doctrinal terminology is based on the Vulgate, and, as far as can be ascertained, was originated in the Latin Version. *Predestination, justification, supererogation (supererogo), sanctification, salvation, mediator, regeneration, revelation, visitation (met.), propitiation*, first appear in the Old Vulgate. *Grace, redemption, election, reconciliation, satisfaction, inspiration, scripture*, were devoted there to a new and holy use. *Sacrament (μυστήριον)* and *communion* are from the same source; and though *baptism* is Greek, it comes to us from the Latin. It would be easy to extend the list by the addition of *orders, penance, congregation, priest*. But it can be seen from the forms already brought forward that the Latin Versions have left their mark both upon our language and upon our thoughts; and if the right method of controversy is based upon a clear historical perception of the force of words, it is evident that the study of the Vulgate, however much neglected, can never be neglected with impunity. It was the Version which alone they knew who handed down to the Reformers the rich stores of mediæval wisdom; the Version with which the greatest of the Reformers were most familiar, and from which they had drawn their earliest knowledge of Divine truth. [B. F. W.]

VULTURE. The rendering in A. V. of the Heb. *אֵיָא* (*dayyâh*) and *אֵיָא*; and also in Job xxviii. 7, of *אֵיָא*, *ayyâh*; elsewhere, in Lev. xi. 14, and Deut. xiv. 13, more correctly rendered "kite;" LXX. *γύψ* and *τεύρας*, Vulg. *vultur*; except in Is. xxiv. 15, where LXX. read *ελαφος*, and Vulg. correctly *milvus*.

There seems no doubt but that the A. V. translation is incorrect, and that the original words refer to some of the smaller species of raptorial birds, as kites or buzzards. *אֵיָא* is evidently synonymous with Arab. *شحية*, *h'dayah*, the vernacular for the "kite" in North Africa, and without the epithet "red" for the black kite especially. Bochart (*Hieroz.* ii. 2, 195) explains it *Vultur niger*. The Samaritan and all other Eastern Versions agree in rendering it "kite." *אֵיָא* (*ayyâh*) is yet more certainly referable to this bird, which in other passages it is taken to represent. Bochart (*Hieroz.* ii. b. 2, c. 8, p. 193) says it is the same bird which the Arabs call *يَايَا* (*yaya*) from its cry; but does not state what species this is, supposing it apparently to be the magpie, the Arab name for which, however, is *العقباق*, *el agaag*.

There are two very different species of bird comprised under the English term vulture: the griffon (*Gyps fulvus*, Sav.), Arab. *نسر*, *nasser*; Heb. *נֶשֶׁר*, *nasher*; invariably rendered "eagle" by A. V.; and the *percepter*, or Egyptian vulture (*Neophron percnopterus*, Sav.), Arab. *رحمة*, *rahma*; Heb. *דולד*, *doldar*; rendered "gier-eagle" by A. V.

The identity of the Hebrew and Arabic terms in these cases can scarcely be questioned. However degrading the substitution of the ignoble vulture for the royal eagle may at first sight appear in many passages, it must be borne in mind that the griffon is in all its movements and characteristics a majestic and royal bird, the largest and most powerful which is seen on the wing in Palestine, and far surpassing the eagle in size and power. Its only rival in these respects is the Bearded Vulture or Lammergeyer, a more uncommon bird everywhere, and which, since it is not, like the griffon, bald on the head and neck, cannot be referred to as *nasher* (see Mic. i. 16). Very different is the slovenly and cowardly Egyptian vulture, the familiar scavenger of all Oriental towns and villages, protected for its useful habits, but loathed and despised, till its name has become a term of reproach like that of the dog or the swine.

If we take the Heb. *ayyâh* to refer to the red kite (*milvus regalis*, Temm.), and *dayyâh* to the black kite (*milvus ater*, Temm.), we shall find the piercing sight of the former referred to by Job (xxviii. 7), and the gregarious habits of the latter by Isaiah (xxiv. 15). Both species are inhabitants of Palestine, the red kite being found all over the country, as formerly in England, but nowhere in great numbers, generally soaring at a great height over the plains, according to Dr. Roth, and apparently leaving the country in winter. The black kite, which is so numerous everywhere as to be gregarious, may be seen at all times of the year, hovering over the villages and the outskirts of towns, on the look-out for offal and garbage, which are its favourite food. Vulture-like, it seldom, unless pressed by hunger, attacks living animals. It is therefore never molested by the natives, and builds its nest on trees in their neighbourhood, fantastically decorating it with as many rags of coloured cloth as it can collect.

There are three species of vulture known to inhabit Palestine:—

1. The Lammergeyer (*Gypstos barbatus*, Cuv.), which is rare everywhere, and only found in desolate mountain regions, where it rears its young in the depth of winter among inaccessible precipices. It is looked upon by the Arabs as an eagle rather than a vulture.

2. The Griffon (*Gyps fulvus*, Sav.), mentioned above, remarkable for its power of vision and the great height at which it soars. Aristotle (*Anim. Hist.* vi. 5) notices the manner in which the griffon scents its prey from afar, and congregates in the wake of an army. The same singular instinct was remarked in the Russian war, when vast numbers of this vulture were collected in the Crimea, and remained till the end of the campaign in the neighbourhood of the camp, although previously they had been scarcely known in the country. "Where-soever the carcass is, there will the eagles be gathered together" (Matt. xxiv. 28); "Where the slain are, there is she" (Job xxxix. 30). The writer observed this bird universally distributed in all the mountainous and rocky districts of Palestine, and especially abundant in the south-east. Its favourite breeding-places are between Jerusalem and Jericho, and all round the Dead Sea.

The third species is the Egyptian vulture (*Neophron percnopterus*, Sav.), often called *l'harak* by the hen, observed in Palestine by Hasselquist and subsequent travellers, and very numerous everywhere. Two other species of very large size, the

sared and cinereous vultures (*Vultur nubicus*, Smith, and *Vultur cinereus*, L.), although inhabitants of the neighbouring countries, and probably also of the south-east of Palestine, have not yet been noted in collections from that country. [H. B. T.]

W

WAGES. The earliest mention of wages is of a recompense not in money but in kind, to Jacob from Laban (Gen. xxix. 15, 20, xxx. 28, xxxi. 7, 8, 41). This usage was only natural among a pastoral and changing population like that of the tent-dwellers of Syria. In Egypt, money payments by way of wages were in use, but the terms cannot now be ascertained (Ex. ii. 9). The only mention of the rate of wages in Scripture is found in the parable of the householder and vineyard (Matt. xx. 2), where the labourer's wages are set at one denarius per day, probably = $\frac{7}{8}d.$, a rate which agrees with Tobit v. 14, where a drachma is mentioned as the rate per day, a sum which may be fairly taken as equivalent to the denarius, and to the usual pay of a soldier (ten *asses* per diem) in the later days of the Roman republic (Tac. Ann. i. 17; Polyb. vi. 39). It was perhaps the traditional remembrance of this sum as a day's wages that suggested the mention of "drachmas wrung from the hard hands of peasants" (Shakespeare, *Jul. Cæs.* iv. 3). In earlier times it is probable that the rate was lower, as until lately it was throughout India. In Scotland we know that in the last century a labourer's daily wages did not exceed sixpence (Smiles, *Lives of Engineers*, ii. 96). But it is likely that labourers, and also soldiers, were supplied with provisions (Michaelis, *Laws of Moses*, §130, vol. ii. p. 190, ed. Smith), as is intimated by the word *δράματα*, used in Luke iii. 14, and 1 Cor. ix. 7, and also by Polybius, vi. 39. The Mishnah (*Baba metzia*, vii. 1, §5), speaks of victuals being allowed or not according to the custom of the place, up to the value of a denarius, i.e. inclusive of the pay.

The Law was very strict in requiring daily payment of wages (Lev. xix. 13; Deut. xxiv. 14, 15); and the Mishnah applies the same rule to the use of animals (*Baba metzia*, ix. 12). The employer who refused to give his labourers sufficient victuals is censured (Job xxiv. 11), and the iniquity of withholding wages is denounced (Jer. xxii. 13; Mal. iii. 5; James v. 4).

Wages in general, whether of soldiers or labourers, are mentioned (Hag. i. 6; Ez. xxi. 18, 19; John iv. 36). Burckhardt mentions a case in Syria resembling closely that of Jacob with Laban—a man who served eight years for his food, on condition of obtaining his master's daughter in marriage, and was afterwards compelled by his father-in-law to perform acts of service for him (*Syria*, p. 297). [H. W. P.]

^a 1. שָׂכָר, מְשָׁכָר; *μισθός*; *merces*.

2. מְעָלָה; *μισθός*; *opus*; wages for work done, from מַעַל, "work" (Gen. p. 1117).

^b 1. מְשָׁכָר; *χορηγία*; *merci*; only in Ez. v. 2.

2. (a) מְשָׁכָר; *μισθός*; *μασούρα*. (b) מְשָׁכָר; *μισθός*; *μασούρα*. (c) מְשָׁכָר; *μισθός*; *μασούρα*.

3. מְשָׁכָר; *μισθός*; *merces*.

WAGGON. [CART and 'NARHUT.] The Oriental waggon or *arabak* is a vehicle composed of two or three planks fixed on two solid circular blocks of wood, from two to five feet in diameter, which serve as wheels. To the floor are sometimes attached wings, which splay outwards like the side of a wheelbarrow. For the conveyance of passengers, mattresses or clothes are laid in the bottom, and the vehicle is drawn by buffaloes or oxen (Arundell, *Asia Minor*, ii. 191, 235, 238; Olearius, *Trav.* p. 309; Ker Porter, *Trav.* ii. 533.) Egyptian carts or waggons, such as were sent to convoy Jacob (Gen. xlv. 19, 21, 27), are described under CART. The covered waggons for conveying the materials of the tabernacle were probably constructed on Egyptian models. They were each drawn by two oxen (Num. vii. 3, 8). Herodotus mentions a four-wheeled Egyptian vehicle (*ἀμαξα*) used for sacred purposes (Her. ii. 63). [H. W. P.]

WALLS. Only a few points need be noticed in addition to what has been said elsewhere on wall-construction, whether in brick, stone, or wood. [BRICKS; HANDICRAFT; MORTAR.] 1. The practice common in Palestine of carrying foundations down to the solid rock, as in the case of the Temple, and in the present day with structures intended to be permanent (Joseph. *Ant.* xv. 11, §3; Luke vi. 48; Robinson, ii. 338; *Col. Ch. Chron.* (1857), p. 459). The pains taken by the ancient builders to make good the foundations of their work may still be seen, both in the existing substructions and in the number of old stones used in more modern constructions. Some of these stones—ancient, but of uncertain date—are from 20 feet to 30 feet 10 inches long, 3 feet to 6 feet 6 inches broad, and 5 feet to 7 feet 8 inches thick (Rob. i. 233, 282, 286, iii. 228). As is the case in numberless instances of Syrian buildings, either old or built of old materials, the edges and sometimes the faces of these stones are "bevelled" in flat grooves. This is commonly supposed to indicate work at least as old as the Roman period (Rob. i. 261, 286, ii. 75, 76, 278, 353, iii. 52, 58, 84, 229, 461, 493, 511; Fergusson, *Hdbk. of Arch.* p. 288). On the contrary side, see *Col. Ch. Chron.* (1858), p. 350.

But the great size of these stones is far exceeded by some of those at Baalbek, three of which are each about 63 feet long; and one, still lying in the quarry, measures 68 feet 4 inches in length, 17 feet 2 inches broad, and 14 feet 7 inches thick. Its weight can scarcely be less than 600 tons (Rob. iii. 505, 512; Volney, *Trav.* ii. 241).

2. A feature of some parts of Solomon's buildings, as described by Josephus, corresponds remarkably to the method adopted at Nineveh of encrusting or veneering a wall of brick or stone with slabs of a more costly material, as marble or alabaster (Joseph. *Ant.* viii. 5, §2; Fergusson, *Hdbk.* 202, 203).

3. Another use of walls in Palestine is to support mountain roads or terraces formed on the side

4. חֵיל; *δύναμις*; *virtus*; also *παραίχματα*; *agui*.

5. פָּרִיס and פָּרִיס; *παρίεις*; *paries*.

6. פָּרִיס; *παρίεις*; *paries*; only in Dan. ix. 26.

7. (a) פָּרִיס; (b) פָּרִיס; Chald. *paries*; *paries*.

8. פָּרִיס; *παρίεις*; *paries*.

9. פָּרִיס; *παρίεις*; *paries*.

of hills for purposes of cultivation (Job. ii. 493, iii. 14, 45).

4. The "path of the vineyards" (Num. xxii. 24) is illustrated by Robinson as a pathway through vineyards, with walls on each side (*B. R.* ii. 80; Stanley, *S. and P.* 102, 420; Lindsay, *Trav.* p. 289; Maundrell, *Early Trav.* p. 437). [WINDOW.] [H.W.P.]

WANDERING IN THE WILDERNESS. [WILDERNESS OF WANDERING.]

WAR. The most important topic in connexion with war is the formation of the army, which is destined to carry it on. This has been already described under the head of **ARMY**, and we shall therefore take up the subject from the point where that article leaves it. Before entering on a war of aggression the Hebrews sought for the Divine sanction by consulting either the Urim and Thummim (Judg. i. 1, xx. 27, 28; 1 Sam. xiv. 37, xxiii. 2, xxviii. 6, xxx. 8), or some acknowledged prophet (1 K. xxii. 6; 2 Chr. xviii. 5). The heathens betook themselves to various kinds of divination for the same purpose (Ex. xxi. 21). Divine aid was further sought in actual warfare by bringing into the field the Ark of the Covenant, which was the symbol of Jehovah Himself (1 Sam. iv. 4-18, xiv. 18), a custom which prevailed certainly down to David's time (2 Sam. xi. 11; comp. Ps. lxxviii. 1, 24). During the wanderings in the wilderness the signal for warlike preparations was sounded by priests with the silver trumpets of the sanctuary (Num. x. 9, xxxi. 6). Formal proclamations of war were not interchanged between the belligerents; but occasionally messages either deprecatory or defiant were sent, as in the cases of Jephthah and the Ammonites (Judg. xi. 12-27), Ben-hadad and Ahab (1 K. xx. 2), and again Amaziah and Jehoash (2 K. xiv. 8). Before entering the enemy's district spies were sent to ascertain the character of the country and the preparations of its inhabitants for resistance (Num. xiii. 17; Josh. ii. 1; Judg. vii. 10; 1 Sam. xxvi. 4). When an engagement was imminent a sacrifice was offered (1 Sam. vii. 9, xiii. 9), and an inspiring address delivered either by the commander (2 Chr. xx. 20) or by a priest (Deut. xx. 2). Then followed the battle-signal, sounded forth from the silver trumpets as already described, to which the host responded by shouting the war-cry (1 Sam. xvii. 52; Is. xlii. 13; Jer. i. 42; Ex. xxi. 22; Am. i. 14). The combat assumed the form of a number of hand-to-hand contests, depending on the qualities of the individual soldier rather than on the disposition of masses. Hence the high value attached to fleetness of foot and strength of arm (2 Sam. i. 23, ii. 18; 1 Chr. xii. 8). At the same time various strategic devices were practised, such as the ambuscade (Josh. viii. 2, 15; Judg. xx. 36), surprise (Judg. vii. 16), or

circumvention (2 Sam. v. 23). Another mode of settling the dispute was by the selection of champions (1 Sam. xvii.; 2 Sam. ii. 14), who were spurred on to assertion by the offer of high reward (1 Sam. xvii. 25, xviii. 25; 2 Sam. xviii. 11; 1 Chr. xi. 6). The contest having been decided, the conquerors were recalled from the pursuit by the sound of a trumpet (2 Sam. ii. 28, xviii. 16, xx. 27).

The siege of a town or fortress was conducted in the following manner:—A line of circumvallation^a was drawn round the place (Ex. iv. 2; Mic. v. 1), constructed out of the trees found in the neighbourhood (Deut. xx. 20), together with earth and any other materials at hand. This line not only cut off the besieged from the surrounding country, but also served as a base of operations for the besiegers. The next step was to throw out from this line one or more "mounds" or "banks"^b in the direction of the city (2 Sam. xx. 15; 2 K. xix. 32; Is. xxxvii. 33), which was gradually increased in height until it was about half as high as the city wall. On this mound or bank towers^c were erected (2 K. xxv. 1; Jer. lii. 4; Ex. iv. 2, xvii. 17, xxi. 22, xxvi. 8), whence the slingers and archers might attack with effect. Battering-rams^d (Ex. iv. 2, xxi. 22) were brought up to the walls by means of the bank, and scaling-ladders might also be placed on it. Undermining the walls, though practised by the Assyrians (Layard, *Nim.* ii. 371), is not noticed in the Bible: the reference to it in the LXX. and Vulg., in Jer. li. 58, is not warranted by the original text. Sometimes, however, the walls were attacked near the foundation, either by individual warriors who protected themselves from above by their shields (Ex. xxvi. 8), or by the further use of such a machine as the *Helepolis*,^e referred to in 1 Macc. xiii. 43. Burning the gates was another mode of obtaining ingress (Judg. ix. 52). The water-supply would naturally be cut off, if it were possible (Jud. vii. 7). The besieged, meanwhile, strengthened and repaired their fortifications (Is. xxii. 10), and repelled the enemy from the wall by missiles (2 Sam. xi. 24), by throwing over beams and heavy stones (Judg. ix. 53; 2 Sam. xi. 21; Joseph. *B. J.* v. 3, §3, 6, §3), by pouring down boiling oil (*B. J.* iii. 7, §28), or lastly by erecting fixed engines for the propulsion of stones and arrows (2 Chr. xxvi. 15). [ENGINE.] Sallies were also made for the purpose of burning the besiegers' works (1 Macc. vi. 31; *B. J.* v. 11, §4), and driving them away from the neighbourhood. The foregoing operations receive a large amount of illustration from the representations of such scenes on the Assyrian slabs. We there see the "bank" thrown up in the form of an inclined plane, with the battering-ram hauled up on it resuming the walls: moveable towers of considerable elevation brought up, whence the warriors discharge their

^a מַחְצוֹת, lit. an "enclosing" or "besieging," and hence applied to the wall by which the siege was effected.

^b מְצָדִים. Saalschütz (*Archäol.* ii. 504) understands this term of the scaling-ladder, comparing the cognate *sullān* Gen. xxviii. 12, and giving the verb *shāpāc*, which accompanies *sullān*, the sense of a "hurried advancing" of the ladder.

^c מִגְדָּלִים. Some doubt exists as to the meaning of this term. The sense of "turrets" assigned to it by Gesenius (*Thes.* p. 336) has been objected to on the ground that the word always appears in the singular number, and in connexion with the expression "round about" the city. Hence the sense of "circumvallation" has

been assigned to it by Michaelis, Keil (*Archäol.* ii. 308) and others. It is difficult, however, in this case, to see any distinction between the terms *daysh* and *meish*. The expression "round about" may refer to the custom of casting up banks at different points: the use of the singular in a collective sense forms a greater difficulty.

^d מַרְמָטָה

^e This is described by Ammianus Marcellinus (xxii. 4 §10) as a combination of the *testudo* and the battering ram, by means of which the besiegers broke through the lower part of the wall, and thus "leaped into the city," not from above, as the words *gravis facit impetum*, *sed* from below.

arrows into the city: the walls undermined, or attempts made to destroy them: by picking up pieces the lower courses: the defenders actively engaged in archery, and averting the force of the battering-ram by chains and ropes: the scaling-ladders at length brought, and the conflict become hand-to-hand (Layard's *Nim.* ii. 366-374).

The treatment of the conquered was extremely severe in ancient times. The leaders of the host were put to death (Josh. x. 26; Judg. vii. 25), with the occasional indignity of decapitation after death (1 Sam. xvii. 51; 2 Macc. xv. 30; Joseph. *B. J.* i. 17, §2). The bodies of the soldiers killed in action were plundered (1 Sam. xxxi. 8; 2 Macc. xiii. 27): the survivors were either killed in some savage manner (Judg. ix. 45; 2 Sam. xii. 31; 2 Chr. xxv. 12), mutilated (Judg. i. 6; 1 Sam. xi. 2), or carried into captivity (Num. xxxi. 26; Deut. xx. 14). Women and children were occasionally put to death with the greatest barbarity (2 K. viii. 12, xv. 16; Is. xlii. 16, 18; Hos. x. 14, xlii. 16; Am. i. 13; Nah. iii. 10; 2 Macc. v. 13): but it was more usual to retain the maidens as concubines or servants (Judg. v. 30; 2 K. v. 2). Sometimes the bulk of the population of the conquered country was removed to a distant locality, as in the case of the Israelites when subdued by the Assyrians (2 K. xvii. 6), and of the Jews by the Babylonians (2 K. xxiv. 14, xxv. 11). In addition to these measures, the towns were destroyed (Judg. ix. 45; 2 K. iii. 25; 1 Macc. v. 28, 51, x. 84), the idols and shrines were carried off (Is. xlii. 1, 2), or destroyed (1 Macc. v. 68, x. 84); the fruit-trees were cut down, and the fields spoiled by over-spreading them with stones (2 K. iii. 19, 25); and the horses were lamed (2 Sam. viii. 4; Josh. xi. 6, 9). If the war was carried on simply for the purpose of plunder or supremacy, these extreme measures would hardly be carried into execution; the conqueror would restrict himself to rifling the treasures (1 K. xiv. 26; 2 K. xiv. 14, xiv. 18), or levying contributions (2 K. xviii. 14).

The Mosaic law mitigated to a certain extent the severity of the ancient usages towards the conquered. With the exception of the Canaanites, who were delivered over to the ban of extermination by the express command of God, it was forbidden to the Israelites to put to death any others than males bearing arms: the women and children were to be kept alive (Deut. xx. 13, 14). In a similar spirit of humanity the Jews were prohibited from felling fruit-trees for the purpose of making siege-works (Deut. xx. 19). The law further restricted the power of the conqueror over females, and secured to them humane treatment (Deut. xxi. 10-14). The majority of the savage acts recorded as having been practised by the Jews were either in retaliation for some gross provocation, as in the case of Adoni-bezek (Judg. i. 6, 7), and of David's treatment of the Ammonites (2 Sam. x. 2-4, xii. 31; 1 Chr. xx. 3); or else they were done by lawless usurpers, as in Menahem's treatment of the women of Tiphmah (2 K. xv. 16). The Jewish kings generally appear to have obtained credit for clemency (1 K. x. 31).

The conquerors celebrated their success by the erection of monumental stones (1 Sam. vii. 12; 2 Sam. viii. 13, where, instead of "gat him a name," we should read "set up a memorial"), by hanging up trophies in their public buildings (1 Sam. xxi. 9, xxi. 10; 2 K. xi. 10), and by triumphal songs and dances, in which the whole popu-

lation took part (Ex. xv. 1-21; Judg. v.; 1 Sam. xviii. 6-8; 2 Sam. xxii.; Jud. xvi. 2-17; 1 Macc. iv. 24). The death of a hero was commemorated by a dirge (2 Sam. i. 17-27; 2 Chr. xxv. 25), or by a national mourning (2 Sam. iii. 31). The fallen warriors were duly buried (1 K. xi. 15), their arms being deposited in the grave beside them (Ex. xxxii. 27), while the enemies' corpses were exposed to the beasts of prey (1 Sam. xvii. 44; Jer. xxv. 33). The Israelites were directed to undergo the purification imposed on those who had touched a corpse, before they entered the precincts of the camp or the sanctuary (Num. xxi. 19). The disposal of the spoil has already been described under *BOOTY*. [W. L. B.]

WASHING THE HANDS AND FEET.

The particular attention paid by the Jews to the cleansing of the hands and feet, as compared with other parts of the body, originated in the social usages of the East. As knives and forks were dispensed with in eating, it was absolutely necessary that the hand, which was thrust into the common dish, should be scrupulously clean; and again, as sandals were ineffectual against the dust and heat of an Eastern climate, washing the feet on entering a house was an act both of respect to the company and of refreshment to the traveller. The former of these usages was transformed by the Pharisees of the New Testament age into a matter of ritual observance (Mark vii. 3), and special rules were laid down as to the times and manner of its performance. The neglect of these rules by our Lord and His disciples drew down upon Him the hostility of that sect (Matt. xx. 2; Luke xi. 38). Whether the expression *xygus* used by St. Mark has reference to any special regulation may perhaps be doubtful; the senses "oft" (A. V.), and "diligently" (Alford), have been assigned to it, but it may possibly signify "with the fist," as though it were necessary to close the one hand, which had already been cleansed, before it was applied to the unclean one. This sense appears preferable to the other interpretations of a similar character, such as "up to the wrist" (Lightfoot); "up to the elbow" (Theophylact); "having closed the hand" which is undergoing the washing (Grot.; Scalig.). The Pharisaical regulations on this subject are embodied in a treatise of the Mishnah, entitled *Yadain*, from which it appears that the ablution was confined to the hand (2, §3), and that great care was needed to secure perfect purity in the water used. The ordinary, as distinct from the ceremonial, washing of hands before meals is still universally prevalent in Eastern countries (Lane, i. 190; Burckhardt's *Notes*, i. 63).

Washing the feet did not rise to the dignity of a ritual observance, except in connexion with the services of the sanctuary (Ex. xxx. 19, 21). It held a high place, however, among the rites of hospitality. Immediately that a guest presented himself at the tent-door, it was usual to offer the necessary materials for washing the feet (Gen. xviii. 4, xix. 2, xxiv. 32, xliii. 24; Judg. xix. 21; comp. Hom. *Od.* iv. 49). It was a yet more complimentary act, betokening equally humility and affection, if the host actually performed the office for his guest (1 Sam. xxv. 41; Luke vii. 38, 44; John xiii. 5-14; 1 Tim. v. 10). Such a token of hospitality is still occasionally exhibited in the East, either by the host, or by his deputy (Robinson's *Res.* ii. 229; Jowett's *Res.* pp. 78, 79). The feet were again washed before retiring to bed (Cant. v. 3). A symbolical significance is attached in John

siii. 10 to washing the feet as compared with bathing the whole body, the former being partial (*πάρω*), the latter complete (*λούω*), the former oft-repeated in the course of the day, the latter done once for all; whence they are adduced to illustrate the distinction between occasional sin and a general state of sinfulness. After being washed, the feet were on festive occasions anointed (Luke vii. 38; John xii. 3). The indignity attached to the act of washing another's feet, appears to have been extended to the vessel used (Ps. lx. 8). [W. L. B.]

WATCHES OF NIGHT (מִשְׁמֶרֶת: *φύλαξις*). The Jews, like the Greeks and Romans, divided the night into military watches instead of hours, each watch representing the period for which sentinels or pickets remained on duty. The proper Jewish reckoning recognised only three such watches, entitled the first or "beginning of the watches" (Lam. ii. 19), the middle watch* (Judg. vii. 19), and the morning watch* (Ex. xiv. 24; 1 Sam. xi. 11). These would last respectively from sunset to 10 P.M.; from 10 P.M. to 2 A.M.; and from 2 A.M. to sunrise. It has been contended by Lightfoot (*Hor. Heb.* in Matt. xiv. 25) that the Jews really reckoned four watches, three only of which were in the dead of the night, the fourth being in the morning. This, however, is rendered improbable by the use of the term "middle," and is opposed to Rabbinical authority (Mishnah, *Berach.* i. §1; Kimchi, on Ps. lxxiii. 7; Rashi, on Judg. vii. 19). Subsequently to the establishment of the Roman supremacy, the number of watches was increased to four, which were described either according to their numerical order, as in the case of the "fourth watch" (Matt. xiv. 25; comp. Joseph. *Ant.* v. 6, §5), or by the terms "even, midnight, cock-crowing, and morning" (Mark xiii. 35). These terminated respectively at 9 P.M., midnight, 3 A.M., and 6 A.M. Conformably to this, the guard of soldiers was divided into four relays (Acts xii. 4), showing that the Roman régime was followed in Herod's army. Watchmen appear to have patrolled the streets of the Jewish towns (Cant. iii. 3, v. 7; 1's. cxvii. 1,⁴ where for "waketh" we should substitute "watcheth;" Ps. cxxx. 8). [W. L. B.]

WATER OF JEALOUSY (Num. v. 11-31), מֵי הַמִּסְתָּה, "waters of bitterness," sometimes with *מֵי הַמִּסְתָּה* added, as "causing a curse" (רַב־מֵי הַמִּסְתָּה; Philo, ii. 310, *ὕδατος ἀλεγγου*).

אֲשֶׁר הָיְתָה הַמִּסְתָּה
רַב־מֵי הַמִּסְתָּה

* Yet being an offering to "bring iniquity to remembrance" (v. 16), it is ceremonially rated as a "sin offering;" hence no oil is to be mixed with the meal before burning it, nor any frankincense to be placed upon it when burnt, which same rule was applied to "sin offerings" generally (Lev. v. 11). With meat offerings, on the contrary, the mixture of oil and the imposition of frankincense were prescribed (ii. 1, 2, 7, 14, 15).

† Probably not the "water of separation" for purification, mixed with the ashes of the red heifer, for as its ceremonial property was to defile the pure and to purify the unclean (Num. xix. 21) who touched it, it could hardly be used in a rite the object of which was to establish the innocence of the upright or discover the guilt of the sinner, without the symbolism jarring. Perhaps water from the laver of the sanctuary is intended.

‡ The words נִסְתָּה לְנִסְתָּה, rendered in the A. V. by the word "rot," rather indicate, according to

The ritual prescribed consisted in the husband's bringing the woman before the priest, and the essential part of it is unquestionably the oath to which the "water" was subsidiary, symbolical, and ministerial. With her he was to bring the tenth part of an ephah of barley-meal as an offering. Perhaps the whole is to be regarded from a judicial point of view, and this "offering" in the light of a court-fee.* God Himself was suddenly invoked to judge, and His presence recognised by throwing a handful of the barley-meal on the blazing altar in the course of the rite. In the first instance, however, the priest "set her before the Lord" with the offering in her hand. The Mishnah (*Sotah*) prescribes that she be clothed in black with a rope girdle around her waist; and from the direction that the priest "shall uncover her head" (ver. 18), it would seem she came in veiled, probably also in black. As she stood holding the offering, so the priest stood holding an earthen vessel of holy water[†] mixed with the dust from the floor of the sanctuary, and declaring her free from all evil consequences if innocent, solemnly devoted her in the name of Jehovah to be "a curse and an oath among her people," if guilty, further describing the exact consequences ascribed to the operation of the water in the "members" which she had "yielded as servants to uncleanness" (vers. 21, 22, 27; comp. Rom. vi. 19; and Theodore, *Quæst.* x. in *Nym.*). He then "wrote these curses in a book, and blotted them out with the bitter water," and, having thrown, probably at this stage of the proceedings, the handful of meal on the altar, "caused the woman to drink" the potion thus drugged, she moreover answering to the words of his imprecation, "Amen, Amen." Josephus adds, if the suspicion was unfounded, she obtained conception, if true, she died infamously. This accords with the sacred text, if she "be clean, then shall she be free and shall conceive seed" (ver. 28), words which seem to mean that when restored to her husband's affection she should be blessed with fruitfulness; or, that if conception had taken place before her appearance, it would have its proper issue in child-bearing, which, if she had been unfaithful, would be intercepted by the operation of the curse. It may be supposed that a husband would not be forward to publish his suspicions of his own injury, unless there were symptoms of apparent conception,[‡] and a risk of a child by another being presented to him as his own. In this case

Gesen. s. v. לַעֲנֹת, to "become or make lean." Mitchell thought ovarian dropsy was intended by the symptoms. Josephus says, τοῦ τε σπλάχνου ἐκνεύσεως αὐτῆς, καὶ τῆς κοιλίας ὑδρῶς καταλαμβάνουσας (*Ant.* iii. 11, §6).

* This is somewhat supported by the rendering in the A. V. of the words נִתְּנָה לָהּ לְמִנְחָה, v. 13, by "neither she be taken with the manner," the italicized words being added as explanatory, without any to correspond in the original, and pointing to the sudden creation of "the manner" or "custom of women" (Gen. xviii. 11, xxxi. 35) i. e. the menstrual flux, suggesting, in the case of a woman not past the age of child-bearing, that conception had taken place. If this be the sense of the original, the suspicions of the husband would be so far based upon a fact. It seems, however, also possible that the words may be an extension of the sense of those immediately preceding, מִיָּד לְיָד, when the connected tenour would be, "and there be no witness against her, and she be not taken," i. e. taken in the fact: comp. John viii. 4, αὐτὴν ἡ γυνὴ καταλάβει καὶ καταστήσῃ αὐτὴν ἑαυτῆς.

the woman's natural apprehensions regarding her own gestation would operate very strongly to make her shrink from the potion, if guilty. For plainly, the effect of such a ceremonial on the nervous system of one so circumstanced, might easily go far to imperil her life, even without the precise symptoms ascribed to the water. Meanwhile the rule would operate beneficially for the woman, if innocent, who would be during this interval under the protection of the court to which the husband had himself appealed, and so far secure against any violent consequence of his jealousy, which had thus found a vent recognized by law. Further, by thus interposing a period of probation the fierceness of conjugal jealousy might cool. On comparing this argument with the further restrictions laid down in the treatise *Sotah* tending to limit the application of this rite, there seems grave reason to doubt whether recourse was ever had to it in fact. [ADULTERY.] The custom of writing on a parchment words cabalistic or medical relating to a particular case, and then washing them off, and giving the patient the water of this ablution to drink, has descended among Oriental superstitions to the present day, and a sick Arab would probably think this the most natural way of "taking" a prescription. See, on the general subject, Grodeck *de vell. Hebr. purgat. castitatis* in Ugoi, *Thesaur.* (Wieser). The custom of such an ordeal was probably traditional to Moses' time, and by fencing it round with the wholesome awe inspired by the solemnity of the prescribed ritual, the lawgiver would deprive it to a great extent of its barbarous tendency, and would probably restrain the husband from some of the ferocious extremities to which he might otherwise be driven by a sudden fit of jealousy, so powerful in the Oriental mind. On the whole it is to be taken, like the permission to divorce by a written instrument, rather as the mitigation of a custom ordinarily harsh, and as a barrier placed in the way of uncalculating vindictiveness. Viewing the regulations concerning matrimony as a whole, we shall find the same principle animating them in all their parts—that of providing a legal channel for the course of natural feelings where irrepresentable, but at the same time of surrounding their outlet with institutions apt to mitigate their intensity, and so assisting the gradual formation of a gentler temper in the bosom of the nation. The precept was given "because of the hardness of their hearts," but with the design and the tendency of softening them. (See some remarks in Spencer, *de Leg. Hebr.*) [H. H.]

WATER OF SEPARATION. [PURIFICATION.]

WAVE-OFFERING (הַנִּזְנוּחַ, "a waving," from הָנַח, "to wave," הִנֵּחַ לְפָנֵי יְהוָה, "a waving before Jehovah"). This rite, together with that of "heaving" or "raising" the offering, was an inseparable accompaniment of peace-offerings. In such the right shoulder, considered the choicest part of the victim, was to be "heaved," and viewed as holy to the Lord, only eaten therefore by the priest; the breast was to be "waved," and eaten by the worshipper. On the second day of the Passover a sheaf of corn, in the green ear, was to be waved, accompanied by the sacrifice of an unblemished lamb of the first year, from the performance of which ceremony the days till Pentecost were to be counted. When that feast arrived, two sheaves, the first-fruits of the ripe corn, were to be

offered with a burnt-offering, a sin-offering, and two lambs of the first year for a peace-offering. These likewise were to be waved.

The Scriptural notices of these rites are to be found in Ex. xxix. 24, 28; Lev. vii. 30, 34, vii² 27, ix. 21, x. 14, 15, xlii. 10, 15, 20; Num. vi 20, xviii. 11, 18, 26-29, &c.

We find also the word הַנִּזְנוּחַ applied in Ex. xxxviii. 24, to the gold offered by the people for the furniture of the sanctuary. It is there called הַנִּזְנוּחַ הַזֶּה. It may have been waved when presented, but it seems not impossible that הַנִּזְנוּחַ had acquired a secondary sense so as to denote "free-will offering." In either case we must suppose the ceremony of waving to have been known to and practised by the Israelites before the giving of the Law.

It seems not quite certain from Ex. xxix. 28, 27, whether the waving was performed by the priest or by the worshipper with the former's assistance. The Rabbinical tradition represents it as done by the worshipper, the priest supporting his hands from below.

In conjecturing the meaning of this rite, regard must be had, in the first instance, to the kind of sacrifice to which it belonged. It was the accompaniment of peace-offerings. These not only, like the other sacrifices, acknowledged God's greatness and His right over the creature, but they witnessed to a ratified covenant, an established communion between God and man. While the sin-offering merely removed defilement, while the burnt-offering gave entirely over to God of His own, the victim being wholly consumed, the peace-offering, as establishing relations between God and the worshipper, was participated in by the latter, who ate, as we have seen, of the breast that was waved. The Rabbis explain the heaving of the shoulder as an acknowledgment that God has His throne in the heaven, the waving of the breast that He is present in every quarter of the earth. The rite testified to His eternal majesty on high, the other to His being among and with His people.

It is not said in Lev. xxiii. 10-14, that a peace-offering accompanied the wave-heave of the Passover. On the contrary, the only bloody sacrifice mentioned in connexion with it is styled a burnt-offering. When, however, we consider that everywhere else the rite of waving belongs to a peace-offering, and that besides a sin and a burnt-offering, there was one in connexion with the wave-loaves of Pentecost (Lev. xxiii. 19), we shall be wary of concluding that there was none in the present case. The significance of these rites seems considerable. The name of the month Abib, in which the Passover was kept, means the month of the green ear of corn, the month in which the great produce of the earth has come to the birth. In that month the nation of Israel came to the birth; each succeeding Passover was the keeping of the nation's birthday. Beautifully and naturally, therefore, were the two births—that of the people into national life; that of their needful sustenance into yearly life—combined in the Passover. All first-fruits were holy to God: the first-born of men, the first-produce of the earth. Both principles were recognized in the Passover. When, six weeks after, the harvest had ripened, the first-fruits of its matured produce were similarly to be dedicated to God. Both were waved, the rite which attested the Divine presence and working all around us being surely most appropriate and significant in their case. [F. G.]

WAY. This word has now in ordinary parlance so entirely forsaken its original sense (except in combination, as in "highway," "causeway"), and is so uniformly employed in the secondary or metaphorical sense of a "custom" or "manner," that it is difficult to remember that in the Bible it most frequently signifies an actual road or track. Our translators have employed it as the equivalent of no less than eighteen distinct Hebrew terms. Of these, several had the same secondary sense which the word "way" has with us. Two others (דֶּרֶךְ and בִּלְתִּי) are employed only by the poets, and are commonly rendered "path" in the A. V. But the term which most frequently occurs, and in the majority of cases signifies (though it also is now and then used metaphorically) an actual road, is דֶּרֶךְ, *derec*, connected with the German *treten* and the English "tread." It may be truly said that there is hardly a single passage in which this word occurs which would not be made clearer and more real if "road to" were substituted for "way of." Thus Gen. xvi. 7, "the spring on the road to Shur;" Num. xiv. 24, "the road to the Red Sea;" 1 Sam. vi. 12, "the road to Beth-hemesh;" Judg. ix. 37, "the road to the oak of Moonenim;" 2 K. xi. 19, "the road to the gate." It turns that which is a mere general expression into a substantial reality. And so in like manner with the word *δδός* in the New Testament, which is almost invariably translated "way." Mark x. 32, "They were on the road going up to Jerusalem;" Matt. xx. 17, "and Jesus took the twelve disciples apart in the road"—out of the crowd of pilgrims who, like themselves, were bound for the Passover.

There is one use of both *derec* and *δδός* which must not be passed over, viz. in the sense of a religious course. In the Old Test. this occurs but rarely, perhaps twice: namely in Amos viii. 14, "the manner of Beersheba," where the prophet is probably alluding to some idolatrous rites then practised there; and again in Ps. cxxxix. 24, "look if there be any evil way," any idolatrous practices, "in me, and lead me in the everlasting way." But in the Acts of the Apostles *δδός*, "the way," "the road," is the received, almost technical, term for the new religion which Paul first resisted and afterwards supported. See Acts ix. 2, xix. 9, 23, xxii. 4, xxiv. 14, 22. In each of these the word "that" is an interpolation of our translators, and should have been put into italics, as it is in xxiv. 22.

The religion of Islam is spoken of in the Koran as "the path," (*et tarik*, iv. 66), and "the right path" (i. 5; iv. 174). Gesenius (*Thes.* 353) has collected examples of the same expression in other languages and religions. [G.]

WEAPONS. [ARMS.]

WEASEL (חִילָה, *chiled*: *γυλῆ*: *mustela*) occurs only in Lev. xi. 29, in the list of unclean animals. According to the old versions and the Talmud, the Heb. *chiled* denotes "a weasel" (see Lawysohn, *Zool. des Talm.* p. 91, and Buxtorf, *Lex. v. Rab. et Talm.* p. 756); but if the word is identical with

the Arabic *chuld* (خلد) and the Syriac *chuldo*

(ܚܠܕܐ), as Bochart (*Hieros.* ii. 435) and others

* This is more obscure in the A. V. even than the others—"Oxne along by the plain of Moonenim."

have endeavoured to show, there is no doubt that "a mole" is the animal indicated. Gesenius (*Thes.* p. 474), however, has the following very true observation: "Satis constat animalium nomina persæpe in hac lingua hæc in alia cognata aliud, id vero simile, animal significare." He prefers to render the term by "Weasel."

Moles are common enough in Palestine; Hasselquist (*Trav.* p. 120), speaking of the country between Jaffa and Rama, says he had never seen in any place the ground so cast up by moles as in these plains. There was scarce a yard's length between each mole-hill. It is not improbable that both the *Talpa europæa* and the *T. caeca*, the blind mole of which Aristotle speaks (*Hist. Anim.* i. 8, §3), occur in Palestine, though we have no definite information on this point. The family of *Mesotides* also is doubtless well represented. Perhaps it is better to give to the Heb. term the same signification which the cognate Arabic and Syriac have, and understand a "mole" to be denoted by it. [MOLE.] [W. H.]

WEAVING (ἵμα). The art of weaving appears to be coeval with the first dawning of civilization. In what country, or by whom it was invented, we know not; but we find it practised with great skill by the Egyptians at a very early period, and hence the invention was not unnaturally attributed to them (Plin. vii. 57). The "vestures of fine linen" such as Joseph wore (Gen. xli. 42) were the product of Egyptian looms, and their quality, as attested by existing specimens, is pronounced to be not inferior to the finest cambric of modern times (Wilkinson, ii. 75). The Israelites were probably acquainted with the process before their sojourn in Egypt; but it was undoubtedly there that they attained the proficiency which enabled them to execute the hangings of the Tabernacle (Ex. xxxv. 35; 1 Chr. iv. 21), and other artistic textures. At a later period the Egyptians were still famed for their manufactures of "fine" (i. e. hackled) flax and of *chérî*, rendered in the A. V. "networks," but more probably a white material either of linen or cotton (Is. xix. 9). From them the Tyrians procured the "fine linen with broadened work" for the sails of their vessels (Ex. xxvii. 7), the handsome character of which may be inferred from the representations of similar sails in the Egyptian paintings (Wilkinson, ii. 131, 167). Weaving was carried on in Egypt, generally, but not universally, by men (Herod. ii. 35; comp. Wilkinson, ii. 84). This was the case also among the Jews about the time of the Exodus (1 Chr. iv. 21), but in later times it usually fell to the lot of the females to supply the household with clothing (1 Sam. ii. 19; 2 K. xxiii. 7), and an industrious housewife would produce a surplus for sale to others (Prov. xxxi. 13, 19, 24).

The character of the loom and the process of weaving can only be inferred from incidental notices. The Egyptian loom was usually upright, and the weaver stood at his work. The cloth was fixed sometimes at the top, sometimes at the bottom, so that the remark of Herodotus (ii. 85) that the Egyptians, contrary to the usual practice, pressed the wool downwards, must be received with reservation (Wilkinson, ii. 85). That a similar variety of usage prevailed among the Jews, may be inferred from the remark of St. John (xix. 23), that the seamless coat was woven "from the top" (*de rœ*

broader). Tunics of this kind were designated by the Romans *rectae*, implying that they were made at an upright loom at which the weaver stood to his work, thrusting the woof upwards (Plin. viii. 74). The modern Arabs use a procumbent loom, raised above the ground by short legs (Burckhardt's *Notes*, i. 67). The Bible does not notice the loom itself, but speaks of the beam^a to which the warp was attached (1 Sam. xvii. 7; 2 Sam. xxi. 19); and of the pin^b to which the cloth was fixed, and on which it was rolled (Judg. xvi. 14). We have also notice of the shuttle,^c which is described by a term significant of the act of weaving (Job vii. 6); the thum^d or threads which attached the web to the beam (Is. xxxviii. 12, *margin*); and the web^e itself (Judg. xvi. 14; A. V. "beam"). Whether the two terms in Lev. xiii. 48, rendered "warp"^f and "woof,"^g really mean these, admits of doubt, inasmuch as it is not easy to see how the one could be affected with leprosy without the other: perhaps the terms refer to certain kinds of texture (Knobel, *in loc.*). The shuttle is occasionally dispensed with, the woof being passed through with the hand (Robinson's *Bib. Res.* i. 169). The speed with which the weaver used his shuttle, and the decisive manner in which he separated the web from the thum when his work was done, supplied vivid images, the former of the speedy passage of life (Job vii. 6), the latter of sudden death (Is. xxxviii. 12).

The textures produced by the Jewish weavers were very various. The coarser kinds, such as tent-cloth, sackcloth, and the "hairy garments" of the poor were made of goat's or camel's hair (Ex. xxvi. 7; Matt. iii. 4). Wool was extensively used for ordinary clothing (Lev. xiii. 47; Prov. xxvii. 26, xxxi. 13; Ex. xxvii. 18), while for finer work flax was used, varying in quality, and producing the different textures described in the Bible as "linen" and "fine linen." The mixture of wool and flax in cloth intended for a garment was interdicted (Lev. xix. 19; Deut. xxi. 11). With regard to the ornamental kinds of work, the terms *ritmah*, "needlework," and *ma'dash chadash*, "the work of the cunning workman," have been already discussed under the head of EMBROIDERER, to the effect that both kinds were produced in the loom, and that the distinction between them lay in the addition of a device or pattern in the latter, the *ritmah* consisting simply of a variegated stuff without a pattern. We may further notice the terms: (1) *shabats*¹ and *tasbotts*² applied to the robes of the priest (Ex. xxviii. 4, 39), and signifying *tasselled* (A. V. "brodered"), i. e. with depressions probably of a square shape worked in it, similar to the texture described by the Romans under the term *scutulatus* (Plin. viii. 73; Juv. ii. 97); this was produced in the loom, as it is expressly said to be the work of the weaver (Ex. xxxix. 27). (2) *Mashzar*³ (A. V. "twined"), applied to the fine linen out of which the curtains of the tabernacle and the sacerdotal vestments were made (Ex. xxvi. 1, xxviii. 6, &c.); in this texture each thread consisted of several finer threads twisted together, as is described to have

been the case with the famed corslet of Amasis (Herod. iii. 47). (3) *Mishbetseth shabib* = (A. V. "of wrought gold"), textures in which gold thread was interwoven (Ps. xlv. 13). The Babylonians were particularly skilful in this branch of weaving, and embroidered groups of men or animals on the robes (Plin. viii. 74; Layard, *Nin.* ii. 418); the "goodly Babylonish garment" secreted by Achaz was probably of this character (Josh. vii. 21). The sacerdotal vestments are said to have been woven in one piece without the intervention of any needlework to join the seams (Joseph. *Ant.* iii. 7, §4). The "coat without seam" (*χiton ἄρραφος*) worn by Jesus at the time of his crucifixion (John xix. 23), was probably of a sacerdotal character in this respect, but made of a less costly material (Carpsov, *Appar.* p. 72). [W. L. B.]

WEDDING. [MARRIAGE.]

WEEK (שבוע, or שבע, from שבע, "seven," a heptad of any thing, but particularly used for a period of seven days: *heptemeras*: *septimana*). We have also, and much oftener, שבועה, or שבועת ימים.

Whatever controversies exist respecting the origin of the week, there can be none about the great antiquity, on particular occasions at least, among the Shemitic races, of measuring time by a period of seven days. This has been thought to be implied in the phrase respecting the sacrifices of Cain and Abel (Gen. iv. 3), "in process of time," literally "at the end of days." It is to be traced in the narrative of the subsidence of the Flood (Gen. viii. 10), "and he stayed yet other seven days;" and we find it recognized by the Syrian Laban (Gen. xxix. 27), "fulfil her week." It is needless to say that this division of time is a marked feature of the Mosaic law, and one into which the whole year was parted, the Sabbath sufficiently showing that. The week of seven days was also made the key to a scale of seven, running through the Sabbatical years up to that of jubilee. [See SABBATH; SABBATICAL YEAR; and JUBILEE, YEAR OF.]

The origin of this division of time is a matter which has given birth to much speculation. Its antiquity is so great, its observance so wide-spread, and it occupies so important a place in sacred things, that it has been very generally thrown back as far as the creation of man, who on this supposition was told from the very first to divide his time on the model of the Creator's order of working and resting. The week and the Sabbath are, if this be so, as old as man himself; and we need not seek for reasons either in the human mind or the facts with which that mind comes in contact, for the adoption of such a division of time, since it is to be referred neither to man's thoughts nor to man's will. A purely theological ground is thus established for the week and for the sacredness of the number seven. They who embrace this view support it by a reference to the six days' creation and the Divine rest on the seventh, which they consider to have been made known to man from the very first,

^a כַּנָּה; so called from its resemblance to a ploughman's yoke.

^b שִׁבְרָה. This term is otherwise understood of the warp, as in the LXX. and the Vulgate (Gossn. *Thec.* p. 896).

^c מַטְרָן. The same word describes both the web and the shuttle.

^d דָּלָה. שְׁתֵּי.
^e שִׁבְרָה. מִשְׁבָּעִי.
^f שִׁבְרָה. מִשְׁבָּעִי.
^g שִׁבְרָה. מִשְׁבָּעִי.

and by an appeal to the exceeding prevalence of the hebdomadal division of time from the earliest age—an argument the force of which is considered to be enhanced by the alleged absence of any natural ground for it.

To all this, however, it may be objected that we are quite in the dark as to when the record of the six days' creation was made known, that as human language is used and human apprehensions are addressed in that record, so the week being already known, the perfection of the Divine work and Sabbath may well have been set forth under the figure of one, the existing division of time moulding the document, instead of the document giving birth to the division; that old and wide-spread as is the recognition of that division, it is not universal; that the nations which knew not of it were too important to allow the argument from its prevalence to stand; and that so far from its being without ground in nature, it is the most obvious and convenient way of dividing the month. Each of these points must now be briefly considered:—

1st. That the week rests on a theological ground may be cheerfully acknowledged by both sides; but nothing is determined by such acknowledgment as to the original cause of adopting this division of time. The records of creation and the fourth commandment give no doubt the ultimate and therefore the deepest ground of the weekly division, but it does not therefore follow that it was not adopted for lower reasons before either was known. Whether the week gave its sacredness to the number seven, or whether the ascendancy of that number helped to determine the dimensions of the week, it is impossible to say. The latter fact, the ancient ascendancy of the number seven, might rest on divers grounds. The planets, according to the astronomy of those times, were seven in number; so are the notes of the diatonic scale; so also many other things naturally attracting observation.

2ndly. The prevalence of the weekly division was indeed very great, but a nearer approach to universality is required to render it an argument for the view in aid of which it is appealed to. It was adopted by all the Shemitic races, and, in the later period of their history at least, by the Egyptians. Across the Atlantic we find it, or a division still but identical with it, among the Peruvians. It also obtains now with the Hindoos, but its antiquity among them is matter of question. It is possible that it was introduced into India by the Arabs and Mohammedans. So in China we find it, but whether universally or only among the Buddhists admits of doubt. (See, for both, Priault's *Questions Moïsaïques*, a work with many of the results of which we may be well expected to quarrel, but which deserves, in respect not only of curious learning, but of the vigorous and valuable thought with which it is impregnated, to be far more known than it is.) On the other hand, there is no reason for thinking the week known till a late period either to Greeks or Romans.

3rdly. So far from the week being a division of time without ground in nature, there was much to recommend its adoption. Where the days were named from planetary deities, as among first the Assyrians and Chaldees, and then the Egyptians, there of course each period of seven days would constitute a whole, and that whole might come to be recognized by nations that disregarded or rejected the practice which had shaped and determined it. But further, the week is a most natural and nearly an exact quan-

dripartition of the month, so that the quarters of the moon may easily have suggested it.

It is beside the purpose of this article to trace the hebdomadal division among other nations than the Hebrews. The week of the Bible is that with which we have to do. Even if it were proved that the planetary week of the Egyptians, as sketched by Dion Cassius (*Hist. Rom.* xxxvii. 18), existed at or before the time of the Exodus, the children of Israel did not copy that. Their week was simply determined by the Sabbath; and there is no evidence of any other day, with them, having either had a name assigned to it, or any particular associations bound up with it. The days seemed to have been distinguished merely by the ordinal numerals, counted from the Sabbath. We shall have indeed to return to the Egyptian planetary week at a later stage of our inquiry, but our first and main business, as we have already said, is with the week of the Bible.

We have seen in Gen. xxix. 27, that it was known to the ancient Syrians, and the injunction to Jacob, "fulfil her week," indicates that it was in use as a fixed term for great festive celebrations. The most probable exposition of the passage is, that Leah tells Jacob to fulfil Leah's week, the proper period of the nuptial festivities in connexion with his marriage to her, and then he may have Rachel also (comp. Judg. xiv.). And so too for funeral observance, as in the case of the obsequies of Jacob, Joseph "made a mourning for his father seven days" (Gen. l. 10). But neither of these instances, any more than Noah's procedure in the ark, go further than showing the custom of observing a term of seven days for any observance of importance. They do not prove that the whole year, or the whole month, was thus divided at all times, and without regard to remarkable events.

In Exodus of course the week comes into very distinct manifestation. Two of the great feasts—the Passover and the Feast of Tabernacles—are prolonged for seven days after that of their initiation (Exod. xii. 15-20, &c.), a custom which remains in the Christian Church, in the rituals of which the remembrances and topics of the great festivals are prolonged till what is technically called the octave. Although the Feast of Pentecost lasted but one day, yet the time for its observance was to be counted by weeks from the Passover, whence one of its titles, "the Feast of Weeks."

The division by seven was, as we have seen, expanded so as to make the seventh month and the seventh year Sabbatical. To whatever extent the laws enforcing this may have been neglected before the Captivity, their effect, when studied, must have been to render the words *שבועות*, *isbû'ot*, *septsimania*, capable of meaning a series of years almost as naturally as a seven of days. Indeed the generality of the word would have this effect at any rate. Hence their use to denote the latter in prophecy, more especially in that of Daniel, is not mere arbitrary symbolism, but the employment of a not unfamiliar and easily understood language. This is not the place to discuss schemes of prophetic interpretation, nor do we propose giving our opinion of any such, but it is connected with our subject to remark that, whatever be the merits of that which in Daniel and the Apocalypse understands a year by a day, it cannot be set aside as forced and unnatural. Whether days were or were not intended to be thus understood in the places in question, their being so would have been a congruous, and we may say

logical attendant on the scheme which counts weeks of years, and both would have been a natural computation to minds familiar and occupied with the law of the Sabbatical year.

In the N. T. we of course find such clear recognition of and familiarity with the week as needs scarcely be dwelt on. Sacred as the division was, and stamped deep on the minds and customs of God's people, it now received additional solemnity from our Lord's last earthly Passover gathering up His work of life into a week.

Hence the Christian Church, from the very first, was familiar with the week. St. Paul's language (1 Cor. xvi. 2, *πρὸς μίαν σαββάνην*) shows this. We cannot conclude from it that such a division of time was observed by the inhabitants of Corinth generally; for they to whom he was writing, though doubtless the majority of them were Gentiles, yet knew the Lord's Day, and most probably the Jewish Sabbath. But though we can infer no more than this from the place in question, it is clear that if not by this time, yet very soon after, the whole Roman world had adopted the hebdomadal division. Dion Cassius, who wrote in the 2nd century, speaks of it as both universal and recent in his time. He represents it as coming from Egypt, and gives two schemes, by one or other of which he considers that the planetary names of the different days were fixed (Dion Cassius, xxvii. 18). Those names, or corresponding ones, have perpetuated themselves over Christendom, though no associations of any kind are now connected with them, except in so far as the whimsical conscience of some has quarrelled with their Pagan origin, and led to an attempt at their disuse. It would be interesting, though foreign to our present purpose, to inquire into the origin of this planetary week. A deeply-learned paper in the *Philological Museum*, by the late Archdeacon Hare,* gives the credit of its invention to the Chaldees. Dion Cassius was however pretty sure to have been right in tracing its adoption by the Roman world to an Egyptian origin. It is very striking to reflect that while Christendom was in its cradle, the law by which she was to divide her time came without collusion with her into universal observance, thus making things ready for her to impose on mankind that week on which all Christian life has been shaped—that week grounded on no worship of planetary deities, nor dictated by the mere wish to quadripartite the month, but based on the earliest lesson of revelation, and proposing to man his Maker's model as that whereby to regulate his working and his rest—that week which once indeed in modern times it has been attempted to abolish, because it was attempted to abolish the whole Christian faith, but which has kept, as we are sure it ever will keep, its ground, being bound up with that other, and sharing therefore in that other's invincibility and perpetuity.

[F. G.]

WEEKS, FEAST OF. [PENTECOST.]

WEIGHTS AND MEASURES.

I. WEIGHTS.

Introduction.—It will be well to explain briefly the method of inquiry which led to the conclusions stated in this article, the subject being intricate, and the conclusions in many main particulars different from any at which other investigators have arrived. The disagreement of the opinions

* *Philology Mus.* vol. i.

respecting ancient weights that have been formed on the evidence of the Greek and Latin writers shows the importance of giving the first place to the evidence of monuments. The evidence of the Bible is clear, except in the case of one passage, but it requires a monumental commentary. The general principle of the present inquiry was to give the evidence of the monuments the preference on all doubtful points, and to compare it with that of literature, so as to ascertain the purport of statements which otherwise appeared to be explicable in two, or even three, different ways. Thus, if a certain talent is said to be equal to so many Attic drachms, these are usually explained to be drachms on the old, or Commercial, standard, or on Solon's reduced standard, or again on the further reduced standard equal to that of Roman denarii of the early emperors; but if we ascertain from weights or coins the weight of the talent in question, we can decide with what standard it is compared, unless the text is hopelessly corrupt.

Besides this general principle, it will be necessary to bear in mind the following postulates.

1. All ancient Greek systems of weight were derived, either directly or indirectly, from an Eastern source.

2. All the older systems of ancient Greece and Persia, the Aeginetan, the Attic, the Babylonian, and the Euboeic, are divisible either by 6000, or by 3600.

3. The 6000th or 3600th part of the talent is a divisor of all higher weights and coins, and a multiple of all lower weights and coins, except its two-thirds.

4. Coins are always somewhat below the standard weight.

5. The statements of ancient writers as to the relation of different systems are to be taken either as indicating original or current relation. When a set of statements shows a special study of metrology we must infer original relation; isolated statements may rather be thought to indicate current relation. All the statements of a writer, which are not borrowed, probably indicate either the one or the other kind of relation.

6. The statements of ancient writers are to be taken in their seemingly-obvious sense, or discarded altogether as incorrect or unintelligible.

7. When a certain number of drachms or other denominations of one metal are said to correspond to a certain number of drachms or other denominations of another metal, it must not be assumed that the system is the same in both cases.

Some of those postulates may seem somewhat strict, but it must be recollected that some, if not all, of the systems to be considered have a mutual relation that is very apt to lead the inquirer to visionary results if he does not use great caution in his investigations.

The information respecting the Hebrew weights that is contained in direct statements necessitates an examination of the systems used by, or known to, the Greeks as late as Alexander's time. We begin with such an examination, then state the direct data for the determination of the Hebrew system or systems, and finally endeavour to effect that determination, adding a comparative view of all our main results.

1. *Early Greek talents.*—Three principal systems were used by the Greeks before the time of Alexander, those of the Aeginetan, the Attic, and the Euboeic talents.

1728 WEIGHTS AND MEASURES

1. The Aeginetan talent is stated to have contained 60 minae, and 6000 drachms. The following points are indisputably established on the evidence of ancient writers. Its drachm was heavier than the Attic, by which, when unqualified, we mean the drachm of the full monetary standard, weighing about 67.5 grains Troy. Pollux states that it contained 10,000 Attic drachms and 100 Attic minae. Aulus Gellius, referring to the time of Demosthenes, speaks of a talent being equal to 10,000 drachms, and, to leave no doubt, says they would be the same number of denarii, which in his own time were equal to current reduced Attic drachms, the terms drachms and denarii being then used interchangeably. In accordance with these statements, we find a monetary system to have been in use in Macedonia and Thrace, of which the drachm weighs about 110 gra., in very nearly the proportion required to the Attic (6 : 10 :: 67.5 : 112.5).

The silver coins of Aegina, however, and of many ancient Greek cities, follow a lower standard, of which the drachm has an average maximum weight of about 96 gra. The famous Cyzicene staters of electrum appear to follow the same standard as the coins of Aegina, for they weigh about 240 gra., and are said to have been equal in value to 28 Attic drachms of silver, a Daric, of 128 gra., being equal to 20 such drachms, which would give the Cyzicenes (20 : 128 :: 28 : 180) three-fourths of gold, the very proportion assigned to the composition of electrum by Pliny. If we may infer that the silver was not counted in the value, the Cyzicenes would be equal to low didrachms of Aegina. The drachm obtained from the silver coins of Aegina has very nearly the weight, 92.3 gra., that Boeckh assigns to that of Athens before Solon's reduction, of which the system continued in use afterwards as the Commercial talent. The coins of Athens give a standard, 67.5 gra., for the Solonian drachm that does not allow, taking that standard for the basis of computation, a higher weight for the ante-Solonian drachm than about that computed by Boeckh.

An examination of Mr. Burgon's weights from Athens, in the British Museum, has, however, induced us to infer a higher standard in both cases. These weights bear inscriptions which prove their denominations, and that they follow two systems. One weighing 9980 gra. troy has the inscription MNA AΓOP (μνα ἀγοραῖος?), another weighing 7171, simply MNA. We have therefore two systems evidently in the relation of the Commercial Attic, and Solonian Attic (9980 : 7171 :: 138.88 : 99.7 instead of 100), a conclusion borne out by the fuller data given a little later (§ 1. 2). The lower weight is distinguished by ΔΕΜΟ on a weight of 3482

($\times 2 = 6964$) gra., and by ΖΑ on one of 884 ($\times 8 = 7072$): its mina was therefore called *Σταμνία*. The identity of these two systems, the Market and the Popular, with the Commercial and Solonian of Athens, is therefore evident, and we thus obtain a higher standard for both Attic talents. From the correct relation of the weights of the two minae given above, we may compute the drachms of the two talents at about 99.8 and 71.7 gra. The heavier standard of the two Attic systems afforded by these weights reduces the difficulty that is occasioned by the difference of the two Aeginetan standards.

We thus obtain the following principal standards of the Aeginetan weight.

a. The Macedonian talent, or Aeginetan of the

WEIGHTS AND MEASURES

writers, weighing about 660,000 gra., containing 60 minae and 6000 drachms.

b. The Commercial talent of Athens, used for the coins of Aegina, weighing, as a monetary talent, never more than about 576,000 gra., reduced from a weight-talent of about 598,800, and divided into the same principal parts as the preceding.

It may be objected to this opinion, that the coins of Aegina should rather give us the true Aeginetan standard than those of Macedonia, but it may be replied, that we know from literature and measurements of but two Greek systems heavier than the ordinary or later Attic, and that the heavier of these systems is sometimes called Aeginetan, the lighter, which bears two other names, never.

2. The Attic talent, when simply thus designated, is the standard weight introduced by Solon, which stood to the older or Commercial talent in the relation of 100 to 138. Its average maximum weight, as derived from the coins of Athens and the evidence of ancient writers, gives a drachm of about 67.5 gra.; but Mr. Burgon's weights, as already shown, enable us to raise this sum to 71.7. Those weights have also enabled us to make a very curious discovery. We have already seen that two minae, the Market and the Popular, are recognized in them, one weight, having the inscription MNA AΓOP (μνα ἀγοραῖος?), weighing 9980 gra., and another, inscribed MNA (μνα σταμνία), weighing 7171 gra., these being in almost exactly the relation of the Commercial and ordinary Attic minae *σταμνία*. There is no indication of any third system, but certain of the marks of value prove that the lower system had two talents, the heavier of which was double the weight of the ordinary talent. No. 9 has the inscription ΤΕΤΑΡΤ, "the quarter," and weighs 3218 gra., giving a unit of 12872 gra.; no. 14, inscribed ΕΜΙΤ ΕΤΑΡ, the "half-quarter," weighs 1770 gra., giving a unit of 14160 gra. We thus obtain a mina twice that of Solon's reduction. The probable reason for the use of this larger Solonian talent will be shown in a later place (§ IV.). These weights are of about the date of the Peloponnesian War. (See Table A.)

From these data it appears that the Attic talent weighed about 430,260 gra. by the weights, and that the coins give a talent of about 405,000 gra., the latter being apparently the weight to which the talent was reduced after a time, and the maximum weight at which it is reckoned by ancient writers. It gradually lost weight in the course, until the drachm fell to about 57 gra. or less, the coming to be equivalent to, or a little lighter than, the denarius of the early Caesars. It is important, when examining the statements of ancient writers, to consider whether the full monetary weight of the drachm, mina, or talent, or the weight after this last reduction, is intended. There are cases, as in the comparison of a talent fallen into disuse, where the value in Attic drachms or denarii so described is evidently used with reference to the full Attic monetary weight.

3. The Euboeic talent, though used in Greece, is also said to have been used in Persia, and there can be no doubt of its Eastern origin. We therefore reserve the discussion of it for the next section (§ II., 2).

II. Foreign talents of the same period.—Two foreign systems of the same period, besides the Hebrew, are mentioned by ancient writers, the Babylonian talent and the Euboeic, which Herodotus

1730 WEIGHTS AND MEASURES

relates to have been used by the Persians of his time respectively for the weighing of their silver and gold paid in tribute.

1. The Babylonian talent may be determined from existing weights found by Mr. Layard at Nineveh. These are in the forms of lions and ducks, and are all upon the same system, although the same denominations sometimes weigh in the proportion of 2 to 1. On account of their great importance we insert a table, specifying their weights, inscriptions, and degree of preservation. (See Table B, previous page.)

From these data we may safely draw the following inferences.

The weights represent a double system, of which the heavier talent contained two of the lighter talents.

The heavier talent contained 60 manehs. The maneh was divided into thirtieths and sixtieths. We conclude the units having these respective relations to the maneh of the heavy talent to be divisions of it, because in the case of the first a thirtieth is a more likely division than a fifteenth, which it would be if assigned to the lighter talent, and because, in the case of the second, eight sixtieths is a more likely division than eight thirtieths.

The lighter talent contained 60 manehs. According to Dr. Hincks, the maneh of the lighter talent was divided into sixtieths, and these again into thirtieths. The sixtieth is so important a division in any Babylonian system, that there can be no doubt that Dr. Hincks is right in assigning it to this talent, and moreover its weight is a value of great consequence in the Babylonian system as well as in one derived from it. Besides, the sixtieth bears a different name from the sixtieth of the heavier talent, so that there must have been a sixtieth in each, unless, but this we have shown to be unlikely, the latter belongs to the lighter talent, which would then have had a sixtieth and thirtieth. The following table exhibits our results.

Heavier Talent.		Gra. troy.
$\frac{1}{60}$ Maneh		268.4
2	$\frac{1}{30}$ Maneh	532.8
60	30 Maneh	15,984
3600	1800 60 Talent	959,040
Lighter Talent.		
$\frac{1}{60}$ of $\frac{1}{60}$ Maneh		4.44
30	$\frac{1}{2}$ Maneh	133.2
1800	60 Maneh	7,992
108000	3600 60 Talent	479,520

Certain low subdivisions of the lighter talent may be determined from smaller weights, in the British Museum, from Babylonia or Assyria, not found with those last described. These are, with one exception, ducks, and have the following weights, which we compare with the multiples of the smallest subdivision of the lighter talent.

Smaller Babylonian or Assyrian Weights.	Gra. troy.	Thirtieths of Sixtieth of Maneh.	Unk. & 64	Supposed unit, &.

WEIGHTS AND MEASURES

Before comparing the evidence of the coins which we may suppose to have been struck according to the Babylonian talent, it will be well to ascertain whether the higher or lower talent was in use, or whether both were, in the period of the Persian coins.

Herodotus speaks of the Babylonian talent as not greatly exceeding the Euboic, which has been computed to be equivalent to the Commercial Attic, but more reasonably as nearly the same as the ordinary Attic. Pollux makes the Babylonian talent equal to 7000 Attic drachms. Taking the Attic drachm at 67.5 gra., the standard probably used by Pollux, the Babylonian talent would weigh 472,500, which is very near the weight of the lighter talent. Aelian says that the Babylonian talent was equal to 72 Attic minae, which, on the standard of 67.5 to the drachm, gives a sum of 486,000. We may therefore suppose that the lighter talent was generally, if not universally, in use in the time of the Persian coins.

Herodotus relates that the king of Persia received the silver tribute of the satrapies according to the Babylonian talent, but the gold, according to the Euboic. We may therefore infer that the silver coinage of the Persian monarchy was then adjusted to the former, the gold coinage to the latter, if there was a coinage in both metals so early. The oldest coins, both gold and silver, of the Persian monarchy, are of the time of Herodotus, if not a little earlier; and there are still more ancient pieces, in both metals, of the same weights as Persian gold and silver coins, which are found at or near Sardes, and can scarcely be doubted to be the coinage of Croesus, or of another Lydian king of the 6th century. The larger silver coins of the Persian monarchy, and those of the satrapies, are of the following denominations and weights:—

	Gra. troy.
Piece of three sigli	253.5
Piece of two sigli	169
Siglos	84.5

The only denomination of which we know the name is the siglos, which, as having the same type as the Daric, appears to be the oldest Persian silver coin. It is the ninetieth part of the maneh of the lighter talent, and the 5400th of that talent. The piece of three sigli is the thirtieth part of that maneh, and the 1800th of the talent. If there were any doubt as to these coins being struck upon the Babylonian standard, it would be removed at the next part of our inquiry, in which we shall show that the relation of gold and silver occasioned these divisions.

2. The Euboic talent, though bearing a Greek name, is rightly held to have been originally an Eastern system. As it was used to weigh the gold sent as tribute to the king of Persia, we may infer that it was the standard of the Persian gold money; and it is reasonable to suppose that the coinage of Euboea was upon its standard. If our result as to the talent, when tested by the coins of Persia and Euboea, confirms this inference and supposition, it may be considered sound.

We must now discuss the celebrated passage of Herodotus on the tribute of the Persian satrapies. He there states that the Babylonian talent contained 70 Euboic minae (iii. 99). He specifies the amount of silver paid in Babylonian talents by each province, and then gives the sum of the silver according to the Euboic standard, reduces the gold paid to its equivalent in silver, reckoning the former at

WEIGHTS AND MEASURES

thirteen times the value of the latter, and lastly gives the sum total. His statements may be thus tabulated:—

Sum of items, silver.	Equivalent in E. T. at 75 minas = S. T.	Equivalent stated.	Difference.
1740 E. T.	= 9030 E. T.	9640 E. T.	+ 510
Gold effluvia.	Equivalent at 12 to 1.	Id.	
340 E. T.	4680 E. T.		
Total . . .	13,710 E. T.	14,320	
Total stated	14,560	14,560	
Difference .	+ 850	+ 340.	

It is impossible to explain this double error in any satisfactory manner. It is, however, evident that in the time of Herodotus there was some such relation between the Babylonian and Euboic talents as that of 11·66 to 10. This is so near 12 to 10 that it may be inquired whether ancient writers speak of any relative value of gold to silver about this time that would make talents in this proportion easy for exchange, and whether, if such a proportion is stated, it is confirmed by the Persian coins. The relative value of 13 to 1, stated by Herodotus, is very nearly 12 to 1, and seems as though it had been the result of some change, such as might have been occasioned by the exhaustion of the surface-gold in Asia Minor, or a more careful working of the Greek silver-mines. The relative value 12 to 1 is mentioned by Plato (*Hipparch.*). About Plato's time the relation was, however, 10 to 1. He is therefore speaking of an earlier period. Supposing that the proportion of the Babylonian and Euboic talents was 12 to 10, and that it was based upon a relative value of 12 to 1, what light do the Persian coins throw upon the theory? If we take the chief or only Persian gold coin, the Daric, assuming its weight to be 129 grs., and multiply it by 12, we obtain the product 1548. If we divide this product as follows, we obtain as aliquot parts the weights of all the principal and heavier Persian silver coins:—

$$\begin{aligned} 1548 \div 6 &= 258 \text{ three sigli.} \\ \div 9 &= 172 \text{ two sigli.} \\ \div 18 &= 86 \text{ sigli.} \end{aligned}$$

On these grounds we may suppose that the Euboic talent was to the Babylonian as 60 to 72, or 5 to 6. Taking the Babylonian maneh at 7992 grs., we obtain 399,600 for the Euboic talent.

This result is most remarkably confirmed by an ancient bronze weight in the form of a lion discovered at Abydos in the Troad, and bearing in Phœnician characters the following inscription:

אָפּוּבאָי לְקַבֵּל חֲתוּמָא דִּי כִסְפָא, "Approved," or "found correct, on the part of the satrap who is appointed over the silver," or "money." It weighs 396,000 grs., and is supposed to have lost one or two pounds weight. It has been thought to be a weight of 50 Babylonian minas, but it is most unlikely that there should have been such a division of the talent, and still more that a weight should have been made of that division without any distinctive inscription. If, however, the Euboic talent was to the Babylonian in the proportion of 5 to 6, 50 Babylonian minas would correspond to a Euboic talent, and this weight would be a talent of that standard. We have calculated the Euboic talent at 399,600 grs., this weight is 396,000, or

WEIGHTS AND MEASURES 1731

3600 deficient, but this is explained by the supposed loss of one (5780) or two (11,520) pounds weight.*

We have now to test our result by the Persian gold money, and the coins of Eubœa.

The principal, if not the only, Persian gold coin is the Daric, weighing about 129 grs. This, we have seen, was the standard coin, according to which the silver money was adjusted. Its double in actual weight is found in the silver coinage, but its equivalent is wanting, as though for the sake of distinction. The double is the thirtieth of the maneh of the lighter or monetary Babylonian talent, of which the Daric is the sixtieth, the latter being, in our opinion, a known division. The weight of the sixtieth is, it should be observed, about 133·2 grs., somewhat in excess of the weight of the Daric, but ancient coins are always struck below their nominal weight. The Daric was thus the 3600th part of the Babylonian talent. It is nowhere stated how the Euboic talent was divided, but if we suppose it to have contained 50 minas, then the Daric would have been the sixtieth of the mina, but if 100 minas, the thirtieth. In any case it would have been the 3000th part of the talent. As the 6000th was the chief division of the Aeginetan and Attic monetary talents, and the 3000th, of the Hebrew talent according to which the sacred tribute was paid, and as an Egyptian talent contained 6000 such units, no other principal division of the chief talents, save that of the Babylonian into 3600, being known, this is exactly what we should expect.

The coinage of Eubœa has hitherto been the great obstacle to the discovery of the Euboic talent. For the present we speak only of the silver coins, for the only gold coin we know is later than the earliest notices of the talent, and it must therefore have been in Greece originally, as far as money was concerned, a silver talent. The coins give the following denominations, of which we state the average highest weights and the assumed true weights, compared with the assumed true weights of the coins of Athens:—

COINS OF EUBŒA.		COINS OF ATHENS.	
Highest weight.	Assumed true weight.	Assumed true weight.	
	258	Tetradrachm 270	
121	129	Didrachm 135	
85	86		
63	64·5	Drachm 67·5	
43	43	Tetrobolon 45	

It must be remarked that the first Euboic denomination is known to us only from two very early coins of Eretria, in the British Museum, which may possibly be Attic, struck during a time of Athenian supremacy, for they are of about the weight of very heavy Attic tetradrachms.

It will be perceived that though the weights of all denominations, except the third in the Euboic list, are very near the Attic, the system of division is evidently different. The third Euboic denomination is identical with the Persian siglos, and indicates the Persian origin of the system. The second piece is, however, identical with the Daric. It would seem that the Persian gold and silver systems of division were here combined; and this might perfectly have been done, as the Daric, though a division of the gold talent, is also a division of the

* Since this was written we have ascertained that M. de Vogüé has supposed this lion to be a Euboic talent

(*Revue Archéologique*, n. s. Jan. 1892). See also *Archæological Journal*, 1890, Sept. pp. 159, 200.

1732 WEIGHTS AND MEASURES

silver talent. As we have noticed, the Daric is omitted in the Persian silver coinage for some special reason. The relation of the Persian and Greek systems may be thus stated:

Persian silver, Babylonian.	Persian gold, Euboic.	Greek Euboic. Actual weight.	Assumed.
253·5			258
169			
	129	121	129
84·5		85	86
		63	64·5
		43	43

The standard weights of Persian silver coins are here assumed from the highest average weight of the siglos. We hold that the coins of Coriuth probably follow the Euboic system.

The only gold coin of Euboea known to us has the extraordinary weight of 49·4 gra. It is of Caryatus, and probably in date a little before Alexander's time. It may be upon a system for gold money derived from the Euboic, exactly as the Euboic was derived from the Babylonian, but it is not safe to reason upon a single coin.

3. The talents of Egypt have hitherto formed a most unsatisfactory subject. We commence our inquiry by stating all certain data.

The gold and silver coins of the Ptolemies follow the same standard as the silver coins of the kings of Macedon to Philip II. inclusive, which are on the full Aeginetan weight. The copper coins have been thought to follow the same standard, but this is an error.

The ancient Egyptians are known to have had two weights, the MeN or UTeN, containing ten smaller weights bearing the name KeT, as M. Chabas has proved. The former name, if rightly read MeN, is a maneh or mina, the latter, according to the Copts, was a drachm or didrachm (ΚΗΤ: ΚΗΤΕ, CKITE S. drachma, didrachma, the last form not being known to have the second signification). A weight, inscribed "Five KeT," and weighing 698 gra., has been discovered. It probably originally weighed about 700 (*Revue Archéologique*, n. s.). We can thus determine the KeT to have weighed about 140 gra., and the MeN or UTeN about 1400. An examination of the copper coins of the Ptolemies has led us to the interesting discovery that they follow this standard and system. The following are all the heavier denominations of the copper coins of the earlier Ptolemies, and the corresponding weights: the coins vary much in weight, but they clearly indicate their standard and their denominations:—

EGYPTIAN COPPER COINS, AND WEIGHTS.

Coins.	Weights.
Gra.	
A cir. 1400.	MeN, or UTeN (Maneh?)
B cir. 700.	5 KeT.
C cir. 280.	(2 KeT).
D cir. 140.	KeT.
E cir. 70.	(½ KeT).

We must therefore conclude that the gold and silver standard of the Ptolemies was different from the copper standard, the latter being that of the ancient Egyptians. The two talents, if calculated from the coins, which in the gold and silver are below the full weight, are in the proportion of about 10 (gold and silver) to 13 (copper); or, if calculated from the higher correct standard of the

WEIGHTS AND MEASURES

gold and silver system, in the proportion of about 10 to 12·7: we shall speak as to the exchange in a later place (§ III.).

It may be observed that the difficulty of explaining the statements of ancient writers as to the Egyptian, Alexandrian, or Ptolemaic talent or talents, probably arises from the use of two systems which could be easily confounded, at least in their lower divisions.

4. The Carthaginian talent may not be as old as the period before Alexander, to which we limit our inquiry, yet it reaches so nearly to that period that it cannot be here omitted. Those silver coins of the Carthaginians which do not follow the Attic standard seem to be struck upon the standard of the Persian coins, the Babylonian talent. The only clue we have, however, to the system is afforded by a bronze weight inscribed ΤΑΛΕΝΤΟΝ, and weighing 321 grammes = 4956·5 gra. (Dr. Levy in *Zeitschrift Deutsch. morgenl. Gesellsch.* xiv. p. 71). This sum is divisible by the weights of all the chief Carthaginian silver coins, except the "dadrachm," but only as sevenths, a system of divisions we do not know to have obtained in any ancient talent. The Carthaginian gold coins seem also to be divisions of this mina on a different principle.

III. *The Hebrew talent or talents and divisions.*—The data we have obtained enable us to examine the statements respecting the Hebrew weights with some expectation of determining this difficult question. The evidence may be thus stated.

1. A talent of silver is mentioned in Exod. which contained 3000 shekels, distinguished as "the holy shekel," or "shekel of the sanctuary." The number of Israelite men who paid the ransom of half a shekel a-piece was 603,550, and the sum paid was 100 talents and 1775 shekels of silver (Ex. xxx. 13, 15, xxxviii. 25-28), whence we easily discover that the talent of silver contained 3000 shekels (603,550 ÷ 2 = 301,775 shekels—1775 = 300,000 ÷ 100 talents = 3000 shekels to the talent).

2. A gold maneh is spoken of, and, in a parallel passage, shekels are mentioned, three manehs being represented by 300 shekels, a maneh therefore containing 100 shekels of gold.

3. Josephus states that the Hebrew talent of gold contained 100 minae (λυχρία ἐκ χρυσῶν.... σταθμὸν ἔχουσα μῆνις ἑκατὸν, ὅς Ἑβραίων μὴν καλοῦσι πέντηκα, εἰς δὲ τὴν ἑλληνικὴν μεταβαλλόμενον γλῶσσαν σημαίνει ὀκτώκωτον. Ant. iii. 6, §7).

4. Josephus states that the Hebrew mina of gold was equal to two librae and a half (δύο τεταρτημύρια χρυσῶν, ἐκ μῆνις τριακοντα τεταρτημύνη. ἡ δὲ μῆνις παρ' ἡμῶν ἰσχυρεῖ λίτρα δύο καὶ ἡμισυ. Ant. xiv. 7, §1). Taking the Roman pound at 5050 gra., the maneh of gold would weigh about 12,625 gra.

5. Epiphanius estimates the Hebrew talent at 125 Roman pounds, which, at the value given above, are equal to about 631,250 gra.

6. A difficult passage in Ezekiel seems to give of a maneh of 50 or 60 shekels: "And the shekel [shall be] twenty gerahs: twenty shekels, five and twenty shekels, fifteen shekels, shall be your maneh" (xlv. 12). The ordinary text of the LXX. gives a series of small sums as the Hebrew, though different in the numbers, but the Alex. and Vat. MSS. have 50 for 15 (εἰκοσι δόρα, πέντε σίκλα, πέντε καὶ σίκλοι δέκα, καὶ πενήκοντα σίκλα: ἡ μῆνις ὅρα). The meaning would be, either 50

WEIGHTS AND MEASURES

there were to be three manehs, respectively containing 20, 25, and 15 shekels, or the like, or else that a sum is intended by these numbers $(20+25+15)=60$, or possibly 50. But it must be remembered that this is a prophetic passage.

7. Josephus makes the gold shekel a Daric (*Ant.* iii. 8, §10).

From these data it may be reasonably inferred, (1.) that the Hebrew gold talent contained 100 manehs, each of which again contained 100 shekels of gold, and, basing the calculation on the stated value of the maneh, weighed about 1,262,500 grs., or, basing the calculation on the correspondence of the gold shekel to the Daric, weighed about 1,290,000 grs. ($129 \times 100 \times 100$), the latter being probably nearer the true value, as the $2\frac{1}{2}$ librae may be supposed to be a round sum, and (2.) that the silver talent contained 3000 shekels, and is probably the talent spoken of by Epiphanus as equal to 125 Roman pounds, or 631,250 grs., which would give a shekel of 210.4 grs. It is to be observed that, taking the estimate of Josephus as the basis for calculating the maneh of the former talent, and that of Epiphanus for calculating the latter, their relation is exactly 2 to 1, 50 manehs at $2\frac{1}{2}$ pounds, making 125 pounds. It is therefore reasonable to suppose that two talents of the same system are referred to, and that the gold talent was exactly double the silver talent.

Let us now examine the Jewish coins.

1. The shekels and half-shekels of silver, if we take an average of the heavier specimens of the Maccabean issue, give the weight of the former as about 220 grs. A talent of 3000 such shekels would weigh about 660,000 grs. This result agrees very nearly with the weight of the talent given by Epiphanus.

2. The copper coins are generally without any indications of value. The two heaviest denominations of the Maccabean issue, however, bear the names "half" (חצי), and "quarter" (רביע). M. de Saulcy gives the weights of three "halves" as, respectively, 251.6 grs. (16.3 grammes), 236.2 (15.3), and 219.2 (14.2). In Mr. Wigan's collection are two "quarters," weighing, respectively, 145.2 grs. and 118.9 grs.; the former being, apparently, the one "quarter" of which M. de Saulcy gives the weight as 142. (9.2 grammes). We are unable to add the weights of any more specimens. There is a smaller coin of the same period, which has an average weight, according to M. de Saulcy, of 81.8 grs. (5.3 grammes). If this be the third of the "half," it would give the weight of the latter at 245.4 grs. As this may be thought to be slender evidence, especially so far as the larger coins are concerned, it is important to observe that it is confirmed by the later coins. From the copper coins mentioned above, we can draw up the following scheme, comparing them with the silver coins.

COPPER COINS.		SILVER COINS.	
Average weight.	Supposed weight.	Average weight.	Supposed weight.
Half . 235.4	250	Shekel . . 220	Id.
Quarter 132.0	125	Half-shekel 110	Id.
(Sixth). 81.8	83.3	[Third] . 73.3.	

It is evident from this list that the copper "half" and "quarter" are half and quarter shekels, and are nearly in the relation to the silver like denominations of 2 to 1. But this relation is not exact, and it is therefore necessary to ascertain further, whether the standard of the silver talent can be

WEIGHTS AND MEASURES 1733

raised, if not, whether the gold talent can be more than twice the weight of the silver, and, should this explanation be impossible, whether there is any ground for supposing a third talent with a shekel heavier than two shekels of the silver.

The silver shekel of 220 grs., gives a talent of 660,000 grs.: this is the same as the Aeginetan, which appears to be of Phœnician origin. There is no evidence of its ever having had a higher shekel or didrachm.

The double talent of 1,320,000 grs., gives a Daric of 132 grs., which is only 1 gr. and a small fraction below the standard obtained from the Babylonian talent.

The possibility of a separate talent for copper depends upon the relations of the three metals.

The relation of gold to silver in the time of Herodotus was 1 : 13. The early relation upon which the systems of weights and coins used by the Persian state were founded was 1 : 12. Under the Ptolemies it was 1 : 12.5. The two Hebrew talents, if that of gold were exactly double that of silver, would have been easy for exchange in the relation of 1 : 12, 1 talent of gold corresponding to 24 talents of silver. The relation of silver to copper can be best conjectured from the Ptolemaic system. If the Hebrews derived this relation from any neighbouring state, Egypt is as likely to have influenced them as Syria; for the silver coinage of Egypt was essentially the same as that of the Hebrews, and that of Syria was different. Besides, the relation of silver and copper must have been very nearly the same in Syria and Palestine as in Egypt during the period in which the Jewish coinage had its origin, on account of the large commerce between those countries. It has, we venture to think, been satisfactorily shown by Letronne that the relation of silver to copper under the Ptolemies was 1 : 60, a mina of silver corresponding to a talent of copper. It has, however, been supposed that the drachm of copper was of the same weight as that of gold and silver, an opinion which we have proved to be incorrect in an earlier part of this article (§II. 3). An important question now arises. Is the talent of copper, when spoken of in relation to that of silver, a talent of weight or a talent of account?—in other words, is it of 6000 actual drachms of 140 grs. each, or of 6000 drachms of account of about 110 grs. or a little less? This question seems to be answered in favour of the former of the two replies by the facts, (1) that the copper coins being struck upon the old Egyptian weight, it is incredible that so politic a prince as the first Ptolemy should have introduced a double system of reckoning, which would have given offence and occasioned confusion; (2) that the ancient Egyptian name of the monetary unit became that of the drachm, as is shown by its being retained with the senses drachm and didrachm by the Copts (§II. 3); and had there been two didrachms of copper, that on the Egyptian system would probably have retained the native name. We are of opinion, therefore, that the Egyptian copper talent was of 6000 copper drachms of the weight of 140 grs. each. But this solution still leaves a difficulty. We know that the relation of silver to copper was 1 : 60 in drachms, though 1 : 78 or 80 in weight. In a modern state the actual relation would force itself into the position of the official relation, and 1 : 60 would become 1 : 78 or 80; but this was not necessarily the case in an ancient country in so peculiar a condition as Egypt. Alexandria and a

Independent interest of its own, demands a few prefatory remarks, viz., the origin of these measures, and their relation to those of surrounding countries. The measures of length are chiefly derived from the members of the human body, which are happily adapted to the purpose from the circumstance that they exhibit certain definite proportions relatively to each other. It is unnecessary to assume that a system founded on such a basis was the invention of any single nation: it would naturally be adopted by all in a rude state of society. Nevertheless, the particular parts of the body selected for the purpose may form more or less a connecting link between the systems of various nations. It will be observed in the sequel that the Hebrews restricted themselves to the fore-arm, to the exclusion of the foot and also of the pace, as a proper measure of length. The adoption of foreign names is also worthy of remark, as showing a probability that the measures themselves were borrowed. Hence the occurrence of words of Egyptian extraction, such as *Am* and *ephah*, and probably *ammah* (for "cubit"), inclines us to seek for the origin of the Hebrew scales both of length and capacity in that quarter. The measures of capacity, which have no such natural standard as those of length, would more probably be settled by conventional usage, and the existence of similar measures, or of a similar scale of measures in different nations, would furnish a strong probability of their having been derived from some common source. Thus the coincidence of the Hebrew bath being subdivided into 72 logs, and the Athenian *metretres* into 72 *sestae*, can hardly be the result of chance; and, if there further exists a correspondence between the ratios that the weights bear to the measures, there would be still further evidence of a common origin. Boeckh, who has gone fully into this subject in his *Metrolologische Untersuchungen*, traces back the whole system of weights and measures prevalent among the civilized nations of antiquity to Babylon (p. 39). The scanty information we possess relative to the Hebrew weights and measures as a connected system, precludes the possibility of our assigning a definite place to it in ancient metrology. The names already referred to lead to the inference that Egypt rather than Babylonia was the quarter whence it was derived, and the identity of the Hebrew with the Athenian scales for liquids furnishes strong evidence that these had a community of origin. It is important, however, to observe in connexion with this subject, that an identity of ratios does not involve an identity of absolute quantities, a distinction which very possibly escaped the notice of early writers, who were not unnaturally led to identify the measures in their absolute values, because they held the same relative positions in the several scales.

We divide the Hebrew measures into two classes, according as they refer to length or capacity, and subdivide each of these classes into two, the former into measures of length and distance, the latter into liquid and dry measures.

1. Measures of length.

(1.) The denominations referring to length were

אָמָה.

כַּמָּה.

רֶמֶס.

אָמָה. This term is generally referred to a Coptic origin, being derived from a word, *mahe* or *mahi*, signifying the "fore-arm," which with the article prefixed becomes *ammah* (Boeckh, p. 265). Gesenius, however, refers it to the Hebrew word signifying "mother," as though the fore-

arm were in some sense the "mother of the arm" (The p. 110).

derived for the most part from the *am* and *am*. We may notice the following four as derived from this source:—(a) The *elba*,^a or finger's breadth, mentioned only in Jer. li. 21. (b) The *tephach*,^b or hand breadth (Ex. xiv. 25; 1 K. vii. 26; 2 Chr. iv. 5), applied metaphorically to a short period of time in Ps. xxxix. 5. (c) The *sevet*,^c or span, the distance between the extremities of the thumb and the little finger in the extended hand (Ex. xxviii. 16; 1 Sam. xvii. 4; Ex. xliii. 13), applied generally to describe any small measure in Is. xl. 12. (d) The *ammah*,^d or cubit, the distance from the elbow to the extremity of the middle finger. This occurs very frequently in the Bible in relation to buildings, such as the Ark (Gen. vi. 15), the Tabernacle (Ex. xxvi., xxvii.), and the Temple (1 K. vi. 2; Ex. xl. xli.), as well as in relation to man's stature (1 Sam. xvii. 4; Matt. vi. 27), and other objects (Esth. v. 14; Zech. v. 2). In addition to the above we may notice:—(e) The *gomed*,^e lit. a rod, applied to Egion's dirk (Judg. iii. 16). Its length is uncertain, but it probably fell below the cubit, with which it is identified in the A. V. (f) The *káneh*,^f or reed (compare our word "canoe" for measuring buildings on a large scale (Ex. xl. 5-8, xli. 8, xlii. 16-19).

Little information is furnished by the Bible itself as to the relative or absolute lengths described under the above terms. With the exception of the notice that the reed equals six cubits (Ex. xl. 5), we have no intimation that the measures were combined in anything like a scale. We should, indeed, infer the reverse from the circumstance that Jeremiah speaks of "four fingers," where according to the scale, he would have said "a hand breadth;" that in the description of Goliath's height (1 Sam. xvii. 4), the expression "six cubits and a span," is used instead of "six cubits and a half;" and that Ezekiel mentions "span" and "half a cubit" in close juxtaposition (xliii. 13, 17), as though they bore no relation to each other either in the ordinary or the long cubit. That the denominations held a certain ratio to each other, arising out of the proportions of the members in the body, could hardly escape notice; but it does not follow that they were ever worked up into an artificial scale. The most important conclusion to be drawn from the Biblical notices, is to the effect that the cubit, which may be regarded as the standard measure, was of varying length, and that, in order to secure accuracy, it was necessary to define the kind of cubit intended, the result being that the other denominations, if combined in a scale, would vary in like ratio. Thus in Deut. iii. 11, the cubit is specified to be "after the cubit of a man;" in 2 Chr. iii. 3 "after the first," or rather "after the older measure;" and in Ex. xli. 8, "a great cubit," or literally "a cubit to the joint," which is further defined in Ex. xli. 5 to be "a cubit and an hand breadth." These expressions involve one of the most knotty points of Hebrew archaeology, viz., the number and the respective lengths of the Scriptural cubits. That there was more than one cubit, is clear; but whether there were three, or only two, is not so clear. We shall have occasion to refer to this topic again

arm were in some sense the "mother of the arm" (The p. 110).

אָמָה.

כַּמָּה.

^a That the expression אֶלְבָּא applies to breadth of time, as well as of order, is clear from many passages, e. g., 2 K. xvii. 34; Ex. iii. 12; Hag. ii. 3.

WEIGHTS AND MEASURES

in Judaea, as the oldest Greek and Phœnician system, and as the Jewish system. As the Jewish system, it must have been of far greater antiquity than the date of the earliest coin struck upon it. The weight according to which the ransom was first paid must have been retained as the fixed legal standard. It may seem surprising, when we remember the general tendency of money to depreciate, of which such instances as those of the Athenian silver and the English gold will occur to the reader, that this system should have been preserved, by any but the Hebrews, at its full weight, from the time of the Exodus to that of the earliest Greek coins upon the Aeginetan standard, a period probably of not much less than a thousand years; but we may cite the case of the solidus of the Roman and Byzantine emperors, which retained its weight from its origination under Constantine the Great until the fall of Constantinople, and its purity from the time of Constantine until that of Alexius Comnenus; and again the long celebrity of the sequin of Venice and the florin of Florence for their exact weight. It must be remembered, moreover, that in Phœnicia, and originally in Greece, this system was that of the great trading nation of antiquity, who would have had the same interest as the Venetians and Florentines in maintaining the full monetary standard. There is a remarkable evidence in favour of the antiquity of this weight in the circumstance that, after it had been depreciated in the coins of the kings and cities of Macedonia, it was restored in the silver money of Philip II. to its full monetary standard.

The Hebrew system had two talents for the precious metals in the relation of 2 : 1. The gold talent, apparently not used elsewhere, contained 100 manehs, each of which contained again 100 shekels, there being thus 10,000 of these units, weighing about 132 grs. each, in the talent.

The silver talent, also known as the Aeginetan, contained 3000 shekels, weighing about 220 grs. each. One gold talent appears to have been equal to 24 of these. The reason for making the talent of gold twice that of silver was probably merely for the sake of distinction.

The Babylonian talent, like the Hebrew, consisted of two systems, in the relation of 2 to 1, upon one standard. It appears to have been formed from the Hebrew by reducing the number of units from 10,000 to 7200. The system was altered by the maneh being raised so as to contain 120 instead of 100 units, and the talent lowered so as to contain 60 instead of 100 manehs. It is possible that this talent was originally of silver, as the exchange, in their common unit, with the Hebrew gold, in the relation of 1 : 12, would be easy, 6 units of the gold talent passing for 72 of the silver, so that 10 gold units would be equal to a silver maneh, which may explain the reason of the change in the division of the talent.

The derivation, from the lighter Babylonian talent, of the Euboic talent, is easily ascertained. Their relation is that of 6 : 5, so that the whole talents could be readily exchanged in the relation of 12 : 1; and the units being common, their exchange would be even more easy.

The Egyptian talent cannot be traced to any other. Either it is an independent system, or, perhaps, it is the oldest talent and parent of the rest. The Hebrew copper talent is equally obscure. Perhaps it is the double of the Persian gold talent.

WEIGHTS AND MEASURES 1735

The Aeginetan talent, as we have seen, was the same as the lesser or silver Hebrew talent. Its introduction into Greece was doubtless due to the Phœnicians. The Attic Commercial was a degradation of this talent, and was itself further degraded to form the Attic Solonian. The Aeginetan talent thus had five successive standards (1, Original Aeginetan; 2, Attic Commercial; 3, Id. lowered; 4, Attic Solonian; 5, Id. lowered) in the following relations:—

I.	II.	III.	IV.	V.
6	: 5.44	: 5	: 3.9	: 3.6
	6		: 4.3	
		6	:	4.3

The first change was probably simply a degradation. The second may have been due to the influence of a Græco-Asiatic talent of Cyzicus or Phœcæa, of which the stater contained about 180 grs. of gold, although weighing, through the addition of 80 grs. of silver, about 240 grs., thus implying a talent in the relation to the Aeginetan of about 5 : 6. Solon's change has been hitherto an unsolved enigma. The relation of the two Attic talents is so awkward that scarcely any division is common to them in weight, as may be inferred from the data in the table of Athenian weights that we have given. Had the heavier talent been divided into quarters, and the lighter into thirds, this would not have been the case. The reason of Solon's change is therefore to be looked for in the influence of some other talent. It has been supposed that this talent was the Euboic, but this theory is destroyed by our discovery that the Attic standard of the oldest coins is below the weight-standard of about the time of the Peloponnesian War, and thus that the reduction of Solon did not bring the weights down to the Euboic standard. If we look elsewhere we see that the heavier Solonian weight is almost the same in standard as the Egyptian, the didrachm of the former exceeding the unit of the latter by no more than about 3 grs. This explanation is almost proved to be the true one by the remarkable fact that the Attic Solonian talent, apparently unlike all other Greek talents, had a double talent, which would give a drachm instead of a didrachm, equivalent to the Egyptian unit. At the time of Solon nothing would be more likely than such an Egyptian influence as this explanation implies. The commercial relations of Egypt and Greece, through Naucratis, were then active; and the tradition or myth of the Egyptian origin of the Athenians was probably never stronger. The degradation of the Attic Solonian talent was no doubt effected by the influence of the Euboic, with the standard of which its lower standard is probably identical.

The principal authorities upon this subject are:—Boeckh's *Metrologische Untersuchungen*; Monissen's *Geschichte des Iönischen Münzwesens*; and Hussey's *Ancient Weights*. Don V. Vazquez Queipo's *Essai sur les Systèmes Métriques et Monétaires des Anciens Peuples* also contains much information. The writer must express his obligations to Mr. de Salis, Mr. Vaux, and Mr. E. Wigan, and more especially to his colleagues Mr. Madden and Mr. Coxe, for valuable assistance. [R. S. P.]

II. MEASURES.

The most important topic to be discussed in connexion with the subject of the Hebrew measures is their relative and absolute value. Another topic, of secondary importance perhaps, but possessing a

as in this respect contrast with the Mosaic cubit, which, according to Rabbinical authorities, was divided into 24 digits. There is some difficulty in reconciling this discrepancy with the almost certain fact of the derivation of the cubit from Egypt. It has been generally surmised that the Egyptian cubit was of more than one length, and that the sepulchral measures exhibit the shorter as well as the longer by special marks. Wilkinson denies the existence of more than one cubit (*Anc. Eg.* ii. 257-259), apparently on the ground that the total lengths of the measures do not materially vary. It may be conceded that the measures are intended to represent the same length, the variation being simply the result of mechanical inaccuracy; but this does not decide the question of the double cubit, which rather turns on the peculiarities of notation observable on these measures. For a full discussion of this point we must refer the reader to Thenius's essay in the *Theologische Studien und Kritiken* for 1846, pp. 297-342. Our limits will permit only a brief statement of the facts of the case, and of the views expressed in reference to them. The most perfect of the Egyptian cubit measures are those preserved in the Turin and Louvre Museums. These are unequally divided into two parts, the one on the right hand containing 15, and the other 13 digits. In the former part the digits are subdivided into aliquot parts from $\frac{1}{2}$ to $\frac{1}{16}$, reckoning from right to left. In the latter part the digits are marked on the lower edge in the Turin, and on the upper edge in the Louvre measure. In the Turin measure the three left-hand digits exceed the others in size, and have marks over them indicating either fingers or the numerals 1, 2, 3. The four left-hand digits are also marked off from the rest by a double stroke, and are further distinguished by hieroglyphic marks supposed to indicate that they are digits of the old measure. There are also special marks between the 6th and 7th, and between the 10th and 11th digits of the left-hand portion. In the Louvre cubit two digits are marked off on the lower edge by lines running in a slightly transverse direction, thus producing a greater length than is given on the upper side. It has been found that each of the three above specified digits in the Turin measure = $\frac{1}{3}$ of the whole length, less these three digits; or, to put it in another form, the four left-hand digits = $\frac{1}{2}$ of the 25 right-hand digits; also that each of the two digits in the Louvre measure = $\frac{1}{4}$ of the whole length, less these two digits; and further, that twice the left half of either measure = the whole length of the Louvre measure, less the two digits. Most writers on the subject agree in the conclusion that the measures contain a combination of two, if not three, kinds of cubit. Great difference of opinion, however, is manifested as to particulars. Thenius makes the difference between the royal and old cubits to be no more than two digits, the average length of the latter being 484.289¹ millimètres, or 19.066 inches, as compared with 523.524 millimètres, or 20.611 inches and 523 millimètres, or 20.591 inches, the lengths of the Turin and Louvre measures respectively. He accounts for the additional two digits as originating in the practice of placing the two fingers crossways at the end of the arm and hand used in measuring,

¹ The precise amount of 484.289 is obtained by taking the mean of the four following amounts:— $\frac{25}{24}$ of 523.524, the total length of the Turin measure, = 486.130; twice the left-hand division of the same measure, = 480.792;

so as to mark the spot up to which the cloth or other article has been measured. He further finds in the notation of the Turin measure, indications of a third or ordinary cubit 23 digits in length. Another explanation is that the old cubit consisted of 24 old or 25 new digits, and that its length was 462 millimètres, or 18.189 inches; and again, others put the old cubit at 24 new digits, as marked on the measures. The relative proportions of the two would be, on these several hypotheses, as 26 : 26, as 28 : 25, and as 28 : 24.

The use of more than one cubit appears to have also prevailed in Babylon, for Herodotus states that the "royal" exceeded the "moderate" cubit (*ῥῆγος μέτριος*) by three digits (i. 178). The appellation "royal," if borrowed from the Babylonians, would itself imply the existence of another; but it is by no means certain that this other was the "moderate" cubit mentioned in the text. The majority of critics think that Herodotus is there speaking of the ordinary Greek cubit (Boeckh, p. 214), though the opposite view is affirmed by Grote in his notice of Boeckh's work (*Class. Mus.* i. 28). Even if the Greek cubit be understood, a further difficulty arises out of the uncertainty whether Herodotus is speaking of digits as they stood on the Greek or on the Babylonian measure. In the one case the proportions of the two would be as 8 : 7, in the other case as 9 : 8. Boeckh adopts the Babylonian digits (without good reason, we think), and estimates the Babylonian royal cubit at 234.2743 Paris lines, or 20.806 inches (p. 219). A greater length would be assigned to it according to the data furnished by M. Oppert, as stated in Rawlinson's *Herod.* i. 315; for if the cubit and foot stood in the ratio of 5 : 3, and if the latter contained 15 digits, and had a length of 315 millimètres, then the length of the ordinary cubit would be 525 millimètres, and of the royal cubit, assuming, with Mr. Grote, that the cubits in each case were Babylonian, 588 millimètres, or 23.149 inches.

Reverting to the Hebrew measures, we should be disposed to identify the *new* measure implied in 2 Chr. iii. 3 with the full Egyptian cubit; the "old" measure and Ezekiel's "cubit with the lesser one, either of 26 or 24 digits; and the "cubit of a man" with the third one of which Thenius speaks. Boeckh, however, identifies the Mosaic measure with the full Egyptian cubit, and accounts for the difference in the number of digits on the hypothesis that the Hebrews substituted a division into 24 for that into 28 digits, the size of the digits being of course increased (pp. 266, 267). With regard to the Babylonian measure, it seems highly improbable that either the ordinary or the royal cubit could be identified with Ezekiel's short cubit (as Rosenmüller thinks), seeing that its length on either of the computations above offered exceeded that of the Egyptian cubit.

In the Mishnah the Mosaic cubit is defined to be one of six palms (*Celim.* 17, §10). It is termed the moderate¹ cubit, and is distinguished from a lesser cubit of five palms on the one side (*Celim.* *ib.*), and on the other side from a larger one, consisting, according to Bartenora (*in Cel.* 17, §9), of six palms and a digit. The palm consisted, accord-

the length of the 26 digits on the Louvre measure, = 460.376; and twice the left-hand division of the same = 486.560.

¹ קוֹמָדוּתָא "א."

WEIGHTS AND MEASURES

ing to Maimonides (*ibid.*), of four digits; and the digit, according to Arias Montanus (*Ant.* p. 113), of four barleycorns. This gives 144 barleycorns as the length of the cubit, which accords with the number assigned to the *cubitus justus et mediocris* of the Arabians (Boeckh, p. 246). The length of the Mosaic cubit, as computed by Thenius (after several trials with the specified number of barleycorns of middling size, placed side by side), is 214.512 Paris lines, or 19.0515 inches (*St. u. Kr.* p. 110). It seems hardly possible to arrive at any very exact conclusion by this mode of calculation. Eissenschmid estimated 144 barleycorns as equal to 238.35 Paris lines (Boeckh, p. 269), perhaps from having used larger grains than the average. The writer of the article on "Weights and Measures" in the *Penny Cyclopaedia* (xviii. 196) gives, as the result of his own experience, that 38 average grains make up 5 inches, in which case $144 = 18.947$ inches; while the length of the Arabian cubit referred to is computed at 213.058 Paris lines (Boeckh, p. 247). The Talmudists state that the Mosaic cubit was used for the edifice of the Tabernacle and Temple, and the lesser cubit for the vessels thereof.¹ This was probably a fiction; for the authorities were not agreed among themselves as to the extent to which the lesser cubit was used, some of them restricting it to the golden altar, and parts of the brazen altar (Mishnah, *Cel.* 17, §10). But this distinction, fictitious as it may have been, shows that the cubits were not regarded in the light of *sacred* and *profane*, as stated in works on Hebrew archaeology. Another distinction, adopted by the Rabbins in reference to the palm, would tend to show that they did not rigidly adhere to any definite length of cubit: for they recognised two kinds of palms, one wherein the fingers lay loosely open, which they denominated a *smiling* palm; the other wherein the fingers were closely compressed, and styled the *grieving* palm (Carpsov, *Appar.* pp. 674, 676).

The conclusions to be drawn from the foregoing considerations are not of the decisive character that we could wish. For while the collateral evidence derived from the practice of the adjacent countries and from later Jewish authorities favours the idea that the Biblical cubit varied but little from the length usually assigned to that measure, the evidence of the Bible itself is in favour of one considerably shorter. This evidence is, however, of so uncertain a character, turning on points of criticism and on brief notices, that we can hardly venture to adopt it as our standard. We accept therefore, with reservation, the estimate of Thenius, and from the cubit we estimate the absolute length of the other denominations according to the proportions existing between the members of the body, the cubit equaling two spans (compare Ex. xxv. 3, 10, with Joseph. *Ant.* iii. 6, §§5, 6), the span three palms, and the palm four digits.

					Inches.

¹ Hence they were denominated הַבֵּינִי הַבְּנִי "cubit of the building," אֵל הַכֵּלִים "cubit of the vessels."

² The term "acre" occurs in the A. V. as the equivalent for *madmah* (מַדְמָה) in 1 Sam. xiv. 14, and for *zomed* (צוֹמֵד); in Is. v. 10. The latter term also occurs

WEIGHTS AND MEASURES 1736

Land and area were measured either by the cubit (Num. xxxv. 4, 5; Ex. xl. 27) or by the reed (Ex. xlii. 20, xliii. 17, xlv. 2, xlviii. 20; Rev. xxi. 16). There is no indication in the Bible of the use of a square measure by the Jews.³ Whenever they wished to define the size of a plot, they specified its length and breadth, even if it were a perfect square, as in Ex. xlviii. 16. The difficulty of defining an area by these means is experienced in the interpretation of Num. xxxv. 4, 5, where the suburbs of the Levitical cities are described as reaching outward from the wall of the city 1000 cubits round about, and at the same time 2000 cubits on each side from without the city. We can hardly understand these two measurements otherwise than as applying, the one to the width, the other to the external boundary of the suburb, the measurements being taken respectively perpendicular and parallel to the city walls. But in this case it is necessary to understand the words rendered "from without the city," in ver. 5, as meaning to the *exclusion* of the city, so that the length of the city wall should be added in each case to the 2000 cubits. The result would be that the size of the areas would vary, and that where the city walls were unequal in length, the sides of the suburb would be also unequal. For instance, if the city wall was 500 cubits long, then the side of the suburb would be 2500 cubits; if the city wall were 1000 cubits, then the side of the suburb would be 3000 cubits. Assuming the existence of two towns, 500 and 1000 cubits square, the area of the suburb would in the former case = 6,000,000 square cubits, and would be 24 times the size of the town; while in the latter case the suburb would be 6,000,000 square cubits, and only 8 times the size of the town. This explanation is not wholly satisfactory, on account of the disproportion of the suburbs as compared with the towns: nevertheless any other explanation only exaggerates this disproportion. Keil, in his comment on Josh. xiv. 4, assumes that the city wall was in all cases to be regarded as 1000 cubits long, which with the 1000 cubits outside the wall, and measured in the same direction as the wall, would make up the 2000 cubits, and would give to the side of the suburb in every case a length of 3000 cubits. The objection to this view is that there is no evidence as to a uniform length of the city walls, and that the suburb might have been more conveniently described as 3000 cubits on each side. All ambiguity would have been avoided if the size of the suburb had been decided either by absolute or relative acreage; in other words, if it were to consist in all cases of a certain fixed acreage outside the walls, or if it were made to vary in a certain ratio to the size of the town. As the text stands, neither of these methods can be deduced from it.

(2.) The measures of distance noticed in the Old Testament are the three following:—(a) The *tsa'ad*,⁴ or pace (2 Sam. vi. 13), answering generally to our yard. (b) The *Cibrath Adrets*,⁵ rendered in the A. V. "a little way" or "a little piece of ground" (Gen. xxxv. 16, xlviii. 7; 2 K. v. 19). The expression appears to indicate some definite distance, but we are unable to state with precision what that distance was. The LXX. retains the Hebrew word

in the passage first quoted, and would with more consistency be rendered *acre* instead of "yoke." It means such an amount of land as a yoke of oxen יֶדֶם *lad* plough in a day. *Madmah* means a *furrow*.

³ צֶדֶר.

⁴ בִּרְתָּן הָאֶרֶץ.

in the form *καρπάδι*, as though it were the name of a place, adding in Gen. xlviii. 7 the words *καὶ τὰς ἡμετέρας*, which is thus a second translation of the expression. If a certain distance was intended by this translation, it would be either the ordinary length of a race-course, or such a distance as a horse could travel without being over-fatigued, in other words, a stage. But it probably means a locality, either a race-course itself, as in 3 Macc. iv. 11, or the space outside the town walls where the race-course was usually to be found. The LXX. gives it again in Gen. xlviii. 7 as the equivalent for Ephraim. The Syriac and Persian versions render *cibratā* by *parasang*, a well-known Persian measure, generally estimated at 30 stades (Herod. ii. 6, v. 53), or from $3\frac{1}{2}$ to 4 English miles, but sometimes at a larger amount, even up to 60 stades (Strab. xi. 518). The only conclusion to be drawn from the Bible is that the *cibratā* did not exceed and probably equalled the distance between Bethlehem and Rachel's burial-place, which is traditionally identified with a spot $1\frac{1}{2}$ mile north of the town. (c) The *derec yām*,⁸ or *mahālac yām*,⁹ a day's journey, which was the most usual method of calculating distances in travelling (Gen. xxx. 36, xxxi. 23; Ex. iii. 18, v. 3; Num. x. 33, xi. 31, xxiii. 8; Deut. i. 2; 1 K. xix. 4; 2 K. iii. 9; Jon. iii. 3; 1 Macc. v. 24, 28, vii. 45; Tob. vi. 1), though but one instance of it occurs in the New Testament (Luke ii. 44). The distance indicated by it was naturally fluctuating according to the circumstances of the traveller or of the country through which he passed. Herodotus variously estimates it at 200 and 150 stades (iv. 101, v. 53); Marinus (*ap. Ptol.* i. 11) at 150 and 172 stades; Pausanias (x. 33, §2) at 150 stades; Strabo (i. 35) at from 250 to 300 stades; and Vegetius (*De Re Mil.* i. 11) at from 20 to 24 miles for the Roman army. The ordinary day's journey among the Jews was 30 miles; but when they travelled in companies only 10 miles: Neapolis formed the first stage out of Jerusalem, according to the former, and Beeroth according to the latter computation (Lightfoot, *Exerc. in Luc.* ii. 44). It is impossible to assign any distinct length to the day's journey: Jahn's estimate of 33 miles, 172 yards, and 4 feet, is based upon the false assumption that it bore some fixed ratio to the other measures of length.

In the Apocrypha and New Testament we meet with the following additional measures:—(d) The Sabbath-day's journey,¹⁰ already discussed in a separate article. (e) The *stadion*,¹¹ or "furlong," a Greek measure introduced into Asia subsequently to Alexander's conquest, and hence first mentioned in the Apocrypha (2 Macc. xi. 5, xii. 9, 17, 29), and subsequently in the New Testament (Luke xxiv. 13; John vi. 19, xi. 18; Rev. xiv. 20, xxi. 16). Both the name and the length of the stade were borrowed from the footrace course at Olympia. It equalled 600 Greek feet (Herod. ii. 149), or 125 Roman paces (Plin. ii. 23), or 606 $\frac{1}{2}$ feet of our measure. It thus falls below the furlong by 53 $\frac{1}{2}$ feet. The distances between Jerusalem and the places Bethany, Jamnia, and Scythopolis, are given with tolerable exactness at 15 stades (John xi. 18),

WEIGHTS AND MEASURES

240 stades (2 Macc. xii. 9), and 600 stades (2 Macc. xii. 29). In 2 Macc. xi. 5 there is an evident error either of the author or of the text, in respect to the position of Bethsura, which is given as only 5 stades from Jerusalem. The Talmudists describe the *stade* under the term *rdā*,¹² and regarded it as equal to 625 feet and 125 paces (Carpzov, *Appar.* p. 679). (f) The *mile*,¹³ a Roman measure, equalling 1000 Roman paces, 8 stades, and 1618 English yards [MILE].

2. Measures of capacity.

The measures of capacity for liquids were:—(a) The *log*,¹⁴ (Lev. xiv. 10, &c.), the name originally signifying a "basin." (b) The *hin*,¹⁵ a name of Egyptian origin, frequently noticed in the Bible (Ex. xxix. 40, xxx. 24; Num. xv. 4, 7, 9; Ex. iv. 11, &c.). (c) The *bath*,¹⁶ the name meaning "measured," the largest of the liquid measures (1 K. vii. 26, 38; 2 Chr. ii. 10; Ex. vii. 23; Is. v. 10). With regard to the relative values of these measures we learn nothing from the Bible, but we gather from Josephus (*Ant.* iii. 8, §3) that the bath contained 6 hins (for the bath equalled 72 *sestia* or 12 *choets*, and the hin 2 *choets*), and from the Rabbioists that the hin contained 12 *logs* (Carpzov, *Appar.* p. 685). The relative values therefore stand thus:—

Log	
12	Hin
72	6 Bath

The dry measure contained the following denominations:—(a) The *cab*,¹⁷ mentioned only in 2 K. vi. 25, the name meaning literally *hollow* or *concave*. (b) The *omer*,¹⁸ mentioned only in Ex. xvi. 16-36. The same measure is elsewhere termed *isadrōn*,¹⁹ as being the tenth part of an ephah (comp. Ex. xvi. 36), whence in the A. V. "tenth deal" (Lev. xiv. 10, xlii. 13; Num. xv. 4, &c.). The word *omer* implies a *heap*, and secondarily a *sheaf*. (c) The *seah*,²⁰ or "measure," this being the etymological meaning of the term, and appropriately applied to it, inasmuch as it was the ordinary measure for household purposes (Gen. xlviii. 6; 1 Sam. xiv. 18; 2 K. vii. 1, 16). The Greek equivalent occurs in Matt. xiii. 33; Luke xiii. 21. The *seah* was otherwise termed *shālshā*,²¹ as being the third part of an ephah (Is. xl. 12; Ps. lxxx. 5). (d) The *ephah*,²² a word of Egyptian origin, and of frequent recurrence in the Bible (Ex. xvi. 36; Lev. v. 11, vi. 20; Num. v. 15, xviii. 5; Judg. vi. 19; Ruth ii. 17; 1 Sam. i. 24, xvii. 17; Ex. xlv. 11, 13, 14, xlv. 5, 7, 11, 14). (e) The *letheh*,²³ or "hath-homer," literally meaning what is *poured out*: it occurs only in Hos. iii. 2. (f) The *homer*, meaning *heap* (Lev. xvii. 16; Num. xi. 32; Is. v. 10; Ex. xlv. 13). It is elsewhere termed *cor*,²⁴ from the circular vessel in which it was measured (1 K. iv. 22, v. 11; 2 Chr. ii. 10, xvii. 5; Ex. vii. 22; Ex. xlv. 14). The Greek equivalent occurs in Luke xvi. 7.

The relative proportions of the dry measures are to a certain extent expressed in the names *isadrōn*, meaning a tenth, and *shālshā*, a third. In addition we have the Biblical statement that the *omer*

דָּרָךְ יוֹם.	מִהְלַךְ יוֹם.

WEIGHTS AND MEASURES

is the tenth part of the ephah (Ex. xvi. 36), and that the ephah was the tenth part of a homer, and corresponded to the bath in liquid measure (Ex. xiv. 11). The Rabbins supplement this by stating that the ephah contained three seahs, and the seah six eubs (Carpsow, p. 683). We are thus enabled to draw out the following scale of relative values:—

Cab	Omer	Seah	Ephah	Homer
1½	3½	3	10	
6	10	3	10	
18	10	3	10	
180	100	30	10	

The above scale is constructed, it will be observed, on a combination of decimal and duodecimal ratios, the former prevailing in respect to the omer, ephah, and homer, the latter in respect to the cab, seah, and ephah. In the liquid measure the duodecimal ratio alone appears, and hence there is a fair presumption that this was the original, as it was undoubtedly the most general, principle on which the scales of antiquity were framed (Boeckh, p. 38). Whether the decimal division was introduced from some other system, or whether it was the result of local usage, there is no evidence to show.

The absolute values of the liquid and dry measures form the subject of a single inquiry, inasmuch as the two scales have a measure of equal value, viz. the bath and the ephah (Ex. xiv. 11): if either of these can be fixed, the conversion of the other denominations into their respective values readily follows. Unfortunately the data for determining the value of the bath or ephah are both scanty and conflicting. Attempts have been made to deduce the value of the bath from a comparison of the dimensions and the contents of the molten sea as given in 1 K. vii. 23-26. If these particulars had been given with greater accuracy and fulness, they would have furnished a sound basis for a calculation; but, as the matter now stands, uncertainty attends every statement. The diameter is given as 10 cubits, and the circumference as 30 cubits, the diameter being stated to be "from one brim to the other." Assuming that the vessel was circular, the proportions of the diameter and circumference are not sufficiently exact for mathematical purposes, nor are we able to decide whether the diameter was measured from the internal or the external edge of the vessel. The shape of the vessel has been variously conceived to be circular and polygonal, cylindrical and hemispherical, with perpendicular and with bulging sides. The contents are given as 2000 baths in 1 K. vii. 26, and 3000 baths in 2 Chr. iv. 5, the latter being probably a corrupt text. Lastly, the length of the cubit is undefined, and hence every estimate is attended with suspicion. The conclusions drawn have been widely different, as might be expected. If it be assumed that the form of the vessel was cylindrical (as the description *prind facie* seems to imply), that its clear diameter was 10 cubits of the value of 19·0515 English inches each, and that its full contents were 2000 baths, then the value of the bath would be 4·8965 gallons; for the contents of the vessel would equal 2,715,638 cubic inches, or 9,793 gallons. If, however, the statement of Josephus (*Ant.* viii. 3, §5), as to the hemispherical form of the vessel, be adopted, then the estimate would be reduced. Saugy, as quoted by Boeckh (p. 261), on this hypothesis calculates the value of the bath at

WEIGHTS AND MEASURES 1741

18·086 French litres, or 3·9807 English gallons. If, further, we adopt Saalschütz's view as to the length of the cubit, which he puts at 15 Dresden inches at the highest, the value of the bath will be further reduced, according to his calculation, to 10½ Prussian quarts, or 2·8057 English gallons; while at his lower estimate of the cubit at 12 inches, its value would be little more than one-half of this amount (*Archäol.* ii. 171). On the other hand, if the vessel bulged, and if the diameter and circumference were measured at the neck or narrowest part of it, space might be found for 2000 or even 3000 baths of greater value than any of the above estimates. It is therefore hopeless to arrive at any satisfactory conclusion from this source. Nevertheless we think the calculations are not without their use, as furnishing a certain amount of presumptive evidence. For, setting aside the theory that the vessel bulged considerably, for which the text furnishes no evidence whatever, all the other computations agree in one point, viz. that the bath fell far below the value placed on it by Josephus, and by modern writers on Hebrew archaeology generally, according to whom the bath measures between 8 and 9 English gallons.

We turn to the statements of Josephus and other early writers. The former states that the bath equals 72 *restas* (*Ant.* viii. 2, §9), that the bin equals 2 Attic *choes* (*ib.* iii. 8, §3, 9, §4), that the seah equals 1½ Italian *modii* (*ib.* ix. 4, §5), that the cor equals 10 Attic *medimni* (*ib.* xv. 9, §2), and that the issaron or omer equals 7 Attic *cotylas* (*ib.* iii. 6, §6). It may further be implied from *Ant.* ix. 4, §4, as compared with 2 K. vi. 25, that he regarded the cab as equal to 4 *restas*. Now, in order to reduce these statements to consistency, it must be assumed that in *Ant.* xv. 9, §2, he has confused the *medimnus* with the *metrétas*, and in *Ant.* iii. 6, §6, the *cotylid* with the *restas*. Such errors throw doubt on his other statements, and tend to the conclusion that Josephus was not really familiar with the Greek measures. This impression is supported by his apparent ignorance of the term *metrétas*, which he should have used not only in the passage above noticed, but also in viii. 2, §9, where he would naturally have substituted it for 72 *restas*, assuming that these were Attic *restas*. Nevertheless his testimony must be taken as decisively in favour of the identity of the Hebrew bath with the Attic *metrétas*. Jerome (*in Matt.* xiii. 33) affirms that the seah equals 1½ *modii*, and (*in Ex.* xiv. 11) that the cor equals 30 *modii*,—statements that are glaringly inconsistent, inasmuch as there were 30 seahs in the cor. The statements of Epiphanius in his treatise *De Mensuris* are equally remarkable for inconsistency. He states (*ii.* 177) that the cor equals 30 *modii*: on this assumption the bath would equal 51 *sartarii*, but he gives only 50 (p. 178): the seah would equal 1 *modius*, but he gives 1½ *modii* (p. 178), or, according to his estimate of 17 *sartarii* to the *modius*, 2½ *sartarii*, though elsewhere he assigns 56 *sartarii* as its value (p. 182): the omer would be 5½ *sartarii*, but he gives 7½ (p. 182), implying 45 *modii* to the cor: and, lastly, the ephah is identified with the Egyptian *artabs* (p. 182), which was either 4½ or 3½ *modii*, according as it was in the old or the new measure, though according to his estimate of the cor it would only equal 3 *modii*. Little reliance can be placed on statements so loosely made, and the question arises whether the identification of the bath with the *metrétas* did not arise

out of the circumstance that the two measures held the same relative position in the scales, each being subdivided into 72 parts, and, again, whether the assignment of 30 *modii* to the cor did not arise out of there being 30 seahs in it. The discrepancies can only be explained on the assumption that a wide margin was allowed for a long measure, amounting to an increase of 50 per cent. This appears to have been the case from the definitions of the seah or *σάρον* given by Hesychius, *μόδιος γάρ μιν, ἕρουν, ἐν ἡμῶν αὐτίκῃ ἰταλικῶν*, and again by Suidas, *μόδιον ὁπερ-πεπληρωμένον, ὅς ἐστιν μύδιον ἑνα καὶ ἡμισυν*. Assuming, however, that Josephus was right in identifying the bath with the *metrétēs*, its value would be, according to Boeckh's estimate of the latter (pp. 261, 278), 1993·95 Paris cubic inches, or 8·7053 English gallons, but according to the estimate of Bertheau (*Gesch.* p. 73) 1985·77 Paris cubic inches, or 8·6696 English gallons.

The Rabbinites furnish data of a different kind for calculating the value of the Hebrew measures. They estimated the log to be equal to six hen eggs, the cubic contents of which were ascertained by measuring the amount of water they displaced (Maimonides, in *Col.* 17, §10). On this basis Thenius estimated the log at 14·088 Paris cubic inches, or ·06147 English gallon, and the bath at 1014·39 Paris cubic inches, or 4·4286 gallons (*St. u. Kr.* pp. 101, 121). Again, the log of water is said to have weighed 108 Egyptian drachmæ,¹ each equalling 61 barleycorns (Maimonides, in *Peah*, 3, §6, ed. Guisius). Thenius finds that 6588 barleycorns fill about the same space as 6 hen eggs (*St. u. Kr.* p. 112). And again, a log is said to fill a vessel 4 digits long, 4 broad, and 2½ high (Maimonides, in *Præf. Menachoth*). This vessel would contain 21·6 cubic inches, or ·07754 gallon. The conclusion arrived at from these data would agree tolerably well with the first estimate formed on the notices of the molten sea.

As we are unable to decide between Josephus and the Rabbinites, we give a double estimate of the various denominations, adopting Bertheau's estimate of the *metrétēs*:-

	(Josephus.)		(Rabbinites.)
	Gallons.		Gallons.
Homer or Cor . . .	86·696	or	44·286
Epah or Bath . . .	8·6696	or	4·4286
Seah	2·8898	or	1·4762
Hin	1·4448	or	·7381
Omer	·8669	or	·4428
Cab	·4818	or	·246
Log	·1204	or	·0615

In the New Testament we have notices of the following foreign measures:—(a) The *metrétēs* = (John ii. 6; A. V. "firkin") for liquids. (b) The *choenix* (Rev. vi. 8; A. V. "measure"), for dry goods. (c) The *sestis*,² applied, however, not to the particular measure so named by the Greeks, but to any small vessel, such as a cup (Mark vii. 4, 8; A. V. "pot"). (d) The *modius*, similarly applied to describe any vessel of moderate dimensions (Matt. v. 15; Mark iv. 21; Luke xi. 33; A. V. "bushel"); though properly meaning a Roman measure, amounting to about a peck.

The value of the Attic *metrétēs* has been already

stated to be 8·6696 gallons, and consequently the amount of liquid in six stone jars, containing on the average 2½ *metrétēs* each, would exceed 110 gallons (John ii. 6). Very possibly, however, the Greek term represents the Hebrew *bath*, and if the bath be taken at the lower estimate assigned to it, the amount would be reduced to about 60 gallons. Even this amount far exceeds the requirements for the purposes of legal purification, the tendency of Pharisaical refinement being to reduce the amount of water to a minimum, so that a quarter of a log would suffice for a person (Mishnah, *Yad.* 1, §1). The question is one simply of archaeological interest as illustrating the customs of the Jews, and does not affect the character of the miracle with which it is connected. The *choenix* was ½ of an Attic *medimnus*, and contained nearly a quart. It represented the usual amount of corn for a day's food, and hence a *choenix* for a penny, or *denarius*, which usually purchased a bushel (*Gen. Fov.* in 81), indicated a great scarcity (Rev. vi. 6).

With regard to the use of fair measures, various precepts are expressed in the Mosaic law and other parts of the Bible (Lev. xix. 35, 36; Dent. xxv. 14, 15; Prov. xx. 10; Ex. xiv. 10), and in all probability standard measures were kept in the Temple, as was usual in the other civilized countries of antiquity (Boeckh, p. 12).

The works chiefly referred to in the present article are the following:—Boeckh, *Metrológicas Untersuchungen*, 1838; *Classical Museum*, vol. i.; *Theologische Studien und Kritiken* for 1845; Mishnah, ed. Surenbuzius; Wilkinson, *Ancient Egyptians*, 2 vols. 1854; Epiphanius, *Opera*, 2 vols. ed. Petavius. [W. L. B.]

WELL. The difference between a well (*Bêr*) and a cistern (*Bôr*) [CISTERN], consists chiefly in the use of the former word to denote a receptacle for water springing up freshly from the ground, while the latter usually denotes a reservoir for rain-water (*Gen.* xxvi. 19, 32; *Prov.* v. 15; *Jek.* iv. 14).

The special necessity of a supply of water (*Josh.* i. 15) in a hot climate has always involved among Eastern nations questions of property of the highest importance, and sometimes given rise to serious contention. To give a name to a well denoted a right of property, and to stop or destroy one care dug was a military expedient, a mark of conquest or an encroachment on territorial right claimed or existing in its neighbourhood. Thus the well Beer-sheba was opened, and its possession attested by a special formality by Abraham (*Gen.* xxi. 30, 31). In the hope of expelling Isaac from their neighbourhood, the Philistines stopped up the wells which had been dug in Abraham's time and called by his name, an encroachment which was stoutly resisted by the followers of Isaac (*Gen.* xixvi. 15-33; see also 2 K. iii. 19; 2 Chr. xxvi. 10; Burckhardt, *Notes*, ii. 185, 194, 204, 276). The Kur'an mentions abandoned wells as signs of desertion (*Sur.* xxi. 1). To acquire wells which they had not themselves dug, was one of the marks of favour foretold to the Hebrews on their entrance into Canaan (*Josh.* vi. 11). To possess one is noticed as a mark of a-

¹ In the table the weight of the log is given as 104 drachms; but in this case the contents of the log are supposed to be wine. The relative weights of water and wine were as 27:26.

dependence (Prov. v. 15), and to abstain from the use of wells belonging to others, a disclaimer of interference with their property (Num. xx. 17, 19, xxi. 22). Similar rights of possession, actual and hereditary, exist among the Arabs of the present day. Wells, Burckhardt says, in the interior of the Desert, are exclusive property, either of a whole tribe, or of individuals whose ancestors dug the wells. If a well be the property of a tribe, the tents are pitched near it, whenever rain-water becomes scarce in the desert; and no other Arabs are then permitted to water their camels. But if the well belongs to an individual, he receives presents from all strange tribes who pass or encamp at the well, and refresh their camels with the water of it. The property of such a well is never alienated; and the Arabs say, that the possessor is sure to be fortunate, as all who drink of the water bestow on him their benedictions (*Notes on Bed. i.* 228, 229; comp. Num. xxi. 17, 18, and Judg. i. 15).

It is thus easy to understand how wells have become in many cases links in the history and landmarks in the topography both of Palestine and of the Arabian Peninsula. The well once dug in the rocky soil of Palestine might be filled with earth or stones, but with difficulty destroyed, and thus the wells of Beersheba, and the well near *Nabulus*, called Jacob's well, are among the most undoubted witnesses of those transactions of sacred history in which they have borne, so to speak, a prominent part. On the other hand, the wells dug in the sandy soil of the Arabian valleys, easily destroyed, but easily renewed, often mark, by their ready supply, the stations at which the Hebrew pilgrims slaked their thirst, or, as at Marah, were disappointed by the bitterness of the water. In like manner the stations of the Mohammedan pilgrims from Cairo and Damascus to Mecca (the Hadj route) are marked by the wells (Robinson, l. 66, 69, 204, 205, ii. 283; Burckhardt, *Syria*, 318, 372, 474; App. III. 656, 660; Shaw, *Trav.* 314; Niebuhr, *Descrip. de l'Ar.*, 347, 348; Wellsted, *Trav.* ii. 40, 43, 64, 457, App.).

Wells in Palestine are usually excavated from the solid limestone rock, sometimes with steps to descend into them (Gen. xxiv. 16; Burckhardt, *Syria*, p. 232; *Col. Ch. Chron.* 1858, p. 470). The brims are furnished with a curb or low wall of stone, bearing marks of high antiquity in the furrows worn by the ropes used in drawing water (Rob. i. 204). This curb, as well as the stone cover, which is also very usual, agrees with the directions of the Law, as explained by Philo and Josephus, viz. as a protection against accident (Ex. xxi. 33; Joseph. *Ant.* iv. 8, §37; Philo, *De Spec. Leg.* iii. 27, ii. 324, ed. Mangey; Maundrell, in *E. Trav.* 435). It was on a curb of this sort that our Lord sat when He conversed with the woman of Samaria (John iv. 6), and it was this, the usual stone cover, which the woman placed on the mouth of the well at Bahurim (2 Sam. xvii. 19), where A. V. weakens the sense by omitting the article. Sometimes the wells are covered with cupolas raised on pillars (Burckhardt, App. V. p. 665).

The usual methods for raising water are the following:—1. The rope and bucket, or water-skin (Gen. xxiv. 14-20; John iv. 11). When the well is deep the rope is either drawn over the curb by the man or woman, who pulls it out to the distance of its full length, or by an ass or ox employed

in the same way for the same purpose. Sometimes a pulley or wheel is fixed over the well to assist the work (Robinson, l. 204, ii. 248; Niebuhr, *Descr. de l'Ar.* 137, pl. 15; *Col. Ch. Chron.* 1858, p. 350; Chardin, *Voy.* iv. 98; Wellsted, *Trav.* i. 280). 2. The sakiyeh, or Persian wheel. This consists of a vertical wheel furnished with a set of buckets or earthen jars, attached to a cord passing over the wheel, which descend empty and return full as the wheel revolves. On the axis of the wheel revolves a second wheel parallel to it, with cogs which turn a third wheel set horizontally at a sufficient height from the ground to allow the animal used in turning it to pass under. One or two cows or bulls are yoked to a pole which passes through the axis of this wheel, and as they travel round it turn the whole machine (Num. xxiv. 7; Lane, *Mod. Eg.* ii. 163; Niebuhr, *Voy.* i. 120; *Col. Ch. Chron.* 1858, p. 352; Shaw, p. 291, 408). 3. A modification of the last method, by which a man, sitting opposite to a wheel furnished with buckets, turns it by drawing with his hands one set of spokes prolonged beyond its circumference, and pushing another set from him with his feet (Niebuhr, *Voy.* i. p. 120, pl. 15; Robinson, ii. 22, iii. 89). 4. A method very common, both in ancient and modern Egypt, is the shadoof, a simple contrivance consisting of a lever moving on a pivot, which is loaded at one end with a lump of clay or some other weight, and has at the other a bowl or bucket. This is let down into the water, and, when raised, emptied into a receptacle above (Niebuhr, *Voy.* i. 120; Lane, *M. E.* ii. 163; Wilkinson, *A. E.* i. 35, 72, ii. 4).

Wells are usually furnished with troughs of wood or stone, into which the water is emptied for the use of persons or animals coming to the wells. In modern times an old stone sarcophagus is often used for this purpose. The bucket is very commonly of skin (Burckhardt, *Syria*, 63; Robinson, l. 204, ii. 21, 315, iii. 35, 89, 109, 134; Lord Lindsay, *Trav.* 255, 237; Wilkinson, *A. E.* i. e.; Gen. xxiv. 20; Ex. ii. 16).

Ancient Egyptian machine for raising water, identical with the shadoof of the present day. (Wilkinson.)

Unless machinery is used, which is commonly worked by men, women are usually the water-carriers. They carry home their water-jars on their heads (Lindsay, p. 236). Great contentions often occur at the wells, and they are often, among

Bedouins, favourite places for attack by enemies (Ex. ii. 16, 17; Judg. v. 11; 2 Sam. xiii. 15, 16; Burckhardt, *Syria*, p. 63; *Notes on Bel.* i. 228; *Col. Ch. Chron.* 1859, p. 473; Lane, *M. A.* i. 252; Robinson, iii. 153).

[H. W. P.]

WHALE. As to the signification of the Hebrew terms *tan* (תָּן) and *tanin* (תַּנִּין), variously rendered in the A. V. by "dragon," "whale," "serpent," "sea-monster," see DRAGON. It remains for us in this article to consider the transaction recorded in the Book of Jonah, of that prophet having been swallowed by some "great fish" (גָּדוֹל לִיָּהּ), which in Matt. xii. 40 is called *κῆτος*, rendered in our version by "whale."

Much criticism has been expended on the Scriptural account of Jonah being swallowed by a large fish; it has been variously understood as a literal transaction, as an entire fiction or an allegory, as a poetical mythus or a parable. With regard to the remarks of those writers who ground their objections upon the *denial of miracle*, it is obvious that this is not the place for discussion; the question of Jonah in the fish's belly will share the same fate as any other miracle recorded in the Old Testament.

The reader will find in Rosenmüller's *Prolegomena* several attempts by various writers to explain the Scriptural narrative, none of which, however, have anything to recommend them, unless it be in some cases the ingenuity of the authors, such as for instance that of Godfrey Less, who supposed that the "fish" was no animal at all, but a ship with the figure of a fish painted on the stern, into which Jonah was received after he had been cast out of his own vessel! Equally curious is the explanation of G. C. Anton, who endeavoured to solve the difficulty, by supposing that just as the prophet was thrown into the water, the dead carcase of some large fish floated by, into the belly of which he contrived to get, and that thus he was drifted to the shore! The opinion of Rosenmüller, that the whole account is founded on the Phœnician fable of Hercules devoured by a sea-monster sent by Neptune (Lycophron, *Cassand.* 33), although sanctioned by Gesenius, Winer, Ewald, and other German writers, is opposed to all sound principles of Biblical exegesis. It will be our purpose to consider what portion of the occurrence partakes of a natural, and what of a miraculous nature.

In the first place then, it is necessary to observe, that the Greek word *κῆτος*, used by St. Matthew, is not restricted in its meaning to "a whale," or any *Cetacean*; like the Latin *cetus* or *cetus*, it may denote any sea-monster, either "a whale," or "a shark," or "a seal," or "a tunny of enormous size" (see Athen. p. 303 B, ed. Dindorf; *Odys.* xii. 97, iv. 446, 452; *Il.* xx. 147). Although two or three species of whale are found in the Mediterranean Sea, yet the "great fish" that swallowed the prophet, cannot properly be identified with any *Cetacean*, for, although the *Sperm whale* (*Calodon macrocephalus*) has a gullet sufficiently large to admit the body of a man, yet it can hardly be the fish intended; as the natural food of *Cetaceans* consists of small animals, such as medusæ and crustaceans.

Nor again, can we agree with Bishop Jebb (*Sacred Literature*, pp. 178, 179), that the *καὶα* of the Greek Testament denotes the back portion of a whale's mouth, in the cavity of which the prophet

was concealed; for the whale passage in Jonah is clearly opposed to such an interpretation.

The only fish, then, capable of swallowing a man would be a large specimen of the *White Shark* (*Carcharias vulgaris*), that dreaded enemy of sailors, and the most voracious of the family of *Squalidae*. This shark, which sometimes attains the length of thirty feet, is quite able to swallow a man whole. Some commentators are sceptical on this point. It would, however, be easy to quote passages from the writings of authors and travellers in proof of this assertion; we confine ourselves to two or three extracts. The shark "has a large gullet, and in the belly of it are sometimes found the bodies of men half eaten, sometimes whole and entire" (*Nature Displayed*, iii. p. 140). But let the Abbé Pluche should not be considered sufficient authority, we give a quotation from Mr. Couch's recent publication, *A History of the Fishes of the British Islands*. Speaking of white sharks, this author, who has paid much attention to the habits of fish, states that "they usually cut asunder any object of considerable size and thus swallow it; but if they find a difficulty in doing this, there is no hesitation in passing into the stomach even what is of enormous bulk; and the formation of the jaws and throat render this a matter of but little difficulty." Ruych says that the whole body of a man in armour (*loricated*), has been found in the stomach of a white shark; and Captain King, in his *Survey of Australia*, says he had caught one which could have swallowed a man with the greatest ease. Blumenbach mentions that a whole horse has been found in a shark, and Captain Basil Hall reports the taking of one in which, besides other things, he found the whole skin of a buffalo which a short time before had been thrown overboard from his ship (i. p. 37). Dr. Baird of the British Museum (*Cyclop. of Nat. Sciences*, p. 514), says that in the river Hooghly below Calcutta, he had seen a white shark swallow a bullock's head and horns entire, and he speaks also of a shark's mouth being "sufficiently wide to receive the body of a man." Wherever therefore the Tarshish, to which Jonah's ship was bound, was situated, whether in Spain, or in Cilicia or in Ceylon, it is certain that the common white shark might have been seen on the voyage. The *C. vulgaris* is not uncommon in the Mediterranean; it occurs, as Forakll (*Descript. Animal.* p. 29), assures us, in the Arabian Gulf, and is common also in the Indian Ocean. So far for the natural portion of the subject. But how Jonah could have been swallowed whole unharmed, or how he could have existed for any time in the shark's belly, it is impossible to explain by simply natural causes. Certainly the preservation of Jonah in a fish's belly is not more remarkable than that of the three children in the midst of Nebuchadnezzar's "burning fiery furnace."

Naturalists have recorded that sharks have the habit of throwing up again whole and alive the prey they have seized (see Couch's *Hist. of Fishes*, p. 33). "I have heard," says Mr. Darwin, "that Dr. Allen of Forres, that he has frequently found a *Diodon* floating alive and distended in the stomach of a shark; and that on several occasions he has known it eat its way out, not only through the coats of the stomach, but through the sides of the monster which has been thus killed." [W. H.]

WHEAT. The well-known valuable cereal, cultivated from the earliest times, and frequently mentioned in the Bible. In the A. V. the Heb.

words *bar* (בַּר or בָּר), *diḡan* (דִּיגָן), *ṣēphāḡāh* (סִפְהָגָה), are occasionally translated "wheat;" but there is no doubt that the proper name of this cereal, as distinguished from "barley," "spelt," &c., is *ḥittāh* (חִטָּה; Chald. חִתְתָּא, *chittā*). As to the former Hebrew terms see under CORN. The first mention of wheat occurs in Gen. xxx. 14, in the account of Jacob's sojourn with Laban in Mesopotamia. Much has been written on the subject of the origin of wheat, and the question appears to be still undecided. It is said that the *Triticum vulgare* has been found wild in some parts of Persia and Siberia, apparently removed from the influence of cultivation (*English Cyclop. art. "Triticum"*). Again, from the experiments of M. Esprit Fabre of Agde it would seem that the numerous varieties of cultivated wheat are merely improved transformations of *Aegilops ovata* (*Journal of the Royal Agricult. Soc.*, No. xxxiii. p. 167-180). M. Fabre's experiments, however, have not been deemed conclusive by some botanists (see an interesting paper by the late Prof. Henfrey in No. xli. of the *Journal* quoted above). Egypt in ancient times was celebrated for the growth of its wheat; the best quality, according to Pliny (*Nat. Hist.* xviii. 7), was grown in the Thebaid; it was all bearded, and the same varieties, Sir G. Wilkinson writes (*Anc. Egypt.* ii. 39, ed. 1854), "existed in ancient as in modern times, among which may be mentioned the seven-eared quality described in Pharaoh's dream" (Gen. xli. 22). This is the so-called mummy-wheat, which, it has been said, has germinated after the lapse of thousands of years; but it is now known that the whole thing was a fraud. Babylonia was also noted for the excellence of its wheat and other cereals. "In grain," says Herodotus (i. 193), "it will yield commonly two hundred fold, and at its greatest production as much as three hundred fold. The blades of the wheat and barley-plants are often four fingers broad." But this is a great exaggeration. (See also Theophrastus, *Hist. Plant.* viii. 7.) Modern writers, as Cheamey and Rich, bear testimony to the great fertility of Mesopotamia. Syria and Palestine produced wheat of fine quality and in large quantities (Ps. cxlvii. 14, lxxxi. 18, &c.). There appear to be two or three kinds of wheat at present grown in Palestine, the *Triticum vulgare* (var. *hybernium*), the *T. spelta* [see RYE], and another variety of bearded wheat which appears to be the same as the Egyptian kind, the *T. coarctatum*. In the parable of the sower our Lord alludes to grains of wheat which in good ground produce a hundred fold (Matt. xiii. 8). "The return of a hundred for one," says Trench, "is not unheard of in the East, though always mentioned as something extraordinary." Laborde says "there is to be found at Kerek a species of hundred wheat which justifies the text of the Bible against the charges of exaggeration of which it has been the object." The common *Triticum vulgare* will sometimes produce one hundred grains in the ear. Wheat is reaped towards the end of April, in May, and in June, according to the differences of soil and position; it was sown either broadcast, and then ploughed in or trampled in by cattle (Is. xxxii. 20), or in rows, if we rightly understand Is. xxviii. 25, which seems to imply that the seeds were planted apart in order to insure larger and fuller ears. The wheat was put into the ground in the winter, and some time after the barley; in the Egyptian plague of hail, conse-

VOL. III.

quently, the barley suffered, but the wheat had not appeared, and so escaped injury. Wheat was ground into flour; the finest qualities were expressed by the term "fat of kidneys of wheat," *ḥalib ḥalav* (Deut. xxxii. 14). Unripe ears are sometimes cut off from the stalks, roasted in an oven, mashed and boiled, and eaten by the modern Egyptians (Sonnini, *Trav.*). Rosenmüller (*Botany of the Bible*, p. 80), with good reason, conjectures that this dish, which the Arabs call *Perit*, is the same as the *geres carmel* (פֶּרִית קַרְמֶל) of Lev. ii. 14 and 2 K. iv. 42. The Heb. word *Kdli* (קָדְלִי, Lev. ii. 14) denotes, it is probable, roasted ears of corn, still used as food in the East. An "ear of corn" was called *Shibboleth* (שִׁבּוּלֶת), the word which betrayed the Ephraimites (Judg. xii. 1, 6), who were unable to give the sound of *sh*. The curious expression in Prov. xxvii. 22, "though thou shouldst bray a fool in a mortar among wheat with a pestle, yet will not his foolishness depart from him," appears to point to the custom of mixing the grains of inferior cereals with wheat; the meaning will then be, "Let a fool be ever so much in the company of wise men, yet he will continue a fool." Maurer (*Comment.* i. c.) simply explains the passage thus: "Quomodocunque tractaveris stultum non patietur se emendari." [Compare articles CORN; AGRICULTURE; BARLEY.] [W. H.]

WHIRLWIND (סִפְחָה; סִפְחָה). The Hebrew terms *séphāḡāh* and *se'arāh* convey the notion of a violent wind or hurricane, the former because such a wind sweeps away every object it encounters, the latter because the objects so swept away are tossed about and agitated. In addition to this, Gesenius gives a similar sense to *galgal*, in Ps. lxxvii. 18 (A. V. "heaven"), and Ez. x. 13 (A. V. "wheel"). Generally, however, this last term expresses one of the effects of such a storm in rolling along chaff, stubble, or such light articles (*Theo.* p. 288). It does not appear that any of the above terms express the specific notion of a whirlwind, i. e. a gale moving violently round on its own axis—and there is no warrant for the use of the word in the A. V. of 2 K. ii. 11. The most violent winds in Palestine come from the east; and the passage in Job xxxvii. 9, which in the A. V. reads, "Out of the south cometh the whirlwind," should rather be rendered, "Out of his chamber," &c. The whirlwind is frequently used as a metaphor of violent and sweeping destruction. Cyrus' invasion of Babylonia is compared to a southerly gale coming out of the wilderness of Arabia (Is. xxi. 1; comp. Knobel, in *loc.*), the effects of which are most prejudicial in that country. Similar allusions occur in Ps. lviii. 9; Prov. i. 27, x. 25; Is. xl. 24; Dan. xi. 40. [W. L. B.]

WIDOW (אַלְמָנָה; *almanā*; *vidua*). Under the Mosaic dispensation no legal provision was made for the maintenance of widows. They were left dependent partly on the affection of relations, more especially of the eldest son, whose birthright, or extra share of the property, imposed such a duty upon him, and partly on the privileges accorded to other distressed classes, such as a participation in the triennial third tithe (Deut. xiv. 29, xxvi. 12), in leasing (Deut. xiv. 19-21), and in religious

אַלְמָנָה.

ties, of this portion of the history of the race of Israel, as full of spiritual lessons necessary for the Christian Church throughout all ages. Hence this region, which physically is, and has probably been for three thousand years or more, little else than a barren waste, has derived a moral grandeur and obtained a reverential homage which has spread with the diffusion of Christianity. Indeed, to Christian, Jew, and Moslem it is alike holy ground. The mystery which hangs over by far the greater number of localities, assigned to events even of first-rate magnitude, rather inflames than allays the eagerness for identification; and the result has been a larger array of tourists than has probably ever penetrated any other country of equal difficulty. Burchardt, Niebuhr, Seetzen, Laborde and Linant, Ruppell, Raumer, Russegger, Lepsius, Henniker, Wellsted, Frazierley, and Miss Martineau, are conspicuous amongst those who have contributed since the close of the last century to deepen, to vivify, and to correct our impressions, besides the earlier works of Monconys in the 17th century, and Hasselquist and Pococke in the 18th; whilst Wilson, Stewart, Bartlett, Bonar, Olin, Bertou, Robinson, and Stanley, have added a rich detail of illustration reaching to the present day. And thus it is at length "possible by the internal evidence of the country itself to lay down, not indeed the actual route of the Israelites in every stage, but in almost all cases, the main alternatives between which we must choose, and in some cases, the very spots themselves." Yet with all the material which now lies at the disposal of the topographical critic, there is often a real poverty of evidence where there seems to be an abundance; and the single lines of information do not weave up into a fabric of clear knowledge. "Hitherto no one traveller has traversed more than one, or at most two routes of the Desert, and thus the determination of these questions has been obscured; first, by the tendency of every one to make the Israelites follow his own track; and secondly, by his inability to institute a just comparison between the facilities or difficulties which attend the routes which he has not seen. This obscurity will always exist till some competent traveller has explored the whole Peninsula. When this has been fairly done, there is little doubt that some of the most important topographical questions now at issue will be set at rest" (Stanley, *S. & P.* 33).

1. The uncertainties commence from the very starting-point of the route of the Wandering. It is impossible to fix the point at which in "the wilderness of Etham" (Num. xxxiii. 8, 7) Israel, now a nation of freemen, emerged from that sea into which they had passed as a nation of slaves. But, slippery as is the physical ground for any fixture of the miracle to a particular spot, we may yet admire the grandeur and vigour of the image of baptism which Christianity has appropriated from those waters. There their freedom was won; "not of

themselves, it was the gift of God," whose Presence visibly preceded, and therefore St. Paul says, "they were baptized in the cloud," and not only "in the sea." The fact that from "Etham in the edge of the wilderness," their path struck across the sea (Ex. xiii. 20), and from the sea into the same wilderness of Etham, seems to indicate the upper end of the furthest tongue of the Gulf of Suex as the point of crossing, for here, as is probable, rather than lower down the same, the district on either side would for a short distance on both shores have the same name. There seems reason also to think that this gulf had then, as also at Erion-Gaber [EZIONGEBER], a further extension northward than at present, owing to the land having upheaved its level. This action seems to have been from early times the predominant one, and traces of it have recently been observed.⁴ Thus it is probable as a result of the same agency that the sea was even then shallow, and the sudden action of a tidal sea in the *coul-de-sac* of a narrow and shallow gulf is well-known. Our own Solway Firth is a familiar example of the rise and rush of water, surprising at times, especially when combined with the action of a strong wind, even those habitually cognizant of its power. Similarly by merely venturing, it seems, below high-water mark, our own King John lost his baggage, regalia, and treasures in the estuary of The Wash. Pharaoh's exclamation, "they are entangled (סִבְכָּה) in the land," merely expresses the perplexity in which such a multitude having, from whatever cause, no way of escape, would find themselves. "The wilderness hath shut them in," refers merely, it is probable, to his security in the belief that, having reached the flat of the waste, they were completely at the mercy of a chariot force, like his, and rather excludes than implies the notion of mountains.⁵ The direction of the wind is "east" in the Hebrew (מִצָּרְחָה), but in the LXX. "south" (νότος), in Ex. xiv. 21. On a local question the probable authority of the latter, executed in Egypt near the spot, is somewhat enhanced above its ordinary value. The furthest tongue of the gulf, now supposed dry, narrows to a strait some way below, i. e. south of its northern extremity, as given in Laborde's map (*Commentary on Exod.*), and then widens again.⁶ In such a narrow pass the action of the water would be strongest when "the sea returned," and here a wind anywhere between E. and S.S.E., to judge from that map, would produce nearly the same effect; only the more nearly due E. the more it would meet the sea at right angles.⁷ The probability is certainly that Pharaoh, seeing his bondmen, now all but within his clutch, yet escaping from it, would in the darkness of night, especially as he had spurned calmer counsels and remonstrances before, pursue with headlong rashness, even although, to a sober judgment guided by experience, the risk was plain.

⁴ See a pamphlet by Charles T. Beke, Ph.D., "A Few Words with Bishop Colenso," 4, 8.

⁵ Compare the use of the same word, of a multitude of men or cattle, in Joel, i. 18, to express *ἀνωμία εἰς τὴν γῆν*, without reference to egress or direction of course, merely for want of food.

⁶ Josephus (*Ant. B.* 15, 53) speaks of the obstruction of precipitous and impassable mountains, but when we consider his extravagant language of the height of the buildings of the temple, it is likely that much more, when speaking in general terms of a spot so distant, such exaggerations may be set down as simply rhetorical.

⁴ Dr. Stanley (*S. & P.* 36) thinks that this supposed extension "depends on arguments which have not yet been thoroughly explored."

⁵ If the wind were direct S. it would at some points favour the notion that "the passage was not a transit but a short circuit, returning again to the Egyptian shore, and then pursuing their way round the head of the gulf," an explanation favoured "by earlier Christian commentators, and by almost all the Rabbinical writers" (*S. & P.* 36). The landing-place would on this view be considerably north of the point of entering the sea.

There is a resemblance in the names Migdol and the ancient 'Magdolum,' twelve miles S. of Pelusium, and undoubtedly described as 'Migdol' by Jeremiah and Ezekiel" (Jer. xlii. 1, xlii. 14; Ezek. xxi. 10, xxx. 6; *S. & P.* 37), also between the same and the modern *Mūṭala*, "a gentle slope through the hills" towards Suez; and Pi-Hahiroth perhaps is 'Ajrūd. The "wilderness of Etham" probably lay on either side adjacent to the now dry trough of the northern end of the gulf. Dr. Stewart (*Tent and Khan*, 64) thinks the name Etham traceable in the *Wady Aḥhi*, on the Arabian shore, but this and the preceding 'Ajrūd are of doubtful identity. The probability seems on the whole to favour the notion that the crossing lay to the N. of the *Jebel 'Aidāh*, which lies on the Egyptian side S. of Suez, and therefore neither the *Ayān Māsa*,^a nor, much less, the *Humām Pharaṣān*, further down on the eastern shore—each of which places, as well as several others, claims in local legend to be the spot of landing—will suit. Still, these places, or either of them, may be the region where "Israel saw the Egyptians dead upon the sea-shore" (Ex. xiv. 30). The crossing place from the Egyptian *Wady Taḥṣit* to the *Ayān Māsa* has been supported, however, by Wilson, Olin, Dr. Stewart (*Tent and Khan*, 56), and others. The notion of *Mūṭala* being Migdol will best suit the previous view of the more northerly passage. The "wilderness of Shur," into which the Israelites "went out" from the Red Sea, appears to be the eastern and south-eastern continuation of that of Etham, for both in Ex. xv. 22, and in Num. xxxiii. 8, they are recorded to have "gone three days in the wilderness," indicated respectively in the two passages as that of Shur and that of Etham. From the expression in Ex. xiii. 20, "Etham, the edge of the wilderness," the habitable region would seem to have ended at that place. Josephus (*Ant.* vi. 7, §3) seems to identify Pelusium with Shur, comp. 1 Sam. xv. 7; but probably, he merely uses the former term in an approximate sense, as a landmark well-known to his readers; since Shur is described as "over against, or before, Egypt" (Gen. xiv. 18), being perhaps the same as Sihor, similarly spoken of in Josh. xiii. 3; Jer. ii. 18. When so described, we may understand "Egypt" to be taken in a strict sense as excluding Goshen and the Arabian nome. [GOSHEN.] Shur "before Egypt," whatever the name may have meant, must probably be viewed as lying eastward of a line drawn from Suez to Pelusium; and the wilderness named from it or from Etham, extended three days' journey (for the Israelites) from the head of the gulf, if not more. It is evident that, viewed from Egypt, the wilderness might easily take its name from the last outpost of the habitable region, whe-

ther town or village, whereas in other aspects it might have a name of its own, from some landmark lying in it. Thus the Egyptians may have known it as connected with Etham, and the desert inhabitants as belonging to Shur; while from his residence in Egypt and sojourn with Jethro, both names may have been familiar to Moses. However this may be, from Suez eastward, the large desert tract, stretching as far east as the Ghor and Mount Seir, i. e. from 32° 40' to 35° 10' E. long., begins. The 31st parallel of latitude, nearly traversing *El 'Arish*, the "River of Egypt," on the Mediterranean, and the southernmost extremity of the Dead Sea, may be taken roughly to represent its northern limit, where it really merges imperceptibly into the "south country" of Judah. It is scarcely called in Scripture by any one general name, but the "wilderness of Paran" most nearly approximates to such a designation, though lost, short of the Egyptian or western limit, in the wilderness of Shur, and perhaps, although not certainly, curtailed eastward by that of Zin. On the south side of the *et-Tih* range, a broad angular head runs across the Peninsula with its apex turned southward, and pointing towards the central block of granite mountains. This is a tract of sand known as the *Debbet er-Ramleh* or *Ramlah*, but which name is omitted in Kiepert's map. The long horizontal range and the sandy plain together form a natural feature marked contrast with the pyramidal configuration of the southern or Sinaitic region. The "wilderness of Sinai" lies of course in that southern region, in that part which, although generally elevated, is overhung by higher peaks. How far this wilderness extended is uncertain. The Israelites only traversed the north-western region of it. The "wilderness of Sin" was their passage into it from the more pleasant district of coast *Wādya* with water-springs which succeeded to the first-travelled wilderness of Shur or Etham, where no water was found. Sin may probably be identified with the coast strip, now known as *el-Kāṣa*, reaching from a little above the *Jebel Feirān*, or as nearly as possible on the 29th parallel of latitude, down to and beyond *Tār* on the Red Sea. They seem to have only dipped into the "Sin" region at its northern extremity, and to have at once moved from the coast towards the N.W. upon Sinai (Ex. xv. 22-27, xvi. 1; Num. xxxiii. 8-11). It is often impossible to assign a distinct track to this vast body—a nation swarming on the march. The fact, of many, perhaps most, of the ordinary adventures being incapable of containing more than a fraction of them, would often have compelled them to appropriate all or several of the modes of access to particular points, between the probabilities of which the judgment of travellers is balanced.^b Down the coast, however

^a A warm spring, the temperature of which is given by Mr. Hamilton (*Sinai, the Hedjaz and Soudan*, 14) as being 83° Fahrenheit. "Robinson found the water here salt, and yielding a hard deposit, yet the Arabs called these springs 'sweet': there are several of them" (Seetzen, *Reisen*, iii. pt. iii. 431). The *Humām* ("warm baths") *Pharaṣān* are similar springs, lying a little W. of S. from *Wady Taḥit*, on the coast close to whose edge rises the precipitous *Jebel Humām*, so called from them, and here intercepting the path along the shore. The Rev. R. S. Tyrwhitt, who made the desert journey in February, 1863, says that there may be a warm spring out of the twelve or thirteen which form the *Ayān Māsa*, but that the water of the larger well is cold, and that he drank of it.

^b North of this limit lies the most southern wady which

has been fixed upon by any considerable number of authorities for Elthm, from which the departure was taken into the wilderness of Sin. Seetzen, but he alone, suggests that Elthm is to be found in a warm spring in a northerly direction from *Tār*, at a very slight distance, which waters the extensive date-palm plantations there. If this were so *Tār* itself would have certainly been included in the radius of the camp; but it is unlikely that they went so far south.

^c It may be worth while to notice that the same observations apply to the battle in Rephidim with Amalek. To look about for a battle-field large enough to give sufficient space for two hosts worthy of representing Israel and Amalek, and to reject all sites where this possibility is not obvious, is an unsafe method of criticism.

from Elham or the Suez region southwards, the course is broad and open, and there the track would be more definite and united. Before going into the further details of this question, a glance may be taken at the general configuration of the *et-Tih* region, computed at 40 parangs, or about 140 miles, in length, and the same in breadth by Jakūt, the famous geographer of Hamah (Seetzen, *Reisen*, iii. 47). For a description of the rock desert of Sinai, in which nature has cast, as it were, a pyramid of granite, culminating at *Um Shauner*, 9300 feet above sea-level, but cloven and culcated in every direction by wadys into minor blocks, see SINAI.

II. The twin Gulfs of Suez and 'Akabah, into which the Red Sea separates, embrace the Peninsula on its W. and E. sides respectively. One or other of them is in sight from almost all the summits of the Sinaitic cluster, and from the highest points both branches. The eastern coast of the Gulf of Suez is strewn with shells, and with the forests of submarine vegetation which possibly gave the whole sea its Hebrew appellation of the "Sea of Weeds." The "huge trunks" of its "trees of coral may be seen even on the dry shore;" while at *Tūr*, cabins are formed of madrepores gathered from it, and the debris of conchylia lie thickly heaped on the beach.¹ Similar "coralline forests" are described (*S. and P.* 83) as marking the coast of the Gulf of 'Akabah. The northern portion of the whole Peninsula is a plateau bounded southwards by the range of *et-Tih*, which droops across it on the map with a curve somewhat like that of a slack chain, whose points of suspension are, westwards, Suez, and eastward, but further south, some "sandstone cliffs, which shut off" this region from the Gulf of 'Akabah. The north-western member of this chain converges with the shore of the Gulf of Suez, till the two run nearly parallel. Its eastern member throws off several fragments of long and short ridges towards the Gulf of 'Akabah and the northern plateau called from it *et-Tih*. The *Jebel Dillāl* (Burckhardt, *Dhelel*) is the most southerly of the continuations of this eastern member (Seetzen, *Reisen*, iii. pt. iii. 413). The greatest elevation in the *et-Tih* range is attained a little W. of the meridian 34°, near its most southerly point; it is here 4654 feet above the Mediterranean. From this point the watershed of the plateau runs obliquely between N. and E. towards Hebron; westward of which line, and northward from the westerly member of *Jebel et-Tih*, the whole wady-system is drained by the great *Wady el-'Arish*, along a gradual slope to the Mediterranean. The shorter and much steeper slope eastward partly converges into the large ducts of *Wadys Fikreh* and *el-Jaib*, entering the Dead Sea's south-western angle through the southern wall of the Ghôr, and partly finds an outlet nearly parallel, but further to the S., by the *Wady Serafeh* into the 'Arabah. The great depression of the Dead Sea (1300 feet below the Mediterranean) explains the

greater steepness of this eastern slope. In crossing this plateau, Seetzen found that rain and wind had worked depressions in parts of its flat, which contained a few shrubs or isolated bushes. This flat rose here and there in heights steep on one side, composed of white chalk with frequent lumps of flint embedded (iii. 48). The plateau has a central point in the station "*Kham Nûkh*", so named from the date-trees which once adorned its wady, but which have all disappeared. This point is nearly equidistant from Suez westward, 'Akabah eastward, *el-'Arish* northward, and the foot of *Jebel Mûsa* southward. It lies half a mile N. of the "Hadj-route," between Suez and 'Akabah, which traverses "a boundless flat, dreary and desolate" (*ibid.* 56), and is 1494 feet above the Mediterranean—nearly on the same meridian as the highest point before assigned to *et-Tih*. On this meridian also lies *Um Shauner* farther south, the highest point of the entire Peninsula, having an elevation of 9300 feet, or nearly double that of *et-Tih*. A little to the W. of the same meridian lies *el-'Arish*, and the southern cape, *Ras Mohammad*, is situated about 34° 17'. Thus the parallel 31°, and the meridian 34°, form important axes of the whole region of the Peninsula. A full description of the wilderness of *et-Tih* is given by Dr. Robinson (i. 177, 8, 199), together with a memorandum of the travellers who explored it previously to himself.

On the eastern edge of the plateau to the N. of the *et-Tih* range, which is raised terrace-wise by a step from the level of the Ghôr, rises a singular second, or, reckoning that level itself, a third plateau, superimposed on the general surface of the *et-Tih* region. Thomsen (*Map*) distinguishes as three terraces in the chalk ridges. Dr. Kruse, in his *Anmerkungen* on Seetzen's travels (iii. pt. iii. 410), remarks that the *Jebel et-Tih* is the *montes nigri*, or *μέλαρες* of Ptolemy, in whose view that range descends to the extreme southern point of the Peninsula, thus including of course the Sinaitic region. This confusion arose from a want of distinct conception of geographical details. The name seems to have been obtained from the dark, or even black colour, which is observable in parts (see p. 1750, note *).

The Hadj-route from Suez to 'Akabah, crossing the Peninsula in a direction a little S. of E., may stand for the chord of the arc of the *et-Tih* range the length of which latter is about 120 miles. This slope, descending northwards upon the Mediterranean, is of limestone (*S. and P.* 7), covered with coarse gravel interspersed with black flints and drift (Russeger's *Map*). But its desolation has not always been so extreme, oxen, asses, and sheep having once grazed in parts of it where now only the camel is found. Three passes through the *et-Tih* range are mentioned by Robinson (i. p. 123; comp. 581-3, App. xxii.)—*er-Râkmech*, the western; *el-Mureikhy*, the eastern; and *el-Würsah*, between

The most reticulated mass of wadys in the whole peninsula, if deemed worth fighting for, would form a battleground for all practical purposes, though not properly a "field" of battle, and the battle might decisively settle supremacy within certain limits, although no regular method of warfare might be applicable, and the numbers actually engaged might be inconsiderable. It would perhaps resemble somewhat more closely a street fight for the mastery of a town.

¹ Stanley, *S. & P.* 5; Hamilton, *Sinai, the Hedjaz, and Soudan*, 14.

² Stanley, *S. & P.* 8.

³ Seetzen, who crossed this route 6 hours to the E. of this station, says that this road, and not the range of *et-Tih*, is the political division of the country, all the country to the S. of the road being reckoned as the *Tūr*, and that northwards as appertaining to Syria (*Reisen*, iii. 410-11, comp. p. 58). His course lay between the route from Hebron to 'Akabah, and that from Hebron to Suez. He went straight southwards to *Psiden*; a route which no traveller has followed since.

⁴ This measurement is a mean between that given by Stanley (*map, S. & P.* 5) and Russeger's estimate, as given by Seetzen (*Reisen*, ii. pt. ii. 411).

the two. These all meet S. of *Ruknab* (Rehoboth, Gen. xvi. 22^f), in about N. lat. 31° 5', E. long. 34° 42', and thence diverge towards Hebron and Gaza. The eastern* is noted by Rusegger as 4853 feet[†] above sea-level. Seetzen took the *et-Tih* range for the "Mount Seir," passed on the way from Sinai (Horeb, Deut. i. 8) to Kadesh Barnea by the Israelites (*Reisen*, iii. 28; comp. *ibid.* Kruse's *Anmerkungen*, pt. II. 417). It would form a conspicuous object on the left to the Israelites, going south-eastwards near the coast of the Gulf of Suez. Seetzen, proceeding towards Suez, i. e. in the opposite direction, mentions a high sandy plain (*Reisen*, iii. p. 111), apparently near *Wady Ghârândel*, whence its steep southern face was visible in a white streak stretching westwards and eastwards. Dr. Stanley (*S. and P.* 7) says, "however much the other mountains of the Peninsula vary in form or height, the mountains of the Tih are always alike—always faithful to their tabular outline and blanched desolation."[‡] They appear like "a long limestone wall." This traveller saw them, however, only "from a distance" (*ibid.* and note 2). Seetzen, who crossed them, going from Hebron to Sinai, says of the view from the highest ridge of the lower mountain-line: "What a landscape was that I looked down upon! On all sides the most frightful wilderness extended out of sight in every direction, without tree, shrub, or speck of green. It was an alternation of flats and hills, for the most part black as night, only the naked rock-walls on the hummocks and heights showed patches of dazzling whiteness." . . . a striking image of our globe, when, through Phaeton's carelessness, the sun came too near to it" (*Reisen*, iii. p. 50). Similarly, describing the scenery of the *Wady el-Bidra*, by which he passed the *et-Tih* range (see note* below), he says: "On the S. side rose a considerable range, desolate, craggy, and naked. All was limestone, chalk, and flint. The chalk cliffs gave the steep off-set of the Tih range on its S. side the aspect of a snow mountain" (p. 62).

The other routes which traverse the Peninsula are, that from Hebron to Suez along the maritime plain, at a distance of from 10 to 30 miles from the sea, passing *el-'Ariah*; that from Suez to Tîr along the coast of the Gulf of Suez through the *Kâd*; and that from 'Akabah, near Esiongheber, ascending the western wall of the 'Arabah through the *Wady el-Joib*, by several passes, not far from the southern extremity of the Dead Sea, towards Hebron, in a course here nearly N.W., then again N.[§] A modern mountain road has been partially constructed by Abbas Pasha in the pass of the *Wady Hebrân*, leading from the coast of the Gulf of Suez towards the convent commonly called

St. Catharine's. The ascent from the trough of the 'Arabah (which is steeper-sided at its N.W. extremity than elsewhere), towards the general plateau is by the pass *el-Khûrd*, by which the level of that broad surface is attained. The smaller plateau rests obliquely upon the latter, abutting on the Dead Sea at *Masûda*, where its side and that of the lower floor converge, and is reached by ascending through the higher *Nubb es-Sûfa*. Its face, corresponding to the southern face of the Tih plateau, looks considerably to the W. of S., owing to this obliquity, and is delineated like a well-defined mountain-wall in Kiepert's map, having at the S.E. angle a bold buttress in the *Jebel Mûkhrâh*, and at the S.W. another in the *Jebel 'Arâif en-Nahak*, which stands out apparently in the wilderness like a promontory at sea. From the former mountain, its most southerly point, at about 30° 20' N. L., the plateau extends northward a little east, till it merges in the southern slope of Judea, but at about 30° 50' N. L. is cut nearly through by the *Wady Fûrâh*, trenching its area eastward, and not quite meeting the *Wady Mûrdâh*, which has its declivity apparently toward the *Wady el-'Ariah* westward. The face of mountain-wall mentioned above may probably be "the mountain of the Amorites," or this whole higher plateau may be so (Deut. i. 7, 19, 20). A line drawn northwards from *Râs Mûhammad* passes a little to the W. of 'Arâif en-Nahak. A more precise description of some parts of this plateau has been given under KADESH.

On the whole, except in the *Debbet er-Ramleh*, sand is rare in the Peninsula. There is little or none on the sea-shore, and the plain *et-Kâd* on the S.W. coast is gravelly rather than sandy (*S. and P.* 8). Of sandstone on the edges of the granitic central mass there is no lack.[¶] It is chiefly found between the chalk and limestone of *et-Tih* and the southern rocky triangle of Sinai. Thus the *Jebel Dûlâl* is of sandstone, in tall vertical cliffs, forming the boundary of *er-Ramleh* on the east side, and similar steep sandstone cliffs are visible in the same plain, lying on its N. and N.W. sides (Seetzen, iii. 66; comp. pt. iii. 413). In the *Wady Mokattab* "the soft surface of these sandstone cliffs offered ready tablets" to the unknown wayfarers who wrote the "Sinaitic inscriptions." This stone gives in some parts a strong red hue to the nearer landscape, and softens into shades of the subtlest delicacy in the distance. Where the surface has been broken away, or fretted and eaten by the action of water, these hues are most vivid (*S. and P.* 10-12). It has been supposed that the Egyptians worked the limestone of *et-Tih*, and that that material, as found in the pyramids, was there quarried. The hardness of the granites in the *Jebel et-Tûr* has been em-

* Seetzen probably took this eastern pass, which leads out into the *Wady Berâh* (Seetzen, *El Bidra*, called also *El Sukhîde*, *Reisen*, III. pt. III. 411, Kruse's *Anmerkungen*, comp. III. 62). He, however, shortly before crossing the range, came upon "a flat hill yielding wholesome pasture for camels, considerable numbers (Haufen) of which are met with here, also two herds of goats and some sheep" (III. 60); not strictly confirming the previous statement, which is Dr. Robinson's.

† It is not easy to reconcile this statement with the figure (4845 ft.) given by Dr. Stanley (*S. & P.*, map, p. 5) apparently as the extreme height of the mountain *El-'Odîme* (Stanley, *J. Bible*), since we might expect that the pass would be somewhat lower than the highest point, instead of *Akher*. On this mountain, see p. 1787, note 1.

‡ Seetzen (III. 56) remarks that "the slope of the *et-Tih*

range shows an equal wildness" to that of the desert as its northern side.

¶ Comp. Dr. Stanley's description of the march down the *Wady Taybâh* "between vast cliffs white on the one side, and on the other of a black calcined colour" (*S. & P.* 66).

§ Nearly following this track in the opposite direction, i. e. to the S.E., Seetzen went from Hebron to *Madara* (al. *Madurah*, or *Modera*), passing by *Maon*, *el-Kîrmed* (the "Carmel" of Nabal's pasture-ground in 1 Sam. xxv. 3) and *Arér* (*Reisen*, III. 10-18).

¶ A remarkable sandstone mountain on the S.W. plain near the sea is the *Jebel Nakûs* ("bell"), said to be so called from the ringing sound made by the sand pouring over its cliffs (Stewart, *T. & K.* 386, comp. Rusegger *Reisen*, III. 277).

phatically noticed by travellers. Thus, in constructing recently the mountain road for Abbas Pasha, "the rocks" were found "obstinately to resist even the gunpowder's blast," and the sharp glass-like edges of the granite soon wear away the workmen's shoes and cripple their feet (Hamilton, *Sinai, the Hedjaz, and Soudan*, 17). Similarly, Laborde says (*Comm. on Num.* xxxiii. 36): "In my journey across that country (from Egypt, through Sinai to the Ghôr), I had carried from Cairo two pair of shoes; they were cut, and my feet came through; when I arrived at 'Akabah, luckily I found in the magazines of that fortress two other pair to replace them. On my return to Sinai, I was barefoot again. Hussein then procured me sandals half an inch thick, which, on my arrival in Cairo, themselves were reduced to nothing, though they had well-preserved my feet." Seetzen noticed on Mount St. Catherine that the granite was "fine-grained and very firm" (iii. 90). For the area of greatest relief in the surface of the whole Peninsula, see SINAI, §1, 2, 3. The name *Jebel et-Tûr* includes the whole cluster of mountains from *el-Fureid* on the N. to *Um Shauwer* on the S., and from *Mûsa* and *ed-Deir* on the E. to *Hum'r* and *Serbûl* on the W., including St. Catherine, nearly S.W. of *Mûsa*. By "Sinai" is generally understood the *Mûsa* plateau, between the *Wady Ledjâ* (Stanley, *Map*) and the *Wady Shueib* on its western and north-eastern flanks, and bounded north-westward by the *Wady er-Rahah*, and south-eastward by the *Wady Sebâyeh* (*Sebâyeh*, Stanley, *ib.*). The Arabs give the name of *Tûr*—properly meaning a high mountain (Stanley, *S. and P.* 6)—to the whole region south of the Hadj-route from Suez to 'Akabah as far as *Râs-Mohammed* (see above, p. 1749, note²). The name of *Tûr* is also emphatically given to the cultivable region lying S.W. of the *Jebel et-Tûr*. Its fine and rich date-palm plantation lies a good way southwards down the Gulf of Suez. Here opens on the sea the most fertile wady now to be found in the Peninsula (Burckhardt, *Arab.* ii. 362; Wellsted, *ib.* 9), receiving all the waters which flow down the range of Sinai westward* (Stanley, *S. and P.* 19).

III. A most important general question, after settling the outline of this "wilderness," is the extent to which it is capable of supporting animal and human life, especially when taxed by the consumption of such flocks and herds as the Israelites took with them from Egypt, and probably—though we know not to what extent this last was supplied by the manna—by the demand made on its resources by a host of from 2,000,000 to 3,000,000 souls.³ In

answer to this question, "much," it has been observed (*S. and P.* 24), "may be allowed for the spread of the tribes of Israel far and wide through the whole Peninsula, and also for the constant means of support from their own flocks and herds. Something, too, might be elicited from the undoubted fact that a population nearly, if not quite, equal to the whole permanent population of the Peninsula does actually pass through the desert, in the caravan of the 5000 African Pilgrims, on their way to Mecca. But, amongst these considerations, it is important to observe what indications there may be of the mountains of Sinai having ever been able to furnish greater resources than at present. These indications are well summed up by Ritter (*Sinai*, pp. 926, 927). There is no doubt that the vegetation of the wady has considerably decreased. In part, this would be an inevitable effect of the violence of the winter torrents. The trunks of palm-trees washed up on the shore of the Dead Sea, from which the living tree has now for many centuries disappeared, show what may have been the devastation produced among those mountains where the floods, especially in earlier times, must have been violent to a degree unknown in Palestine; whilst the peculiar cause—the impregnation of salt—which has preserved the vestiges of the older vegetation there, has here, of course, no existence. The traces of such a destruction were pointed out to Burckhardt (*Arab.* 538) on the eastern side of Mount Sinai, as having occurred within half a century before his visit; also to Wellsted (*ib.* 15), as having occurred near Tûr in 1832. In part, the same result has followed from the reckless waste of the Bedouin tribes—reckless in destroying and careless in replenishing. A fire-pipe, lit under a grove of desert trees, may clear away the vegetation of a whole valley.

"The acacia-trees have been of late years ruthlessly destroyed by the Bedouins for the sake of charcoal," which forms "the chief, perhaps it might be said the only traffic of the Peninsula" (*S. and P.* 24). Thus, the clearance of this tree in the mountains where it abounded once, and its decrease in the neighbour groups in which it exists still, is accounted for, since the monks appear to have aided the devastation. Vegetation, where maintained, nourishes water and keeps alive its own life; and no attempts to produce vegetation anywhere in this desert seem to have failed. "The gardens at the wells of Moses, under the French and English agents from Suez, and the gardens in the valleys of Jebel Mûsa, under the care of the Greek monks of the Convent of St. Catherine," are conspicuous examples (*ib.* 26). Besides, a traveller

* The following positions by East longitude from Paris are given in Seetzen, *lit. pt. iii.*, *Anmerk.* 414:—

Suez, 26° 57' 30", Berghaus.

'Akabah, 28° 48', Niebuhr; but 28° 55' by others.

Convent St. Catherine, 28° 36' 40" s", Seetzen and Zach; but 31° 37' 54" by Rüppell.

Sinai, 28° 48'.

Râs Mohammed, 27° 43' 24".

But there must be grave errors in the figures, since Suez is placed furthest to the east of all the places named, whereas it lies furthest to the west; also 'Akabah lies an entire degree, by Kiepert's map, to the east of the Convent, whereas it is here put at less than 9'; and *Râs Mohammed*, which lies further to the east than all these except 'Akabah, is placed to the west of them all.

² Dr. Stanley (*S. & P.* 24, note¹), following Ewald (*Archæol.* ii. 61, 283, 286, 2nd edit.), says, "the most recent and the most critical investigation of this (the

Israelitish) history inclines to adopt the numbers of 600,000 (males of the warlike age) as authentic."

³ Dr. Stanley (28) thinks the ark and wooden utensils of the Tabernacle were of this timber. Seetzen (*lit. pt. iii.* 109) saw no trees nearly big enough for such service, and thinks it more probable that the material was obtained by purchase from travelling caravans; but it is not clear whether he thinks that the tree (*Mimosa Nilotica*) is in this wilderness below its usual size, or that not this but something else is the "Shittim-wood" of the A. V.

⁴ So called, but the proper name appears to be *qîq*; *qîq* is the Transfiguration of our Lord, represented in the great mosaic of Justinian, in the apse of its church, probably of his age, as is also the name (Tyrrhitt). The transfer of the body of St. Catherine thither from Egypt by angels is only one of the local legends; but its association appears to have pre-dominated with travellers (Seetzen, *lit. pt. iii.* 414, 5).

In the 16th century calls the *Wady er-Rahel* in front of the Convent, now entirely bare, "a vast green plain."^a In this wilderness, too, abode Amalek, "the first of the nations," powerful enough seriously to imperil the passage of the Israelites through it, and importantly contributing to subsequent history under the monarchy. Besides whom we have "king Arad the Canaanite, who dwelt in the south," i. e. apparently on the terrace of mountain overhanging the Ghôr near Masada on the Dead Sea, in a region now wholly desolate. If his people were identical with the Amorites or Canaanites of Num. xiv. 43; Deut. i. 44, then, besides the Amalekites of Ex. xvii. 8, we have one other host within the limits of what is now desert, who fought with Israel on equal or superior terms; and, if they are not identical, we have two such (Num. xiv. 40-45, xxi. 1, xxxiii. 40; Deut. i. 43, 44). These must have been "something more than a mere handful of Bedouins. The Egyptian copper-mines, monuments, and hieroglyphics in *Sirâbit el-Khadim* and the *Wady Mûghâra*, imply a degree of intercourse between Egypt and the Peninsula" in a period probably older than the Exodus, "of which all other traces have long ceased. The ruined cities of Edom in the mountains east of the 'Arabah, and the remains and history of Petra itself, indicate a traffic and a population in these remote regions which now is almost inconceivable" (*S. & P.* 26). Even the 6th and 7th centuries A.D. showed traces of habitation, some of which still remain in ruined cells and gardens, &c., far exceeding the tale told by present facts. Seetzen, in what is perhaps as arid and desolate a region as any in the whole desert, asked his guide to mention all the neighbouring places whose names he knew. He received a list of sixty-three places in the neighbourhood of Madûrah, Petra, and 'Akabah, and of twelve more in the *Ghôr as-Suphiya*, of which total of seventy-five all save twelve are now abandoned to the desert, and have retained nothing save their names—"a proof," he remarks, "that in very early ages this region was extremely populous, and that the furious rage with which the Arabs, both before and after the age of Mahomet, assailed the Greek emperors, was able to convert into a waste this blooming region, extending from the limit of the Hedjaz to the neighbourhood of Damascus" (*Reisen*, iii. 17, 18).

Thus the same traveller in the same journey from Hebron to Madûrah entered a Wady called *el-Jemen*, where was no trace of water save moist spots in the sand, but on making a hole with the hand it was quickly full of water, good and drinkable (*ib.* 13). The same, if saved in a cistern, and served out by aloes, might probably have clothed the bare wady with verdure. This is confirmed by his remark (*ib.* 83), that a blooming vegetation shows itself in this climate wherever there is water; as well as by the example of the tank system as practised in Hindostan. He also notices that there are quicksands in many spots of the *Debbet er-Ramleh*, which it is difficult to understand, unless as caused by accumulations of water (*ib.* 67). Similarly in the desert *Wady el-Kudeis* between Hebron and Sinai, he found a spot

of quicksand with sparse shrubs growing in it (*ib.* 48).

Now the question is surely a pertinent one, as compared with that of the subsistence of the flocks and herds of the Israelites during their wanderings: how the sixty-three perished communities named by Seetzen's guide can have supported themselves? It is pretty certain that fish cannot live in the Dead Sea,^b nor is there any reason for thinking that these extinct towns or villages were in any large proportion near enough to its waters to avail themselves of its resources, even if such existed. To suppose that the country could ever have supported extensive coverts for game is to assume the most difficult of all solutions of the question. The creatures that find shelter about the rocks, as hares, antelopes, gazelles, jerboas, and the lizards that burrow in the sand (*el-Dabbâ*), alluded to by the traveller in several places (iii. 67, comp. pt. ii. 415-442, and Laborde, *Comm. on Numa*, xxxiii. 42), are far too few, to judge from appearances, to do more than eke out a subsistence, the staple of which must have been otherwise supplied; and the same remark will apply to such casual windfalls as swarms of edible locusts, or flights of quail. Nor can the memory of these places be probably connected with the distant period when Petra, the commercial metropolis of the Nabatheans, enjoyed the carrying trade between the Levant and Egypt westwards, and the rich communities further east. There is least of all reason for supposing that by the produce of mines, or by asphalt gathered from the Dead Sea, or by any other native commodities, they can ever have enjoyed a commerce of their own. We are thrown back, then, upon the supposition that they must in some way have supported themselves from the produce of the soil. And the produce for which it is most adapted is either that of the date-palm, or that to which earlier parallels point, as those of Jedro and the Kenites, and of the various communities in the southern border of Judah (Num. xxxiv. 4, 5; Josh. xv. 3, 4; 1 Sam. xxx. 27-31), viz. that of pasturage for flocks and herds, a possibility which seems solely to depend on adequately husbanding the water supplied by the rains. This tallies with the use of the word *בְּרִיחַ*, for "wilderness," i. e. "a wide open space, with or without actual pasture, the country of the nomads, as distinguished from that of the agricultural and settled people" (*S. and P.* 496, App. §9).^c There seems however to be implied in the name a capacity for pasturage, whether actually realized or not. This corresponds, too, with the "thin," or rather "transparent coating of vegetation," seen to clothe the greater part of the Sinaitic wilderness in the present day (*ib.* 16, 22), and which furnishes an initial minimum from which human fostering hands might extend the prospect of possible resources up to a point as far in excess of present facts as were the numbers of the Israelitish host above the 6000 Bedouins computed now to form the population of the desert. As regards the date-palm, Hasselquist speaks as though it alone afforded the means of life to some existing Arab communities. Hamilton (*Sinai*, &c., 17) says that

^a Monkeys quoted by Stanley, *S. and P.*

^b Seetzen speaks in one place of a few shell-fish being met along its northern shore. Compare Stanley, *S. & P.* 282. [See, THIS SALT.]

^c The word *בְּרִיחַ* has been examined under the head

of *Dunes* [vol. 1. 426]. The writer of that article has nothing to add to it, except to call attention to the use of the term in Jer. li. 1, where the prophet in two words gives an exact definition of a *Wilder*: "a land not sown"—that is, left to nature. [C.]

in his path by the *Wady Hebrón*, towards the modern Sinai, "small clumps of uncultivated date-trees rise between the granite walls of the pass, wherever the winter torrents have left sufficient detritus for their nourishment." And again, after describing the pass of the Convent, he continues, "beneath lies a veritable chaos, through which now trickles a slender thread of water, where in winter rushes down a boiling torrent" (ib. 19). It is hardly too much to affirm that the resources of the desert, under a careful economy of nature's bounty, might be, to its present means of subsistence, as that winter torrent's volume to that summer streamlet's slender thread. In the *Wady Hebrón* this traveller found "a natural bath," formed in the granite by the *Ain Hebrón*, called "the Christians' pool" (ib. 17). Two-thirds of the way up the *Jebel Mésa* he came upon "a frozen streamlet" (ib. 30); and Seetzen, on the 14th of April, found snow lying about in sheltered clefts of the *Jebel Catharin*, where the rays of the sun could not penetrate (ib. 92). Hamilton encountered on the *Jebel Mésa* a thunderstorm, with "heavy rain" (*Sinai*, etc., 16). There seems on the whole no deficiency of precipitation. Indeed the geographical situation would rather bespeak a copious supply. Any southerly wind must bring a fair amount of watery vapour from the Red Sea, or from one of its expanding arms, which embrace the Peninsula on either side, like the blades of a forer; while at no greater distance than 140 miles northward roll the waters of the Mediterranean, supplying, we may suppose, their quota, which the much lower ranges of the *Tih* and *Odjme* cannot effectually intercept. Nor is there any such abetter from rain-clouds on either of the Gulfs of Suez and 'Akabah, as the long line of mountains on the eastern flank of Egypt, which screens the rain supply of the former from reaching the valley of the Nile. On the contrary, the conformation of the Peninsula, with the high wedge of granitic mountains at its core, would rather receive and condense the vapours from either gulf, and precipitate their bounty over the lower faces of mountain and troughs of wady, interposed between it and the sea. It is much to be regretted that the low intellectual condition of the monks⁴ forbids any reasonable hope of adequate meteorological observations to check these merely probable arguments with reliable statements of fact; but in the absence of any such register, it seems only fair to take reasonable probabilities fully into view. Yet some significant facts are not wanting to redeem in some degree these probabilities from the ground of mere hypothesis. "In two of the great wadys" which break the wilderness on the coast of the Gulf of Suez, "*Ghüründel*, and *Usrit*, with its continuation of the *Wady Tayibah*, tracts of vegetation are to be found in considerable luxuri-

ance." The wadys leading down from the Sinai range to the Gulf of 'Akabah "furnish the same testimony, in a still greater degree," as stated by Rhipell, Miss Martineau, Dr. Robinson, and Burckhardt. "In three spots, however, in the desert . . . this vegetation is brought by the concurrence of the general configuration of the country to a still higher pitch. By far the most remarkable collection of springs is that which renders the clusters of the *Jebel Mésa* the chief resort of the Bedouin tribes during the summer heats. Four abundant sources in the mountains immediately above the Convent of St. Catherine must always have made that region one of the most frequented of the desert . . . Oases (analogous to that of Ammon in the western desert of the Nile) are to be found wherever the waters from the different wadys or hills, whether from winter streams or from such living springs as have just been described, converge to a common reservoir. One such oasis in the Sinaitic desert seems to be the palm-grove of *El-Wady at Thér*, described by Burckhardt as so thick that he could hardly find his way through it (*S. and P.* 19, note 1; see Burckh. *Arab.* ii. 362). The other and more important is the *Wady Firdán*, high up in the table-land of Sinai itself (*S. and P.* 18, 19)." Now, what nature has done in these favoured spots might surely be seconded⁵ in others by an ample population, familiarized, to some extent, by their sojourn in Egypt with the most advanced agricultural experience of the then world, and guided by an able leader who knew the country, and found in his wife's family others who knew it even better than he (*Num.* x. 31). It is thus supposable that the language of Ps. cvii. 35-38, is based on no mere pious imagery, but on actual fact: "He turneth the wilderness into a standing water, and dry ground into water-springs. And there He maketh the hungry to dwell, that they may prepare a city for habitation; and sow the fields and plant vineyards, which may yield fruits of increase. He blesseth them so that they are multiplied greatly; and suffereth not their cattle to decrease." And thus we may find an approximate basis of reality for the enhanced poetic images of Isaiah (xli. 19, lv. 13). Palestine itself affords abundant tokens of the resources of nature so husbanded, as in the artificial "terraces of which there are still traces to the very summits" of the mountains, and some of which still, in the Jordan valley, "are occupied by masses of vegetation" (*S. and P.* 138, 297). In favoured spots wild luxuriance testifies to the extent of the natural resources, as in the wadys of the coast, and in the plain of Jericho, where "far and wide extends the green circle of tangled thickets, in the midst of which are the hovels of the modern village, beside which stood, in ancient times, the great city of Jericho" (ib. 306). From this plain alone, a correspondent of the British

⁴ There is no mistaking the enormous amount of rain which must fall on the Desert and run off uselessly into the sea. In February all the wadys had evidently had strong torrents down, and all across them from hill-side to hill-side. The whole surface of wide valleys was marked and ribbed like the bed of a stony and sandy stream in England. The great plain of *Shurkhá* was intersected in all directions by these torrents, draining the mountains about *Nakb Badara*. So all the wadys, wherever there was a decided fall. Major Macdonald (engaged at present in superintending the working of a turquoise bed at *Sirráh el-Khadim*) said that after a sudden storm in the hills to the N., he had from two to

three feet of water running furiously through his tents for three hours, to *Wady Maghára*. Common industry in digging tanks would make all the wadys "Moses as the rose" (Tyrrwhitt).

⁵ See Dr. Stanley's estimate of the inmates of the convent (*S. and P.* 54, 56).

⁶ Nay, it is possible that such works had already to some extent been undertaken on account of the mining colonies which certainly then existed at *Wady el-Hadara* and *Shurkhá el-Khadim*, and were probably supported on the produce of the country, not sent on camels from Egypt (Tyrrwhitt).

Conan, at Iaffa asserts that he could feed the whole population of modern Syria (*Cotton Supply Reporter*, June 14, 1862). But a plantation reclaimed from the wilderness is ever in the position of a besieged city; when once the defence of the human garrison is withdrawn, the fertility stimulated by its agency must obviously perish by the invasion of the wild. And thus we may probably suppose that, from numberless tracts, thus temporarily rescued from barrenness, in situations only moderately favourable, the traces of verdure have vanished, and the desert has reclaimed its own; or that there the soil only betrays its latent capacity by an unprofitable dampness of the sand.

Seetzen, on the route from Hebron to Sinai, after describing an "immense dinky plain," the "dreariest and most desolate solitude," observes that, "as soon as the rainy season is over and the warm weather sets in, the pits (of rain-water) dry up, and it becomes uninhabitable," as "there are no brooks or springs here" (iii. 55, 56). Dr. Stewart (*The Tent and the Khan*, 14, 15) says of the *Wady Akthi*, which he would identify with Etham (Ex. xiii. 20; Num. xxxiii. 6), "sand-hills of considerable height separate it from the sea, and prevent the winter rains from running off rapidly. A considerable deposit of rich alluvial loam is the result, averaging from 2 to 4 inches in thickness, by sowing upon which immediately after the rains the Bedouins could certainly reap a profitable harvest; but they affect to despise all agricultural labour. . . . Yet," he adds, "the region never could have supplied food by its own natural vegetation for so great a multitude of flocks and herds as followed in the train of the Israelites." This seems rather a precipitate sentence; for one can hardly tell what its improved condition under ancient civilization may have yielded, from merely seeing what it now is, after being overrun for centuries by hordes of contemptuous Bedouins. Still, as regards the general question, we are not informed what numbers of cattle followed the Israelites out of Egypt. We only know that "flocks and herds" went with them, were forbidden to graze "before the mount" (Sinai), and shared the fortunes of the desert with their owners. It further appears that, at the end of the forty years' wandering, two tribes and a half were the chief, perhaps the only, cattle-masters. And, when we consider how greatly the long and sore bondage of Egypt must have interfered with their favourite pursuit during the eighty years of Moses' life before the Exodus, it seems reasonable to think that in the other tribes only a few would have possessed cattle on leaving Egypt. The notion of a people "scattered abroad throughout all the land of Egypt" (Ex. v. 12), in pursuit of wholly different and absorbing labour, being able generally to maintain their wealth as sheep-masters is obviously absurd. It is therefore supposable that Reuben, Gad, and a portion of Manasseh had, by remoteness of local position, or other favourable circumstances to us unknown, escaped the oppressive consequences to their flocks and herds which must have generally prevailed. We are not told that the lambs at the first passover were obtained from the flock of each family, but only that they were bidden to "draw out and take a lamb for an house"—a direction quite consistent in many, perhaps in most cases, with purchase. Hence it is probable that these two tribes and a half may have been the chief cattle-masters first as well as last. If they had enough cattle to find their pursuit in tending

them, and the others had not, economy would dictate a transfer; and the whole multitude of cattle would probably fare better by such an arrangement than by one which left a few head scattered up and down in the families of different tribes. Nor is there any reason to think that the whole of the forty years' sojourn was spent in such locomotion as marks the more continuous portion of the narrative. The great gap in the record of events left by the statement of Deut. i. 46, "Ye abode in Kadesh many days," may be filled up by the supposition of quarters established in a favourable site, and the great bulk of the whole time may have been really passed in such stationary encampments. And here, if two tribes and a half only were occupied in tending cattle, some resource of labour, to avoid the embarrassing temptations of idleness in a host so large and so disposed to murmur, would be, in a human sense, necessary. Nor can any so probable an occupation be assigned to the remaining nine and a half tribes, as that of drawing from the wilderness whatever contributions it might be made to afford. From what they had seen in Egypt, the work of irrigation would be familiar to them, and from the prospect before them in Palestine the practice would at some time become necessary: thus there were on the whole the soundest reasons for not allowing their experience, if possible, to lapse. And, irrigation being supposed, there is little, if any, difficulty in supposing its results; to the spontaneousness of which ample testimony, from various travellers, has been cited above. At any rate it is unwise to decide the question of the possible resources of the desert from the condition to which the spathy and fastidiousness of the Bedouins have reduced it in modern times. On this view, while the purely pastoral tribes would retain their habits unimpaired, the remainder would acquire some slight probation in those works of the field which were to form the staple industry of their future country. But, if any one still insists that the produce of the desert, however supposably improved, could never have yielded support for all "the flocks and herds"—utterly indefinite as their number is—which were carried thither; this need not invalidate the present argument, much less be deemed inconsistent with the Scriptural narrative. There is nothing in the latter to forbid our supposing that the cattle perished in the wilderness by hundreds or by thousands. Even if the words of Ps. cvii. 38 be taken in a sense literally historical, they need mean no more than that, by the time they reached the borders of Palestine, the number so lost had, by a change of favourable circumstances, been replaced, perhaps even by capture from the enemy, over whom God, and not their own sword, had given them the victory. All that is contended for is, that the resources of the wilderness were doubtless utilized to the utmost, and that the flocks and herds, so far as they survived, were so kept alive. What those resources might amount to, is perhaps nearly as indefinite an inquiry as what was the number of the cattle. The difficulty would "find its level" by the diminution of the latter till it fell within the limits of the former; and in this balanced state we must be content to leave the question.

Nor ought it to be left out of view, in considering any arguments regarding the possible change in the character of the wilderness, that Egyptian policy certainly lay, on the whole, in favour of

extending the desolation to their own frontier on the Suez side: for thus they would gain the surest protection against invasion on their most exposed border; and as Egypt rather aimed at the development of a high internal civilisation than an extension of influence by foreign conquest, such a desert frontier would be to Egypt a cheap defence. Thus we may assume that the Pharaohs, at any rate after the rise of the Assyrian empire, would discern their interest and would act upon it, and that the felling of wood and stopping of wells, and the obliteration, wherever possible, of oases, would systematically make the Peninsula untenable to a hostile army descending from the N.E. or the N.

IV. It remains to trace, so far as possible, the track pursued by the host, bearing in mind the limitation before stated, that a variety of converging or parallel routes must often have been required to allow of the passage of so great a number. Assuming the passage of the Red Sea to have been effected at some spot N. of the now extreme end of the Gulf of Suez, they would march from their point of landing a little to the E. of S. Here they were in the wilderness of Shur, and in it "they went three days and found no water." The next point mentioned is Marah. The *Ain el-Hawdra* has been thought by most travellers since Burckhardt's time to be Marah. Between it and the *Ain Mûsa* the plain is alternately gravelly, stony, and sandy, while under the range of *Jebel Wardân* (a branch of *et-Tû*) chalk and flints are found. There is no water on the direct line of route (Robinson, i. 87-88). *Hawdra* stands in the lime and gypsum region which lines the eastern shore of the Gulf of Suez at its northern extremity. Seetzen (*Reisen*, iii. 117) describes the water as salt, with purgative qualities; but adds that his Bedouins and their camels drank of it. He argues, from its inconsiderable size, that it could not be the Marah of Moses. This, however, seems an inconclusive reason. [MARAH.] It would not be too near the point of landing assumed, as above, to be to the N. of the *Ain Mûsa*, nor even, as Dr. Stewart argues (p. 55), too near for a landing at the *Ain Mûsa* itself, when we consider the incumbrances which would delay the host, and, especially whilst they were new to the desert, prevent rapid marches. But the whole region appears to abound in brackish or bitter springs (Seetzen, *ibid.* iii. 117, &c.; *Asmerk.* 430). For instance, about 1½ hour nearer Suez than the *Wady Ghârîndel* (which Lepsius took for Marah, but which Niebuhr and Robinson regard as more probably Elim), Seetzen (*ibid.* iii. 113, 114) found a *Wady et-Tû*, with a salt spring and a salt crust on the surface of its bed, the same, he thinks, as the spot where Niebuhr speaks of finding rock-

salt. This corresponds in general proximity with Marah. The neighbouring region is described as a low plain girt with limestone hills, or more rarely chalk. For the consideration of the miracle of sweetening the waters, see MARAH. On this first section of their desert-march, Dr. Stanley (*S. and P.* 37) remarks, "There can be no dispute as to the general track of the Israelites after the passage (of the Red Sea). If they were to enter the mountains at all, they must continue in the route of all travellers, between the sea and the table-land of the *Tû*, till they entered the low hills of *Ghârîndel*. According to the view taken of the scene of the passage, Marah may either be at 'the springs of Moses,' or else at *Hawdra* or *Ghârîndel*." He adds in a note, "Dr. Graul, however, was told . . . of a spring near *Tû el-Amra*, right (i. e. south) of *Hawdra*, so bitter that neither men nor camels could drink of it. From hence the road goes straight to *Wady Ghârîndel*." Seetzen also inclines to view favourably the identification of *el-Amra* with Marah. He gives it the title of a "wady," and precisely on this ground rejects the pretensions of *el-Hawdra* as being no "wady," but only a brook;¹ whereas, from the statement "they encamped" at Marah, Marah must, he argues, have been a wady.² It seems certain, however, that *Wady Ghârîndel*—whether it be Marah, as Lepsius and (although doubtfully) Seetzen thought, or Elim as Niebuhr, Robinson, and Kruse—must have lain on the line of march, and almost equally certain that it furnished a camping station. In this wady Seetzen found more trees, shrubs, and bushes than he anywhere else saw in his journey from Sinai to Suez. He particularizes several date-palms and many tamarisks, and notes that the largest quantity of the vegetable manna, now to be found anywhere in the Peninsula, is gathered here (iii. 116) from the leaves of the last-named tree, which here grows "with gnarled boughs and hoary head; the wild acacia, tangled by its desert growth into a thicket, also shoots out its grey foliage and white blossoms over the desert" (Stanley, *S. and P.* 68). The "scenery" in this region becomes "a succession of watercourses"³ (*ibid.*); and the *Wady Tayibeh*, connected with *Ghârîndel* by *Useit*,⁴ is so named from the goodly water and vegetation which it contains. These three wadis encompass on three sides the *Jebel Hummâm*; the sea, which it precipitously overhangs, being on the fourth. To judge from the configuration as given in the maps, there seems no reason why all three should not have combined to form Elim, or at any rate, as Dr. Stanley (*ibid.*) suggests, two of them. Only, from Num. xxiii 8, 10, as Elim appears not to have been on the sea

¹ Dr. Aitoun, quoted by Dr. Stewart (l. c.), it seems, denies this.

² In the *Wady Tû* were found date-palms, wild trunkless tamarisks, and the white-flowering broom; also a small, aspy growth, scarce a hand high, called *el-Seemak* by the Bedouins, which, when dried, is pounded by them and mixed with wheat for bread. It has a saltish-sour taste, and is a useful salad herb, belonging to the order *Mesembryanthemum*, Linn. (Seetzen, *ibid.*).

³ Yet he apparently allows as possible that Marah may be found in a brook observed by Fûrer a little to the N. of *Ghârîndel* (iii. 117).

⁴ There is, however, a remarkable difference between the indication of locality given by Seetzen to this wady, and the position ascribed to the *Tû el-Amra*, as above. For Seetzen (or rather Dr. Kruse, commenting on his

Journal) says, Robinson passed the wady two hours nearer Suez than *Hawdra*, and therefore so far to the north, not south, of it (*Reisen*, iii. pt. iii. 430-1). Hence it is possible that the *Tû* and the *Wady el-Amra* may be distinct localities, and the common name result from the common property of a briny or bitter spring. Kiepert's map (to Robinson, vol. i.) gives the two names *Amra* and *Hawdra* close together, the former a little, but less than a mile, to the N.

⁵ So Dr. Kruse notices that Dr. Robinson's Arabs who camped in *Ghârîndel* found, at half an hour's distance from their camping ground, a flowing brook and copious fountains, such as they hitherto nowhere found in the peninsula (Seetzen, iii. pt. iii. 430).

⁶ Robinson (l. 69) says that near this wady hot sulphureous springs were visited by Niebuhr, and are ascribed by Ruessegger.

we must suppose that the encampment, if it extended into three wadys, stopped short of their seaward extremities. The Israelitish host would scarcely find in all three more than adequate ground for their encampment. Beyond (i. e. to the S.E. of *Ghârûndel*), the ridges and spurs of limestone mountain push down to the sea, across the path along the plain (Robinson, i. 70, and Map).

This portion of the question may be summed up by presenting, in a tabular form, the views of some leading travellers or annotators, on the site of Elim:—

Wady <i>Ghârûndel</i> .		Wady <i>Uacit</i> .	Some warm springs north of <i>Tôr</i> , which feed the rich date- plantations of the coast there, Seetzen.
Niebuhr, Robinson, Krusse.	One or both, Stanley.	Laborde "possibly," Robinson (l. 72).	
[By Lepsius identified with Marah.]			

Dr. Kruse (*Anmerk.* 418) singularly takes the words of Ex. xv. 27, "they encamped there (in Elim) *by the waters*," as meaning "by the sea;" whereas, from Num. xxxiii. 9, 10, it appears they did not reach the sea till a stage further, although their distance from it previously had been but small.

From Elim, the next stage brought the people again to the sea. This fact, and the enviable position in respect of water supply, and consequent great fertility, enjoyed by *Tôr* on the coast, would make it seem probable that *Tôr* was the locality intended; but as it lies more than seventy miles, in a straight line, from the nearest probably assignable spot for Elim, such a distance makes it a highly improbable site for the next encampment. The probable view is that their seaside camp was fixed much nearer to the group of wadys viewed as embracing Elim, perhaps in the lower part of the *Wady Taybeh*, which appears to have a point of juncture with the coast (Stanley, *S. and P.* 38). The account in Ex. xvi. knows nothing of this encampment by the sea, but brings the host at once into "the wilderness of Sin;" but we must bear in mind the general purpose of recording, not the people's history so much as God's dealings with them, and the former rather as illustrative of the latter, and subordinate thereto. The evident design however, in Num. xxxiii. being, to place on record their itinerary, this latter is to be esteemed as the *locus classicus* on any topographical questions, as compared with others having a less special relation to the track. The "wilderness of Sin" is

an appellation no doubt representing some natural feature, and none more probably than the alluvial plain, which, lying at the edge of the sea, about the spot we now regard them as having reached begins to assume a significant appearance. The modern name for this is *el-Kâa*, identified by Seetzen² with this wilderness (iii. pt. iii. 412). Dr. Stanley³ calls *el-Kâa*, at its initial point, "the plain of *Murkhâh*," and thinks it is probably this wilderness. Lower down the coast this plain expands into the broadest in the Peninsula, and somewhere in the still northern portion of it we must doubtless place the "Dophkah"⁴ and "Alush" of Num. xxxiii. 12-14.

In the wilderness of Sin occurred the first murmuring for food, and the first fall of manna. The modern confection sold under that name is the exudation collected from the leaves of the tamarisk tree (*tamarix Orientalis*, Linn., Arab. *tarfa*, Heb. *טַרְפָּה*) only in the Sinaitic valleys, and in no great abundance.⁵ If it results from the punctures made in the leaf by an insect (the *coccus manniparus*, Ehrenberg) in the course of June, July, and August, this will not suit the time of the people's entering the region "on the fifteenth day of the second month after" their departure from Egypt (Ex. xvi. 1-8). It is said to keep as a hardened syrup for years (Laborde, *Compend Geogr.* on Ex. xvi. 13, 14), and thus does not answer to the more striking characteristics described in Ex. xvi. 14-26. [MANNA.] Seetzen thought that the gum Arabic, an exudation of the acacia, was the real manna of the Israelites; i. e. Seetzen regards the statement of "bread from heaven" as a fiction (*Reisen*, iii. 75-79). A caravan of a thousand persons is said by Hasselquist (*Voyages, &c.*, *Materia Medica*, 298, transl. ed. 1766) to have subsisted solely on this substance for two months. In the same passage of Ex. (v. 13) quails are first mentioned.

In most portions of the earlier route it is more important to show the track than to fix the stations; and such an indication only can be looked for where nothing beyond the name of the latter is recorded. Supposing now that the alluvial plain, where it first begins to broaden to a significant size, is "the wilderness of Sin," all further questions, till we come to Sinai, turn on the situation assigned to Rephidim. If, as seems most likely, Rephidim be found at *Feirâm* [REPHIDIM], it becomes almost certain that the track of the host lay to the north of *Serbûl*,⁶ a magnificent five-peaked mountain, which some have thought to be Sinai, and which becomes first visible at the plain of *Murkhâh*. [SINAI.]

² He calls it the Wilderness of *Sir*, but this is plainly a misprint for *Sin*.

³ His map, however, omits the name *el-Kâa*. Robinson thinks the wilderness of Sin is the maritime plain south-east of *Murkhâh*, but not certainly including the latter.

⁴ Seetzen thought that Dophkah might possibly be retraced in the name of a place in this region, *el Tobbaaka* (Krusse). For Alush there is no conjecture.

⁵ Seetzen compares it to the round beads obtained from the mastich; and says it is used as a purgative in Upper Egypt, and that it is supposed to be brought out by the great effect of heat on a sandy soil, since in Syria and elsewhere this tree has not the product.

⁶ Dr. Stanley notices that possibly, viewing *Ghârûndel* (or *Uacit*, which lies beyond it, from Soes) as Elim, the host may have gone to the latter (the further point), and then have turned back to the lower part of *Ghârûndel*,

and there pitched by the "Red Sea." Then, he further remarks, it was open to them to take a northern course for Sinai (*Jebel Mâas*), avoiding *Serbûl* and *Feirâm* altogether (*S. & P.* 38). But all this, he adds, seems "not likely." That route passes by *Serbûl* *el-Khâdim* to the *Jebel Mâas*. Robinson, who went by this way, conjectured that *el-Khâdim* was a place of pilgrimage to the ancient Egyptians, and might have been the object of Moses' proposed journey of "three days into the wilderness" (l. 18). The best account of this locality by far, which the present contributor has met with, is that in the MS. referred to at the end of this article. The writer dwells especially on the immense remains of mining operations, refuse of fuel, metal, &c., to be seen there; also on the entrenched camp at *Atghâra*, discovered recently by Major Macdonald, evidently a work of great labour and of capacity for a large garrison.

The tabernacle was not yet set up, nor the order of march organized, as subsequently (Num. x. 13, &c.), hence the words "track" or "route," as indicating a line, can only be taken in the most wide and general sense. The road slowly rises between the coast and *Feirán*, which has an elevation of just half the highest peak of the whole cluster. *Feirán* must have been gained by some road striking off from the sea-coast, like the *Wady Mokatteb*, which is now the usual route from Cairo thither, perhaps by several parallel or converging lines. Those who reject *Feirán* for Rephidim will have the onset of accounting for such a fruitful and blooming spot as, from its position, it must always have been, being left out of the route, and of finding some other site for Rephidim. Possibly *Tār* itself might be Rephidim, but then not one of the sites generally discussed for Sinai will suit. It seems better then to take *Feirán*, or the adjacent valley of *es-Sheykh* in connexion with it, for Rephidim. The water may have been produced in one, and the battle have taken place in the other, of these contiguous localities; and the most direct way of reaching them from *el-Murkháh* (the "wilderness of Sin") will be through the wadys *Shelláh* and *Mokatteb*. Dr. Stanley, who suggests the road by the S. of *Sarbdí*, through *Wady Hebrán* (Robinson, i. 95), as also a possible route to Sinai (*S. and P.* 38, 4), and designates it "the southern" one, omits to propose any alternative station for Rephidim; as he also does in the case of "the northern" route being accepted. That route has been already mentioned [page 1576, note 1], but is of too remote a probability to require being here taken into view. The *Wady Mokatteb*, the "written," as its name imports, contains the largest number of inscriptions known as the Sinaitic. They are scratched on the friable surface of the sandstone masses which dot the valley on either side, some so high as to have plainly not been executed without mechanical aid and great deliberation. They are described or noticed by Dr. Robinson, Burckhardt, Laborde, Seetzen, and others, but especially by Dr. Stanley (*S. and P.* 57-62). [See on this subject SINAI, notes * and *.]

V. Besides the various suggestions regarding Horeb and Sinai given under SINAI, one occurs in Dr. Kruse's *Anmerkungen* on Seetzen, which is worth recording here. Seetzen approached the *Jebel Músa* from the N., a little W., by a route which seems to have brought him into the region through which Dr. Robinson approached it from the N.W. On this Dr. Kruse remarks, "Horeb lay in the plain of Rephidim . . . a day's march short of (or) Sinai, on a dry plain, which was extensive enough for a camping-ground, with a rock-fountain struck by Moses from the rock. This distance just hits the plain *es-Sheb* (*Sheb*, Kiepert's Map), which Robinson entered before reaching the foremost ridge of Sinai, and suits the peaked mountain *el-Orf*, in the highest point of this plain. That this plain, too, is large enough for fighting in (as

mentioned Ex. xvii. 9), is plain from Robinson's statement (i. 141) of a combat between two tribes which took place there some years before his visit. Robinson, from this rocky peak, which I took for Horeb, in 1½ hour reached the spring *Gurbeh*, probably the one the opening of which was ascribed to Moses, and thence in another hour came to the steep pass *Nább Háy*, to mount which he took 2½ hours, and in 2½ hours more, crossing the plain *er-Ráheh*, arrived at the convent at the foot of Sinai. Seetzen's Arabs gave the name of *Orribe* to a mountain reached before ascending the pass, no doubt the same as Robinson's *el-Orf* and the Horeb of Holy Writ" (*Reisen*, iii. pt. iii. 422; comp. 414). He seeks to reconcile this with Ex. xxxiii. 6, which describes the people, penitent after their disobedience in the matter of the golden calf, as "stripping themselves of their ornaments by the Mount Horeb," by supposing that they were by Moses led back again from Sinai, where God had appeared to him, and immediately below which they had encamped, to Horeb in the plain of Rephidim. But this must have been a day's journey backward, and of such a retrograde movement the itinerary in Num. xxxiii. 14, 15, 16, has no trace. On the contrary, it says, "they removed from the desert of Sinai and pitched in Kibroth Hattaavah." Now, although they stayed a year in the wilderness of Sinai (Ex. xix. 1; Num. x. 11, 12), and need not be supposed to have had but one camping station all the time, yet Rephidim clearly appears to lie without the limits of that wilderness (Ex. xvii. 1, xix. 1, 2; Num. xxxiii. 15), and a return thither, being a departure from those limits, might therefore, we should expect, be noticed, if it took place; even though all the shiftings of the camp within the wilderness of Sinai might not be set down in the itinerary. Under SINAI an attempt is made to reconcile the "rock in Horeb" at Rephidim with a "Mount Horeb" (the same, in fact, as Sinai, though with a relative difference of view), by regarding "Horeb" as a designation descriptive of the ground, applicable, through similarity of local features, to either. If this be not admitted, we may perhaps regard the *Wady es-Sheykh*, a crescent concave southwards, whose western born joins *Wady Feirán*, and whose eastern finds a south-eastern continuation in the plain *er-Ráheh* (leading up to *Jebel Músa*, the probable Sinai), as the Horeb proper. This contains a rock called traditionally the "seat of Moses" (Schubert, *Reisen*, ii. 356). And this is to some extent confirmed by the fact that the wady which continues the plain *er-Ráheh* to the N.W., forming with the latter a slightly obtuse angle, resumes the name of *es-Sheykh*. If we may suppose the name "Horeb," though properly applied to the crescent *Wady es-Sheykh*, which joins *Feirán*, to have had such an extension as would embrace *er-Ráheh*, then the "rock in Horeb" might be a day's journey from the "Mount (of) Horeb." This view, it may be observed, does not exclude that just referred to under SINAI, but merely removes it from resting

* Through the wilderness of *Káa* (from its northern border) to the opening of *Wady Hebrán* into it is 5½ hours' journey. The manna tamarisk is found there; and some birds, called by Dr. Kruse "Wüstenhühner," which he appears to think might be the quails of Scripture. Seetzen in his journal plainly sets down the "quails" as being wholly a mistake for locusts (*Reisen*, iii. pt. iii. 413, comp. 80).

* Two hardly distinguishable mountains on either side of the way (from the *Wady Reizardán*) were named *er-ile* and *Preueh* (*Reisen*, iii. 80).

* He thinks the reason why they were thus countermanded was because "Horeb" was better supplied with water, but he does not show that the "spring *Gurbeh*" adequately meets this condition (ib. 422).

* The expression *סֹהַר הָהָר* in Ex. xxxiii. 6 may probably be, like the expression *הַר הַמִּלִּים*, *hu. a.*, and that of *יְהוָה הָהָר*, *Joab. xxi. 11, &c.*, two nouns in regimen, the "mount of Horeb."

on the sense there proposed for "Horeb" (חֹרֵב), as a local appellative, to more general grounds.

But whatever may be the case with other sacred localities, the identification of Sinai itself will probably never be free from obscurity. We seem to have adequate information regarding all the eminent mountains within the narrow compass to which our choice is reduced, and of all the important passes. Nor is it likely that any fresh clue of trustworthy local tradition will be unravelled, or any new light thrown on the text of the Scriptural statements. Somewhere in the granitic nucleus of lofty mountain-crests the answer, doubtless, lies.⁷ For the grounds on which a slight preponderance of probability rests in favour of the *Jebel Mâsa*,⁸ see SINAI. But even that preponderance mainly rests on the view that the numbers ascribed in our present text to the host of Israel are trustworthy. If further criticism should make this more doubtful than it now is, that will have the probable effect of making the question more vague rather than more clear than it is at present. "This degree of uncertainty is a great safeguard for the real reverence due to the place. As it is, you may rest on your general conviction and be thankful" (*S. & P.* 76). The tradition which has consecrated the *Jebel Mâsa* can, we know, be traced to its source in a late year. It has the taint of modernism and the detective witness of the older tradition of *Serbâl*. Dr. Stanley thinks it "doubtful whether the scene of the giving of the Law, as we now conceive it, ever entered into the minds of those who fixed the traditional site. The consecrated peak of the *Jebel Mâsa* was probably revered simply as the spot where Moses saw the vision of God, without reference to any more general event" (*S. & P.* 76), and this is likely to have been equally true of *Serbâl* before it. The Eastern mind seized on the spot as one of devout contemplation by the one retired saint; the Western searches for a scene which will bring the people perceptibly into the region of that Presence which the saint beheld.

Certain vivid impressions left on the minds of travellers seem to bespeak such remarkable features for the rocks of this cluster, and they are generally so replete with interest, that a few leading details of the aspect of principal mountains may find place here. Approaching the granitic nucleus from the N. side, Seetzen found himself "ever between two high wild and naked cliffs of granite." All possible forms of mountains blended in the view of the group, conical and pointed, truncated, serrated, and rounded (*Reisen*, iii. 69, 67). Immediately previous to this he had been upon the perpendicular sandstone cliffs, which in *el-Dûlâl* bounded the sandy plain *er-Ramleh* on the eastern side, whilst similar steep sandstone cliffs lay on the N. and N.W. On a nearer view small bright quartz-grit (*Quarz-kiesel*), of whitish-yellow and reddish hue, was observed in the coarse-grained sandstone. Dr. Stanley,

approaching from the N.W., from *Wady Shalâl* through *Wadys Sidri* and *Feirân*, found the rocks of various orders more or less interchanged and intermixed. In the first, "red tops resting on dark-green bases closed the prospect in front," doubtless both of granite. Contrast with this the description of *Jebel Mâsa*, as seen from Mount St. Catherine (*ibid.* 77), "the reddish granite of its lower mass, ending in the grey green granite of the peak itself." *Wady Sidri* lies "between red granite mountains descending precipitously on the sands," but just in the midst of it the granite is exchanged for sandstone, which last forms the rock-tablets of the *Wady Mokattab*, lying in the way to *Wady Feirân*. This last is full of "endless windings," and here "began the curious sight of the mountains, streaked from head to foot, as if with boiling streams of dark red matter poured over them, the igneous fluid squirted upwards as they were heaved from the ground." . . . "The colours tell their own story, of chalk and limestone and sandstone and granite." Besides these, "huge cones of white clay and sand are at intervals planted along these mighty watercourses (the now dry wadis), apparently the original alluvial deposit of some tremendous antediluvian torrent, left there to stiffen into sandstone" (71). The *Wady Feirân* is bounded southwards by the *Jebel Nediye* and the *Jebel Serbâl*, which extend westwards to the maritime plain, and eastward to the Sinaitic group, and on whose further or southern side lies the widest part of *el-Kâa*, previously noticed as the "Wilderness of Sin." Seetzen remarks that *Jebel Feirân* is not an individual mountain, but, like Sinai, a conspicuous group (*Reisen*, iii. 107; comp. pt. iii. 413).

Serbâl rises from a lower level than the Sinaitic group, and so stands out more fully. Dr. Stewart's account of its summit confirms that of Burckhardt. The former mounted from the northern side a narrow plateau at the top of the easternmost peak. A block of grey granite crowns it and several contiguous blocks form one or two grottoes, and a circle of loose stones rests in the narrow plateau at the top 'The Tent and the Khan, 117, 118). The "five peaks," to which "in most points of view it is reducible, at first sight appear inaccessible, but are divided by steep ravines filled with fragments of fallen granite." Dr. Stanley mounted "over smooth blocks of granite to the top of the third or central peak," amid which "innumerable shrubs like sage or thyme, grew to the very summit." Here, too, his ascent was assisted by loose stones arranged by human hands. The peak divides into "two eminences," on "the highest of which, as on the back of some petrified tortoise, you stand, and overlook the whole peninsula" (*S. & P.* 71, 72). Russegger says "the stone of the peak of *Serbâl* is porphyry" (*Reisen*, iii. 276). Dr. Stewart mentions the extensive view from its summit of the mountains "which arise from the western shore on

⁷ The *Tabula Peutingeriana* gives in the interior of the Sinaitic peninsula a wilderness indicated as "desertum ubi xl. annos erraverunt filii Israel ducente Moyses," and marks therein a three-peaked mountain, with the words, "hic legem acciperunt in monte Syna." Dr. Kruse thinks the "three peaks" mean Sinai (i.e. the *Jebel Mâsa*), *Ag. Eydinâ* and the *Jebel Humr* (Seetzen, *Reisen*, iii. pt. iii. 421).

⁸ Dr. Kruse says, "This highest S.E. point of Sinai is undisputedly the 'mountain of the Lord' of Holy Writ, the modern Mount St. Catherine. The N.W. part of Sinai

is, however, now named 'Horîf' by the monks, not by the Arabs, probably in order to combine Horeb with Sinai, by which name they denote the most south-easterly point. The 'plain' or 'wilderness' of Sinai can be nothing else than the high plain situated on the northern steep declivity surrounded by the three before-named peaks of Sinai, the opposite plateau of *Jebel Fureâ*, and K. and W. some low ridges. It is now called the plain *Râkâk*, and is, according to Robinson's measurement, quite large enough to hold two millions of Israelites: who have encamped together" (*ibid.* 423).

the Gulf of 'Akabah," seen in the N.E., and of the Sinaitic range, "closely packed" with the intermediate *Jebel Wateidh*, "forming the most confused mass of mountain tops that can be imagined" (114, 115). His description of the ascent of the eastern peak is formidable. He felt a rarity of the air, and often had to climb or crawl flat on the breast. It was like "the ascent of a glacier, only of smooth granite, instead of ice." At a quarter of an hour from the summit he also "found a stair of blocks of granite, laid one above another on the surface of the smooth slippery rock" (113). On the northern summit are visible the remains of a building, "granite fragments cemented with lime and mortar," and "close beside it three of those mysterious inscriptions," implying "that this summit was frequented by unknown pilgrims who used those characters" (*S. and P. 72*).

The approach to *Jebel Mûsa* from the W. is only practicable on foot. It lies through *Wady Solam* and the *Nûbb Hôwy*, "Pass of the Wind," whose stair of rock leads to the second or higher stage of the great mountain labyrinth. Elsewhere this pass would be a roaring torrent. It is amidst masses of rock a thread of a stream just visible, and here and there forming clear pools, shrouded in palms, or leaving its clue to be traced only by rushes. From the head of this pass the cliff-front of Sinai comes in sight through "a long continued plain between two precipitous mountain ranges of black and yellow granite." This is the often-mentioned plain *er-Râheh*. Deep gorges enter it on each side, and the convent and its gardens close the view. The ascent of *Jebel Mûsa*, which contains "high valleys with abundant springs," is by a long flight of rude steps winding through crags of granite. The cave and chapel "of Elias" are passed on the slope of the ascent, and the summit is marked by the ruins of a mosque and of a Christian church. But, Strauss adds, "the 'Mount of Moses' rose in the south higher and higher still," and the point of this *Jebel Mûsa*, eighty feet in diameter, a distant two hours and more from the plain below (*Sinai and Golgotha*, 116). The *Râs Sûsfâfeh* seems a small, steep, and high mountain, which is interposed between the slope of *Jebel Mûsa* and the plain; and, from its position, surveys both the openings of *es-Sheykh* N.E. and of *er-Râheh* N.W., which converge at its foot. Opposite to it, across the plain, is the *Jebel Fursid*, whose peak is cloven asunder, and the taller summit is again shattered and rent, and strewn, as by an earthquake, with its own fragments. The aspect of the plain between *Jebel Fursid*, which here forms a salient angle, wedging southwards, and the *Râs Sûsfâfeh*, is described as being, in conjunction with these mountains, wonderfully suggestive, both by its grandeur and its suitability, for the giving and the receiving of the Law. "That such a plain should exist at all in front of such a cliff is so remarkable a coincidence with the sacred narrative, as to furnish a strong

internal argument, not merely of its identity with the scene, but of the scene itself having been described by an eye-witness" (*S. and P.* 42, 43). The character of the Sinaitic granite is described by Seetzen (*Reisen*, iii. 86) as being (1) flesh-red with glass-coloured quartz and black mica, and (2) greyish-white with abundance of the same mica. He adds that the first kind is larger-grained and handsomer than the second. Hamilton speaks of "long ridges of arid rock surrounding him in chaotic confusion on every side," and "the sharp broken peaks of granite far and near as all equally desolate" (*Sinai, the Hedjaz, and Soudan*, 31). This view of "granite peaks," so thickly and wildly set as to form "a labyrinth" to the eye, was what chiefly impressed Dr. Stanley in the view from the top of *Jebel Mûsa* (*S. and P.* 77). There the weather-beaten rocks are full of curious fissures and holes (46), the surface being "a granite mass cloven into deep gullies and basins" (76). Over the whole mountain the imagination of votaries has stamped the rock with tokens of miracle. The dendrites^a were viewed as memorials of the Burning Bush. In one part of the mountain is shown the impress of Moses' back, as he hid himself from the presence of God (*ib.* 30), in another the hoof-print of Mahomet's mule, in the plain below a rude hollow between contiguous blocks of stone passes for the mould of the head of the Golden Calf; while in the valley of the *Leja*, which runs, parallel to and overhung by the *Jebel Mûsa*'s greatest length, into *er-Râheh*, close to *Râs Sûsfâfeh*, the famous "Stone of Moses" is shown—"a detached mass from ten to fifteen feet high, intersected with wide slits or cracks . . . with the stone between them worn away, as if by the dropping of water from the crack immediately above." This distinctness of the mass of the stone lends itself to the belief of the Rabbis, that this "rock followed" the Israelites through the wilderness, which would not be the case with the non-detached off-set of some larger cliff. The Koran also contains reference to "the rock with the twelve mouths for the twelve tribes of Israel," i. e. the aforesaid cracks in the stone, into which the Bedouins thrust grass as they mutter their prayers before it. Bishop Clayton accepted it as genuine, so did Whiston the translator of Josephus;^b but it is a mere *lusus naturæ*; and there is another fragment, "less conspicuous," in the same valley, "with precisely similar marks." In the pass of the *Wady es-Sheykh* is another stone, called the "Seat of Moses," described by Laborde (*S. and P.* 45-48, and notes). Seetzen adds, some paces beyond the "Stone of Moses" several springs, copious for a region so poor in water, have their source from under blocks of granite, one of which is as big as this "Stone of Moses." These springs gush into a very small dyke, and thence are conducted by a canal to supply water to a little fruit-garden . . . Their water is pure and very good. On this canal, several paces below the basin, lies a considerably

^a By this pass Dr. Stanley was himself conducted thither, sending his camels round by the *Wady es-Sheykh* from *Beiran*, "the more accessible though more circuitous route into the central upland." By this latter no suppose the great bulk of the host of Israel may have reached *er-Râheh* and Sinai, while "the chiefs of the people would mount" by the same pass which he took (*S. & P.* 42).

^b Dr. Stewart (*ib.* sup. 122) says, "Gebel Musa, the Sinai of Jewish traditions, is neither visible from the *Gebel* (*i. e.* *Râs*) *Sûsfâfeh*, nor from any other point in

the plain of *er-Râheh*." This seems confirmed by the argument of *S. & P.* 43, 44, that Moses, descending from the *Jebel Mûsa*, would not be able to see what was going on in the plain till he emerged upon it, the height of *Sûsfâfeh* effectually intercepting the view.

^c These have become scarce on this mountain: Seetzen (*Reisen*, iii. 86) expressly mentions that he observed none. They are now found abundantly in the course of constructing Abbas Paasha's mountain road (Stewart, *F. & E.* 132, 134).

^d See his note on *And.* iii. 1, §7.

bigger block of granite than the "Stone of Moses," "and the canal runs round as close to its side as to be half-concealed by it" (*Reisen*, iii. 95). He seems to argue that this appearance and half-concealment may have been made use of by Moses to procure belief in his having produced the water miraculously, which existed before. But this is wholly inconsistent, as indeed is any view of this being the actual "rock in Horeb," with his view of Rephidim as situated at *el-Hessak*, the western extremity of the *Wady Feirán*. Equally at variance with the Scriptural narrative is the claim of a hole in *el-Rákh*, below *Rás Sifáífeh*, to be "the Pit of Korah," whose story belongs to another and far later stage of the march.

On Mount St. Catherine the principal interest lies in the panorama of the whole Peninsula which it commands, embraced by the converging horns of the Red Sea, and the complete way in which it overlooks the *Jebel Músa*, which, as seen from it, is by no means conspicuous, being about 1000 feet lower. Setzen mounted by a path strewn with stones and blocks, having nowhere any steps, like those mentioned as existing at *Serbéll*, and remarks that jasper and porphyry chiefly constitute the mountain. He reached the highest point in three hours, including intervals of rest, by a hard, steep path, with toilsome clambering; but the actual time of ascending was only 1½ hours. The date-palm plantation of *Tír* is said to be visible from the top; but the haze prevailing at the time prevented this traveller from verifying it (*Reisen*, iii. 89-93). "The rock of the highest point of this mountain swells into the form of a human body, its arms swathed like that of a mummy, but headless—the counterpart, as it is alleged, of the corpse of the beheaded Egyptian mist. . . . Not improbably this grotesque figure furnishes not merely the illustration, but the origin, of the story" of St. Catherine's body being transported to the spot, after martyrdom, from Egypt by angelic hands (*S. and P.* 45).

The remaining principal mountain is named variously *el-Deir*, "the Convent," "Bestin," from St. Episteme, the first abbess of the nunnery; "Solah," from "the Cross," which stands on its summit; and the "Mount of the Burning Bush," from a legend that a sun-beam shoots down, supposed miraculously, on one day in the year, through the mountain into the chapel "of the Burning Bush" (so called) in the convent (*ib.* 78). In the pass of the Convent rocks arise on every side, in long succession, fantastically coloured, grey, red, blue, bright yellow, and bronze, sometimes strangely marked with white lines of quartz or black bands of basalt; huge blocks worn into fantastic shapes . . . interrupt the narrow track, which successive ages have worn along the face of the precipice, or, hanging overhead, threaten to overwhelm the traveller in their fall. The wady which contains this pass is called by the name of *Shu'eb*—a corruption of Hobab, the name of the father-in-law of Moses (*ib.* 32, 33). At the foot of a mountain near the convent Setzen noticed "a range of rocks of black horn-porphry, of hornblende, and black jasper, and between their scrolls or volutes white quartz." The gardens, as has been noticed, are in sight

from the approach through *el-Rákh*. Nature enlarges on their beauty, enhanced, of course, by the savage wild about them; "indeed a blooming vegetation appears in this climate wherever there is water" (*Reisen*, iii. 70, 73, 87). These proved capabilities of the soil are of interest in reference to the Messianic and to every period. As regards the Convent, the reader may be referred to Dr. Stanley's animated description of its character, the policy of its founder, and the quality of its inmates (*S. and P.* 51-56). This traveller took three hours in the ascent. "In the recesses between the peaks was a ruined Bedouin village. On the highest level was a small natural basin, thickly covered with shrubs of myrrh—of all the spots of the kind that I saw, the best suited for the feeding of Jethro's flocks in the seclusion of the mountain" (*ib.* 78). He thought the prospect, however, from its summit inferior in various ways to any of the other views from the neighboring mountains, *Serbéll*, *St. Catherine*, *Jebel Músa*, or *Rás Sifáífeh*.

The rocks, on leaving Sinai on the east for 'Akabá, are curiously intermingled, somewhat as in the opposite margin of the *Wady Sifri* and *Mekhalah*. *Wady Seyál* contains "hills of a conical shape, curiously slanting across each other, and with an appearance of serpentine and basalt. The wady . . . then mounted a short rocky pass—of hills capped with sandstone—and entered on a plain of deep sand—the first we had encountered—over which were scattered isolated clumps of sandstone, with occasional chalk. . . . At the close of this plain, an isolated rock, its high tiers rising out of lower tiers, like a castle." Here "the level ranges of *et-Tih* rose in front." And soon after, on striking down, apparently, north-eastwards, "a sandy desert, amidst fantastic sandstone rocks, mixed with lilac and dull green, as if of tufa," succeeded. After this came a desert strewn with "fragments of the *Tih*," i. e. limestone, but "presently," in the "*Wady Ghúshleh*,"⁴ which turns at first nearly due northward, and then deflects westward, the "high granite rocks" reappeared; and in the *Wady el-'Ain*, "the rocks rise, red granite or black basalt, occasionally tipped as if with castles of sandstone to the height of about 1000 feet . . . and finally open on the sea. At the mouth of the pass are many traces of flood—trees torn down, and strewn along the sand" (*ib.* 80, 81).

VI. We now pass on to resume the attempt to trace the progress of the Israelites. Their sojourn of a year in the neighbourhood of Mount Sinai was an eventful one. The statements of the Scriptural narrative which relate to the receiving of the ten Tables, the Golden Calf, Moses' vision of God, and the visit of Jethro, are too well known to need special mention here; but beside these, it is certain from Num. iii. 4, that before they quitted the wilderness of Sinai, the Israelites were thrown into mourning by the untimely death of Aaron's two sons, Nadab and Abihu. This event is probably connected with the setting up of the tabernacle and the enkindling of that holy fire, the sanctity of which their death avenged. That it has a determinate chronological relation with the promulgations which from time to time were made in that

* Dr. Stanley verified the possibility of the fact, and discovered its miraculous character by examining the ravine above the convent, through which, when the sun gains the necessary altitude, a ray would reach the chapel (*S. & P.* 46).

⁴ Here Dr. Stanley quitted the track pursued by Dr. Ho-

lmeson, which from the Convent he had hitherto followed; the latter continuing in a N.E. direction through *Wady Samghy* to the western shore of the Gulf of 'Akabá, the former turning northwards by the *Wady Ghúshleh*, as above, immediately after passing the 'Ain el-Fahárah.

wilderness, is proved by an edict in Lev. xvi., being fixed as subsequent to it (Lev. x., comp. xxi. 1). The only other fact of history contained in Leviticus is the punishment of the son of mixed parentage for blasphemy (xxiv. 10-14). Of course the consecration of Aaron and his sons is mentioned early in the Book in connexion with the laws relating to their office (viii., ix.). In the same wilderness region the people were numbered, and the exorcism of the Levites against the firstborn was effected; these last, since their delivery when God smote those of Egypt, having incurred the obligation of sanctity to him. The offerings of the princes of Israel were here also received. The last incident mentioned before the wilderness of Sinai was quitted for that of Paran is the intended departure of Hobab the Kenite, which it seems he abandoned at Moses' urgency. They now quitted the Sinaitic region for that of Paran, in which they went three days without finding a permanent encampment, although temporary halts must of course have been daily made (Num. i., ix. 15-23; x. 13, 33; xi. 35; xii. 16). A glance at Kiepert's, or any map showing the region in detail, will prove that here a choice of two main routes begins, in order to cross the intervening space between Sinai and Canaan, which they certainly approached in the first instance on the southern, and not on the eastern side. Here the higher plateau surmounting the Tih region would almost certainly, assuming the main features of the wilderness to have been then as they are now, have compelled them to turn its western side nearly by the route by which Setzen came in the opposite direction from Hebron to Sinai, or to turn it on the east by going up the 'Arabah, or between the 'Arabah and the higher plateau. Over its southern face there is no pass, and hence the route from Sinai, and those from Petra towards Gaza and Hebron, all converge into one of two trunk-lines of route (Robinson, i. 147, 151, 2, ii. 186). Taberah and Kibroth-Hattaavah, both seem to belong to the same encampment where Israel abode for at least a month (xi. 20), being names given to it from the two events which happened there. [TABERAH, KIBROTH-HATTA'AVAH, QUAILS.] These stations seen from Num. x. 11-13, 33-36, to have lain in the wilderness of Paran; but possibly the passage x. 11-13 should come after that 33-36, and the "three days' journey" of ver. 33 lie still in the wilderness of Sinai; and even Taberah and Hazeroth, reached in xi., xii., also there. Thus they would reach Paran only in xii. 16, and x. 12 would be either misplaced or mentioned by anticipation only. One reason for thinking that they did not strike northwards across the Tih range from Sinai, is Moses' question when they murmur, "shall all the fish of the sea be gathered together for them, to suffice them?" which is natural enough if they were rapidly nearing the Gulf of 'Akabah, but strange if they were posting towards the inland heart of the desert. Again the quails are brought by "a wind from the sea" (Num. xi. 22, 31); and various travellers (Borchhardt, Schubert, Stanley) testify to the occurrence of vast flights of birds in this precise region between Sina and 'Akabah. Again, Hazeroth, the next station after these, is

coupled with Disahab, which last seems undoubtedly the *Dahab* on the shore of that gulf (Deut. i. 1, and Robinson, ii. 187, note). This makes a seaward position likely for Hazeroth. And as Taberah, previously reached, was three days' journey or more from the wilderness of Sinai, they had probably advanced that distance towards the N.E. and 'Akabah; and the distance required for this will bring us so near *el-Hühherd* (the spot which Dr. Robinson thought represented Hazeroth in fact, as it seems to do in name), that it may be accepted as a highly probable site. Thus they were now not far from the coast of the Gulf of 'Akabah. A spot which seems almost certain to attract their course was the *Wady el-'Ain*, being the water, the spring of that region of the desert, which would have drawn around it such "nomadic settlements as are implied in the name of Hazeroth, and such as that of Israel must have been" (S. & P. 82). Dr. Robinson remarks, that if this be so, this settles the course to Kadesh as being up the 'Arabah, and not across the plateau of *el-Tih*. Dr. Stanley thinks this identification a "faint probability," and the more uncertain as regards identity, "as the name Hazeroth is one of the least likely to be attached to any permanent or natural feature of the desert," meaning "simply the enclosures, such as may still be seen in the *Bedouin* villages, hardly less transitory than tents" (S. & P. 81, 82). We rely, however, rather on the combination of the various circumstances mentioned above than on the name. The *Wady Hühherd* and *Wady el-'Ain*, appear to run nearly parallel to each other, from S.W. to N.E., nearly from the eastern extremity of the *Wady es-Sheikh*, and their N.E. extremity comes nearly to the coast, marking about a midway distance between the *Jebel Musa* and 'Akabah. In Hazeroth the people tarried seven days, if not more (Num. xi. 35, xii.), during the exclusion of Miriam from the camp while leprous. The next permanent encampment brought them into the wilderness of Paran, and here the local commentator's greatest difficulty begins.

For we have not merely to contend with the fact that time has changed the desert's face in many parts, and obliterated old names for new; but we have beyond this, great obscurity and perplexity in the narrative. The task is, first, to adjust the uncertainties of the record *inter se*, and then to try and make the resultant probability square with the main historical and physical facts, so far as the latter can be supposed to remain unaltered. Besides the more or less discontinuous form in which the sacred narrative meets us in Exodus, a small portion of Leviticus, and the greater part of Numbers, we have in Num. xxxiii. what purports at first sight to be a complete skeleton route so far as regards nomenclature; and we further find in Deuteronomy a review of the leading events of the wandering or some of them, without following the order of occurrence, and chiefly in the way of allusion expanded and dwelt upon. Thus the authority is of a threefold character. And as, in the main narrative, whole years are often sunk as uneventful, so in the itinerary of Num. xxxiii., on a near view great chasms occur, which require, where all else bespeaks a severe uniformity of method, to be somehow ac-

* Setzen supposes that what are called quails in Scripture were really locusts (*Reisen*, iii. 80); an opinion which Coquerel (Laborde, *Comma. Geogr.* Ex. xvi. 13) appears to have shared. But surely locusts, as edible, are too well known to Scripture to make the confusion possible. Mr.

VOL. III.

Tyrwhitt says that quails, or small partridges, which he supposes rather mean, are, as far as he saw more common in the desert than locusts.

† Robinson, *ib. sup.*; compare Stewart, *2. and 3. 115.*

mounted for. But, beyond the questions opened by either authority in itself, we have difficulties of apparent incongruity between them; such as the encampment in Exodus of Dophka and Alush, and of the encampment by the Red Sea; and, incomparably greater, that of the fact of a visit to Kadesh being recorded in Num. xiii. 26, and again in xx. 1, while the itinerary mentions the name of Kadesh only once. These difficulties resolve themselves into two main questions. Did Israel visit Kadesh once, or twice? And where is it now to be looked for?

Before attempting these difficulties individually, it may be as well to suggest a caution against certain erroneous general views, which often appear to govern the considerations of desert topography. One is, that the Israelites journeyed, wherever they could, in nearly a straight line, or took at any rate the shortest cuts between point and point. This has led some delineators of maps to simply register the file of names in Num. xxxiii. 16-36 from Sinai in rectilinear sequence to Kadesh, wherever they may happen to fix its site, then turn the line backward from Kadesh to Esion-Geber, and then either to Kadesh again, or to Mount Hor, and thence again, and here correctly, down the 'Arabah southwards and round the south-eastern angle of Edom, with a sweep northwards towards Moab. In drawing a map of the Wanderings, we should mark as approximately or probably ascertained the stations from Etham to Hazereth, after which no track should be attempted, but the end of the line should lose itself in the blank space; and out of the same blank space it might on the western side of the 'Arabah be similarly resumed and traced down the 'Arabah, &c., as before described. All the sites of intervening stations, as being either plainly conjectural merely, or lacking any due authority, should simply be marked in the margin, save that Moserah may be put close to Mount Hor, and Esion-Geber further S. In the 'Arabah [EZION-GEBER], from which to the brook Zered and onwards to the plains of Moab, the ambiguities lie in narrow ground, and a probable light breaks on the route and its stations.

Another common error is, that of supposing that from station to station, in Num. xxxiii., always represents a day's march merely, whereas it is plain from a comparison of two passages in Ex. (xv. 22), and Num. (x. 33), that on two occasions three days formed the period of transition between station and station, and therefore, that not day's marches, but intervals of an indefinite number of days between permanent encampments, are intended by that itinerary; and as it is equally clear from Num. ix. 22, that the ground may have been occupied for "two days, or a month, or a year," we may suppose that the occupations of a longer period only may be marked in the itinerary. And thus the difficulty of apparent chasms in its enumeration, for instance the greatest, between Esion-Geber and Kadesh (xxxiii. 35-37) altogether vanishes.

An example of the error, consequent on neglect-

^s He speaks of certain stations as "placées entre le mont Sinai et Cadès, espace qui ne comporte pas plus de onze journées selon l'affirmation bien positive de Deutéronome" (l. 1). He then proceeds to argue, "Ces dix-sept stations réunies aux trois que nous venons d'examiner, en forment vingt; il y a donc neuf stations... dont on ne sait que faire." The statement quoted from Deuteronomy, whether genuine, or an annotation that has crept into the text, merely states the distance as ordinarily known and travelled, and need not indicate that the Israelites crossed it at that rate of progress.

ing to notice this, may be seen in Laborde's map of the Wanderings, in his Commentary on Exodus and Numbers, in which the stations named in Num. xxxiii. 18-34, are closely crowded, but between those of ver. 35 and those of ver. 37 a large void follows, and between those of ver. 37 and those of ver. 39 a still larger one, both of which, since as referring to the text of his Commentary we find that the intervals all represent day's marches, are plainly impossible.

Omitting, then, for the present all consideration of the previous intervals after Hazereth, some suggestions concerning the nomenclature and possible sites of which will be found in articles under their respective names, the primary question, did the people visit Kadesh twice, or once only, demands to be considered.

We read in Num. x. 11, 12, that "on the twentieth day of the second month of the second year . . . the children of Israel took their journeys out of the wilderness of Sinai, and *the about rested in the wilderness of Paran*." The latter statement is probably to be viewed as made by anticipation; as we find that, after quitting Kibroth-Hattavah and Hazereth, "the people pitched in the wilderness of Paran" (Num. xii. 16). Here the grand pause was made while the spies, "sent," it is again impressed upon us (xiii. 3), "from the wilderness of Paran," searched the land for "forty days," and returned "to Moses and to Aaron, and to all the congregation . . . unto the wilderness of Paran to Kadesh." This is the first mention of Kadesh in the narrative of the Wanderings (vers. 25, 26). It may here be observed that an inaccuracy occurs in the rendering of Moses' directions to the spies in the A. V. of xiii. 17, "get you up by this way southward" (צָפָה), where "by the South," i. e. by the border lying in that direction from Palestine, is intended, as is further plain from ver. 22, "And they ascended by the south and came to Hebron," i. e. they went northward.^b From considerations adduced under KADESH, it seems that Kadesh probably means firstly, a region of the desert spoken of as having a relation, sometimes with the wilderness of Paran, and sometimes with that of Zin (comp. vers. 21, 26); and secondly, a distinct city within that desert limit. Now all the conditions of the narrative of the departure and return of the spies, and of the consequent despondency, murmuring, and penal sentence of wandering, will be satisfied by supposing that the name "Kadesh," here means *the region* merely. It is observable, also, that Kadesh is not named as the place of departure, but only as that of return. From Paran is the start; but from Zin (both regions in the desert) the search commences. And this agrees with the political geography of the southern border, to which the wilderness of Zin is always reckoned as pertaining,^c whereas that of Paran always lies outside the promised land. Natural features of elevation, depression, and slope,^d are the only tokens to which

^b The word for "southward" would be צָפָה, as found in Ex. xl. 24, Josh. xvii. 9, 10. The word צָפָה appears to mean the "dry" country, and hence to become the appellative for the region on the south of Judah and Simeon where springs were scarce; see *The Negueb* by Rev. E. Wilton, pref. viii.

^c Num. xxxiv. 4; Josh. xv. 3.

^d For some good remarks on the level of the desert and the slope between the south country, Dead Sea, and the 'Arabah, see Robinson, l. 847.

we can reasonably trust in deciding where the Paran wilderness ends, and that of Zin begins. It has been proposed under KADESH to regard part of the 'Arabah, including all the low ground at the southern and south-western extremity of the Dead Sea, as the wilderness of Zin. [ZIN.] Then the broad lower north-eastern plateau, including both its slopes as described above, will be defined as the Paran wilderness proper. If we assume the higher superimposed plateau, described above, to bear the name of "Kadesh" as a desert district, and its south-western mountain-wall to be "the mountain of the Amorites," then the Paran wilderness, so far as synonymous with Kadesh, will mean most naturally "the region where that mountain-wall from *Jebel 'Ardif en-Nakab* to *Jebel Mithrah*, and perhaps thence northward along the other side of the angle of the highest plateau, overlies the lower terrace of the Tih. Moses identifies the coming "to Kadesh Barnea"¹ with the coming to "the mountain of the Amorites" (Deut. i. 19, 20) whence the spies were also despatched (vers. 22, 23), which is said to have been from "Paran" in Num. xiii. 3. Suppose the spies' actual start to have been made from somewhere on the watershed of the two slopes of *et-Tih*, the spies' best way then would have been by the *Wady el-Jerafeh* into and so up the 'Arabah: this would be beginning "from the wilderness of Zin," as is said in Num. xiii. 21. Then, most naturally, by his direction to them, "go up into the mountains" (Num. xiii. 17), which he represents as acted on in Deut. i. 24, "and they turned and went up into the mountain," he meant them to mount the higher plateau, supposed the region Kadesh. By their "turning" in order to do so, it may be inferred that their course was not direct to their object, as indeed has been supposed in taking them along the 'Arabah and again up its western side by the passes *el-Khurâr* and *es-Sâfâ* (Zephath).² By these passes they must have left Zin or the 'Arabah, there being no choice. During the forty days of their absence, we may suppose the host to have moved from the watershed into the Kadesh-Paran region, and not at this period of their wanderings to have touched the city Kadesh at all. This is quite consistent with, if it be not even confirmed by, the words of the murmurers in xiv. 2, 3, "Would God we had died in *this wilderness*! And wherefore hath the Lord brought us unto *this land*?" and throughout the denunciation which follows, evidently on the same spot, the words "the wilderness," and "this wilderness," often recur, but from first to last there is no mention of a "city."

Now, in Deut. i. 19, where these proceedings pass in review before Moses, in his words to the people, there is, strictly speaking, no need to mention Kadesh at all, for the people were all the time in the wilderness of *Paran*. Yet this last is so wide a term, reaching almost from the 'Arabah to near the Egyptian frontier, that Moses might naturally use some more precise designation of the quarter he meant. He accordingly marks it by the proximity of Kadesh.

¹ For "Barnea," see perhaps a Horite proper name, see KADAN, note 1.

² Mr. Wilton (*Neged*, 12, 190-202), following Howlands (in Williams), makes Zephath *es-Sebata* on the northern side of the high broad plateau, supposed here to be the "mountain of the Amorites." On this view the Israelites must already have won that eminence from which it was clearly the intention of the Amorites to repel them; and must, when defeated, have been driven up hill from a position occupied in the plain below. The position as-

mity of Kadesh. Thus, the spies' return to "the wilderness of Paran to Kadesh" means to that part of the lower plateau where it is adjacent to the higher, and probably the eastern side of it. The expression "from Kadesh-barnea even unto Gaia," is decisive of an eastern site for the former (Josh x. 41).

Here, as is plain both from Num. xiv. 40-45 and from Deut. i. 41-44, followed the wayward attempt of the host to win their way, in spite of their sentence of prohibition, to the "hill" (Num. xiv. 40-45, Deut. i. 41-44) or "mountain" of the Amalekites and Canaanites, or Amorites, and their humiliating defeat. They were repulsed in trying to force the pass at Hormah (or Zephath, Judg. i. 14), and the region of that defeat is called "Seir," showing that the place was also known by its Horite name; and here perhaps the remnant of the Horites were allowed to dwell by the Edomites, to whose border this territory in the message of Num. xx. 18, is ascribed. [KADESH.] Here, from the notice in Num. xiv. 25, that these "Amalekites and Canaanites dwell in the valley," we may suppose that their dwelling was where they would find pasture for their flocks, in the wady *el-Fibrah* and others tributary to *el-Seib*, and that they took post in the "mountain" or "hill," as barring the way of the Israelites' advance. So the spies had gone by Moses' direction "this way, by the South (not 'southward,' as shown above), up into the mountain;" and this same way, "the way of the spies," through the passes of *el-Khurâr* and *es-Sâfâ*, was the approach to the city Kadesh also.

Here, then, the penal portion of the wanderings commences, and the great bulk of it, comprising a period of nearly thirty-eight years, passes over between this defeat in Num. xiv., and the resumption of local notices in Num. xx., where again the names of "Zin" and "Kadesh" are the first that meet us.

The only events recorded during this period (and these are interspersed with sundry promulgations of the Ceremonial Law), are the execution of the offender who gathered sticks on the Sabbath (Num. xv. 32-36), the rebellion of Korah (xvi.), and, closely connected with it, the adjudgment of the pre-eminence to Aaron's house with their kindred tribe, solemnly confirmed by the judicial miracle of the rod that blossomed. This seems to have been followed by a more rigid separation between Levi and the other tribes, as regards the approach to the tabernacle, than had been practically recognized before (xxvii. xviii. 22; comp. xvi. 40).

We gather, then, from Deut. i. 46, that the greater part, perhaps the whole, of this period of nearly thirty-eight years, if so we may interpret the "many days" there spoken of, was passed in Kadesh,—the region, that is, not the city; in which, of course, the camp may have been shifted at convenience, under direction, any number of times. But Num. xx. 1 brings us to a new point of departure. The people have grown old, or

Sâfâ is on the S. side of the high ground, and has probably always been the pass by which to mount it. For all this, see Mr. Wilton's own map, or any one which shows both *es-Sebata* and *es-Sâfâ*.

³ Our A. V. here seems to have viewed *סִינַי* as if derived from *סִי* "to spy." Gesen. renders it "regions," and the LXX. makes it a proper name *Αδωναι*. It is not elsewhere found. Now the verb *סִי* occurs in the passage where the spies are sent forth, Num. xiii. xiv., which gives a presumption in favour of the A. V.

rather again young, in their wanderings. Here, then, we are at "the desert of Zin, in the first month," with the "people abiding in Kadesh." By the sequel, "Miriam died *there*, and was buried *there*," a more precise definition of locality now seems intended; which is further confirmed by the subsequent message from the same place to the king of Edom, "Behold, we are in Kadesh, a city in the uttermost of thy border" (v. 16). This, then, must be supposed to coincide with the encampment, recorded as taking place "in the wilderness of Zin, which is Kadesh," registered in the itinerary (xxxiii. 36). We see then why, in that register of specific camping-spots, there was no necessity for any previous mention of "Kadesh;" because the earlier notice in the narrative, where that name occurs, introduces it not as an individual encampment, but only as a region, within which perpetual changes of encampment went on for the greater part of thirty-eight years. We also see that they came twice to Kadesh the region, if the city Kadesh lay in it, and once to Kadesh the city; but once only to Kadesh the region, if the city lay without it. We are not told how the Israelites came into possession of the city Kadesh, nor who were its previous occupants. The probability is that these last were a remnant of the Horites, who after their expulsion by Edom from Mount Seir [EDOM] may have here retained their last hold on the territory between Edom and the Canaanitish Amorites of "the South." Probably Israel took it by force of arms, which may have induced the attack of "Arad the Canaanite,"^a who would then feel his border immediately threatened (Num. xxxiii. 40; comp. xxi. 1). This warlike exploit of Israel may, perhaps, be alluded to in Judges v. 4 as the occasion when Jehovah "went out of Seir" and "marched out of the field of Edom" to give His people victory. The attack of Arad, however,

though with some slight success at first, may have brought defeat upon himself and destruction upon his cities (xxi. 3).^b We learn from xxxiii. 36 only that Israel marched without permanent halt from Ezion-geber upon Kadesh. This sudden activity after their long period of desultory and purposeless wandering may have alarmed King Arad. The itinerary takes here another stride from Kadesh to Mount Hor. There their being engaged with the burial of Aaron may have given Arad his fancied opportunity of assaulting the rear of their march, he descending from the north whilst they also were facing southwards. In direct connexion with these events we come upon a singular passage in Deuteronomy (x. 6, 7), a scrap of narrative imbedded in Moses' recital of events at Horeb long previous.^c This contains a short list of names of localities, on comparing which with the itinerary, we get some clue to the line of march from the region Kadesh to Ezion-geber southwards.

We find at the part of their route in which Aaron's death took place, that stations named "Beeroth of the children of Jaakan, Mosera (where Aaron died), Gudgodah, and Jotbath," were successively passed through; and from Num. xxxiii. 38 we find that "Aaron went up into Mount Hor . . . and died there in the fortieth year . . . in the first day of the fifth month." Assuming for Mount Hor the traditional site overhanging the 'Arabah, which they very soon after this quitted, Mosera must have been close to it, probably in the 'Arabah itself. Now the stations which in the itinerary come next before Ezion-geber, and which were passed in the strictly penal wandering which commenced from the region Kadesh, have names so closely similar that we cannot doubt we are here on the same ground. Their order is, however, slightly changed, standing in the two passages as follows:—

CONJECTURAL SITE.	NUM. xxxiii. 30-38.	DEUT. x. 6, 7.
(a) 'Ain Hasb, N.W. in the 'Arabah.	(a) (Hashmonah).	
(1) Kushiabek, mouth of the Wady Abu, near the foot of Mount Hor.	(1) Moseroth.	(1) Beeroth of the children of Jaakan.
(2) 'Ain Ghadrindah.	(2) Bene-Jaakan. ^d	(2) Mosera.
(3) Wady el-Ghadidagidh.	(3) Hor-bagidagidh.	(3) Gudgodah.
(4) Confluence of Wady el-Adhah with el-Jerufah.	(4) Jotbathah. (Ebronah). (Ezion-geber).	(4) Jotbath. ^e

^a More properly "the Canaanitish king of Arad."

^b He "took some of" the Israelites "prisoners." It is possible the name Mosera, or plur. Moseroth, may recall this fact; the word מְסֵרָה, (found only in the plur.), meaning "bonds" or "fetterers." This would accord with the suggestion of the text that Aaron's burial gave Arad the opportunity for his raid; for Mosera must have been near Mount Hor, where that burial took place. It is possible that the destruction of these cities may not have really taken place till the entry into Canaan under Joshua (Josh. xii. 16, Judg. i. 17), and may be mentioned in Num. xxi. 2, 3, by anticipation only as a subsequent fulfilment of the vow recorded as then made. It is obvious to suggest that Mosera is the Mosera of Deut. x. 6, and so Mr. Wilton (*The Negeb*, 28 &c.) has suggested, wishing to identify it with Mount Hor. But the received site for Mount Hor is the least doubtful of all in the Exodus. Josephus clearly identifies it as we do; and there is a strong improbability in a Jewish tradition fixing it in Edomitish or in Nabathean territory, unless the testimony in its favour had been overpowering. Mosera might perhaps be the hill called "Sin" (Zin?), mentioned by Josephus as that to which Miriam was buried (Ant. iv. 4, § 47).

^c A somewhat similar fragment of narrative, but relating to what perhaps took place during the time of the allocation to the people between the paragraphs of which it occurs, is found in Deut. iv. 41-43; and indeed the mention of Aaron's death, with the date and his age, and of the attack of Arad, both of which had been detailed before, is hardly less of a deviation from the dry enumeration of stations in the itinerary itself (Num. xxxiii. 38, 39). But it would be foreign to our present purpose to enter on the critical questions which these passages suggest. We assume their genuineness, and suppose them displaced.

^d See JAAKAN and BENE JAAKAN for the name. Jaakan was the grandson of Seir (1 Chr. i. 42, comp. Gen. xiv. 6, xxvi. 27).

^e Dr. Robinson, judging from his visit, thinks that these stations could not have lain to the S. of Mount Hor, as that region is too poor in water to contain any such place as Jotbath in Deut. x. 7, and corresponds rather to the description given in Num. xxi. 4-8 (ll. 175). He thinks that 'Ain el-Thaybeh is either Beeroth Bene Jaakan or Moseroth, and Wady el-Ghadidagidh Jotbath (ibid.).

Now in Num. xi. 14, 16, 22-29, the narrative conducts us from Kadesh the city, reached in or shortly before "the fortieth year," to Mount Hor, where Aaron died, a portion of which route is accordingly that given in Deut. x. 6, 7; whereas the parallel column from Num. xxxiii. gives substantially the same route as pursued in the early part of the penal wandering, when fulfilling the command given in the region Kadesh, "turn you, get you into the wilderness by the way of the Red Sea" (Num. xiv. 25; Deut. i. 40), which command we further learn from Deut. ii. 1 was strictly acted on, and which a march towards Ezion-geber would exactly fulfil.

These half-obliterated footsteps in the desert may seem to indicate a direction only in which Kadesh the city¹ lay. Widely different localities, from Petra eastward to el-Khâlesah on the north-west, and westward to near the *Jebel Hellah*, have been assigned by different writers. The best way is to acknowledge that our research has not yet grasped the materials for a decision, and to be content with some such attempt as that under KADESH, to fix it approximately only, until more undoubted tokens are obtained. The portion of the arc of a circle with *es-Sûfa* for its centre, and a day's journey—about fifteen miles—for its radius, will not take in el-Khâlesah, nor Petra,² and the former name seems to be traceable, with a slight metathesis, much more probably in *Chesi*³ than in Kadesh.⁴ The highest plateau is marked with the ruins of Aboda, and on the inferior one, some miles S.W. of the defile of the *Wady el-Fureh* stands a round conical hill of limestone, mixed with sand, named Madarah (Modum, or Modera), at a short day's journey from the southern end of the Dead Sea. Seetzen, who visited it, had had his curiosity raised by a Bedouin legend of a village having been destroyed by Allah and buried under that hill for the wickedness of its people; and that, as a further attestation, human skulls were found on the ground around it. This statement he resolved by visiting the spot into a simple natural phenomenon of some curious rounded stones, or pebbles, which abound in the neighbourhood. He thought it a legend of Sodom; and it might, with equal likelihood, have been referred to the catastrophe of Korah (Seetzen, *Reisen*, iii. 13), which, if our sites for Kadesh the region and Paran are correct, should have occurred in the neighbourhood, were it not far more probable that the physical appearance of the round pebbles having once given rise to the story of the skulls, the legend was easily generated to account for them.

¹ Laborde (*Comment. on Num. xxxiii. 36*) places Kadesh the city "près des sources d'Embach au fond de Ouadi Djeraf" (*Wady el-Jerâf*). Dr. Robinson thought 'Ain el-Wâheb was Kadesh, the city, or, as he calls it, Kadesh Barnea (see *Map*, vol. i., end). Dr. Stanley remarks that there is no cliff (صفا) there. See his remarks quoted under KADASH.

² Robinson puts *es-Sûfa* at about two days' journey from the foot of Mount Hor, ii. 180-1.

³ As suggested in Williams's *Holy City*, i. 464.

⁴ The northern Kadesh, or Kedesh, in Naphtali has the very same consonants in its modern Arabic name as in the Hebrew.

⁵ A writer in the *Journal of Soc. Lit.* April, 1860, connects this name with كد, "good," from the goodness of the water supply. This is not unlikely; but his view of the name كد, as from the same root as the Arabic كد -

كُد. 'Adbeh, is very doubtful, the ك (Heb. ק) being grossly radical. However, if el-'Adbeh be, as he avers,

The mountains on the west of the 'Arabah must have been always poor in water, and form a dreary contrast to the rich springs of the eastern side in Mount Seir. From the cliff front of this last, Mount Hor stands out prominently (Robinson, ii. 174-180). It has been suggested [HOR HAGIDGAD] that the name Hagidgad, or Gudgodah, may possibly be retraced in the *Wady el-Ghûdhaghidh*, which has a confluence with the *Wady el-Jerâf*. This latter runs into the 'Arabah on the west side. That point of confluence, as laid down in Kiepert's map (Robinson, B. R. i.), is about fifteen miles from the 'Arabah's nearest point, and about forty or forty-five from the top of Mount Hor. On the whole it seems likely enough that the name of this Wady may really represent that of this station, although the latter may have lain nearer the 'Arabah than the Wady now reaches, and this conjectural identification has been adopted above. Jotbath, or Jotbatha,⁶ is described as "a land of rivers of waters" (Deut. i. 7); and may stand for any confluence of wadis in sufficient force to justify that character. It should certainly be in the southern portion of the 'Arabah, or a little to the west of the same.

The probabilities of the whole march from Sinai, then, seem to stand as follows: They proceeded towards the N.E. to the 'Ain el-Hûderâh (Haze-roth), and thence quitted the maritime region, striking directly northwards to el-'Ain, and thence by a route wholly unknown, perhaps a little to the E. of N. across the lower eastern spur of the el-Tih range, descending the upper course of the *Wady el-Jerâf*, until the south-eastern angle of the higher plateau confronted them at the *Jebel el-Mûhrah*. Hence, after despatching the spies, they moved perhaps into the 'Arabah, or along its western overhanging hills, to meet their return. Then followed the disastrous attempt at or near *es-Sûfa* (Zephath), and the penal wandering in the wilderness of Kadesh, with a track wholly undetermined, save in the last half-dozen stations to Ezion-geber inclusively, as shown just above. They then marched on Kadesh the city, probably up the 'Arabah by these same stations, took it, and sent from there the message to Edom. The refusal with which it was met forced them to retrace the 'Arabah once more, and meanwhile Aaron died. Thus the same stations (Deut. x. 6, 7) were passed again, with the slight variation just noticed, probably caused by the command to resort to Mount Hor which that death occasioned.⁷ Thence, after

a region of abundant water, the place may correspond with Jotbath, though the name do not. His map places it about 17 miles N.W. of the modern extremity of the Gulf of 'Akabah—i. e. on the western side of the 'Arabah. His general view of the route to and from Kadesh, and especially of the site of Sinai and Mount Hor, is inadmissible. See further towards the end of this article. Burckhardt's map gives another watery spot with palm-trees in the 'Arabah itself, not far from its southern end, which might also suit for Jotbath.

⁶ Hengstenberg (*Authenticity of the Pent.* ii. 366) has another explanation of the deranged order of the stations enumerated just above, based on the supposition that in the two passages (Num. xxxiii. 30-35, Deut. x. 6, 7) the march proceeded in two opposite directions; but this would obviously require a reverse order of all the stations, and not the derangement of two merely. Von Ranke thought that the line of march threaded the 'Arabah thrice through, and making allowance for the mistake of giving it each time a nearly rectilinear direction, he is not far wrong.

reaching 'Akabah, and turning north-eastward, they passed by a nearly straight line towards the eastern border of Moab.

Of the stations in the list from Rithmah to Mithcah, both inclusive, nothing is known. The latter, with the few preceding it, probably belong to the wilderness of Kadesh; but no line can be assigned to the route beyond the indications of the situation of that wilderness given above. In the sequel to the burial of Aaron, and the refusal of Edom to permit Israel to "pass through his border" (which refusal may perhaps have been received at Mount Hor (Moserah), though the message which it answered was sent from the city Kadesh), occurred the necessity, consequent upon this refusal, of the people's "compassing the land of Edom" (Num. xxi. 4), when they were much "discouraged because of the way,"* and where the consequent murmuring was rebuked by the visitation of the "fiery serpents" (v. 5, 6). There is near Elath a promontory known as the *Ras Um Hays*, "the mother of serpents," which seem to abound in the region adjacent; and, if we may suppose this the scene of that judgment, the event would be thus connected with the line of march, rounding the southern border of Mount Seir, laid down in Deut. ii. 8, as being "through the way of the plain (i. e. the 'Arabah) from Elath and from Esion-geber," whence "turning northward," having "compassed that mountain (Mount Seir) long enough," they "passed by the way of the wilderness of Moab" (v. 3, 8).

Some permanent encampment, perhaps represented by Zalmonah in Num. xxxiii. 41, 42, seems here to have taken place, to judge from the urgent expression of Moses to the people in Deut. ii. 13: "Now rise up, said I, and get you over the brook Zered," which lay further N. a little E., being probably the *Wady el-Ahry* (Robinson, ii. 157). [ZERED.] The delay caused by the plague of serpents may be the probable account of this apparent urgency, which would on this view have taken place at Zalmonah; and as we have connected the scene of that plague with the neighbourhood of Elath, so, if we suppose Zalmonah^d to have lain in the *Wady Ithm*, which has its junction with the 'Arabah close to 'Akabah, the modern site of Elath, this will harmonize the various indications, and form a suitable point of departure for the last stage of the wandering, which ends at the brook Zered (v. 14). Dr. Stanley, who passed through 'Akabah,

thus describes the spot in question (*S. and P.* 84, 85): "'Akabah is a wretched village shrouded in a palm-grove at the north end of the gulf, gathered round a fortress built for the protection of the Mecca pilgrimage. . . . This is the whole object of the present existence of 'Akabah, which stands on the site of the ancient Elath,—'the Palm-Trees,' so called from the grove. Its situation, however, is very striking, looking down the beautiful gulf, with its jagged ranges on each side. On the west is the great black pass, down which the pilgrimage descends, and from which 'Akabah ('the Pass') derives its name; on the north opens the wide plain, or Desert Valley, wholly different in character from anything we have seen, still called, as it was in the days of Moses, 'the 'Arabah.' Down this came the Israelites on their return from Kadesh, and through a gap up the eastern hills they finally turned off to Moab. . . . This is the *Wady Ithm*, which turns the eastern range of the 'Arabah. . . . It is still one of the regular roads to Petra, and in ancient times seems to have been the main approach from Elath or 'Akabah. . . . The only published account of it is that of Laborde. These mountains appear to be granite, tall, as we advance northward, we reach the entrance of the *Wady Tuhai*, where, for the first time, red sandstone appears in the mountains, rising, as in the *Wady el-Ain*, architecture-wise above grey granite."

Three stations, Punon,^e Obobth, and Ije-Abarim, were passed between this locality and the brook or valley of Zered (Num. xxi. 10-12, comp. xxxiii. 43, 44), which last name does not occur in the itinerary, as neither do those of "the brooks of Arnon," Beer, Mattanah, Nahaliel, and Barmoth, all named in Num. xxi. 14-30; but the interval between Ije-Abarim and Nebo, which last corresponds probably (see Deut. xxiv. 1) with the *Pisgah*^f of xxi. 20, is filled by two stations merely, named Dibon-gad and Almon-diblatheim, from whence we may infer that in these two only were permanent halts made. [DIBON-GAD, ALMON-DIBLATHEIM.] In this stage of their progress occurred the "digging" of the "well" by "the prince," the successive victories over Sihon and Og, and, lastly, the famous episodes of Balaam and Phinehas, and the final numbering of the people, followed by the chastisement of the Midianites (Num. xxi. 17, xxii.-xxvi., xxxi. 1-12; comp. Deut. ii. 24-37, iii. 1-17).

One passage remains in which, although the

^b Dr. Robinson thinks that by the "King's Highway" the *Wady Ghassir*, opening a thoroughfare into the heart of the Edomitic territory was meant (ii. 187). Though the passage through Edom was refused, the burial of the most sacred person of a kindred people may have been allowed, especially if Mount Hor was already, as Dr. Stanley suggests, a local sanctuary of the region (*S. & P.* 97-98).

^c The way up the 'Arabah was tollsome, and is so at this day. Dr. Robinson calls it "a still more frightful desert" than the Sinaitic (ii. 184). The pass at the head of the Gulf of 'Akabah towards el-Tih "is famous for its difficulty, and for the destruction which it causes to animals of burden" (i. 178). Only two travellers, Laborde and Bertin, have accomplished (I recorded their accomplishment of) the entire length of the 'Arabah.

^d Von Raumer identifies it with *Madan*, a few minutes to the E. of Petra.

^e Punon is spoken of by Jerome (Beland, 593) as "Quondam civitas principum Edom nunc vicinis in deserto, ubi aerum metalla damnatorum supplicia effoduntur inter civitatem Petram et Zoaram." Athanas. *Epist. ad Solit. Vitis Agendes*, speaks of the condemnation

of a person to the mines of Phasgo, where he would only live a few days. Winer says, Seetzen took *Kaladi Phasgo* for Punon, referring to *Monat. Corresp.* xvii. 137. Laborde (Comment. on Num. xxxiii. 43) thinks that the place named by Jerome and Athanasius cannot be Punon, which he says lay S.E. of Petra. He adds that Burchardt and Von Raumer took *Tafila* for Punon. He places Obobth "dans les décombres de Bataleh (*Smithy, Robinson*), laissent ainsi Maan à droite."

^f Dr. Stewart (*T. & K.* 386) says, "The river Arnon empties itself into the Dead Sea, and between them rises the lofty Gebel Atrous, which is believed to be the Nebo or Pisgah of Scripture." He justifies this from its being the highest mountain on the Moabitish border, and from the hot spring Califfah being situated at its base, which seems to correspond with the *Ashdodh* ("springs" or "streams") of Pisgah of Deut. iv. 48. He adds that "Moses could have seen the land of Israel from that mountain." The Arnon is, without doubt, the *Wady el-Mojeb*. Ar of Moab is Areopolis. Rabboth Moab, now Rabba [As-Moas and Arnon.]

event recorded belongs to the close of Moses' life, relating to his last words in the plain of Moab, and as such lies beyond the scope of this article, several names of places yet occur which are identical with some herein considered, and it remains to be seen in what sense those places are connected with the scene of that event. The passage in question is Deut. i. 1, where Moses is said to have spoken "on this side Jordan in the wilderness, in the plain over against the Red Sea, between Paran and Tophel, and Laban and Hazereth and Diabab."⁸ The words "on this side" might here mislead, meaning, as shown by the LXX. rendering, *ἐπὶ*, "across" or "beyond," i. e. on the E. side. This is a passage in which it is of little use to examine the question by the aid of maps, since the more accurate they are, the more probably will they tend to confuse our view of it. The words seem to forget that the Gulf of Akabah presents its end to the end of the 'Arabah ("plain,"), and to assume that it presents the length of its coast, on which Diabab (*Dakab*) lies. This length of coast is regarded, then, as opposite to the 'Arabah; and thus the 'Arabah, in which Moses spoke, is defined by "Paran and Tophel," lying on opposite edges of the Dead Sea, or rather of the whole depression in which it lies, which is in fact the 'Arabah continued northward. Paran here is perhaps the El Paran to which Chedorlaimor came in Gen. xiv. 6 [PARAN], and probably Tophel is the well-known *Tafila* to the N.N.E. of Petra; and similarly the Red Sea, "over against" which it is spoken of as lying, is defined by Diabab on its coast, and Hazereth near the same. The introduction of "Laban" is less clear, but probably means, from its etymology, "the white," i. e. the chalk and limestone region, which in the mountain-range of *Tā*, comes into view from the Edomitish mountains (Stanley, *S. and P.* 87), and was probably named, from that point of view, by the paler contrast which it there offered to the rich and varied hues of the sandstones and granites of Mount Seir, which formed their own immediate foreground.

A writer in the *Journal of Sac. Lit.*, April,

בְּעֶבֶר הַיַּרְדֵּן צִמְרֵי בְּשֶׁרְכָה מִלִּי סוֹף בַּיִת
פָּאָרָן וְיִבְיָהוּ וְלִבְנֵי וְיִבְיָהוּ וְיִבְיָהוּ וְיִבְיָהוּ
are the words of the Heb. text, from which the LXX. offers some divergences, being as follows:—*ἐπὶ τῆς ὁδοῦ τῆς ἐρυθρᾶς θαλάσσης ἀπέναντι τοῦ Πάρου, καὶ Δαβὴν καὶ Ἀβλάν καὶ κατὰ-ἑξῆς*. The phrase *ἐπὶ τῆς ὁδοῦ*, if "Red Sea" be, as the LXX. confirms, the true meaning, is here abridged into *ἐπὶ τῆς*. The word *ἐπὶ τῆς* was possibly differently read by the LXX. (query, *ἐπὶ τῆς*, as if "the evening" were—"the west," *ἐπὶ τῆς*), whilst *ἀπέναντι τοῦ Πάρου* looks as though it were meant for one compound name; and the two last names are translated, Hazereth being—"enclosure," and Diabab—"the golden." N.B. Hazereth elsewhere is represented by *Ἀσραῖ* (Num. xl. 35, xli. 1, 16).

⁸ Some incidental errors of this writer, though unimportant, may assist in forming an estimate of his work. Thus he identifies Petra with Bozrah, the former being the capital of the later Nabatheans, the latter that of the Edom of the prophetic period and locally distinct. Again he says, "Of all the people in the universe the race most detested by the Jews were the Idumeans." That race has generally been thought, on good authority, to be the Samaritans.

⁹ Some feeling of rivalry there no doubt was; but

1860, on *Sinai, Kadesh, and Mount Hor*, propounds an entirely original view of these sites, in conflict with every known tradition and hitherto accepted theory.⁹ For instance, Josephus identifies Mount Hor with Petra and Kerek; Jerome and Kosmas point to *Serbel* in the granitic mountain region as Sinai; but this writer sets aside Josephus' testimony as a wholly corrupt tradition, invented by the Rabbis in their prejudice against the Idumeans, in whose territory between Eleutheropolis, Petra, and Elath (see Jerome on *Obad.*), he asserts they all lay. [EDOMITES.] Kadesh the city, and perhaps Kadesh Barnea, did so lie, and possibly Elusa, now *el-Khaleseh*, may retain a trace of "Kadesh," several types of which nomenclature are to be found in the region lying thence southward [KADESH]; but *el-Khaleseh* lies too far N. and W. to be the Kadesh Barnea to which Israel came "by the way of the spies," and which is clearly in far closer connexion with Zephath (*es-Sifa*) than *el-Khaleseh* could be. On the contrary, there seems great reason for thinking that, had so well-known and historical a place as Elusa been the spot of any great event in the history of the Exodus, the tradition would probably have been traceable in some form or other, whereas there is not a trace of any. Kadesh, again, lay "in the uttermost of the border" of Edom. Now, although that border may not have lain solely E. of the 'Arabah, it is utterly inconsistent with known facts to extend it to Elusa; for then the enemies encountered in Hormah would have been Edomites, whereas they were Amalekites, Canaanites, and Amorites; and Israel, in forcing the pass, would have been doing what we know they entirely abstained from—attempting violence to the territory of Edom. The "designus" which this writer attributes to the "Rabbis," as regards the period up to Josephus' time, are gratuitous imputations; nor does he cite any authorities for this or any other statement. Nor was there any such feeling against the Idumeans as he supposes. They annexed part of the territory of Judah and Simeon during the Captivity, and were subsequently, by the warlike

this writer vastly exaggerates it, in supposing that the Jewish Rabbis purposely obliterated genuine traditions, which referred these sites to Idumean territory—that of a circumcised and vanquished race who had accepted the place of "proselytes of the covenant"—in order to transfer them to what was then the territory of the purely Gentile and often hostile Nabatheans. Surely a transfer the other way would have been far more likely. Above all, what reason is there for thinking that the Rabbis of the period busied themselves with such points at all? Zeal for sites is the growth of a later age. There is no proof that they ever cared enough for Mount Hor to falsify for the sake of it. As regards *Jebel Odjme* being Sinai, the writer seems to have formed a false conception of *Odjme* which he draws as a prominent mountain boss in the range of *Tā*, taking that range for Horeb, and the prominent mountain for Sinai. The best maps show that it had no such predominance. They give it (e. g. Kiepert's) as a distinct but less clearly defined and apparently lower range, falling back into the northern plateau in a N.W. direction from about the most southerly point of the *Tā*; which, from all the statements regarding it, is a low horizontal range of limestone, with no such prominent central point whatever. Rassegger describes particularly the mounting by the wall-like partition of "Edjme" to the plateau of Edjme itself. "The height," he says, "which we had here to mount is in no wise considerable," and adds, "we had now arrived at the plateau" (*Reisen*, iii. 80, 81).

Macabees, annexed themselves, received circumcision and the law, by which an Edomite might, "in the third generation," enter the congregation of Israel (Deut. xxiii. 8), so that by the New Testament period they must have been fully recognized. The Jews proper, indeed, still speak of them as "foreigners," but to them as having the place of kinsmen, a common share in Jerusalem, and care of its sanctity as their "metropolis;" and Josephus expressly testifies that they kept the Jewish feasts there (Ant. xvii. 10, §2; comp. B. J. iv. 4, §4, 5). The zealots and the party of order both appealed to their patriotism, somewhat as in our Rebellion both parties appealed to the Scots.

It remains to notice the natural history of the wilderness which we have been considering. A number of the animals of the Sinaitic region have been mentioned. [SINAI.] The domestic cattle of the Bedouins will of course be found, but camels more numerous in the drier tracts of *et-Tih*. Schubert (*Reisen*, ii. 354) speaks of Sinai as not being frequented by any of the larger beasts of prey, nor even by jackals. The lion has become very rare, but is not absolutely unknown in the region (*Neget*, 46, 47). Foxes and hyenas, Ritter (xiv. 333) says, are rare, but Mr. Tyrwhitt mentions hyenas as common in the *Wady Mughdara*; and Ritter (*ibid.*), on the authority of Burckhardt, ascribes to the region a creature which appears to be a cross between a leopard and a wolf, both of which are rare in the Peninsula, but by which probably a hyena is to be understood. A leopard-skin was obtained by Burckhardt on Sinai, and a fine leopard is stated by Mr. Tyrwhitt, to have been seen by some of his party in their ascent of *Um Shawamer* in 1862. Schubert continues his list in the *Ayras Syriacus*, the ibex,¹ seen at *Tüfleh* in flocks of forty or fifty together, and a pair of whose horns, seen by Burckhardt (*Arab*. 405-6) at *Keret*, measured 3½ feet in length, the web,² the shrew-mouse, and a creature which he calls the "spring-mouse" (= *mus jaculus* or *jerboa*?), also a *canis famelicus*, or desert-fox, and a lizard known as the *Agama Sinaitica*, which may possibly be identical with one of those described below. Hares and jerboas are found in *Wady Feiran*. Schubert quotes (*ibid.* note) Rüppell as having found specimens of *helix* and of *coccinella* in this wilderness; for the former, comp. Forskål, *Icones Rerum Natur.* Tab. xvi. Schubert saw a fine eagle in the same region, besides catching specimens of thrush, with

stonechat and other song-birds, and speaks of the warbling of the birds as being audible from the *mimosa* bush. Clouds of birds of passage were visible in the *Wady Murrah*. Near the same tract of wilderness Dr. Stanley saw "the sky darkened by the flights of innumerable birds, which proved to be large red-legged cranes, 8 feet in height, with black and white wings, measuring 7 feet from tip to tip" (*S. & P.* 82). At *Th/leh* crows abound. On *Serbd* Dr. Stewart saw the red-legged partridge (*Tent and K'aa*, 117; comp. Burckhardt, *Syria*, 534); and the bird "katta," in some parts of the Peninsula, comes in such numbers that boys sometimes knock over three or four at a single throw of a stick.³ Hasselquist, who saw it here and in Egypt, calls it a partridge, smaller than ours, and of a greyish colour (204). Ritter (xiv. 333) adds linnets (?), ducks, prairie-birds, heath-cocks, larks, a specimen of finch, besides another small bird, probably reibrest or chaffinch, the varieties of falcon known as the *brachydactylus* and the *niger*, and, of course, on the coast, sea-swallows, and mews. Flocks of blue rock pigeons were repeatedly seen by Mr. Tyrwhitt.

Seetzen, going from Hebron to Madara, makes mention of the following animals, whose names were mentioned by his guides, though he does not say that any of them were seen by himself:—wolf, porcupine, wild-cat, ounce, mole, wild-ass, and three not easily to be identified, the *Sellek*, dog-shaped,⁴ the *Assack*, which devours the gazelle, and the *Ikkajib*, said to be small and in shape like a hedgehog. Seetzen's list in this locality also includes certain reptiles, of which such as can be identified are explained in the notes:—*el-Mellidsha*, *Umm el-Saleiman*, *el-Lidsha* or *Leja*,⁵ *el-Harraba* or *Hirba*,⁶ *Dacherrir* or *Jarrirak*,⁷ *el-Dab*, otherwise *Dade*,⁸ *el-Hanne* or *Hanan*,⁹ *el-Lifed*; and among birds the partridge, duck, stork, eagle,¹⁰ vulture (*er-Rakkam*), crow (*el-Grab*), kite (*Hidayak*),¹¹ and an unknown bird called by him *Um-Salht*. His guides told him of ostriches as seen near *Bleisha* on the way from Hebron to Sinai, and he saw a nightingale, but it seems at no great distance to the south of Hebron. The same writer also mentions the edible lizard, *el-Daob*, as frequently found in most parts of the wilderness, and his third volume has an appendix on zoology, particularly describing, and often with illustrations, many reptiles and serpents of Egypt and Arabia, without, however, pointing out such as are peculiar to the wilderness. Among these are thirteen varieties of

¹ Mr. Tyrwhitt commends the flesh of the ibex as superior to any of the deer tribe that he had ever eaten.

² Or *Ushr*, *وبر*, "fell similis sine cauda herbipagus monticola caro incolis edulis" (Forskål, *Descript. Anim.* v.).

³ Seetzen (iii. 41) saw holes in the earth made, he thought, by mice, in going from Hebron to Madara.

⁴ Probably these birds have furnished a story to Pliny, of their settling by night on the yards of ships in such vast numbers as to sink them (*N. H.* x.).

⁵ With this compare the mention by Burckhardt (op. Ritter, xiv. 333) of a great wild-dog spoken of by the Bedouins, and thought by Ritter to be perhaps the same as the *Durban* of the Hodja desert.

⁶ *لجيا*, *rana* (Freyling).

⁷ *دود*.

⁸ *حربا*, *chamaeum* (Fr.). Mr. Tyrwhitt speaks of

one of these as seen by him at the entrance of *Wady es-Sheikh* on the route from Suez to Sinai by *Sirab el-Khadim*, which appeared green in shade and yellow in sunshine.

⁹ *جوارقة*, *scorpionum parvarum species*, *scorpio formosa* (Fr.).

¹⁰ *ضب*, *Lacerta Aegypti* (Fr.); and *دود*, "a worm;" but this difference of signification seems to show that they cannot represent one and the same animal, as Seetzen's text would seem to intend.

¹¹ *حن*, *scarabaeus*. *عقاب*, *aquila*.

¹² *حداية*, *villosus*.

lizard, twenty-one of serpent, and seven of frog, besides fifteen of Nile-fish. Laborde speaks of serpents, scorpions, and black-scaled lizards, which perforate the sand, as found on the eastern border of Eilat near Tâfleh (Comm. on Num. xxxiii. 42). The MS. of Mr. Tyrwhitt speaks of starting "a large sand-coloured lizard, about 3 feet long, exactly like a crocodile, with the same bandy look about his fore-legs, the elbows turning out enormously." He is described as covered not only "in scales, but in a regular armour, which rattled quite loudly as he ran." He "got up before the dromedary, and vanished into a hole among some *retem*." This occurred at the head of the *Wady Mohattab*. Hasselquist (220) gives a *Laocerta Scimus*, "the Scinc," as found in Arabia Petraea, near the Red Sea, as well as in Upper Egypt, which he says is much used by the inhabitants of the East as an aphrodisiac, the flesh of the animal being given in powder, and broth made of the recent flesh. He also mentions the edible locust, *Gryllus Arabicus*, which appears to be common in the wilderness, as in other parts of Arabia, giving an account of the preparation of it for food (230-233). Burckhardt names a cape not far from 'Akabah, *Ras Um Huye*, from the number of serpents which abound there, and accordingly applied to this region the description of the "fiery serpents" in Num. xxi. 4-9. Schubert (ii. 362) remarked the first serpents in going from Suez and Sinai to Petra, near *el-Hudherda*; he describes them as speckled. Burckhardt (*Syria*, 489, 502) saw tracks of serpents, two inches thick, in the sand. According to Küppel, serpents elsewhere in the Peninsula are rare. He names two poisonous kinds, *Cerastes* and *Scytalis* (Ritter, xiv. 329). The scorpion has given his name to the "Ascent of Scorpions," which was part of the boundary of Judah on the side of the southern desert. *Wady es-Zuvelrah* in that region swarmed with them; and De Sauley says, "you cannot turn over a single pebble in the *Nedjd* (a branch wady) without finding one under it" (De Sauley, i. 529, quoted in *Negeb*, 51).

The reader who is curious about the fish, molluscs, &c., of the Gulf of Suez should consult Schubert (ii. 263, note, 288, note, and for the plants of the same coast, 294, note). For a description of the coral-banks of the Red Sea, see Ritter (xiv. 476 foll.), who remarks that these formations rise from the coast-edge always in longitudinal extension parallel to its line, bespeaking a fundamental connexion with the upheaval of the whole stretch of shore from S.E. to N.W. A fish which Seetzen calls the *Além* may be mentioned as furnishing to the Bedouins the fish-skin sandals of which they are fond. Ritter (xiv. 327) thinks that fish may have contributed materially to the sustenance of the Israelites in the desert (Num. xi. 22), as they are

now dried and salted for sale in Cairo or at the Convent of St. Catherine. In a brook near the foot of *Serbâl*, Schubert saw some varieties of *ciaphrus*, *dyticus*, *colymbetes*, *gyriacus*, and other water insects (*Reise*, ii. 302, note).

As regards the vegetation of the desert, the most frequently found trees are the date-palm (*Phoenix dactylifera*), the desert acacia, and the tamarik. The palms are almost always dwarf, as described *S. & P.* 20, but sometimes the "dôm" palm is seen, as on the shore of the Gulf of 'Akabah (Schubert, ii. 370; comp. Robinson, i. 161). Hasselquist, speaking of the date-palm's powers of sustenance, says that some of the poorer families in Upper Egypt live on nothing else, the very stones being ground into a provender for the dromedary. This tree is often found in tufts of a dozen or more together, the dead and living boughs interlacing overhead, the dead and living roots intertwining below, and thus forming a canopy in the desert. The date-palms in *Wady Târ* are said to be all numbered and registered. The acacia is the *Mimosa Nilotica*, and this forms the most common vegetation of the wilder-

ness. Its Arabic name is *es-Seyâl* (سبيل), and it is generally supposed to have furnished the "Shittim wood" for the Tabernacle (Forakli, *Deser. Plant.* Cent. vi. No. 90; Celsii, *Hierob.* i. 438 foll.; Ritter, xiv. 335 foll.). [SHITTIM-TREE.] It is armed with fearful thorns, which sometimes tear the packages on the camels' backs, and of course would severely lacerate man or beast. The gum arabic is gathered from this tree, on which account it is also called the *Acacia gumifera*. Other tamarisks, beside the *mannifera*, mentioned above, are found in the desert. Grass is comparatively rare, but its quantity varies with the season. Robinson, on finding some in *Wady Sumghy*, N.E. from Sinai, near the Gulf of 'Akabah, remarks that it was the first his party had seen since leaving the Nile. The terebinth (*Pistachia terebinthus*, Arab. *Bâtm*)^a is well known in the wadis about Beersheba, but in the actual wilderness it hardly occurs. For a full description of it see Robinson, ii. 222-3, and notes, also i. 208, note, and comp. Cels. *Hierob.* i. 34. The "broom," of the variety known as *retem*, (Heb. and Arab.), rendered in the A. V. by "juniper," a genuine desert plant; it is described (Robinson, i. 203, and note) as the largest and most conspicuous shrub therein, having very bitter roots, and yielding a quantity of excellent charcoal, which is the staple, if one may so say, of the desert. The following are mentioned by Schubert (ii. 352-4)^b as found within the limits of the wilderness:—*Mespilus Aconia*, *Colutea halepica*, *Atraphaxis spinosa*, *Ephedra alaba*, *Cytisus uniflorus*, and a *Cynomorium*, a highly interesting variety, compared by Schubert

large turtle asleep and basking on the shore near the castle of 'Akabah, which he ineffectually tried to capture.

^a Seetzen met with it (iii. 47) at about 1 hour to the W. of *Wady el-'Ain*, between Hebron and Sinai; but the mention of small cornfields in the same neighbourhood shows that the spot has the character of an oasis.

^b Schubert's floral catalogue is unusually rich. He travelled with an especial view to the natural history of the regions visited. His tracks extend from Cairo through Suez, Ayûn Mûsa, and Tôr, by way of Serbâl, to Sinai, thence to Mount Hor and Petra; thence by Madara and Hebron to Jerusalem; as well as in the wadi region of Palestine and Syria. His book should be consulted by all students of this branch of the subject.

^v Mr. Wilton (*Negeb*, 51) interprets "flying," applied (Lev. xxx. 8) to the serpent of the South, as "making green springs;" and "fiery" as either denoting a sensation caused by the bite, or else "red-coloured;" since such are said to have been found by several travellers whom he cites in the region between the Dead and Red Seas.

^c A number of these are delineated in Forakli's *Icones Rariorum Nat.* among the later plates; see also his *Vermes*, (v.), *Corallia Maris Rubri* (*ibid.*). Also in Kussner's atlas some specimens of the same classes are engraved. Schubert (ii. 370) remarks that most of the fish found in the Gulf of 'Akabah belong to the tribes known as *Acanthurus* and *Charodon* (Hasselquist, 223). He saw a

to a well known Maltese one. To these he adds in a note (*ibid.*):—*Dactylis memphitica*, *Gagea reticulata*, *Rumex vesicarius*, *Artemisia Judaica*, *Leysera discoides*, *Santolina fragrantissima*, *Seriola*, *Lindenbergia Sinaica*, *Lamium amplexicaule*,^c *Stachys affinis*, *Sisymbrium iris*, *Anchusa Milleri*, *Asperugo procumbens*, *Omphalodes intermedia*, *Daemia cordata*, *Roseda canescens*, and *pruinosa*, *Reaumuria vermiculata*, *Fumaria parviflora*, *Hypocoum pendulum*, *Cleome trinervis*, *Aerva tomentosa*, *Malva Honbezey*, *Fagonia*,^e *Zygophyllum coccineum*,^d *Astragalus Friesenii*, *Genista monosperma*,^e Schubert (ii. 357) also mentions, as found near *Abu Saeir*, N.E. of Sinai, a kind of sage, and of what is probably goat's-rue, also (note, *ibid.*) a fine variety of *Astragalus*, together with *Linaria*, *Lotus*, *Cynosurus echinatus*, *Bromus tectorum*, and (365) two varieties of *Perularia*, the procer and the tomentosa.

In the S.W. region of the Dead Sea grows the singular tree of the apples of Sodom, the *Aeclepias gigantea* of botanists. Dr. Robinson, who gives a full description of it (i. 522-3), says it might be taken for a gigantic species of the milk-weed or silkweed found in the northern regions of the U. S. He condemns the notion of Haesliquist (285, 287-8) as an error, that the fruit of the *Solanum melongena* when punctured by a tenthrædo, resulted in the Sodom apple, retaining the skin uninjured, but wholly changed to dust within (ib. 524). It is the *Oshar* of the Arabs. Robinson also mentions willows, hollyhocks, and hawthorns in the Sinaitic region, from the first of which the *Bas Sifsfef*, "willow-head," takes its name (i. 106, 109; Stanley, S. & P. 17). He saw hyssop (*Jadeh*) in abundance, and thyme (*Za'er*), and in the *Wady Feiran* the colocynth, the *Kirdy* or *Kirdes*, a green thorny plant with a yellow flower; and in or near the *Arabah*, the juniper (*Arar*), the oleander (*Dijfeh*), and another shrub like it, the *Zahnam*, as also the plant *el-Ghadah*, resembling the *Retem*, but larger (i. 110, 83; ii. 124, 126, 119, and note). He also describes the *Gadikid*, which has been suggested as possibly the "tree" cast by Moses into the waters of Marah (Ex. xv. 25). It grows in saline regions of intense heat, bearing a small red berry, very juicy, and slightly acidulous. Being constantly found amongst brackish pools, the "bane and antidote" would thus, on the above supposition, be side by side, but as the fruit ripens in June, it could not have been ready for its supposed use in the early days of the Exodus (Robinson, i. 66-69). He adds in a note that Forskål gives it (*Flor. Aeg. Arab.* p. lxi.), as the *Paganum retusum*, but that it is more correctly the *Nitraria tridentata* of

Drostantes (*Flora Atlant.* i. 372). The mountain *Um Shauwer* takes its name from the fennel found upon it, as perhaps may *Serbél* from the *Ser*, myrrh, which "creeps over its ledges up to the very summit,"—a plant noticed by Dr. Stanley as "thickly covering" with its "shrubs" the "natural basin" which surmounts *ed-Deir*, and as seen in the *Wady Seydl*, N.E. from Sinai (S. & P. 17, 78-80). Dr. Stanley also notices the wild thorn, from which the *Wady Sidri* takes its name, the fig-tree which entitles another *Wady* the "Father of Fig-trees" (*Abé Hamadi*), and in the *Wady Seydl*, "a yellow flowering shrub called *Abithram*, and a blue thorny plant called *Silleh*." Again, north-eastwards in *Wady el-Ain* were seen "rubac, the large-leaved plant called *Esher*," and further down the "*Laaf*, or asper plant, springing from the clefts." Seetzen's *mesembryanthemum*, described above, page 1755, note e, is noticed by Forskål, who adds that no herb is more common in sandy desert localities than the second, the *nodiflorum*, called in Arabic the *ghasál* (غامسول).

Haesliquist speaks of a *mesemb*, which he calls the "fig-marigold," as found in the ruins of Alexandria; its agreeable saltish-aromatic flavour, and its use by the Egyptians in salads, accord closely with Seetzen's description. Seetzen gives also Arabic names of two plants, one called *Ichadum* by the guides, described as of the size of heath with blue flowers; the other named *Subb-el-dich*, found to the north of *Wady el-Ain*, which had a club-shaped sappy root, ranged a foot high above the earth, having scales instead of leaves, and covered, when he saw it, with large, golden flowers clinging close together, till it seemed like a little *ninepin* (Kegel). Somewhat to the south of this he observed the "rose of Jericho" growing in the driest and most desolate solitude, and which appears always to be dead (*Reisen*, iii. 46, 54). In the region about Madara he also found what he calls "Christ's-thorn," Arab. *el-Aussiloh*, and an anonymous plant with leaves broader than a tulip, perhaps the *Esher* mentioned above. The following list of plants between Hebron and Madara is also given by Seetzen, having probably been written down by him from hearing them pronounced by his Bedouin guides, and some accordingly it has not been possible to identify with any known names,—*el-Kharidy*, mentioned in the previous column, note c; *el-Bureid*, a hyacinth, whose small pear-shaped bulb is eaten raw by the Bedouins, *el-Aria*,^b *el-Dacherra*, *el-Sphara* (or *Zafra*?),^c *el-Erbidn*, *el-Gdime*, *Schehera* (or *Shakoreeyeh*),^d *el-Metnda*, described as a small shrub, *el-Hmisa*, *el-Schillueh*, possibly the

^c Both these are found in cultivated grounds only.

^d Shown in Forskål's *Icones Her. Arab.* tab. xi., where several kinds of *zygophyllum* are delineated.

^e Probably the same as the *retem* mentioned above.

^f Many varieties of *Aeclepias*, especially the *Cordata*, are given by Forskål (*Descr. Plant. cent.* ii. 49-51). A writer in the *English Cyclopæd. of Nat. Hist.* supports the view of Haesliquist, which Dr. Robinson condemns, calling this tree a *Solanum*, and ascribing to a tenthrædo the phenomenon which occurs in its fruit.

^g *ib.*

^h "قروصي", arboris raris nomen in deserto crescentis

quæ flores flaviores sunt quam plantæ ورس (vars, *mercurialis tinctorum*) appellatur" (Freytag). For this and most of the notes on the Arabic names of plants

and animals, the present writer is indebted to Mr. E. S. Poole.

^a - ٤٤
"اروطي"

nomen arboris crescentis in arenis, flore saligneo, fructu xiziphino amaro, radicibus ramulisque rubris, cæcis reconditis fructu vascuntur cameli, cortex autem cortex coconantur" (Freyt.). It grows to a man's height, with a flower like the *salix aegyptiaca*, but smaller, with a fruit like the jujube, and the root red.

^b - ٤٥

"ذقواء", *ruta sylvestris* (Freyt.).

^c - ٤٦
"شكوريه"

olechorium; *inflytus* (Forskål, *Flor. Aegypt.* ap. Freyt.). Succory or endive. Conditio: MS notes).

same as that called *Silleh*, as above, by Dr. Stanley, *el-Khalla* (or *Khal*), *el-Handogék* (or *Handakook*),^a *el-Liddemna*, *el-Haddad*, *Kuli*, *Addan el-Hammár* (or *Adda el-Himár*).^a Some more rare plants, precious on account of their products, are the following: *Balsamum Aaronis*, or *nuss behen*, called by the Arabs *Festuck el-Ban*, from which an oil is extracted having no perfume of its own, but scented at pleasure with *jessamine* or other odoriferous leaf, &c. to make a choice unguent. It is found in Mount Sinai and Upper Egypt:—*Cucurbita Edgenaria*, Arab. *Charrah*, found in Egypt and the deserts of Arabia, wherever the mountains are covered with rich soil. The tree producing the famous balsam called "of Mecca," is found many days' journey from that place in Arabia Petrea. Linnaeus, after some hesitation, decided that it was a species of *Amirya*. The *Osimum frankincense* is mentioned by Hasselquist as a product of the desert; but the producing tree appears to be the same as that which yields the gum arabic, viz. the *Mimosa nilotica*, mentioned above. The same writer mentions the *Ochromanthus officinalis*, "camel's bay," as growing plentifully in the deserts of both the Arabias, and regards it as undoubtedly one of the precious, aromatic, and sweet plants, which the Queen of Sheba gave to Solomon (Hasselquist, 288, 255, 298-7; comp. 250-1, 300). Fuller details on the facts of natural history of the region will be found in the writers referred to, and some additional authorities may be found in Sprengel, *Historia rei Herb.* vol. ii.

Besides these, the cultivation of the ground by the Sinaitic monks has enriched their domain with the choicest fruit trees, and with a variety of other trees. The produce of the former is famed in the markets of Cairo. The cypresses of the Convent are visible far away among the mountains, and there is a single conspicuous one near the "cave of Elias" on *Jebel Músa*. Besides, they have the silver and the common poplar, with other trees, for timber or ornament. The apricot, apple, pear, quince, almond, walnut, pomegranate, olive, vine, citron, orange, cornelian cherry, and two fruits named in the Arabic *Schellák* and *Baryák*, have been successfully naturalized there (Robinson, i. 94; Seetzen, iii. 70 &c.; Hasselquist, 425; *S. & P.* 52). Dr. Stanley views these as mostly introduced from Europe; Hasselquist on the contrary views them as being the originals whence the finest varieties we have in Europe were first brought. Certainly nearly all the above trees are common enough in the gardens of Palestine and Damascus.

[The present writer wishes to acknowledge the kindness of the Rev. R. S. Tyrwhitt of Oxford, in allowing him a sight of a valuable MS. read by that traveller before the Alpine Club. It is expected to be published in the Journal of that body, but was not in print when this paper went to press. The references to Mr. Tyrwhitt in the preceding article, either relate to that MS., or to his own remarks upon the article itself, which he inspected whilst in the proof sheet.] [H. H.]

^a *شالة* nomen plantae regionis Nedyd peculiaris: est 3os; casus exiguus; Læer; Rata (Freyt.).

WILLOWS (וִּילָוּת, *'ardōim*, only in pl. *lvi'a*; (with וִּילָוּת) ἄγρου κλάδους ἐκ χειμάρρου, *klāvus āgru*: *salices*), undoubtedly the correct rendering of the above Hebrew *וִּילָוּת*, as is proved by the old versions and the kindred

S --

Arabic *gharīb* (غروب). Willows are mentioned in Lev. xxiii. 40, among the trees whose branches were to be used in the construction of booths at the Feast of Tabernacles; in Job xl. 22, as a tree which gave shade to Behemoth ("the hippopotamus"); in Is. xiv. 4, where it is said that Israel's offspring should spring up "as willows by the watercourses;" in the Psalm (cxxxvii. 2) which so beautifully represents Israel's sorrow during the time of the Captivity in Babylon—"we hauged our harps upon the willows in the midst thereof." With respect to the tree upon which the captive Israelites hung their harps, there can be no doubt that the weeping willow (*Salix Babylonica*) is intended. This tree grows abundantly on the banks of the Euphrates, in other parts of Asia as in Palestine (Strand's *Flora Palaest.* No. 558), and also in North Africa. Bochart has endeavoured to show (*Phaleg*, i. cap. viii.) that country is spoken of, in Is. xv. 7, as "the Valley of Willows." This however is very doubtful. Sprengel (*Hist. Rei Herb.* i. 18, 270) seems to restrict the *'ardāb* to the *Salix Babylonica*; but there can scarcely be a doubt that the term is generic, and includes other species of the large family of *Salices*, which is probably well represented in Palestine and the Bible lands, such as the *Salix alba*, *S. viminalis* (osier), *S. Aegyptiaca*, which latter plant Sprengel

S --

identifies with the *safedf* (صفدف) of Abul-fadli, cited by Celsius (*Hierob.* ii. 108), which word is probably the same as the *Taphelphēdh* (תפפפ) of Ezekiel (xvii. 5), a name in Arabic for "a willow." Burckhardt (*Syria*, p. 644), mentions a fountain called 'Ain *Safedf* (عين صفدف), "the Willow Fountain" (Catagogo,

Arabic Dictionary, p. 1051). Rauwolf (quoted in *Bib. Bot.* p. 274) thus speaks of the *safedf*:—"These trees are of various sizes; the stems, branches, and twigs are long, thin, soft, and of a pale yellow, and have some resemblance to those of the birch; the leaves are like those of the common willow; on the boughs grow here and there shoots of a span long, as on the wild *Sig-trees* of Cyprus, and these put forth in spring tender downy blossoms like those of the poplar; the blossoms are pale coloured, and of a delicious fragrance; the natives pull them in great quantities, and distil from them a cordial which is much esteemed." Hasselquist (*Trav.* p. 449), under the name of *calaf*, apparently speaks of the same tree; and Forskål (*Descript. Plant.* p. 1211.) identifies it with the *Salix Aegyptiaca*, which he considers the *safedf* to be the *S. Babylonica*.

should seem, from the late-tree, or *radāk* (a species of the bird's-foot trefoil). Mellis & MS. notes).

^a Comfrey (MS. notes).

1772 WILLOWS, BROOK OF THE

From these discrepancies it seems that the Arabic words are used indefinitely for willows of different kinds.

"The children of Israel," says Lady Calcott (*Scripture Herbal*, p. 533), "still present willows annually in their synagogues, bound up with palm and myrtle, and accompanied with a citron." In this country, as is well known, sprigs of willow-blossoms, under the name of "palms," are often carried in the hand, or borne on some part of the dress, by men and boys on Palm Sunday.

Before the Babylonish Captivity the willow was always associated with feelings of joyful prosperity. "It is remarkable," as Mr. Johns (*The Forest Trees of Britain*, ii. p. 240) truly says, "for having been in different ages emblematical of two directly opposite feelings, at one time being associated with the palm, at another with the cypress." After the Captivity, however, this tree became the emblem of sorrow, and is frequently thus alluded to in the poetry of our own country; and "there can be no doubt," as Mr. Johns continues, "that the dedication of the tree to sorrow is to be traced to the pathetic passage in the Psalms."

Various uses were no doubt made of willows by the ancient Hebrews, although there does not appear to be any definite allusion to them. The Egyptians used "flat baskets of wickerwork, similar to those made in Cairo at the present day" (Wilkinson, *Anc. Egypt*, i. p. 43). Herodotus (i. 194) speaks of boats at Babylon whose framework was of willow; such coracle-shaped boats are represented in the Nineveh sculptures (see Rawlinson's *Herodotus*, vol. i. p. 268).

WILLOWS, THE BROOK OF THE (נַחַל הָאֲרָבָה)

נַחַל הָאֲרָבָה: ἡ φάραγξ Ἀραβας: *torrens salicum*. A wady mentioned by Isaiah (xv. 7) in his dirge over Moab. His language implies that it was one of the boundaries of the country—probably, as Gesenius (*Jesaja*, i. 532) observes, the southern one. It is possibly identical with a wady mentioned by Amos (vi. 14) as the then recognized southern limit of the northern kingdom (Fürst, *Hundob.*; Ewald, *Propheten*). This latter appears in the A. V. as "the river of the wilderness" (נַחַל הַמִּדְבָּר: ὁ χελμαῖος τῶν ἐρημῶν: *torrens deserti*). Widely as they differ in the A. V., it will be observed that the names are all but identical in the original, the only difference being that it is plural in Isaiah and singular in Amos. In the latter it is *ha-Arabah*, the same name which is elsewhere almost exclusively used for the Valley of the Jordan, the *Ghor* of modern Arabs. If the two are regarded as identical, and the latter as the accurate form of the name, then it is probable that the *Wady el-Ahzy* is intended, which breaks down through the southern part of the mountains of Moab into the so-called *Ghor es-Safieh*, at the lower end of the lake, and appears (though our in-

WILLS

formation as to that locality is very scanty) to form a natural barrier between the districts of *Kerak* and *Jabal* (Burckhardt, *Syria*, Aug. 7). This is not improbably also the brook *Zared* (*nachal-Zared* of the earlier history).

Should, however, the *Nachal ha-Arabah* be rendered "the Willow-torrent"—which has the support of Gesenius (*Jesaja*) and Pusey (*Comm. on Amos*, vi. 14)—then it is worthy of remark that the name *Wady Sufsaf*, "Willow Wady," is still attached to a part of the main branch of the ravine which descends from *Kerak* to the north end of the peninsula of the Dead Sea (Irbly, May 9). Either of these positions would agree with the requirements of either passage.

The Targum Pseudojonathan translates the name *Zered* by "oiers," or "baskets."

The Rev. Mr. Wilton in his work on *The Negeb, or South Country of Scripture*, endeavours to identify the *Nachal ha-Arabah* of Amos with the *Wady el-Jeb*, which forms the main drain by which the waters of the present *Wady Arabah* (the great tract between *Jebel Sherah* and the mountains of *et-Tih*) are discharged into the *Ghor es-Safieh* at the southern end of the Dead Sea. (This important wady was first described by Dr. Robinson, and an account of it will be found in this work under the head of *ARABAH*, vol. i. p. 89 b.) This is certainly ingenious, but cannot be accepted as more than a mere conjecture, without a single consideration in its favour beyond the magnitude of the *Wady el-Jeb*, and the consequent probability that it would be mentioned by the Prophet.^b

Over this name Jerome takes a singular flight in his Commentary on Is. xv. 7, connecting it with the *Orbitim* (A. V. "ravens") who fed Elijah during his seclusion:—"Pro salicibus in Hebræo legimus *Arabim* quod potest et *Arabes* intelligi et legi *Orbitim*; id est villa in finibus eorum ita cujus a plerisque accolæ in Monte Oreb Eliæ præbuisse alimenta dicuntur. . . ." The whole passage is a curious mixture of topographical confusion and what would now be denounced as rationalism. [G.]

WILLS. The subject of testamentary disposition is of course intimately connected with that of inheritance, and little need be added here to what will be found above. [HEIR, vol. i. p. 779.] Under a system of close inheritance like that of the Jews, the scope for bequest in respect of land was limited by the right of redemption and general re-entry in the Jubilee year. [JUBILEE, Vows.] But the Law does not forbid bequests by will of such limited interest in land as was consistent with those rights. The case of houses in walled towns was different, and there can be no doubt that they must, in fact, have frequently been bequeathed by will (Lev. xxv. 30). Two instances are recorded in the O. T. under the Law, of testamentary disposition, (1) effected in the case of Ahiathophel (2 Sam. xvii. 23), (2) recommended in the case of Hezekiah (2 K. xx.

^a Amos is speaking of the northern kingdom only, not of the whole nation, which excludes the interpretation of the LXX., &c., probably the *Wady el-Arish*, and also (if it were not precluded by other reasons) that of Gesenius, the *Kidron*.

^b It is surely incautious (to say the least) to speak of a mere conjecture, such as this, in terms as positive and unhesitating as if it were a certain and indisputable identification.—"Amos is the only sacred writer who mentions the *Wady el-Jeb*; which he defines as the southern limit of Palestine . . . The minute accuracy of

the Prophet in speaking of it as the '*nachal* of the *Arabah*'" (*Negeb*, &c., 34, 35). It has not even the support that it was in the Prophet's native district. Amos was no "prophet of the Negeb." He belonged to the pasture-grounds of Tekoa, not ten miles from Jerusalem, and all his work seems to have lain in Bethel and the northern kingdom. There is not one title of evidence that he ever set foot in the Negeb, or knew anything of it. Such statements as these are calculated only to damage and retard the too-faltering progress of Scripture topography.

1; Is. xxxviii. 1); and it may be remarked in both, that the word "set" in order," marg. "give charge concerning," agrees with the Arabic word "command," which also means "make a will" (Michaelis, *Law of Moses*, art. 80, vol. i. p. 430, ed. Smith. Various directions concerning wills will be found in the Mishna, which imply disposition of land, *Baba Bathr.* viii. 6, 7). [H. W. P.]

WIMPLE (מִטְפָּחָה). An old English word for hood or veil, representing the Hebrew *mitpachath* in Is. iii. 22. The same Hebrew word is translated "veil" in Ruth iii. 15, but it signifies rather a kind of shawl or mantle (Schroeder, *De Vestitu Mulier.* Hebr. c. 16). [DRESS, p. 456.] [W. L. B.]

WINDOW (חֹלֶה; Chal. ܚܠܐ; *Chal.* ܚܠܐ). The window of an Oriental house consists generally of an aperture (as the word *challah* implies) closed in with lattice-work, named in Hebrew by the terms *drubbdh* (Eccl. xii. 3, A. V. "window"; Hos. xiii. 3, A. V. "chimney"), *chirakkim* (Cant. ii. 9), and *eshdh* (Judg. v. 28; Prov. vii. 6, A. V. "casement"), the two former signifying the interlaced work of the lattice, and the third the coolness produced by the free current of air through it. Glass has been introduced into Egypt in modern times as a protection against the cold of winter, but lattice-work is still the usual, and with the poor the only, contrivance for closing the window (Lane's *Mod. Eg.* i. 29). When the lattice-work was open, there appears to have been nothing in early times to prevent a person from falling through the aperture (Acts xx. 9). The windows generally look into the inner court of the house, but in every house one or more look into the street, and hence it is possible for a person to observe the approach of another without being himself observed (Judg. v. 28; 2 Sam. vi. 16; Prov. vii. 6; Cant. ii. 9). In Egypt these outer windows generally project over the doorway (Lane, i. 27; Carne's *Letters*, i. 94). When houses abut on the town-wall it is not unusual for them to have projecting windows surmounting the wall and looking into the country, as represented in Conybeare and Howson's *St. Paul*, i. 124. Through such a window the spies escaped from Jericho (Josh. ii. 15), and St. Paul from Damascus (2 Cor. xi. 33). [W. L. B.]

WINDS (רוּחִים). That the Hebrews recognised the existence of four prevailing winds as issuing, broadly speaking, from the four cardinal points, north, south, east, and west, may be inferred from their custom of using the expression "four winds" as equivalent to the "four quarters" of the hemisphere (Ex. xxxvii. 9; Dan. viii. 8; Zech. ii. 6; Matt. xxiv. 31). The correspondence of the two ideas is expressly stated in Jer. xlix. 36. The North wind, or, as it was usually called "the north," was naturally the coldest of the four (Ecclus. xliii. 20), and its presence is hence invoked as favourable to vegetation in Cant. iv. 16. It is further described in Prov. xxv. 23, as bringing A. V. "driveth away" in text; "bringeth forth in marg." rain; in this case we must understand the north-west wind, which may bring rain, but was

certainly not regarded as decidedly rainy. The difficulty connected with this passage has led to the proposal of a wholly different sense for the term *izaphon*, viz. *hidden place*. The north-west wind prevails from the autumnal equinox to the beginning of November, and the north wind from June to the equinox (v. Raumer's *Paläst.* p. 79). The East wind crosses the sandy wastes of Arabia Deserta before reaching Palestine, and was hence termed "the wind of the wilderness" (Job i. 19; Jer. xiii. 24). It is remarkably dry and penetrating, and has all the effects of the *sirocco* on vegetation (Ex. xvii. 10, xix. 12; Hos. xiii. 15; Jon. iv. 8). It also blows with violence, and is hence supposed to be used generally for any violent wind (Job xxvii. 21, xxxviii. 24; Ps. xlviii. 7; Is. xxvii. 8; Ex. xxvii. 26). It is probably in this sense that it is used in Ex. xiv. 21, though the east, or at all events the north-east wind would be the one adapted to effect the phenomenon described, viz. the partition of the waters towards the north and south, so that they stood as a wall on the right hand and on the left (Robinson, *Res.* i. 57). In this as in many other passages, the LXX. gives the "south" wind (*psros*), as the equivalent for the Greek *addm*. Nor is this wholly incorrect, for in Egypt, where the LXX. was composed, the south wind has the same characteristics that the east has in Palestine. The Greek translators appear to have felt the difficulty of rendering *addm* in Gen. xii. 6, 23, 27, because the parching effects of the east wind, with which the inhabitants of Palestine are familiar, are not attributable to that wind in Egypt, but either to the south wind, called in that country the *hamassan*, or to that known as the *samoon*, which comes from the south-east or south-south-east (Lane's *Mod. Eg.* i. 22, 23). It is certainly possible that in Lower Egypt the east wind may be more parching than elsewhere in that country, but there is no more difficulty in assigning to the term *addm* the secondary sense of *parching*, in this passage, than that of *violent* in the others before quoted. As such at all events the LXX. treated the term both here and in several other passages, where it is rendered *kabour* (*kabour*, lit. the burner). In James i. 11, the A. V. erroneously understands this expression of the burning heat of the sun. In Palestine the east wind prevails from February to June (v. Raumer, 79). The South wind, which traverses the Arabian peninsula before reaching Palestine, must necessarily be extremely hot (Job xxxvii. 17; Luke xii. 55); but the rarity of the notices leads to the inference that it seldom blew from that quarter (Ps. lxxviii. 26; Cant. iv. 16; Ecclus. xliii. 16); and even when it does blow, it does not carry the *samoon* into Palestine itself, although Robinson experienced the effects of this scourge not far south of Beersheba (*Res.* i. 196). In Egypt the south wind (*hamassan*) prevails in the spring, a portion of which in the months of April and May is termed *el-hamassan* from that circumstance (Lane i. 22). The West and south-west winds reach Palestine loaded with moisture gathered from the Mediterranean (Robinson, i. 429), and are hence expressively termed by

• צָפוֹן; *επὶ ἀλλοτρίῃ; διαπονη* in Rabb. a w2
Gen. p. 1155.

צָפוֹן חֲרָבִים אֲשֶׁב תִּיכֵן דָּרוֹם קָרִים צָפוֹן

• The term *izaphon* (צָפוֹן) in Ps. xi. 6 (A. V. "horrible") has been occasionally understood as referring to the *samoon* (Oshausen, in loc. *Senen. Thea.* p. 418); but it may equally well be rendered "wrathful" or "avenging" (Heugstetberg, in loc.).

the Arabs "the fathers of the rain" (v. *RAURIC*; 79). The little cloud "like a man's hand" that rose out of the west, was recognised by Elijah as a promise of the coming downfall (1 K. xviii. 44), and the same token is adduced by our Lord as one of the ordinary signs of the weather (Luke xii. 54). Westerly winds prevail in Palestine from November to February.

In addition to the four regular winds, we have notice in the Bible of the local squalls (*Αελλαι*; Mark iv. 37; Luke viii. 23), to which the Sea of Genesareth was liable in consequence of its proximity to high ground, and which were sufficiently violent to endanger boats (Matt. viii. 24; John vi. 18). The gales which occasionally visit Palestine are noticed under the head of WHIRLWIND. In the narrative of St. Paul's voyage we meet with the Greek term *lips* (*Αίψ*) to describe the south-west wind; the Latin *Caurus* or *Caurus* (*χάρως*), the north-west wind (Acts xxvii. 12); and *εβρουλάδης* (a term of uncertain origin, perhaps a corruption of *εβρουλάης*, which appears in some MSS.), a wind of a very violent character (*εβρουλάης*) coming from E.N.E. (Acts xxvii. 14; Conyb. and Hows. *St. Paul*, ii. 402). [EUROCLYDON.]

The metaphorical allusions to the winds are very numerous; the east wind, in particular, was regarded as the symbol of nothingness (Job xv. 2; Hos. xii. 1), and of the wasting destruction of war (Jer. xviii. 17), and, still more, of the effects of Divine vengeance (Is. xxvii. 8). In which sense, however, general references to violent wind are also employed (Ps. ciii. 16; Is. lxiv. 6; Jer. iv. 11). Wind is further used as an image of speed (Ps. civ. 4; "He maketh His angels winds;" Heb. i. 7), and of transitoriness (Job vii. 7; Ps. lxxviii. 39). Lastly, the wind is frequently adduced as a witness of the Creator's power (Job xxviii. 25; Ps. cxxxv. 7; Eccl. xi. 5; Jer. x. 13; Prov. xxx. 4; Am. iv. 13), and as representing the operations of the Holy Spirit (John iii. 8; Acts ii. 2), whose name (*πνεῦμα*) represents a gentle wind. [W. L. B.]

WINE. The manufacture of wine is carried back in the Bible to the age of Noah (Gen. ix. 20, 21), to whom the discovery of the process is apparently, though not explicitly, attributed. The natural history and culture of the vine is described under a separate head. [VINE.] The only other plant whose fruit is noticed as having been converted into wine was the pomegranate (Cant. viii. 2). In Palestine the vintage takes place in September, and is celebrated with great rejoicings (Robinson, *Res.* i. 431, ii. 81). The ripe fruit was gathered in baskets (Jer. vi. 9), as represented in Egyptian paintings (Wilkinson, i. 41-45), and was carried to the wine-press. It was then placed in the upper one of the two vats or receptacles of which the wine-press was formed [WINE-PRESS], and was subjected to the process of "treading," which has prevailed in all ages in Oriental and South-European countries (Neh. xiii. 15; Job xxiv. 11; Is. xvi. 10; Jer. xxv. 30, xlviii. 33; Am. ix. 13; Rev. xix. 15). A certain amount of juice exuded from the ripe fruit from its own pressure before the treading commenced. This appears to have been kept separate from the rest of the juice, and to have formed the *gleukos* or "sweet wine" noticed in Acts ii. 13. The first drops of juice that reached the lower vat were termed the *dema*, or "tear," and formed the first-fruits of the vintage (*ἀρωγὰς ἀποδοῦ*, LXX.) which were to be presented to Jehovah (Ex. xxii.

29). The "treading" was effected by one or more men according to the size of the vat, and, if the Jews adopted the same arrangements as the Egyptians, the treaders were assisted in the operation by ropes fixed to the roof of the wine-press, as represented in Wilkinson's *Anc. Eg.* i. 46. They encouraged one another by shouts and cries (Is. xvi. 9, 10; Jer. xxv. 30, xlviii. 33). Their legs and garments were dyed red with the juice (Gen. xlix. 11, Is. lxiii. 2, 3). The expressed juice escaped by an aperture into the lower vat, or was at once collected in vessels. A hand-press was occasionally used in Egypt (Wilkinson, i. 45), but we have no notice of such an instrument in the Bible. As to the subsequent treatment of the wine, we have but little information. Sometimes it was preserved in its unfermented state, and drunk as must, but more generally it was bottled off after fermentation, and, if it were designed to be kept for some time, a certain amount of lees was added to give it body (Is. xxv. 6). The wine consequently required to be "refined" or strained previously to being brought to table (Is. xxv. 6).

Egyptian Wine-press, from Wilkinson.

The produce of the wine-press was described in the Hebrew language by a variety of terms, indicative either of the quality or of the use of the liquid. These terms have of late years been subjected to a rigorous examination with a view to show that Scripture disapproves, or, at all events, does not speak with approval, of the use of fermented liquor. In order to establish this position it has been found necessary, in all cases where the substance is coupled with terms of commendation, to explain them as meaning either unfermented wine or fruit, and to restrict the notices of fermented wine to passages of a condemnatory character. We question whether the critics who have adopted these views have not driven their arguments beyond their fair conclusions. It may at once be conceded that the Hebrew terms translated "wine" refer occasionally to an unfermented liquor; but inasmuch as there are frequent allusions to intoxication in the Bible, it is clear that fermented liquors were also in common use. It may also be conceded that the Bible occasionally speaks in terms of strong condemnation of the effects of wine; but it is an open question whether in these cases the condemnation is not rather directed against intoxication and excess, than against the substance which is the occasion of the excess. The term of chief importance in connection with

this subject is *šrds*, which is undoubtedly spoken of with approval, inasmuch as it is frequently classed with *oil* and *sheven*, in the triplet "corn, wine, and oil," as the special gifts of Providence. This has been made the subject of a special discussion in a pamphlet entitled *Thresh to Yayin* by Dr. Less, the object being to prove that it means not wine but fruit. An examination of the Hebrew terms is therefore unavoidable, but we desire to carry it out simply as a matter of Biblical criticism, and without reference to the topic which has called forth the discussion.

The most general term for wine is *yayin*,^a which is undoubtedly connected with the Greek *oinos*, the Latin *vinum*, and our "wine." It has hitherto been the current opinion that the Indo-European languages borrowed the term from the Hebrew. The reverse, however, appears to be the case (Raman, *Lang. Sem.* i. 207): the word belongs to the Indo-European languages, and may be referred either to the root *we*, "to weave," whence come *viere*, *cimen*, *vitis*, *vitta* (Pott, *Etym. Forsch.* i. 120, 230), or to the root *wam*, "to love" (Kuhn, *Zeits. f. Vergl. Sprachf.* i. 191, 192). The word being a borrowed one, no conclusion can be drawn from etymological considerations as to its use in the Hebrew language. *šrds*^b is referred to the root *ydrash*, "to get possession of," and is applied, according to Gesenius (*Thes.* p. 633), to wine on account of its inebriating qualities, whereby it gets possession of the brain; but, according to Bythner, as quoted by Less (*Thresh*, p. 52), to the vine as being a possession (נַחֲלָה *naḥalâ*) in the eyes of the Hebrews. Neither of these explanations is wholly satisfactory, but the second is less so than the first, inasmuch as it would be difficult to prove that the Hebrews attached such pre-eminent value to the vine as to place it on a par with landed property, which is designated by the cognate terms *yermehshâ* and *mordeshâ*. Nor do we see that any valuable conclusion could be drawn from this latter derivation; for, assuming its correctness, the question would still arise whether it was on account of the natural or the manufactured product that such store was set on the vine. *šds*^c is derived from a word signifying "to tread," and therefore refers to the method by which the juice was expressed from the fruit. It would very properly refer to new wine as being recently trodden out, but not necessarily to unfermented wine. It occurs but five times in the Bible (Cant. viii. 2; Is. xlix. 26; Joel i. 5, iii. 18; Am. ix. 13). *šds* is derived from a root signifying to "soak" or "drink to excess." The cognate verb and participle are constantly used in the latter sense (Deut. xxi. 20; Prov. xxiii. 20, 21; Is. lvi. 12; Nah. i. 10). The connexion between *šds* and the Latin *apa*, applied to a decoction of must (Kitto's *Cycl. s. v. Wine*), appears doubtful: the latter was regarded as a true Latin word by Pliny (xiv. 11). *šds* occurs but thrice (Is. i. 22; Hos. iv. 18; Nah. i. 10). *Chamar*^d (Deut. xxxii. 14), in the Chaldee *chamar* (Ezr. vi. 9, vii. 22) and *chamarâ* (Dan. v. 1 ff.), conveys the notion of *foaming* or *ebullition*, and may equally well apply to the process of fermentation or to the frothing of liquid freshly poured out, in which latter case it might be used of an unfermented liquid. *Masec*^e

(Ps. lxxv. 8), *maseg*^f (Cant. vii. 2), and *mimado*^g (Prov. xxiii. 30; Is. lxx. 11), are connected etymologically with *maseo* and "mix," and imply a mixture of wine with some other substance: no conclusion can be drawn from the word itself as to the quality of the wine, whether fermented or unfermented, or as to the nature of the substance introduced, whether spices or water. We may further notice *šdsr*,^h a generic term applied to all fermented liquors except wine [DRINK, STRONG]; *chamets*,ⁱ a weak sour wine, ordinarily termed vinegar [VINEGAR]; *šds*,^j rendered "flagon of wine" in the A. V. (2 Sam. xvi. 1; 1 Chr. xvi. 3; Cant. ii. 5; Hos. iii. 1), but really meaning a cake of pressed raisins; and *šdsr*,^k properly meaning the " lees " or dregs of wine, but in Is. xxv. 6 transferred to wine that had been kept on the lees for the purpose of increasing its body. In the New Testament we meet with the following terms: *oinos*,^m answering to *yayin* as the generic designation of wine; *gleukos*,ⁿ properly sweet wine (Acts ii. 13); *sikera*,^o a Grecised form of the Hebrew *šdsr*; and *oxos*,^p vinegar. In Rev. xiv. 10 we meet with a singular expression,^q literally meaning *mixed unmixed*, evidently referring to the custom of mingling wine: the two terms cannot be used together in their literal sense, and hence the former has been explained as meaning "poired out" (De Wette in *l. j.*).

From the terms themselves we pass on to an examination of such passages as seem to elucidate their meaning. Both *yayin* and *šrds* are occasionally connected with expressions that would apply properly to a fruit; the former, for instance, with verbs significant of *gathering* (Jer. xi. 10, 12), and *growing* (Ps. civ. 14, 15); the latter with *gathering* (Is. lxii. 9, A. V. "brought it together"), *treading* (Mic. vi. 15), and *withering* (Is. xiv. 7; Joel i. 10). So again the former is used in Num. vi. 4 to define the particular kind of tree whose products were forbidden to the Nazarite, viz. the "pendulous shoot of the vine;" and the latter in Judg. ix. 13, to denote the product of the vine. It should be observed, however, that in most, if not all, the passages where these and similar expressions occur, there is something to denote that the fruit is regarded not simply as fruit, but as the raw material out of which wine is manufactured. Thus, for instance, in Ps. civ. 15 and Judg. ix. 13 the *cheering* effects of the product are noticed, and that these are more suitable to the idea of wine than of fruit seems self-evident: in one passage indeed the A. V. connects the expression "make cheerful" with bread (Zech. ix. 17), but this is a mere mis-translation, the true sense of the expression there used being to *nourish* or *make to grow*. So, again, the *treading* of the grape in Mic. vi. 15 is in itself conclusive as to the pregnant sense in which the term *šrds* is used, even if it were not subsequently implied that the effect of the treading was in the ordinary course of things to produce the *yayin* which was to be drunk. In Is. lxii. 9 the object of the *gathering* is clearly conveyed by the notion of *drinking*. In Is. xiv. 7 the *šrds*, which withers, is paralleled with *yayin* in the two following verses. And lastly, in Is. lxx. 8 the nature of the *šrds*, which is said to be found in the cluster

יַיִן	תִּירָשׁ	עֵסֶר
כֶּבֶד	חֶמֶר	מֶסֶק
מֶזֶק	מֶסֶק	שֶׁכֶר

חֶמֶן	חֶמֶן	שֶׁכֶר
οἶνος.	οἶνος.	οἶνος.
δύνα.	μεγαλὸν ἄνθος ἀκροῦτος.	

of the grapes, is not obscurely indicated by the subsequent eulogium, "a blessing is in it." That the terms "vine" and "wine" should be thus interchanged in poetical language calls for no explanation. We can no more infer from such instances that the Hebrew terms mean *grapes as fruit*, than we could infer the same of the Latin *vinum* because in some two or three passages (Plaut. *Trin.* ii. 4, 125; Varr. *de L. L.* iv. 17; Cato, *R. R.* c. 147) the term is transferred to the grape out of which wine is made.

The question whether either of the above terms ordinarily signified a solid substance, would be at once settled by a reference to the manner in which they were consumed. With regard to *yayin* we are not aware of a single passage which couples it with the act of eating.* With regard to *tirsh* the case is somewhat different, inasmuch as that term generally follows "corn," in the triplet "corn, wine, and oil," and hence the term applied to the consumption of corn is carried on, in accordance with the grammatical figure *zeugma*, to the other members of the clause, as in Deut. xii. 17. In the only passage where the act of consuming *tirsh* alone is noticed (Is. lxiii. 8, 9), the verb is *shattheth*,[†] which constantly indicates the act of drinking (e. g. Gen. ix. 21, xxiv. 22; Ex. vii. 21; Ruth ii. 9), and is the general term combined with *decal* in the joint act of "eating and drinking" (e. g. 1 Sam. xxx. 16; Job i. 4; Eccl. ii. 24). We can find no confirmation for the sense of *sucking* assigned to the term by Dr. Lees (*Tirsh*, p. 61): the passage quoted in support of that sense (Ps. lxxv. 8) implies at all events a kind of sucking allied to drinking rather than to eating, if indeed the sense of drinking be not the more correct rendering of the term. An argument has been drawn against the usual sense assigned to *tirsh*, from the circumstance that it is generally connected with "corn," and therefore implies an edible rather than a drinkable substance. The very opposite conclusion may, however, be drawn from this circumstance; for it may be reasonably urged that in any enumeration of the materials needed for men's support, "meat and drink" would be specified, rather than several kinds of the former and none of the latter.

There are, moreover, passages which seem to imply the actual manufacture of *tirsh* by the same process by which wine was ordinarily made. For, not to insist on the probability that the "bringing together," noticed in Is. lxii. 9, would not appropriately apply to the collecting of the fruit in the wine-vat, we have notice of the "treading" in connexion with *tirsh* in Mic. vi. 15, and again of the "overflowing" and the "bursting out" of the *tirsh* in the vessel or lower vat (*yakeb*; *שפך*), which received the must from the proper press (Prov. iii. 10; Joel ii. 24).

Lastly, we have intimations of the effect produced by an excessive use of *yayin* and *tirsh*. To the former are attributed the "darkly flashing eye" (Gen. xlix. 12; A. V. "red," but see Gesen. *Thes.* Append. p. 89), the unbridled tongue (Prov. xx. 1; Is. xxviii. 7), the excitement of the spirit (Prov. xxxi. 6; Is. v. 11; Zech. ix. 15, x. 7), the enchainment of its votaries (Hos. iv. 11), the perverted judgment (Prov. xxxi. 5; Is. xxviii. 7), the indecent exposure (Ezek. ii. 15, 16), and the sickness resulting

from the heat (*chemsh*, A. V. "bottles" of wine (Hos. vii. 5). The allusions to the effects of *tirsh* are confined to a single passage, but this a most decisive one, viz., Hos. iv. 11, "Whoredom and wine (*yayin*), and new wine (*tirsh*) take away the heart," where *tirsh* appears as the climax of en-grossing influences, in immediate connexion with *yayin*.

The impression produced on the mind by a general review of the above notices is, that both *yayin* and *tirsh* in their ordinary and popular acceptation referred to fermented, intoxicating wine. In the condemnatory passages no exception is made in favour of any other kind of liquid passing under the same name, but not invested with the same dangerous qualities. Nor again in these passages is there any decisive condemnation of the substance itself, which would enforce the conclusion that elsewhere an unfermented liquid must be understood. The condemnation must be understood of *excessive* use in any case: for even where this is not expressed, it is implied; and therefore the instances of wine being drunk without any reproof of the act, may with as great a probability imply the moderate use of an intoxicating beverage, as the use of an un-intoxicating one.

The notices of fermentation are not very decisive. A certain amount of fermentation is implied in the distension of the leather bottles when new wine was placed in them, and which was liable to burst old bottles. It has been suggested that the object of placing the wine in bottles was to prevent fermentation, but that in "the case of old bottles fermentation might ensue from their being impregnated with the fermenting substance" (*Tirsh*, p. 65). This is not inconsistent with the statement in Matt. ix. 17, but it detracts from the spirit of the comparison which implies the presence of a strong expansive, penetrating principle. It is, however, inconsistent with Job xxxii. 19, where the distension is described as occurring even in new bottles. It is very likely that new wine was preserved in the state of must by placing it in jars or bottles, and then burying it in the earth. But we should be inclined to understand the passages above quoted as referring to wine drawn off before the fermentation was complete, either for immediate use, or for the purpose of forming it into sweet wine after the manner described by the Geoponic writers (vii. 19, [*Dict. of Ant.* "Vinum"]). The presence of the gas-bubble, or as the Hebrews termed it, "the eye" that sparkled in the cup (Prov. xxiii. 31), was one of the tokens of fermentation having taken place, and the same effect was very possibly implied in the verse *themer*.

The remaining terms call for but few remarks. There can be no question that *osin* means wine, and in this case it is observable that it forms part of a Divine promise (Joel iii. 18; Am. ix. 13) very much as *tirsh* occurs elsewhere, though other notices imply that it was the occasion of excess (Is. xlix. 26; Joel i. 5). Two out of the three passages in which *sabe* occurs (Is. i. 22; Nah. i. 10) imply a liquor that would be spoiled or *rounded* (the expression in Is. i. 22, *mdhal*, A. V. "mixed," is supposed to convey the same idea as the Latin *castrare* applied to wine in Plin. xix. 19) by the application of water; we think the passages quoted

* An apparent instance occurs in Is. lv. 1, where the "buy and eat" has been supposed to refer to the "buy wine and milk" which follows (*Tirsh*, p. 24). But the

term rendered "buy" properly means "to buy *grain*" and hence expresses in itself the substance to be eaten
 בָּרָא

favour the idea of *strength* rather than *sweetness* being the characteristic of *sabbé*. The term occurs in Hos. iv. 18, in the sense of a debauch, and the verb accompanying it has no connexion with the notion of acidity, but would more properly be rendered "is past." The *mingling* implied in the term *mesek* may have been designed either to increase, or to diminish the strength of the wine, according as spices or water formed the ingredient that was added. The notices chiefly favour the former view; for mingled liquor was prepared for high festivals (Prov. ix. 2, 5), and occasions of excess (Prov. xxiii. 30; Is. v. 22). A cup "full mixed," was emblematic of severe punishment (Ps. lxxv. 8). At the same time strength was not the sole object sought: the wine "mingled with myrrh" given to Jesus, was designed to deaden pain (Mark xv. 23), and the spiced pomegranate wine prepared by the bride (Cant. viii. 2) may well have been of a mild character. Both the Greeks and Romans were in the habit of flavouring their wines with spices, and such preparations were described by the former as wine *ἐσπευμασμένον* *εσπευμασμένον* (Athen. i. p. 31 s), and by the latter as *aromatiles* (Plin. xiv. 19, §5). The authority of the Mishna may be cited in favour both of water and of spices, the former being noticed in *Berach.* 7, §5; *Pesach.* 7, §13, and the latter in *Schem.* 2, §1. In the New Testament the character of the "sweet wine," noticed in Acts ii. 13, calls for some little remark. It could not be *sau* wine in the proper sense of the term, inasmuch as about eight months must have elapsed between the vintage and the feast of Pentecost. It might have been applied, just as *mushum* was by the Romans, to wine that had been preserved for about a year in an unfermented state (Cato, *R. R.* c. 120). But the explanations of the ancient lexicographers rather lead us to infer that its luscious qualities were due, not to its being recently made, but to its being produced from the very purest juice of the grape; for both in Hesychius and the Etymologicum Magnum the term *γλεύκος* is explained to be the juice that flowed spontaneously from the grape before the treading commenced. The name itself, therefore, is not conclusive as to its being an unfermented liquor, while the context implies the reverse: for St. Peter would hardly have offered a serious defence to an accusation that was not seriously made; and yet if the sweet wine in question were not intoxicating, the accusation could only have been ironical.

As considerable stress is laid upon the quality of sweetness, as distinguished from strength, supposed to be implied in the Hebrew terms *mesek* and *sabbé*, we may observe that the usual term for the inspissated juice of the grape, which was characterised more especially by sweetness, was *debash*, rendered in the A. V. "honey" (Gen. xliii. 11; Ex. xxvii. 17). This was prepared by boiling it down either to a third of its original bulk, in which case it was termed *sapa* by the Latins, and *σάπων* or *σίπων* by the Greek; or else to half its bulk, in which case it was termed *defrutum* (Plin. xiv. 11). Both the substance and the name, under the form of *dibe*, are in common use in Syria at the present day. We may further notice a less artificial mode of producing a sweet liquor from the grape, namely, by pressing the juice directly into the cup, as described in Gen. xi. 11. And, lastly, there appears to have been a

beverage, also of a sweet character, produced by macerating grapes, and hence termed the "liquor" of grapes (Num. vi. 3). These later preparations are allowed in the Koran (xvi. 69) as substitutes for wine.

There can be little doubt that the wines of Palestine varied in quality, and were named after the localities in which they were made. We have no notices, however, to this effect. The only wines of which we have special notice, belonged to Syria: these were the wine of Helbon, a valley near Damascus, which in ancient times was prized at Tyre (Ex. xxvii. 18) and by the Persian monarchs (Strab. xv. p. 735), as it still is by the residents of Damascus (Porter, *Damascus*, i. 333); and the wine of Lebanon, famed for its aroma (Hos. xiv. 7).

With regard to the uses of wine in private life there is little to remark. It was produced on occasions of ordinary hospitality (Gen. xiv. 18), and at festivals, such as marriages (John ii. 3). The monuments of ancient Egypt furnish abundant evidence that the people of that country, both male and female, indulged liberally in the use of wine (Wilkinson, i. 52, 53). It has been inferred from a passage in Pintarch (*de Isid.* 8) that no wine was drunk in Egypt before the reign of Psammeticus, and this passage has been quoted in illustration of Gen. xl. 11. The meaning of the author seems rather to be that the kings subsequently to Psammeticus did not restrict themselves to the quantity of wine prescribed to them by reason of their sacerdotal office (Diod. i. 70). The cultivation of the vine was incompatible with the conditions of a nomad life, and it was probably on this account that Jonadab, wishing to perpetuate that kind of life among his posterity, prohibited the use of wine to them (Jer. xxxv. 6). The case is exactly parallel to that of the Nabathaeans, who abstained from wine on purely political grounds (Diod. xix. 94).

Under the Mosaic law wine formed the usual drink-offering that accompanied the daily sacrifice (Ex. xxix. 40), the presentation of the first-fruits (Lev. xxiii. 13), and other offerings (Num. xv. 5). It appears from Num. xviii. 7 that strong drink might be substituted for it on these occasions. Tithe was to be paid of wine (*thrsék*) as of other products, and this was to be consumed "before the Lord," meaning within the precincts of the Temple, or perhaps, as may be inferred from Lev. vii. 16, at the place where the Temple was situated (Deut. xii. 17, 18). The priest was also to receive first-fruits of wine (*thrsék*), as of other articles (Deut. xviii. 4; comp. Ex. xxii. 29); and a promise of plenty was attached to the faithful payment of these dues (Prov. iii. 9, 10). The priests were prohibited from the use of wine and strong drink before performing the services of the Temple (Lev. x. 9), and the place which this prohibition holds in the narrative favours the presumption that the offence of Nadab and Abihu was committed under the influence of liquor. Ezekiel repeats the prohibition as far as wine is concerned (Ez. xlii. 21). The Nazarite was prohibited from the use of wine, or strong drink, or even the juice of grapes during the continuance of his vow (Num. vi. 3); but the adoption of that vow was a voluntary act. The use of wine at the paschal feast was not enjoined by the Law; but had become an established custom, at all events in the post-Babylonian period. The cup was handed round four times according to the ritual prescribed in the Mishna (*Pesach.* 10, §1), the third cup being designated the "cup of blessing" (1 Cor. x. 16), because

יְבִשֵּׁה

יְבִשֵּׁה

grace was then said (*Pesach*. 10, §7). [*PASSOVER*]. The contents of the cup are specifically described by our Lord as "the fruit" (*γέννημα*) of the vine (*Matt.* xxvi. 29; *Mark* xiv. 25; *Luke* xxii. 18), and in the Mishna simply as wine. The wine was mixed with warm water on these occasions, as implied in the notice of the warming kettle (*Pesach*. 7, §13). Hence in the early Christian Church it was usual to mix the sacramental wine with water, a custom as old, at all events, as Justin Martyr's time (*Apol.* i. 65). The Pastoral Epistles contain directions as to the moderate use of wine on the part of all holding office in the Church; as that they should not be *πάρους* (1 Tim. iii. 3; A. V. "given to wine"), meaning insolent and violent under the influence of wine; "not given to much wine" (1 Tim. iii. 8); "not enslaved to much wine" (Tit. ii. 3). The term *σφάλας* in 1 Tim. iii. 2 (A. V. "sober"), expresses general vigilance and circumspection (*Schleusner, Lex. s. v.*; *Alford, in loc.*). St. Paul advises Timothy himself to be no longer a habitual water-drinker, but to take a little wine for his health's sake (1 Tim. v. 23). No very satisfactory reason can be assigned for the place which this injunction holds in the Epistle, unless it were intended to correct any possible misapprehension as to the preceding words, "Keep thyself pure." The precepts above quoted, as well as others to the same effect addressed to the disciples generally (*Rom.* xiii. 13; *Gal.* v. 21; 1 Pet. iv. 3), show the extent to which intemperance prevailed in ancient times, and the extreme danger to which the Church was subjected from this quarter. [W. L. B.]

WINE-PRESS (נֶחֱמֶה; נֶחֱמֶה). From the scanty notices contained in the Bible we gather that the wine-presses of the Jews consisted of two receptacles or vats placed at different elevations, in the upper one of which the grapes were trodden, while the lower one received the expressed juice. The two vats are mentioned together only in *Joel* iii. 13:—"The press (*gath*) is full: the fats (*yekebim*) overflow"—the upper vat being full of fruit, the lower one overflowing with the must. *Yekéb* is similarly applied in *Joel* ii. 24, and probably in *Prov.* iii. 10, where the verb rendered "burst out" in the A. V. may bear the more general sense of "abound" (*Gesen. Thes. p. 1130*). *Gath* is also strictly applied to the upper vat in *Neh.* xiii. 15, *Lam.* i. 15, and *Is.* lxiii. 2, with *pérâh* in a parallel sense in the following verse. Elsewhere *yekeb* is not strictly applied; for in *Job* xxiv. 11, and *Jer.* xlviii. 33, it refers to the upper vat, just as in *Matt.* xxi. 33, *ὁράσκειν* (properly the vat under the press) is substituted for *ἄνθος*, as given in *Mark* xii. 1. It would, moreover, appear natural to describe the whole arrangement by the term *gath*, as denoting the most important portion of it; but, with the exception of proper names in which the word appears, such as *Gath*, *Gath-rimmon*, *Gath-hepher*, and *Gittaim*, the term *yekeb* is applied to it (*Judg.* vii. 25; *Zech.* xiv. 10). The same term is also applied to the produce of the wine-press (*Num.* xviii. 27, 30; *Deut.* xv. 14; 2 K. vi. 27; *Hos.* ix. 2). The term *pérâh*, as used in *Hagg.* ii. 16, probably refers to the contents of a wine-vat,* rather than to the press or vat itself. The two vats were usually dug or hewn out of the solid rock (*Is.* v. 2, margin;

Matt. xxi. 33). Ancient wine-presses, so constructed, are still to be seen in Palestine, one of which is thus described by Robinson:—"Advantage had been taken of a ledge of rock; on the upper side a shallow vat had been dug out, eight feet square, and fifteen inches deep. Two feet lower down another smaller vat was excavated, four feet square by three feet deep. The grapes were trodden in the shallow upper vat, and the juice drawn off by a hole at the bottom (still remaining) into the lower vat" (*B. R.* iii. 137, 603). The wine-presses were thus permanent, and were sufficiently well known to serve as indications of certain localities (*Judg.* vii. 25; *Zech.* xiv. 10). The upper receptacle (*gath*) was large enough to admit of threshing being carried on in (not "by," as in A. V.) it, as was done by Gideon for the sake of concealment (*Judg.* vi. 11). [FAT.] [W. L. B.]

WINNOWNING. [AGRICULTURE.]

WISDOM OF JESUS, SON OF SIRACH. [ECCLESIASTICUS.]

WISDOM, THE, OF SOLOMON. *Σοφία Σολομών;* *Σοφία Σολομώντος;* later, *ἡ Σοφία*: *Liber Sapientias;* *Sapientius Salomonis;* *Sophia Salomonis*. The title *Σοφία* was also applied to the Book of Proverbs, as by Melito ap. Euseb. *H. E.* iv. 26 (*Παραμύλη ἡ καὶ ἡ Σοφία*; see Vales. or Routh *ad loc.*), and also to Ecclesiasticus, as Epiphanius (*adv. haer.* lxxvi. p. 94', *ἐν ταῖς Σοφίαις, Σολομώντος τὸ φημι καὶ τοῦ Σιράχ*), from which considerable confusion has arisen.

1. *Text.*—The Book of Wisdom is preserved in Greek and Latin texts, and in subsidiary translations into Syriac, Arabic, and Armenian. Of these latter, the Armenian is said to be the most important; the Syriac and Arabic Versions being paraphrastic and inaccurate (*Grimm, Einl.* §10). The Greek text, which, as will appear afterwards, is undoubtedly the original, offers no remarkable features. The variations in the MSS. are confined within narrow limits, and are not such as to suggest the idea of distinct early recensions; nor is there any appearance of serious corruptions anterior to existing Greek authorities. The Old Latin Version, which was left untouched by Jerome (*Praef. in Libr. Sal.*, *In eo libro qui a plerisque Sapientia Salomonis inscribitur . . . calamo temperavi; tantummodo canonice Scripturas emendare desiderans, et studium meum certis magis quam dubiis commendare*), is in the main a close and faithful rendering of the Greek, though it contains some additions to the original text, such as are characteristic of the old version generally. Examples of these additions are found—i. 15, *Injustitia autem mortis est acquisitio*; ii. 8, *Nullum pratum est quod non pertranscat luxuria nostra*; ii. 17, *et sciemus quae erant novissima illius*; vi. 1, *Melior est sapientia quam vires, et cir prudens quam fortis*. And the construction of the parallelism in the two first verses suggests the belief that there, at least, the Latin reading may be correct. But other additions point to a different conclusion: vi. 23, *dirigite lumen sapientiae omnes qui praeestis populo*; viii. 11, *et facies principum mirabuntur me*; ix. 19, *quae placuerunt tibi domine a principio*; xi. 5, *a defectione potus sui, et in eis cum abundarent filii Israel lactati sunt*.

The chief Greek MSS. in which the book is contained are the *Codex Sinaiticus* (A), the *Cod. Alexandrinus* (A), the *Cod. Vaticanus* (B), and the *Cod. Ephraemi* (C). The entire text is pre-

* The LXX. renders the term by *μετρητής*, the Greek measure equivalent to the Hebrew bath.

served in the three former; in the latter, only considerable fragments: viii. 5-xi. 10; xiv. 19-xvii. 18; xviii. 24-xix. 22.

Sabatier used four Latin MSS. of the higher class for his edition: "Corbeiensis duos, unum Sangermanensem, et alium S. Theodorici ad Remos," of which he professes to give almost a complete (but certainly not a literal) collation. The variations are not generally important; but patristic quotations show that in early times very considerable differences of text existed. An important MS. of the book in the Brit. Mus. *Egerton*, 1046, *Sæc.* viii. has not yet been examined.

2. *Contents.*—The book has been variously divided but it seems to fall most naturally into two great divisions: (1) i.-ix.; (2) x.-xix. The first contains the doctrine of Wisdom in its moral and intellectual aspects; the second, the doctrine of Wisdom as shown in history. Each of these parts is again capable of subdivision. The first part contains the praise of Wisdom as the source of immortality in contrast with the teaching of sensualists (i.-v.); and next the praise of Wisdom as the guide of practical and intellectual life, the stay of princes, and the interpreter of the universe (vi.-ix). The second part, again, follows the action of Wisdom summarily, as preserving God's servants from Adam to Moses (x. 1.-xi. 4), and more particularly in the punishment of the Egyptians and Canaanites (xi. 5-16; xi. 17-xii.). This punishment is traced to its origin in idolatry, which, in its rise and progress, presents the false substitute for Revelation (xiii., xiv.). And in the last section (xv.-xix.) the history of the Exodus is used to illustrate in detail the contrasted fortunes of the people of God and idolaters. The whole argument may be presented in a tabular form in the following shape.

I.—Ch. i.-ix. *The doctrine of Wisdom in its spiritual, intellectual, and moral aspects.*

(a). i.-v. Wisdom the giver of happiness and immortality.

The conditions of wisdom (i. 1-11).

Uprightness of thought (1-5).

Uprightness of word (6-11).

The origin of death (i. 12-ii. 24).

Sin (in fact) by man's free will (i. 12-16).

The reasoning of the sensualist (ii. 1-20).

Sin (in source) by the envy of the devil (21-24).

The godly and wicked in life (as mortal), (iii. 1-iv.).

In chastisements (iii. 1-10).

In the results of life (iii. 11-iv. 6).

In length of life (7-20).

The godly and wicked after death (v.).

The judgment of conscience (1-14).

The judgment of God—

On the godly (15-16).

On the wicked (17-23).

(β). vi.-ix. Wisdom the guide of life.

Wisdom the guide of princes (vi. 1-21).

The responsibility of power (1-11).

Wisdom soon found (12-16).

Wisdom the source of true sovereignty (17-21).

The character and realm of wisdom

Open to all (vi. 22-vii. 7).

Pervading all creation (vii. 8-viii. 1).

Swaying all life (viii. 2-17).

Wisdom the gift of God (viii. 17-ix.).

Prayer for wisdom (ix.).

II.—Ch. x.-xix. *The doctrine of Wisdom in its historical aspects.*

(a). Wisdom a power to save and chastise.

Wisdom seen in the guidance of God's people from Adam to Moses (x.-xi. 4).

Wisdom seen in the punishment of God's enemies (xi. 5-xii.).

The Egyptians (xi. 5-xii. 1).

The Canaanites (xii. 2-18).

The lesson of mercy and judgment (19-27).

(β). The growth of idolatry the opposite to wisdom.

The worship of nature (xiii. 1-9).

The worship of images (xiii. 10-xiv. 13).

The worship of deified men (xiv. 14-21).

The moral effects of idolatry (xiv. 22-31).

(γ). The contrast between true worshippers and idolaters (xv.-xix.).

The general contrast (xv. 1-17).

The special contrast at the Exodus—

The action of beasts (xv. 18-xvi. 13).

The action of the forces of nature—water fire (xvi. 14-29).

The symbolic darkness (xvii.-xviii. 4).

The action of death (xviii. 5-25).

The powers of nature changed in their working to save and destroy (xix. 1-21).

Conclusion (xix. 21).

The subdivisions are by no means sharply defined, though it is not difficult to trace the main current of thought. Each section contains the preparation for that which follows, just as in the classic trilogy the close of one play shadowed forth the subject of the next. Thus in ii. 24b, iv. 20, ix. 18, &c., the fresh idea is enunciated, which is subsequently developed at length. In this way the whole book is intimately bound together, and the clauses which appear at first sight to be idle repetitions of thought really spring from the elaborateness of its structure.

3. *Unity and integrity.*—It follows from what has been said that the book forms a complete and harmonious whole. But the distinct treatment of the subject, theoretically and historically, in two parts, has given occasion from time to time for maintaining that it is the work of two or more authors. C. F. Houbigant (*Prolegg. ad Sap. et Eccles.* 1777) supposed that the first nine chapters were the work of Solomon, and that the translator of the Hebrew original (probably) added the later chapters. Eichhorn (*Eint. in d. Apoc.* 1795), rightly feeling that some historical illustrations of the action of wisdom were required by the close of ch. ix., fixed the end of the original book at ch. xi. 1. Nachtigal (*Das Buch Weis.* 1799) devised a far more artificial theory, and imagined that he could trace in the book the records of (so to speak) an antiphonic "Praise of Wisdom," delivered in three sittings of the sacred schools by two companies of doctors. Bretschneider (1804-5), following out the simpler hypothesis, found three different writings in the book, of which he attributed the first part (i. 1-vi. 8) to a Palestinian Jew of the time of Antiochus Epiph., the second (vi. 9-x.) to a philosopher Alexandrian Jew of the time of our Lord, and the

third (xii.-xix.) to a contemporary, but uneducated Jew, who wrote under the influence of the rudest rational prejudices. The eleventh chapter was, as he supposed, added by the compiler who brought the three chief parts together. Bertholdt (*Einführung*, 1815) fell back upon a modification of the earliest division. He included chap. i.-xii. in the original book, which he regarded as essentially philosophical, while the later addition (xiii.-xix.) is, in his judgment, predominantly theological. It is needless to enter in detail into the arguments by which these various opinions were maintained, but when taken together, they furnish an instructive example of the course of subjective criticism. The true refutation of the one hypothesis which they have in common—the divided authorship of the book—is found in the substantial harmony and connexion of its parts, in the presence of the same general tone and manner of thought throughout it, and yet more in the essential uniformity of style and language which it presents, though both are necessarily modified in some degree by the subject-matter of the different sections. (For a detailed examination of the arguments of the "Separatists," see Grimm, *Exeg. Handb.* § 4; and Bauermeister, *Comm. in lib. Sap.* 3 ff.)

Some, however, admitting the unity of the book, have questioned its integrity. Eichhorn imagined that it was left imperfect by its author (*Einf.* p. 148); Grotius, apparently, that it was mutilated by some accident of time (*Videtur hio liber esse corruptus*); and others have been found, in later times, to support each opinion. Yet it is obvious that the scope of the argument is fully satisfied by the investigation of the providential history of the Jews up to the time of the occupation of Canaan, and the last verse furnishes a complete epilogue to the treatise, which Grimm compares, not inaptly, with the last words of 3 Macc.

The idea that the book has been interpolated by a Christian hand (Grotius, *Gratz*) is as little worthy of consideration as the idea that it is incomplete. The passages which have been brought forward in support of this opinion (ii. 12-20, 24, iii. 13, 14, xiv. 7; comp. *Homilies*, p. 174, ed. 1850) lose all their force, if fairly interpreted.

4. *Style and Language.*—The literary character of the book is most remarkable and interesting. In the richness and freedom of its vocabulary it most closely resembles the fourth Book of Maccabees, but it is superior to that fine declamation, both in power and variety of diction. No existing work represents perhaps more completely the style of composition which would be produced by the sophistic schools of rhetoric; and in the artificial balancing of words, and the frequent niceties of arrangement and rhythm, it is impossible not to be reminded of the exquisite story of Prodicus (*Xen. Memorab.* ii. 1, 21), and of the subtle refinements of Protagoras in the dialogue which bears his name. It follows as a necessary consequence that the effect of different parts of the book is very unequal. The florid redundancy and restless straining after effect, which may be not unsuited to vivid intellectual pictures, is wholly alien from the philosophic contemplation of history. Thus the forced contrasts and fantastic exaggerations in the description of the Egyptian plagues cannot but displease while it is equally impossible not to admire the lyrical force of the language of the sensualist (ii. 1, ff.), and of the picture of future judgment (v. 15, ff.). The magnificent description of Wisdom (vii. 22-viii. 1) must

rank among the noblest passages of human eloquence, and it would be perhaps impossible to point out any piece of equal length in the remains of classical antiquity more pregnant with noble thought, or more rich in expressive phraseology. It may be placed beside the Hymn of Cleanthes on the visions of Plato, and it will not lose its power to charm and move. Examples of strange or new words may be found almost on every page. Such are *ἀναποδισμός*, *πρωτόπλαστος*, *εὐδέχθεια*, *ἐγερσιμία*, *ἐνδύειν*, *ἀκηλίδωτος*, *βρυθασμός*, *ἐννοία*; others belong characteristically to later Greek, as *διαβούλιον*, *ἀντανεκλάσθαι*, *ἀδιδάκτως*, *ἐδράζειν*, *ἐξάλλας*, *ἀπερίσπαστος*, &c.; others, again, to the language of philosophy, *ὁμοιοπαθής*, *ἐντιμός*, *προϋφαστάται*, &c.; and others to the LXX., *χερσίν*, *ἀλοκαύτωμα*, &c. No class of writings and no mode of combination appear to be unfamiliar to the writer. Some of the phrases which he adopts are singularly happy, as *κατάχρησις ἁμαρτίας* (i. 4), *ἀλαζονεύεσθαι παντὶ θεῷ* (ii. 16), *ἐλπίς ἀθανάσιας παλῆς* (iii. 4), &c.; and not less so some of the short and weighty sentences in which he gathers up the truths on which he is dwelling: vi. 19, *ἀφθαρσία ἐγγύς ἐστιν ποιεῖ θεοῦ*; xi. 28, *φείδω δὲ πάντων ἐπὶ αὐτῷ, δέσποτα φιλόψυχοι*. The numerous artificial resources with which the book abounds are a less pleasing mark of labour bestowed upon its composition. Thus, in i. 1, we have *ἀγαθήσατε . . . φρονήσατε . . . ἐν ἀγαθότητι καὶ ἐν ἀλότητι*, . . . *φρονήσατε*; v. 23, *ποταμοὶ . . . ἀποτόμης*; xiii. 11, *περιέψων ἐμβαδὸς . . . καὶ τεχνισμένους ἐκπεριέψων*; xix. 20, *τηνὸν ἐντονον*. The arrangement of the words is equally artificial, but generally more effective, and often very subtle and forcible; vii. 29, *ἐστὶ γὰρ αὐτῇ (ἡ σοφία) ἐκπεριεστέρα ἡλίου καὶ ὕδατος πάντων ὕδατων*. *ὦπτι συγκρινόμενῃ εὐρίσκειται πρότερα*. *τοῦτο μὲν γὰρ διαδέχεται νύξ, σοφίας δὲ οὐκ ἀντισχέει κακία*.

The language of the Old Latin translation is also itself full of interest. It presents, in great profusion, the characteristic provincialisms which elsewhere mark the earliest African version of the Scriptures. [Comp. *VULGATE*, § 43.] Such are the substantives *extermium*, *refrigerium*; *proclelitas*, *medietas*, *nimietas*, *natioitas*, *supervacuitas*; *sublatio*; *assistris*, *doctriz*, *electriz*; *immemoratio* (*ἀμνησία*); *incolatus*; the adjectives *contemptibilis*, *ineffugibilis*, *odibilis*; *incoinquinatus*, *inexculciatus*, *indisciplinatus*, *insensatus*, *inimulatus* (*ἀνομήκπιτος*); *fumigabundus*; the verbs *angustiare*, *mansuetare*, *improperare*; and the phrases *impossibilis immittere*, *partibus* (= *partium*), *innumerabilis honestas*, *providentia* (pl.).

5. *Original Language.*—The characteristics of the language, which have been just noticed, are so marked that no doubt could ever have been raised as to the originality of the Greek text, if it had not been that the book was once supposed to be the work of Solomon. It was assumed (so far rightly) that if the traditional title were correct, the book must have been written in Hebrew; and the belief which was thus based upon a false opinion as to the authorship, survived, at least partially, for some time after that opinion was abandoned. Yet as it must be obvious, even on a superficial examination, that the style and language of the book show conclusively that it could not have been the work of Solomon, so it appears with equal certainty that the freedom of the Greek diction was

6. *Doctrinal character.*—The theological teaching of the book offers, in many respects, the nearest approach to the language and doctrines of Greek philosophy which is found in any Jewish writing up to the time of Philo. There is much in the views which it gives of the world, of man, and of the Divine Nature, which springs rather from the combination or conflict of Hebrew and Greek thought than from the independent development of Hebrew thought alone. Thus, in speaking of the almighty power of God, the writer describes Him as "having created the universe out of matter without form" (*κτίσαντα τὴν κόσμον ἐξ ἀμόρφου* *ἁλῆς*, xi. 17), adopting the very phrase of the Platonists, which is found also in Philo (*De Vict. Offer.* §13), to describe the pre-existing matter out of which the world was made, and (like Philo, *De Münd. Op.* §5) evidently implying that this indeterminate matter was itself uncreated. Whatever attempts may be made to bring this statement into harmony with the doctrine of an absolute primal creation, it is evident that it derives its form from Greece. Scarcely less distinctly heathen is the conception which is presented of the body as a mere weight and clog to the soul (ix. 15; contrast 2 Cor. v. 1-4); and we must refer to some extra-Judaic source for the remarkable doctrine of the pre-existence of souls, which finds unmistakable expression in viii. 20. The form, indeed, in which this doctrine is enunciated differs alike from that given by Plato and by Philo, but it is no less foreign to the pure Hebrew mode of thought. It is more in accordance with the language of the O. T. that the writer represents the Spirit of God as filling (i. 7) and inspiring all things (xii. 1).

7. *The doctrine of Wisdom.*—It would be impossible to trace here in detail the progressive development of the doctrine of Wisdom, as a Divine Power standing in some sense between the Creator

There is also considerable difference between the sketch of the rise of idolatry in Philo, *De Monarch.* §1-3, and that given in *Wied. alt.* xiv. Other differences are pointed out by Eichenborn, *Sind.* 172 ff. A trace of the cabalistic use of numbers is pointed out by Ewald in the twenty-one attributes of Wisdom (*viv* 22, 23).

and creation, yet without some idea of this history no correct opinion can be formed on the position which the book of the Pseudo-Solomon occupies in Jewish literature. The foundation of the doctrine is to be found in the Book of Proverbs, where (viii.) Wisdom (*Chokma*) is represented as present with God before (viii. 22) and during the creation of the world. So far it appears only as a principle regulating the action of the Creator, though even in this way it establishes a close connexion between the world, as the outward expression of Wisdom, and God. Moreover, by the personification of Wisdom, and the relation of Wisdom to men (viii. 31), a preparation is made for the extension of the doctrine. This appears, after a long interval, in Ecclesiasticus. In the great description of Wisdom given in that book (xxiv.), Wisdom is represented as a creation of God (xxiv. 9), penetrating the whole universe (4-8), and taking up her special abode with the chosen people (8-12). Her personal existence and providential function are thus distinctly brought out. In the Book of Wisdom the conception gains yet further completeness. In this, Wisdom is identified with the Spirit of God (ix. 17)—an identification half implied in Eccles. xxiv. 3—which brooded over the elements of the unformed world (ix. 9), and inspired the prophets (vii. 7, 27). She is the power which unites (i. 7) and directs all things (viii. 1). By her, in especial, men have fellowship with God (xii. 1); and her action is not confined to any period, for “in all ages entering into holy souls, she maketh them friends of God and prophets” (vii. 27). So also her working, in the providential history of God’s people, is traced at length (x.); and her power is declared to reach beyond the world of man into that of spirits (vii. 23).

The conception of Wisdom, however boldly personified, yet leaves a wide chasm between the world and the Creator. Wisdom answers to the idea of a spirit vivifying and uniting all things in all time, as distinguished from any special outward revelation of the Divine Person. Thus at the same time that the doctrine of Wisdom was gradually constructed, the correlative doctrine of the Divine Word was also reduced to a definite shape. The Word (*Memra*), the Divine expression, as it was understood in Palestine, furnished the exact complement to Wisdom, the Divine thought; but the ambiguity of the Greek *Logos* (*sermo*, *ratio*) introduced considerable confusion into the later treatment of the two ideas. Broadly, however, it may be said that the Word properly represented the mediative element in the action of God, Wisdom the mediative element of His omnipresence. Thus, according to the later distinction of Philo, Wisdom corresponds to the *immanent* Word (*Λόγος ἐνδιδέσμετος*), while the Word, strictly speaking, was defined as *causative* (*Λόγος προφορικός*). Both ideas are included in the language of the prophets, and both found a natural development in Palestine and Egypt. The one prepared men for the revelation of the Son of God, the other for the revelation of the Holy Spirit.

The Book of the Pseudo-Solomon, which gives the most complete view of Divine wisdom, contains only two passages in which the Word is invested with the attributes of personal action (xvi. 12, xviii. 15; ix. 1 is of different character). These, however, are sufficient to indicate that the two powers were distinguished by the writer; and it has been unanimously argued that the superior prominence

given in the book to the conception of Wisdom is an indication of a date anterior to Philo. Nor is this conclusion unreasonable, if it is probably established on independent grounds that the book is of Alexandrine origin. But it is no less important to observe that the doctrine of Wisdom in itself is no proof of this. There is nothing in the direct teaching on this subject, which might not have arisen in Palestine, and it is necessary that we should recur to the more special traits of Alexandrine thought in the book which have been noticed before (§6) for the primary evidence of its Alexandrine origin; and starting from this there appears to be, as far as can be judged from the imperfect materials at our command, a greater affinity in the form of the doctrine on wisdom to the teaching of Alexandria than to that of Palestine (comp. Ewald, *Gesch.* iv. 548 ff.; Weite, *Étude*, 161 ff., has some good criticisms on many supposed traces of Alexandrine doctrine in the book, but errs in denying all).

The doctrine of the Divine wisdom passes by a transition, often imperceptible, to that of human wisdom, which is derived from it. This embraces not only the whole range of moral and spiritual virtues, but also the various branches of physical knowledge. [Comp. PHILOSOPHY.] In this aspect the enumeration of the great forms of natural science in vii. 17-20 (viii. 8), offers a most instructive subject of comparison with the corresponding passages in 1 K. iv. 32-34. In addition to the subjects on which Solomon wrote (Songs, Proverbs: Plants, Beasts, Fowls, Creeping Things, Fishes, Cosmology, Meteorology, Astronomy, Psychology, and even the elements of the philosophy of history (viii. 8), are included among the gifts of Wisdom. So far then the thoughtful Jew had already at the Christian era penetrated into the domain of speculation and inquiry, into each province, it would seem, which was then recognized, without abandoning the simple faith of his nation. The fact itself is most significant; and the whole book may be quoted as furnishing an important corrective to the later Roman descriptions of the Jews, which were drawn from the people when they had been almost uncivilized by the excitement of the last desperate struggle for national existence. (For detailed references to the chief authorities on the history of the Jewish doctrine of Wisdom, see PHILOSOPHY; adding Bruch, *Die Weisheitslehre der Hebräer*, 1851.)

8. *Place and date of writing.*—Without claiming for the internal indications of the origin of the book a decisive force, it seems most reasonable to believe on these grounds that it was composed at Alexandria some time before the time of Philo (c. 120-80 B.C.). This opinion in the main, though the conjectural date varies from 150-50 B.C., or even beyond these limits, is held by Heydenreich, Götter, Bauermeister, Ewald, Bruch, and Grunze; and other features in the book go far to confirm it. Without entering into the question of the extent of the Hellenistic element at Jerusalem in the last century B.C., it may be safely affirmed that there is not the slightest evidence for the existence there of so wide an acquaintance with Greek modes of thought, and so complete a command of the resources of the Greek language, as is shown in the Book of Wisdom. Alexandria was the only place where Judaism and philosophy, both of the east and west, came into natural and close connexion. It appears further that the mode in which Egyptian idolatry is spoken of, must be due in some degree to the influence of

present and living antagonism, and not to the contemplation of past history. This is particularly evident in the great force laid upon the details of the Egyptian animal worship (xv. 18, &c.); and the description of the condition of the Jewish settlers in Egypt (xix. 14-16) applies better to colonists fixed at Alexandria on the conditions of equality by the first Ptolemies, than to the immediate descendants of Jacob. It may, indeed, be said justly, that the local colouring of the latter part of the book is conclusive as to the place of its composition. But all the guesses which have been made as to its authorship are absolutely valueless. The earliest was that mentioned by Jerome, which assigned it to Philo (*Præf. in Lib. Sæd. Nonnulli scriptorum veterum hunc esse Judæi Philonis affirmant*). There can be no doubt that the later and famous Philo was intended by this designation, though Jerome in his account of him makes no reference to the belief (*De vir. illustr. xi.*). Many later writers, including Luther and Gerhard, adopted this view; but the variations in teaching, which have been already noticed, effectually prove that it is unfounded. Others, therefore, have imagined that the name was correct, but that the elder Philo was intended by it (G. Wernsdorff, and in a modified form Huet and Bellarmine). But of this elder Jewish Philo it is simply known that he wrote a poem on Jerusalem.⁶ Lutterbeck suggested Aristobolus. [ARISTOBOLUS.] Eichhorn, Zeller, Jost, and several others supposed that the author was one of the Therapeutæ, but here the positive evidence against the conjecture is stronger, for the book contains no trace of the ascetic discipline which was of the essence of the Therapeutic teaching. The opinion of some later critics that the book is of Christian origin (Kirschbaum, C. H. Weiss), or even definitely the work of Apollon (Noack), is still more perverse; for not only does it not contain the slightest trace of the three cardinal truths of Christianity, the Incarnation, the Atonement, the Resurrection of the body, but it even leaves no room for them by the general tenor of its teaching.⁴

9. *History.*—The history of the book is extremely obscure. There is no trace of the use of it before the Christian era, but this could not be otherwise if the view which has been given of its date be correct. It is perhaps more surprising that Philo does not (as it seems) show any knowledge of it, and it is not unlikely that if his writings are carefully examined with this object, some allusions to it may be found which have hitherto escaped observation. On the other hand, it can scarcely be doubted that St. Paul, if not other of the Apostolic writers, was familiar with its language, though he makes no definite quotation from it (the supposed reference in Luke xi. 49 to Wisd. ii. 12-14, is wholly unfounded). Thus we have striking parallels in Rom. ix. 21 to Wisd. xv. 7; in Rom. ix. 22 to Wisd. xii. 20; in Eph. vi. 13-17 to Wisd. v. 17-19 (the heavenly armour), &c. The coincidences in thought or language which occur in other books of the N. T., if they stood alone, would be insufficient to establish a direct connexion between them and the

Book of Wisdom; and even in the case of St. Paul, it may be questioned whether his acquaintance with the book may not have been gained rather orally than by direct study. The same remark applies to a coincidence of language in the epistle of Clement to the Corinthians printed out by Grimm (*Ad Cor. i. 27; Wisd. xi. 22, xii. 12*); so that the first clear references to the book occur not earlier than the close of the second century. According to Eusebius (*H. E. v. 26*), Irenæus made use of it (and of the Ep. to the Hebrews) in a lost work, and in a passage of his great work (*adv. Hæc. iv. 38, 3*) Irenæus silently adopts a characteristic clause from it (*Wisd. vi. 19, ἀφ' ὧν ἡ δόξα ἐστὶν τοῦ θεοῦ*). From the time of Clement of Alexandria the book is constantly quoted as an inspired work of Solomon, or as "Scripture," even by those Fathers who denied its assumed authorship, and it gained a place in the Canon (together with the other Apocryphal books) at the Council of Carthage, *cir.* 397 A.D. (for detailed references see CANON, vol. i. pp. 256, 258.). From this time its history is the same as that of the other Apocryphal books up to the period of the Reformation. In the controversies which arose then its intrinsic excellence commanded the admiration of those who refused it a place among the canonical books (so Luther *op. Grimm*, §2). Pellican directly affirmed its inspiration (Grimm, l. c.); and it is quoted as Scripture in both the Books of Homilies (pp. 98-9; 174, ed. 1850). In later times the various estimates which have been formed of the book have been influenced by controversial prejudices. In England, like the rest of the Apocrypha, it has been most strangely neglected, though it furnishes several lessons for Church Festivals. It seems, indeed, impossible to study the book dispassionately, and not feel that it forms one of the last links in the chain of providential connexion between the Old and New Covenants. How far it falls short of Christian truth, or rather how completely silent it is on the essential doctrines of Christianity, has been already seen; and yet Christianity offers the only complete solution to the problems which it raises in its teaching on the immortality of man, on future judgment, on the catholicity of the divine Church, and the speciality of Revelation. It would not be easy to find elsewhere any pre-Christian view of religion equally wide, sustained, and definite. The writer seems to have looked to the east and west, to the philosophy of Persia and Greece, and to have gathered from both what they contained of Divine truth, and yet to have clung with no less zeal than his fathers to that central revelation which God made first to Moses, and then carried on by the O. T. prophets. Thus in some sense the book becomes a landmark by which we may partially fix the natural limits of the development of Jewish doctrine when brought into contact with heathen doctrine, and measure the aspirations which were thus raised before their great fulfilment. The teaching of the book upon immortality has left ineffaceable traces upon the language of Christendom. The noble phrase which speaks of a "hope full of immortality" (*Wisd. iii. 4*), can never be lost;

* The conjecture of J. Faber, that the book was written by Zerubabel, who rightly assumed the character of a second Solomon, is only worth mentioning as a specimen of misplaced ingenuity (*comp. Weiss, Eisd. 191 ff.*). Augustine himself corrected the mistake by which he attributed it to Jesus the son of Sirach.

⁴ Dr. Fregelles has given a new turn to this opinion by supposing that the book may have been written by a

Christian (otherwise unknown) named Philo. In support of this he suggests an ingenious conjectural emendation of a corrupt passage of the Muratorian Canon. Where the Latin text reads *et Sapientia ab amicis Solomonis in hæmorum ipsius scripta*, he imagines the original Greek may have read, καὶ ἡ Σοφία Σολωνιστρὸς φίλου (for φίλου). . . . Or again, that Jerome so misread the passage (*Journal of Theol.* 1856, 37 ff.).

and in mediæval art few symbols are more striking than that which represents in outward form that "the souls of the righteous are in the hand of God" (Wisd. iii. 1). Other passages less familiar are scarcely less beautiful when seen in the light of Christianity, as xv. 3, "To know Thee (O God) is perfect righteousness; yea, to know Thy power is the root of immortality" (comp. viii. 13, 17; St. John xvii. 3), or xi. 28, "Thou sparest all: for they are thine, O Lord, thou lover of souls" (comp. xii. 16); and many detached expressions anticipate the language of the Apostles (iii. 9, *χάρις καὶ ἔλεος*; iii. 14, *τῆς πίστεως χάρις καὶ ἐλεότης*; xi. 24, *παροῦς ἀπαρτήματα ἀνθρώπων εἰς μετένοιαν*; xvi. 7, *διὰ τοῦ πόντου πάντων σωτήρα*).

10. *Commentaries*.—The earliest commentary which remains is that of Rabanus Maurus (†856), who undertook the work, as he says in his preface, because he was not acquainted with any complete exposition of the book. It is uncertain from his language whether the homilies of Augustine and Ambrose existed in his time: at least they have now been long lost. Of the Roman Catholic commentaries the most important are those of Lorinus (†1634), Corn. a Lapide (†1637), Makdonstus (†1583), Calmet (†1757), J. A. Schmid (1858). Of other commentaries, the chief are those by Grotius (†1645), Heydenreich, Bauermeister (1828), and Grimm (1837). The last mentioned scholar has also published a new and admirable commentary in the *Kurzgef. Exeg. Handb. zu d. Apok.* 1860, which contains ample references to earlier writers, and only errs by excess of fulness. The English commentary of R. Arnold (†1756) is extremely diffuse, but includes much illustrative matter, and shows a regard for the variations of MSS. and Versions which was most unusual at the time. A good English edition, however, is still to be desired. [B. F. W.]

WITCH, WITCHCRAFTS. [MAGIC.]

WITNESS. Among people with whom writing is not common, the evidence of a transaction is given by some tangible memorial or significant ceremony. Abraham gave seven ewe-lambs to Abimelech as an evidence of his property in the well of Beer-sheba. Jacob raised a heap of stones, "the heap of witness," as a boundary-mark between himself and Laban (Gen. xxi. 30, xxxi. 47, 52). The tribes of Reuben and Gad raised an "altar," designed expressly not for sacrifice, but as a witness to the covenant between themselves and the rest of the nation; Joshua set up a stone as an evidence of the allegiance promised by Israel to God; "for," he said, "it hath heard all the words of the Lord" (Josh. xxii. 10, 26, 34, xxiv. 26, 27). So also a pillar is mentioned by Isaiah as "a witness to the Lord of Hosts in the land of Egypt" (Is. xix. 19, 20). Thus also the sacred ark and its contents are called "the Testimony" (Ex. xvi. 33, 34, xxv. 16, xxxviii. 21; Num. i. 50, 53, ix. 15, x. 11, xvii. 7, 8, xviii. 2; Heb. ix. 4).

Thus also symbolical usages, in ratification of contracts or completed arrangements, as the ceremony of shoe-loosing (Deut. xxv. 9, 10; Ruth iv. 7, 8), the ordeal prescribed in the case of a suspected wife, with which may be compared the ordeal of the Styx (Num. v. 17-31; *Class. Mus.* vi. 386). The Bedouin Arabs practise a fiery ordeal in certain cases by way of compurgation (Burek-

• עֵד, עֵדָה; *uēdē*; *testis*: used both of persons and things.

hardt, *Notes*, i. 121; Layard, *Nin. and Ezb.* p. 305). The ceremony also appointed at the oblation of first-fruits may be mentioned as partaking of the same character (Deut. xvi. 4). [FIRST-FRUIT.]

But written evidence was by no means unknown to the Jews. Divorce was to be proved by a written document (Deut. xxiv. 1, 3), whereas among Bedouins and Mussulmans in general a spoken sentence is sufficient (Burrhardt, *Notes*, i. 110; Sale, *Koran*, c. 33, p. 348; Lane, *Mod. Eg.* i. 136, 236). In civil contracts, at least in later times, documentary evidence was required and carefully preserved (Is. viii. 16; Jer. xxxii. 10-16).

On the whole the Law was very careful to provide and enforce evidence for all its infractions and all transactions bearing on them: e.g. the memorial stones of Jordan and of Ebal (Deut. xxvii. 2-4; Josh. iv. 9, viii. 30); the fringes on garments (Num. xv. 39, 40); the boundary-stones of property (Deut. xix. 14, xxvii. 17; Prov. xxii. 28); the "broad plates" made from the censers of the Korahites (Num. xvi. 38); above all, the Ark of Testimony itself:—all these are instances of the care taken by the Legislator to perpetuate evidence of the facts on which the legislation was founded, and by which it was supported (Deut. vi. 20-25). Appeal to the same principle is also repeatedly made in the case of prophecies as a test of their authenticity (Deut. xviii. 22; Jer. xxviii. 9, 16, 17; John iii. 11, v. 36, x. 38, xiv. 11; Luke xxiv. 48; Acts i. 3, ii. 32, iii. 15, &c.).

Among special provisions of the Law with respect to evidence are the following:—

1. Two witnesses at least are required to establish any charge (Num. xxxv. 30; Deut. xvii. 6, xix. 15; 1 K. xxi. 13; John viii. 17; 2 Cor. xiii. 1; Heb. x. 28); and a like principle is laid down by St. Paul as a rule of procedure in certain cases in the Christian Church (1 Tim. v. 19).

2. In the case of the suspected wife, evidence besides the husband's was desired, though not demanded (Num. v. 13).

3. The witness who withheld the truth was censured (Lev. v. 1).

4. False witness was punished with the punishment due to the offence which it sought to establish. [OATHS.]

5. Slandorous reports and officious witness are discouraged (Ex. xx. 16, xxiii. 1; Lev. xix. 16, 18; Deut. xix. 16-21; Prov. xxiv. 28).

6. The witnesses were the first excommunicers (Deut. xiii. 9, xvi. 7; Acts vii. 58).

7. In case of an animal left in charge and torn by wild beasts, the keeper was to bring the carcass in proof of the fact and disproof of his own criminality (Ex. xxii. 13).

8. According to Josephus, women and slaves were not admitted to bear testimony (*Ant.* iv. 8, §15). To these exceptions the Mishna adds idiots, deaf, blind, and dumb persons, persons of infamous character, and some others, ten in all (Selden, *de Synedr.* ii. 13, 11; Otho, *Lex. Rab.* p. 653). The high-priest was not bound to give evidence in any case except one affecting the king (ib.). Various refinements on the quality of evidence and the manner of taking it are given in the Mishna (*Synedr.* iv. 5, v. 2, 3; *Maccoth*, i. 1, 9; *Sheb.* iii. 10, iv. 1, v. 1). In criminal cases evidence was required to be oral; in pecuniary, written evidence was allowed (Otho, *Lex. Rab.* 653).

In the N. T. the original notion of a witness as exhibited in the special form of one who attests an

belief in the Gospel by personal suffering. So St. Stephen is styled by St. Paul (Acts xxii. 20), and the "faithful Antipas" (Rev. ii. 13). St. John also speaks of himself and of others as witnesses in this sense (Rev. i. 9, vi. 9, xi. 3, xx. 4). See also Heb. xi. and xii. 1, in which passage a number of persons are mentioned, belonging both to O. T. and N. T., who bore witness to the truth by personal endurance; and to this passage may be added, as bearing on the same view of the term "witness," Dan. iii. 21, vi. 16; 1 Macc. i. 60, 63; 2 Macc. vi. 18, 19. Hence it is that the use of the ecclesiastical term "Martyr" has arisen, of which copious illustration may be seen in Suicer, *Thes.* vol. ii. p. 310, &c. [H. W. P.]

WIZARD. [MAGIC.]

WOLF (WOLF; *add*: *λῆκος*: *lypus*). There can be little doubt that the wolf of Palestine is the common *Canis lypus*, and that this is the animal so frequently mentioned in the Bible, though it is true that we lack precise information with regard to the *Canides* of Palestine. Hemprich and Ehrenberg have described a few species, as, for instance, the *Canis Syriacus* and the *C. (Vulpes) Niloticus* (see figures in art. Fox, App. A); and Col. Hamilton Smith mentions, under the name of *derbom*, a species of black wolf, as occurring in Arabia and Southern Syria; but nothing definite seems to be known of this animal. Wolves were doubtless far more common in Biblical times than they are now, though they are occasionally seen by modern travellers (see Kitto's *Physical History of Palestine*, p. 364, and Russell's *Nat. Hist. of Aleppo*, ii. 184): "the wolf seldom ventures so near the city as the fox, but is sometimes seen at a distance by the sportsmen among the hilly grounds in the neighbourhood; and the villages, as well as the herds, often suffer from them. It is called *Deeb* in Arabic, and is common all over Syria."

The following are the Scriptural allusions to the wolf—its ferocity is mentioned in Gen. xlix. 27; Ex. xxii. 27; Hab. i. 8; Matt. vii. 15: its nocturnal habits, in Jer. v. 6; Zeph. iii. 3; Hab. i. 8: its attacking sheep and lambs, John x. 12; Matt. x. 16; Luke x. 3. Isaiah (xi. 6, lxx. 25) foretells the peaceful reign of the Messiah under the metaphor of a wolf dwelling with a lamb; cruel persecutors are compared with wolves (Matt. x. 16; Acts xx. 29).

Wolves, like many other animals, are subject to variation in colour; the common colour is grey with a tinting of fawn and long black hairs; the variety most frequent in Southern Europe and the Pyrenees is black; the wolf of Asia Minor is more tawny than those of the common colour.

The people of Nubia and Egypt apply the term *Dieb* to the *Canis anthus*, Fr. Cuv. (see Rüppell's *Atlas zu der Reise im Nördlichen Africa*, p. 48); this, however, is a jackal, and seems to be the *Lupus Syriacus*, which Hemp and Ehrenb. noticed in Syria, and identical with the "Egyptian wolf" figured by Hain. Smith in Kitto's *Cycl.* [W. H.]

WOMEN. The position of women in the Hebrew commonwealth contrasts favourably with that which in the present day is assigned to them generally in Eastern countries. The social equality of the two sexes is most fully implied in the history of the original creation of the woman, as well as in the name assigned to her by the man, which differed from his own only in its feminine termination

(Gen. ii. 18-23). This narrative is hence effectively appealed to as supplying an argument for enforcing the duties of the husband towards the wife (Eph. v. 28-31). Many usages of early times interfere with the preservation of this theoretical equality: we may instance the existence of polygamy, the autocratic powers vested in the head of the family under the patriarchal system, and the treatment of captives. Nevertheless a high tone was maintained generally on this subject by the Mosaic law, and, as far as we have the means of judging, by the force of public opinion.

The most salient point of contrast in the usages of ancient as compared with modern Oriental society was the large amount of liberty enjoyed by women. Instead of being immured in a harem, or appearing in public with the face covered, the wives and maidens of ancient times mingled freely and openly with the other sex in the duties and amenities of ordinary life. Rebekah travelled on a camel with her face unveiled, until she came into the presence of her affianced (Gen. xxiv. 64, 5). Jacob saluted Rachel with a kiss in the presence of the shepherds (Gen. xxix. 11). Each of these maidens was engaged in active employment, the former in fetching water from the well, the latter in tending her flock. Sarah wore no veil in Egypt, and yet this formed no ground for supposing her to be married (Gen. xii. 14-19). An outrage on a maiden in the open field was visited with the severest punishment (Deut. xxii. 25-27), proving that it was not deemed improper for her to go about unprotected. Further than this, women played no inconsiderable part in public celebrations: Miriam headed a band of women who commemorated with song and dance the overthrow of the Egyptians (Ex. xv. 20, 21); Jephthah's daughter gave her father a triumphal reception (Judg. xi. 34); the maidens of Shiloh danced publicly in the vineyards at the yearly feast (Judg. xxi. 21); and the women fêted Saul and David, on their return from the defeat of the Philistines, with singing and dancing (1 Sam. xviii. 6, 7). The odes of Deborah (Judg. v.) and of Hannah (1 Sam. ii. 1, &c.) exhibit a degree of intellectual cultivation which is in itself a proof of the position of the sex in that period. Women also occasionally held public offices, particularly that of prophetess or inspired teacher, as instanced in Miriam (Ex. xv. 20), Huldah (2 K. xxii. 14), Noadiah (Neh. vi. 14), Anna (Luke ii. 36), and above all Deborah, who applied her prophetic gift to the administration of public affairs, and was so entitled to be styled a "judge" (Judg. iv. 4). The active part taken by Jezebel in the government of Israel (1 K. xviii. 13, xxi. 25), and the usurpation of the throne of Judah by Athaliah (2 K. xi. 3), further attest the latitude allowed to women in public life.

The management of household affairs devolved mainly on the women. They brought the water from the well (Gen. xxiv. 15; 1 Sam. ix. 11) attended to the flocks (Gen. xxix. 6, &c.; Ex. ii. 16), prepared the meals (Gen. xviii. 6; 2 Sam. xiii. 8), and occupied their leisure hours in spinning (Ex. xxxv. 26; Prov. xxxi. 19) and making clothes, either for the use of the family (1 Sam. ii. 19; Prov. xxxi. 21), for sale (Prov. xxxi. 14, 24), or for charity (Acts ix. 39). The value of a virtuous and active housewife forms a frequent topic in the Book of Proverbs (xi. 16, xii. 4, xiv. 1, xxi. 10, &c.). Her influence was of course proportionably great; and, where there was no second wife, she controlled the arrangements of the house, to the

extent of inviting or receiving guests in her own mansion (Judg. iv. 18; 1 Sam. xxv. 18. &c.; 2 K. v. 8, &c.). The effect of polygamy was to transfer female influence from the wives to the mother, as is incidentally shown in the application of the term *gēdrah* (literally meaning *powerful*) to the queen mother (1 K. ii. 18, xv. 13; 2 K. x. 13, xxiv. 12; Jer. xiii. 18, xxi. 2). Polygamy also necessitated a separate establishment for the wives collectively, or for each individually. Thus in the palace of the Persian monarch there was a "house of the women" (Esth. ii. 9), which was guarded by eunuchs (ii. 3); in Solomon's palace the harem was connected with, but separate from, the rest of the building (1 K. vii. 8); and on journeys each wife had her separate tent (Gen. xxxi. 33). In such cases it is probable that the females took their meals apart from the males (Esth. i. 9); but we have no reason to conclude that the separate system prevailed generally among the Jews. The women were present at festivals, either as attendants on the guests (John xii. 2), or as themselves guests (Job i. 4; John ii. 3); and hence there is good ground for concluding that on ordinary occasions also they joined the males at meals, though there is no positive testimony to that effect.

Further information on the subject of this article is given under the heads DEACONESSES, DRESS, HAIR, MARRIAGE, SLAVE, VEIL, and WIDOW. [W. L. B.]

WOOL. [FOREST.]

WOOL (וֹל; יָבֵשׁ). Wool was an article of the highest value among the Jews, as the staple material for the manufacture of clothing (Lev. xiii. 47; Deut. xxii. 11; Job xxxi. 20; Prov. xxxi. 13; Ex. xxxiv. 3; Hos. ii. 5). Both the Hebrew terms, *tsomer* and *yās*, imply the act of shearing, the distinction between them being that the latter refers to the "fleeces" (Deut. xviii. 4; Job xxxi. 20), as proved by the use of the cognate *gīrah*, in Judg. vi. 37-40, in conjunction with *tsomer*, in the sense of "a fleece of wool." The importance of wool is incidentally shown by the notice that Meah's tribute was paid in a certain number of rams "with the wool" (2 K. iii. 4), as well as by its being specified among the firstfruits to be offered to the priests (Deut. xviii. 4). The wool of Damascus was highly prized in the mart of Tyre (Ex. xxvii. 18); and is compared in the LXX. to the wool of Miletus (*ῥαία ἐκ Μιλήτου*), the fame of which was widely spread in the ancient world (P'lin. viii. 73; Virg. Georg. iii. 206, iv. 334). Wool is occasionally cited as an image of purity and brilliancy (Is. i. 18; Dan. vii. 9; Rev. i. 14), and the flakes of snow are appropriately likened to it (Ps. cxlvii. 16). The art of dyeing it was understood by the Jews (Mishna, *Shab.* i. § 6). [W. L. B.]

WOOLLEN (LINEN and). Among the laws against unnatural mixtures is found one to this effect: "A garment of mixtures [יִצְמִיז, *shaatnez*] shall not come upon thee" (Lev. xix. 19); or, as it is expressed in Deut. xxii. 11, "thou shalt not wear *shaatnez*, wool and flax together." Our version, by the help of the latter passage, has rendered the strange word *shaatnez* in the former, "of linen and woollen;" while in Deut. it is translated "a garment of divers sorts." In the Vulgate the difficulty is avoided; and *εισθῆναος*, "spurious" or "counterfeit," the rendering of the LXX., is wanting in precision. In the Targum of Onkelos the same word remains with a slight modification to

adapt it to the Chaldees; but in the Peshito-Syriac of Lev. it is rendered by an adjective, "mottled;" and in Deut. a "mottled garment," corresponding in some degree to the Samaritan version, which has "spotted like a leopard." Two things only appear to be certain about *shaatnez*—that it is a foreign word, and that its origin has not at present been traced. Its signification is sufficiently defined in Deut. xxii. 11. The derivation given in the Mishna (*Cūlain*, ix. 8), which makes it a compound of three words, signifying "carded, spun, and twisted," is in keeping with Rabbinical etymologies generally. Other etymologies are proposed by Bochart (*Hieros.* pt. i. b. 2, c. 45), Simonis (*Lex. Heb.*), and Pfeiffer (*Dub. Vex.* cent. 2, loc. xi.). The last mentioned writer defended the Egyptian origin of the word, but his knowledge of Coptic, according to Jablonski, extended not much beyond the letters, and little value, therefore, is to be attached to the solution which he proposed for the difficulty. Jablonski himself favours the suggestion of Forster, that a garment of linen and woollen was called by the Egyptians *shomnes*, and that this word was borrowed by the Hebrews, and written by them in the form *shaatnez* (*Opusc.* i. 294).

The reason given by Josephus (*Ant.* iv. 8, § 11) for the law which prohibited the wearing a garment woven of linen and woollen is, that such were worn by the priests alone (see Mishna, *Cūlain*, ix. 1). Of this kind were the girdle (of which Josephus says the warp was entirely linen, *Ant.* iii. 7, § 2), ephod, and breastplate (Braunius, *de Vest. Sac. Hebr.* pp. 110, 111) of the High Priest, and the girdle of the common priests (Maimonides, *Cēd Hammikdash*, cviii.). Spencer conjectured that the use of woollen and linen inwoven in the same garment prevailed amongst the ancient Zeb., and was associated with their idolatrous ceremonies (*De leg. Heb.* ii. 33, § 3); but that it was permitted to the Hebrew priests, because with them it could give rise to no suspicion of idolatry. Maimonides found in the books of the Zabi that "the priests of the idolaters clothed themselves with robes of linen and woollen mixed together" (Townley, *Reasons of the Laws of Moses*, p. 207). By "wool" the Talmudists understood the wool of sheep (Mishna, *Cūlain*, ix. 1). It is evident from Zeph. i. 8, that the adoption of a particular dress was an indication of idolatrous tendencies, and there may be therefore some truth in the explanation of Maimonides. [W. A. W.]

WORM, the representative in the A. V. of the Hebrew words *Sās*, *Rimūdh*, and *Tūfēh*, *Tūf*, or *Tūaath*, occurs in numerous passages in the Bible. The first-named term, *Sās* (סָס, *sās*, *times*) occurs only in Isa. li. 8, "For the *sās* (סָס) shall eat them up like a garment, and the *Sās* shall eat them like wool." The word probably denotes some particular species of moth, whose larva is injurious to wool, while perhaps the former name is the more general one for any of the destructive *Tineas* or "Clothes Moths." For further information on the subject the reader is referred to MOTHS.

2. *Rimūdh* (רִמְדָּה; *rimdh*, *rimda*; *vermis*, *putredo*, *tinea*). The manna that the disobedient Israelites kept till the morning of a weekday "bred worms" (רִמְדָּה), and stank (Ex. xvi. 20); while of that kept over the Sabbath and gathered the night before, it is said that "it did

not stink, neither was there any worm (וּלְמִדָּה) therein." The Hebrew word is connected with the root מִדָּה "to be putrid" (see Gesenius, *Thes.* s. v.), and points evidently to various kinds of maggots, and the larvae of insects which feed on putrefying animal matter rather than to earthworms; the words in the original are clearly used indiscriminately to denote either true *annelida*, or the larval condition of various insects. Thus, as may be seen above, *Rimmāh* and *Tōldāh* are both used to express the maggot or caterpillar, whatever it might have been that consumed the bad manna in the wilderness of Sin. Job, under his heavy affliction, exclaims, "My flesh is clothed with *rimmāh*" (vii. 5; see also xvii. 14); there is no reason to doubt that this expression is to be understood literally; a person in Job's condition would very probably suffer from *entozoa* of some kind. In Job xxi. 26, xiv. 20, there is an allusion to worms (insect larvae) feeding on the dead bodies of the buried; our translators in the well-known passage (xix. 26)—"And though after my skin worms destroy this body"—have rather over-interpreted the words of the original, "My skin shall have been consumed."^a

The patriarch uses both *Rimmāh* and *Tōldāh* (וּלְמִדָּה), in ch. xxv. 6, where he compares the estate of man to a *rimmāh*, and the son of man to a *tōldāh*. This latter word, in one or other of its forms (see above), is applied in Deut. xviii. 39 to some kinds of larvae destructive to the vines: "Thou shalt plant vineyards . . . but shalt not gather the grapes, for the *tōldāth* shall eat them." Various kinds of insects attack the vine, amongst which one of the most destructive is the *Tortrix vitiana*, the little caterpillar of which eats off the inner parts of the blossoms, the clusters of which it binds together by spinning a web around them. The "worm" which is said to have destroyed Jonah's gourd was a *tōldāth* (Jonah iv. 7). Michaelis (*Suppl.* p. 2189) quotes Rumpsius as asserting that there is a kind of black caterpillar, which, during sultry rainy weather, does actually strip the plant of its leaves in a single night. In Is. lvi. 24 allusion is made to maggots feeding on the dead bodies of the slain in battle. The words of the prophet are applied by our Lord (Mark ix. 44, 46, 48) metaphorically to the stings of a guilty conscience in the world of departed spirits.

The death of Herod Agrippa I. was caused by worms (συνελκυσσόμενος, Acts xii. 23); according to Josephus (*Ant.* xix. 8), his death took place five days after his departure from the theatre. It is curious that the Jewish historian makes no mention of worms in the case of Agrippa, though he expressly notes it in that of Herod the Great (*Ant.* xvii. 6, §5). A similar death was that of Antiochus Epiphanes (2 Macc. ix. 9; see also Eusebius, *Ecccl. Hist.* viii. 16; and Lucian, *Pseudomantis.* i. p. 904; compare Wetstein on Acts xii. 23). Whether the worms were the cause or the result of the disease is an immaterial question. The "Angel of the Lord struck Herod" with some disease, the issue of which was fatal, and the loathsome spectacle of which could not fail to have had a marked humilitating effect on his proud heart. [W. H.]

WORMWOOD (וּלְמִדָּה, *lāmdāh*; *πικρία*, *χολή*, *βδύρη*, and *ἀνύκη*; *amaritudo*, *absinthium*). The

correct translation of the Heb. word, occurs frequently in the Bible, and generally in a metaphorical sense, as in Deut. xix. . . ., where of the idolatrous Israelites it is said, "Let there be among you a root that beareth wormwood" (see also Prov. v. 4). In Jer. ix. 15, xxiii. 13; Lam. iii. 15, 19, wormwood is symbolical of bitter calamity and sorrow; unrighteous judges are said to "turn judgment to wormwood" (Am. v. 7). The orientals typified sorrows, cruelties, and calamities of any kind by plants of a poisonous or bitter nature. [FALL, App. A.] The name of the star which, at the sound of the third angel's trumpet fell upon the rivers, was called Wormwood ('Αψυδός; Rev. viii. 11). Kitto (*Phys. Hist. of Palestine*, p. 215) enumerates four kinds of wormwood as found in Palestine—*Artemisia nitotica*, *A. Judaica*, *A. fruticosa*, and *A. cinerea*. Rauwolf speaks of some kind of wormwood under the name of *Absinthium sanctonicum Judaicum*, and says it is very common in Palestine; this is perhaps the *Artemisia Judaica*. The Hebrew *Lāmdāh* is doubtless generic, and denotes several species of *Artemisia* (Celsius, *Hierob.* i. p. 480; Rosenmüller, *Bib. Bot.* p. 116). [W. H.]

WORSHIPPER. A translation of the Greek word *νεοκόρος*, used once only, Acts xix. 35; in the margin "Temple-keeper." The *neocoros* was originally an attendant in a temple, probably entrusted with its charge (Eurip. *Ion*, 115, 121, ed. Dind.; Plato, *Leg.* vi. 7, Bekk.; Theodoret, *Hist. Ecccl.* iii. 14, 16; Pollux, i. 14; Philo, *De Prov. Sac.* 6, li. 237; Hesychius explains it by δ *τὸν ναὸν κοσμῶν*, κοπεῖν γὰρ τὸ σκελεῖν, Suidas, κοσμῶν καὶ εὐτρεπίζων, ἀλλ' οὐχ ὁ σκελεῖν, ed. Gaist, p. 2579). The divine honours paid in later Greek times to eminent persons even in their lifetime, were imitated and exaggerated by the Romans under the empire, especially in Asia (Plut. *Lyc.* 23; Appian, *Mithr.* 76; Dion Cass. xxxi. 6). The term *neocoros* became thus applied to cities or communities which undertook the worship of particular emperors even in their lifetime; but there is no trace of the special title being applied to any city before the time of Augustus. The first occurrence of the term in connexion with Ephesus is on coins of the age of Nero (A.D. 54-68), a time which would sufficiently agree with its use in the account of the riot there, probably in 55 or 56. In later times the title appears with the numerical adjuncts *δὲς*, *τρίης*, and even *τετραδύς*. A coin of Nero's time bears on one side 'Εθεσίω *νεοκόρων*, and on the reverse a figure of the temple of Artemis (Mionnet, *Inscr.* iii. 93; Eckhel, *Doctr. Vet. Num.* ii. 520). The ancient veneration of Artemis and her temple on the part of the city of Ephesus, which procured for it the title of *νεοκόρος τῆς Ἀπρίμειδος*, is too well known to need illustration; but in later times it seems probable that with the term *νεοκόρος* the practice of Neocorism became reserved almost exclusively for the veneration paid to Roman emperors, towards whom many other cities also of Asia Minor are mentioned as Neocorists, e. g. Nicomedia, Perinthus, Sardis, Smyrna, Magnesia (Herod. i. 26; Strabo, xiv. 640; Aristid. *Or.* xlii. 775, ed. Dind.; Mionnet, *Inscr.* iii. 97, Nos. 281, 285; Eckhel, *De Num.* ii. 520, 521; Boeckh, *Inscr.* 2617, 2618, 2622, 2654, 2957, 2990, 2992, 2993; Krause, *De Civ. Neocoris*; Hoffmann, *Lex. Neocoris*). [H. W. P.]

^a The Hebrew is, וְאֶת־בְּשָׁרִי אֶכְלֶה (אֶכְלֶה), i. e., "And I will eat my flesh," or, "My skin shall have been consumed." [Davidson renders it, "Yea, after my skin, when this (body) is destroyed" (*Isaiah* O. T. ii. p. 237).

WRESTLING. [GAMES.]

WRITING. It is proposed in the present article to treat, not of writing in general, its origin, the people by whom and the manner in which it was discovered, but simply with reference to the Hebrew race to give such indications of their acquaintance with the art as are to be derived from their books, to discuss the origin and formation of their alphabet and the subsequent development of the present square character, and to combine with this discussion an account, so far as can be ascertained, of the material appliances which they made use of in writing, and the extent to which the practice prevailed among the people.

It is a remarkable fact that although, with respect to other arts, as for instance those of music and metal working, the Hebrews have assigned the honour of their discovery to the heroes of a remote antiquity, there is no trace or tradition whatever of the origin of letters, a discovery many times more remarkable and important than either of these. Throughout the Book of Genesis there is not a single allusion, direct or indirect, either to the practice or to the existence of writing. The word **כָּתַב**, *katthab*, "to write," does not once occur; none of its derivatives are used; and **סֵפֶר**, *sepher*, "a book," is found only in a single passage (Gen. v. 1), and there not in a connexion which involves the supposition that the art of writing was known at the time to which it refers. The signet of Judah (Gen. xxxviii. 18, 25) which had probably some device engraved upon it, and Pharaoh's ring (Gen. xli. 42) with which Joseph was invested, have been appealed to as indicating a knowledge quite consistent with the existence of writing. But as there is nothing to show that the devices upon these rings, supposing them to exist, were written characters, or in fact any thing more than emblematic figures, they cannot be considered as throwing much light upon the question. That the Egyptians in the time of Joseph were acquainted with writing of a certain kind there is other evidence to prove, but there is nothing to show that up to this period the knowledge extended to the Hebrew family. At the same time there is no evidence against it. The instance brought forward by Hengstenberg to prove that "signets commonly bore alphabetic writings," is by no means so decisive as he would have it appear. It is Ex. xxxix. 30: "And they made the plate of the holy crown of pure gold, and wrote upon it a writing of the engravings of a signet, 'Holiness to the Lord.'" That is, this inscription was engraved upon the plate as the device is engraved upon a signet, in intaglio; and the expression has reference to the manner of engraving, and not to the figures engraved, and therefore cannot be appealed to as proving the existence of alphabetic characters upon Judah's signet or Pharaoh's ring. Writing is first distinctly mentioned in Ex. xvii. 14, and the connexion clearly implies that it was not then employed for the first time, but was so familiar as to be used for historic records. Moses is commanded to preserve the memory of Amalek's onslaught in the desert by committing it to writing. "And Jehovah said unto Moses, Write this for a memorial in the book (not 'a book,' as in the A. V.), and rehearse it in the ears of Joshua." It is clear that some special book is here referred to, perhaps, as Aben Ezra suggests, the book of the wars of Jehovah, or the book of Jashar, or one of the many documents

WRITING

of the ancient Hebrews which have long since perished. Or it may have been the book in which Moses wrote the words of Jehovah (Ex. xxiv. 4), that is the laws contained in chapters xi.-xxiii. The tables of the testimony are said to be "written by the finger of God" (Ex. xxxi. 18, on both sides, and "the writing was the writing of God, graven upon the tables" (Ex. xxxii. 15). It is not clear whether the passage in Ex. xxxiv. 28 implies that the second tables were written by Moses or by God himself. The engraving of the gems of the high-priest's breastplate with the names of the children of Israel (Ex. xxviii. 11), and the inscription upon the mitre (Ex. xxxix. 30) have to do more with the art of the engraver than of the writer, but both imply the existence of alphabetic characters. The next allusion is not so clear. The Israelites were forbidden, in imitation of the idolatrous nations, to put any "brand" (lit. "writing of burning") upon themselves. The figures thus branded upon the skin might have been alphabetic characters, but they were more probably emblematic devices, symbolizing some object of worship, for the root **כָּתַב**, *katthab* (to write), is applied to picture-drawing (Judg. viii. 14), to mapping out a country (Josh. xviii. 8), and to plan-drawing (1 Chr. xxviii. 19). The curses against the adulterers were written by the priest "in the book," as before; and blotted out with water (Num. v. 23). This proceeding, though principally distinguished by its symbolical character, involves the use of some kind of ink, and of a material on which the curses were written which would not be destroyed by water. The writing on door-posts and gates, alluded to in Deut. vi. 9, xl. 20, though perhaps to be taken figuratively rather than literally, implies certainly an acquaintance with the art and the use of alphabetic characters. Hitherto, however, nothing has been said of the application of writing to the purposes of ordinary life, or of the knowledge of the art among the common people. Up to this point such knowledge is only attributed to Moses and the priests. From Deut. xxi. 1, 3, however, it would appear that it was extended to others. A man who wished to be separated from his wife for her infidelity, could relieve himself by a summary process. "Let him write her a bill (**סֵפֶר**, *sepher*, "a book") of divorcement, and give it in her hand, and send her out of his house." It is not absolutely necessary to infer from this that the art of writing was an accomplishment possessed by every Hebrew citizen, though there is no mention of a third party; and it is more than probable that these "bills of divorcement," though apparently so informal, were the work of professional scribes. It was enjoined as one of the duties of the king (Deut. xvii. 18), that he should transcribe the book of the law for his own private study, and we shall find hereafter in the history that distinct allusions to writing occur in the case of several kings. The remaining instances in the Pentateuch are the writing of laws upon stone covered with plaster, upon which while soft the inscription was cut (Deut. xxxii. 3, 8), the writing of the song of Moses (Deut. xxxii. 32), and of the law in a book which was placed in the side of the ark (Deut. xxxi. 24). One of the first acts of Joshua on entering the Promised Land was to inscribe a copy of the Law on the stones of the Altar on Mount Ebal (Josh. viii. 32). The survey of the country was drawn out in a book (Josh. xviii. 8). In the time of the Judges

we first meet with the professional scribe (שֹׁפֵט, *sôphêr*), in his important capacity as marshal of the host of warriors (Judg. v. 14), with his staff (A. V. "pen") of office. Ewald (*Post. Bûch*, i. 129) regards *sôphêr* in this passage as equivalent to שֹׁפֵט, *sôphêr*, "judge," and certainly the context implies the high rank which the art of writing conferred upon its possessor. Later on in the history we read of Samuel writing in "the book" the manner of the kingdom (1 Sam. x. 25); but it is not till the reign of David that we hear for the first time of writing being used for the purposes of ordinary communication. The letter (lit. "book") which contained Uriah's death-warrant was written by David, and must have been intended for the eye of Job alone; who was therefore able to read writing, and probably to write himself, though his message to the king, conveying the intelligence of Uriah's death, was a verbal one (2 Sam. xi. 14, 15). If we examine the instances in which writing is mentioned in connexion with individuals, we shall find that in all cases the writers were men of superior position. In the Pentateuch the knowledge of the art is attributed to Moses, Joshua, and the priest alone. Samuel, who was educated by the high-priest, is mentioned as one of the earliest historians (1 Chr. xxix. 29), as well as Nathan the prophet (2 Chr. ix. 29), Shemaiah the prophet, Iddo the seer (2 Chr. xii. 15, xiii. 22), and Jehu the son of Hanani (2 Chr. xx. 34). Letters were written by Jezebel in the name of Ahab and sealed with his seal (1 K. xxi. 8, 9, 11); by Jehu (2 K. xi. 6); by Hezekiah (2 Chr. xxxix. 1); by Rabahakeh the Assyrian general (2 Chr. xxxiii. 17); by the Persian satraps (Esr. iv. 6, 7, 8); by Sanballat (Neh. vi. 5), Tobiah (Neh. vi. 19), Haman (Esth. viii. 5), Mordecai and Esther (Esth. ix. 29). The prophet Elijah wrote to Ahab (2 Chr. xxi. 2); Isaiah wrote some of the history of his time (2 Chr. xvi. 22); Jeremiah committed his prophecies to writing (Jer. li. 60), sometimes by the help of Baruch the scribe (Jer. xxxvi. 4, 32); and the false prophet, Shemaiah the Nehelamite, endeavoured to undermine Jeremiah's influence by the letters which he wrote to the high-priest (Jer. xxix. 25). In Is. xxix. 11, 12, there is clearly a distinction drawn between the man who was able to read, and the man who was not, and it seems a natural inference from what has been said that the accomplishments of reading and writing were not widely spread among the people, when we find that they are universally attributed to those of high rank or education, kings, priests, prophets, and professional scribes.

In addition to these instances in which writing is directly mentioned, an indirect allusion to its early existence is supposed to be found in the name of certain officers of the Hebrews in Egypt, שֹׁפֵט, *sôphêr*, LXX. ὑπαγγραφεὶς (Ex. v. 6, A. V. "officers"). The root of this word has been sought in the Arabic *asafara*, "to write," and its original meaning is believed to be "writers," or "scribes;" an explanation adopted by Gesenius in his *Lexicon Hebræicum* and *Thesaurus*, though he rejected it in his *Geschichte der Hebräischen Sprache und Schrift*. In the name Kirjath-Sopher (Booktown, Josh. xv. 15) the indication of a knowledge of writing among the Phoenicians is more distinct. Hitzig conjectures that the town may have derived its name from the discovery of the art, for the Hittites, a Canaanitish race, inhabited that

region, and the term Hittites may possibly have its root in the Arabic *asafara*, "to write."

The Hebrews, then, a branch of the great Shemitic family, being in possession of the art of writing, according to their own historical records, at a very early period, the further questions arise, what character they made use of, and whence they obtained it. It is scarcely possible in the present day to believe that, two centuries since, learned men of sober judgment seriously maintained, almost as an article of faith, that the square character, as it is known to us, with the vowel points and accents, was a direct revelation from heaven, and that the commandments were written by the finger of God upon the tables of stone in that character. Such, however, was really the case. But recent investigations have shown that, so far from the square character having any claim to such a remote antiquity and such an august parentage, it is of comparatively modern date, and has been formed from a more ancient type by a gradual process of development, the steps of which will be indicated hereafter, so far as they can be safely ascertained. What then was this ancient type? Most probably the Phœnician. To the Phœnicians, the daring seamen, and adventurous colonizers of the ancient world, tradition assigned the honour of the invention of letters (Plin. v. 12). This tradition may be of no value as direct evidence, but as it probably originated with the Greeks, it shows that, to them at least, the Phœnicians were the inventors of letters, and that these were introduced into Europe by means of that intercourse with Phœnicia which is implied in the legend of Cadmus, the man of the East. The Phœnician companions of this hero, according to Herodotus (v. 58), taught the Greeks many accomplishments, and among others the use of letters which hitherto they had not possessed. So Lucan, *Phars.* iii. 220:

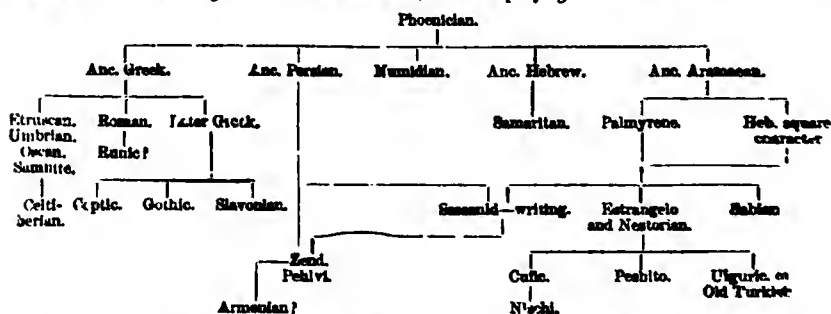

"Phœnices primum, famæ ac credimus, and
Mansurum rudibus vocem signare figuris."

Pliny (vii. 56) was of opinion that letters were of Assyrian origin, but he mentions as a belief held by others that they were discovered among the Egyptians by Mercury, or that the Syrians had the honour of the invention. The last-mentioned theory is that given by Diodorus Siculus (v. 74), who says that the Syrians invented letters, and from them the Phœnicians having learnt them, transferred them to the Greeks. On the other hand, according to Tacitus (*Ann.* xi. 14), Egypt was believed to be the source whence the Phœnicians derived their knowledge. Be this as it may, the voice of tradition represents the Phœnicians as the disseminators, if not the inventors, of the alphabet. Whether it came to them from an Aramaean or Egyptian source can at best be but the subject of conjecture. It may, however, be reasonably inferred that the ancient Hebrews derived from, or shared with, the Phœnicians the knowledge of writing and the use of letters. The two nations spoke languages of the same Shemitic family; they were brought into close contact by geographical position; all circumstances combine to render it probable that the ancient Hebrew alphabet was the common possession both of Hebrews and Phœnicians, and this probability is strengthened by the results of modern investigation into the Phœnician inscription which have of late years been brought to light. The names of the Hebrew letters indicate that they must have been the invention of

a Semitic people, and that they were moreover a pastoral people may be inferred from the same evidence. Such names as Aleph (an ox), Gimel (a camel), Lamed (an ox-goat), are most naturally explained by this hypothesis, which necessarily excludes the seafaring Phoenicians from any claim to their invention. If, as has been conjectured, they took the first idea of writing from the Egyptians, they would at least have given to the signs which they invented the names of objects with which they themselves were familiar. So far from this being the case the letters of the Hebrew alphabet contain no trace whatever of ships or seafaring matters: on the contrary, they point distinctly to an inland and pastoral people. The Shemitic and Egyptian alphabets have this principle in common, that the object whose name is given to a letter was taken originally to indicate the letter which begins the name; but this fact alone is insufficient to show that the Shemitic races borrowed their alphabet from Egypt, or that the principle thus held in common may not have been the possession of other nations of a still earlier date than the Egyptians. "The phonetic use of hieroglyphics," says Mr. Kenrick, "would naturally suggest to a practical people, such as the Phoenicians were, a simplification of the cumbrous system of the Egyptians, by dispensing altogether with the pictorial and symbolical use, and assigning one character to each sound, instead of the multitude of homophones which made the reading of the hieroglyphics so difficult; the residence of the Phoenician shepherds, the Hyksos, in Egypt might afford an opportunity for this adaptation, or it might be brought about by commercial intercourse. We cannot, however, trace such a resemblance between the earliest Phoenician alphabet known to us, and the phonetic characters of Egypt, as to give any certainty to this conclusion" (*Phœnicia*, pp. 184, 185).

Perhaps all that can be inferred from the tradition that letters came to the Greeks from the Phoenicians, but that they were the invention of the Egyptians, is that the Egyptians possessed an alphabet before the Phoenicians. Wahl, De Wette, and Kopp are inclined to a Babylonian origin, understanding the *Ἰβραίων* of Diodorus and the *Syri* of Pliny of the Babylonians. But Gesenius has shown this to be untenable, because (1) Pliny distinctly mentions both *Syri* and *Assyrii*, and by no means confounds them; and (2) because the inscription on the seal-stone, on which Kopp based his theory, is nothing more than Phoenician, and that not of the eldest form, but inclining to the somewhat later

Aramaic character. This seal-stone which contained, besides a cuneiform inscription, some Shemitic characters which were deciphered by Kopp, and were placed by him at the head of his most ancient alphabets (*Hilder und Schriften*, ii. p. 154). Gesenius, however, read them with a very different result. He himself argues for a Phoenician origin of the alphabet, in opposition to a Babylonian or Aramaean, on the following grounds:—1. That the names of the letters are Phoenician, and not Syrian. Several of the names are found alike in the Hebrew and Aramaic dialects: as for instance, *beth*, *gimel*, *zain*, *mem*, *ain*, *resh*, *shin*, but others are not found in Syriac at all, at least not in the same sense. *Aleph* in Syriac signifies "a thousand," not "an ox;" *daleth* is not "a door," and for this, as well as for *mem*, *god*, *mem*, *pe*, *kaph*, and *tau*, different words are used. The Greek forms of the names of the letters are somewhat in favour of an Aramaic origin, but there is no proof that they came in this shape from the East, and that they were not so modified by the Greeks themselves. 2. It is not probable that the Aramaic dialect was the language of the inventors; for the letters א ב ג ד, which to them were certainly consonants, had become so weak in the Aramaic that they could scarcely any longer appear as such, and could not have been expressed by signs by an inventor who spoke a dialect of this kind. 3. If the Phoenician letters are pictorial, as there seems reason to believe, there is no model, among the old Babylonian discoverers of writing, after which they could have been formed; while, on the other hand, it is extremely probable that the Phoenicians, from their extended commerce, especially with Egypt, adopted an imitation of the Egyptian phonetic hieroglyphics, though they took neither the figures nor the names from this source. The names of some of the letters lead us to a nomadic pastoral people, rich in herds: *aleph* (an ox), *gimel* (a camel), *lamed* (an ox-goat), *beth* (a tent), *daleth* (a tent-door), *vau* (a tent-peg), *cheth* (a hurdle or pen). It is a little remarkable that Gesenius did not see that this very fact militates strongly against the Phoenician origin of the letters, and points, as has been observed above, rather to a pastoral than a seafaring people as their inventors. But whether or not the Phoenicians were the inventors of the Shemitic alphabet, there can be no doubt of their just claim to being its chief disseminators; and with this understanding we may accept the genealogy of alphabets as given by Gesenius, and exhibited in the accompanying table.

Whatever minor differences may exist between the ancient and more modern Shemitic alphabets, they have two chief characteristics in common:—

1. That they contain only consonants and the three principal long vowels, *ā*, *i*, *u*; the other vowels being represented by signs above, below, or in the

middle of letters, or being omitted altogether. 2. That they are written from right to left. The Ethiopic, being perhaps a non-Semitic alphabet, is an exception to this rule, as is the cuneiform character in which some Semitic inscriptions are found. The same peculiarity of Egyptian writing was remarked by Herodotus. No instance of what is called *boustrophedon* writing—that is in a direction from right to left, and from left to right, in alternate lines—is found in Semitic monuments.

The old Semitic alphabets may be divided into two principal classes: 1. The Phœnician, as it exists (a) in the inscriptions in Cyprus, Malta, Carpentras, and the coins of Phœnicia and her colonies. It is distinguished by an absence of vowels, and by sometimes having the words divided and sometimes not. (b). In the inscriptions on Jewish coins. (c). In the Phœnicio-Egyptian writing, with three vowel signs, deciphered by Caylus on the mummy bandages. From (a) are derived (d), the Samaritan character, and (e), the Greek. 2. The Hebrew-Chaldaic character; to which belong (a), the Hebrew square character; (b), the Palmyrene, which has some traces of a cursive hand; (c), the Estrangelo, or ancient Syriac; and (d), the ancient Arabic or Cufic. The oldest Arabic writing (the Himyaritic) was perhaps the same as the ancient Hebrew or Phœnician.

It remains now to consider which of all these was the alphabet originally used by the ancient Hebrews. In considering this question it will on many accounts be more convenient to begin with the common square character, which is more familiar, and which from this familiarity is more constantly associated with the Hebrew language and writing. In the Talmud (*Sma.* fol. 21, 2) this character is called פתב מרובע, "square writing," or פתב אשורי, "Assyrian writing;" the latter appellation being given because, according to the tradition, it came up with the Israelites from Assyria. Under the term Assyria are included Chaldaea and Babylonia in the wider sense; for it is clear that in ancient writers the names *Assyria* and *Chaldaea* are applied indifferently to the same characters. The letters of the inscription on the tomb of Sardanapalus are called Chaldaean (*Athen.* xii. p. 529) and Assyrian (*Athen.* xii. p. 469; *Arrian.* *Exp. Alex.* ii. 5, §4). Again, the Assyrian writing on the pillars erected by Darius at the Bosphorus (*Her.* iv. 87), is called by Strabo *Persian* (xv. p. 502). Another derivation for the epithet אשורית, *ashshurith*, as applied to this writing, has been suggested by Rabbi Judah the Holy, who derives it from אשורית, *meshushshereth*, "blessed;" the term being applied to it because it was employed in writing the sacred books. Another etymology (from אשור, *ashar*, to be straight), given by the Hebrew grammarian Abraham de Balmis, describes it as the straight, perpendicular writing, so making the epithet equivalent to that which we apply to it in calling it the square character. Hupfeld, starting from the same root, explains the Talmudic designation as merely a technical term used to denote the more modern writing, and as opposed to פתב ראש, "broken," by which the ancient character is described. According to him it signifies that which is firm, strong, protected and supported as with torts and walls, referring perhaps to the horizontal strokes on which the letters rest as on a foundation. In this view he compares it with the Ethiopic character,

meter, which is called in Arabic *Shams* "supported." It must be confessed that none of these explanations are so satisfactory as to be unhesitatingly accepted. The only fact to be derived from the word אשורית is that it is the source of the whole Talmudic tradition of the Babylonian origin of the square character. This tradition is embodied in the following passages from the Jerusalem and Babylonian Talmuds:—"It is a tradition: R. Jose says Ezra was fit to have the law given by his hand, but that the age of Moses prevented it; yet though it was not given by his hand, the writing and the language were; the writing was written in the Syriac tongue, and interpreted in the Syriac tongue (*Exr.* iv. 7), and they could not read the writing (*Dan.* v. 8); from hence it is learnt that it was given on the same day. R. Nathan says the law was given in broken characters (פתב ראש, *roash*), and agrees with R. Jose; but Rab (i. e. R. Judah the Holy) says that the law was given in the Assyrian (i. e. the square) character, and when they sinned it was turned into the broken character, and when they were worthy, in the days of Ezra, it was turned to them again in the Assyrian character, according to *Zech.* ix. 12. It is a tradition: R. Simeon ben Eleazar says, on the account of R. Eleazar ben Parta, who also says, on the account of Eliezer Hammodai, the law was written in the Assyrian character" (*Talm. Jerus. Megillah*, fol. 71, 2, 3). But the story, as best known, is told in the Babylonian Talmud:—"Mar Zutra, or as others Mar Ukba, says, at first the law was given to Israel in the Hebrew (פתב אשורי, i. e. the Samaritan) writing and the holy tongue; and again it was given to them, in the days of Ezra, in the Assyrian writing and the Syriac tongue. They chose for the Israelites the Assyrian writing and the holy tongue, and left to the *Idiotus* the Hebrew writing and the Syriac tongue. Who are the *Idiotus*? R. Chasda says, the Cuthæans (or Samaritans). What is the Hebrew writing? R. Chasda says, the Libonah writing" (*Sanhed.* fol. 21, 2; 22, 1). The Libonah writing is explained by R. Solomon to mean the large characters in which the Jews wrote their amulets and *mesorahs*. The broken character mentioned above can only apply to the Samaritan alphabet, or one very similar to it. In this character are written, not only manuscripts of the Samaritan Pentateuch, varying in age from the 13th to the 16th century, but also other works in Samaritan and Arabic. The Samaritans themselves call it *Hebrew writing*, in contradistinction to the square character, which they call the writing of Ezra. It has no vowel points, but a diacritical mark called *Marhetono* is employed, and words and sentences are divided. A form of character more ancient than the Samaritan, though closely resembling it, is found on the coins struck under Simon Maccabæus, circ. B.C. 142. Of this writing Genesius remarks (*art. Palæographie* in *Erich* and *Gruber's Encyclopædie*) that it was most probably employed, even in manuscripts, during the whole lifetime of the Hebrew language, and was gradually displaced by the square character about the birth of Christ. An examination of the characters on the Maccabæan coins shows that they bear an extremely close resemblance to those of the Phœnician inscriptions, and in many cases are all but identical with them. The figures of three characters (פ ד ד) do not occur, and that of ד is doubtful.

In order to explain the Talmudic story above

given, and the relation between the square character and that of the coins, different theories have been constructed. Some held that the square character was sacred, and used by the priests, while the character on the coins was for the purposes of ordinary life. The younger Buxtorf (*De Lit. Hebr. Gen. Ant.*) maintained that the square alphabet was the oldest and the original alphabet of the Hebrews, and that before the Captivity the Samaritan character had existed side by side with it; that during the Captivity the priests and more learned part of the people cultivated the square or sacred character, while those who were left in Palestine adhered to the common writing. Ezra brought the former back with him, and it was hence called Assyrian or Chaldean. The other was used principally by the Samaritans, though occasionally by the Jews themselves, as is shown by the characters on the Maccabean coins. This opinion found many supporters, and a singular turn was given to it by Morinus (*De Lingua Primæva*, p. 271) and Loescher (*De Causis Ling. Hebr.* pp. 207, 208), who maintained that the characters on the coins were a kind of tachygraphic writing formed from the square character. Hartmann (*Ling. Evid.* p. 28, &c.) also upheld the existence of a twofold character, the sacred and profane. The favourers of this hypothesis of a double alphabet had some analogies to which they could appeal for support. The Egyptians had a twofold, or even a threefold character. The cuneiform writing of the ancient Persians and Medes was perhaps a sacred character for monuments, the Zend being used for ordinary life. The Arabs, Persians, and Turks employ different characters according as they require them for letters, poems, or historical writings. But analogy is not proof, and therefore the passage in Is. viii. 1 has been appealed to as containing a direct allusion to the ordinary writing as opposed to the sacred character. But it is evident, upon examination, that the writing there referred to is that of a perfectly legible character, such as an ordinary unskilled man might read. Irenæus (*Adv. Hæres.* ii. 24), indeed, speaks of sacerdotal letters, but his information is not to be relied on. In fact the sole ground for the hypothesis lies in the fact that the only specimens of the Hebrew writing of common life are not in the usual character of the manuscripts. If this supposition of the coexistence of a twofold alphabet be abandoned as untenable, we must either substitute for it a second hypothesis, that the square character was the exclusive possession of the kingdom of Judah, and that the Samaritan was used in the northern kingdom, or that the two alphabets were successive and not contemporary. Against the former hypothesis stands the fact that the coins on which the so-called Samaritan character occurs were struck at Jerusalem, and the names *Hebrew* and *Assyrian*, as applied to the two alphabets, would still be unaccounted for. There remains then the hypothesis that the square character and the writing of the coins succeeded each other in point of time, and that the one gradually took the place of the other, just as in Arabic the Nischi writing has displaced the older Cufic character, and in Syriac the Estrangelo has given place to that at present in use. But did the square character precede the character on the coins, or was the reverse the case? According to some of the doctors of the Talmud (*Sanh. fol. 21, 2; 22, 1*), in the passage above quoted, the Law was given to the Israelites in the Hebrew character and the *Assyrian* tongue. It was given again

in the days of Ezra in the *Assyrian* character and the *Aramaean* tongue. By the "Hebrew" character is to be understood what is elsewhere called the "broken" writing, which is what is commonly called Samaritan; and by the *Assyrian* writing is to be understood the square character. But Rabbi Judah the Holy, who adopted a different etymology for the word *אשורית* (*Assyrian*), says that the Law was first given in this square character, but that afterwards, when the people sinned, it was changed into the broken writing, which again, upon their repentance in the days of Ezra, was converted into the square character. In both these cases it is evident that the tradition is entirely built upon the etymology of the word *אשורית*, and varies according to the different conceptions formed of its meaning: consequently it is of but slight value as direct testimony. The varying character of the tradition shows moreover that it was framed after the true meaning of the name had become lost. Origen (on Ex. ix. 4) says that in the ancient alphabet the *Tau* had the form of a cross, and (*Hexapla*, i. 86, Montfaucon) that in some MSS. of the LXX. the word *טור* was written in ancient Hebrew characters, not with those in use in his day, "for they say that Ezra used other [letters] after the Captivity." Jerome, following Origen, gives out as certain what his predecessor only mentioned as a report, and the tradition in his hands assumes a different aspect. "It is certain," he says, "that Ezra the scribe and doctor of the law, after the taking of Jerusalem and the restoration of the Temple under Zerubbabel, discovered other letters which we now use: whereas up to that time the characters of the Samaritans and Hebrews were the same. . . . And the tetragrammaton name of the Lord we find in the present day written in ancient letters in certain Greek rolls" (*Prolog. Gal. in Libr. Reg.*). The testimony of Origen with regard to the form of *Tau* undergoes a similar modification. "In the ancient Hebrew letters, which the Samaritans use to this day, the last letter, *tau*, has the form of a cross." Again, in another passage (*Ep. 136 ad Marcell.* ii. 704, *Ep. 14*, ed. Martianay) Jerome remarks that the ineffable name *יהוה*, being misunderstood by the Greeks when they met with it in their books, was read by them *πρωι*, i. e. *PIHUI*. It has been inferred from this that the ancient characters, to which both Jerome and Origen refer in the first-quoted passages, were the square characters, because in them alone, and not in the Samaritan, does any resemblance between *יהוה* and *PIHUI* exist. There is nothing, however, to show that Jerome contemplated the same case in the two passages. In the one he expressly mentions the "ancient characters," and evidently as an exceptional instance, for they were only found in "certain rolls;" in the other he appears to speak of an occurrence by no means uncommon. Again, it is Jerome, and not Origen, who is responsible for the assertion that in the Samaritan alphabet the *Tau* has the form of a cross. Origen merely says this is the case in the ancient or original (*ἀρχαίους*) Hebrew characters, and his assertion is true of the writing on the Maccabean coins, and of the ancient and even the more modern Phœnician, but not of the alphabet known to us as the Samaritan. It seems clear, therefore, that Jerome's language on this point cannot be regarded as strictly accurate.

There are many arguments which go to show that the Samaritan character is older than the square Hebrew. One of these is derived from the

existence of the Samaritan Pentateuch, which, according to some writers, must date at least from the time of the separation of the two kingdoms, the northern kingdom retaining the ancient writing which was once common to both. But there is no evidence for the existence of the Samaritan Pentateuch before the Captivity, and the opinion which now most commonly prevails is that the Samaritans received it first in the Maccabean period, and with it the Jewish writing (Hävernick, *Erd.* i. 290). The question is still far from being decided, and while it remains in this condition the arguments derived from the Samaritan Pentateuch cannot be allowed to have much weight. Hupfeld (*Stud. und Krit.* 1830, ii. 279, &c.) contends that the common theory, that the Samaritans received their writing from the ancient Israelitish times, but maintained it more faithfully than the Jews, is improbable, because the Samaritans were a mixed race, entirely different from the ancient Israelites, and had, like their language, a preponderating Aramaic element: consequently, if they had had a character peculiar to themselves, independently of their sacred book, it would rather have been Aramaic. He argues that the Samaritans received their present writing with their Pentateuch from the Jews, because the Samaritan character differs in several important particulars from that on the Phœnician monuments, but coincides in all characteristic deviations with the ancient Hebrew on the Maccabean coins. These deviations are—(1) the horizontal strokes in *Beth*, *Mem*, and *Nun*, which have no parallel on the Phœnician monuments: (2) the angular heads of *Beth*, *Daleth*, and especially *Ain*, which last never occurs in an angular form in Phœnician: (3) the entirely different forms of *Tsade* and *Vau*, as well as of *Zain* and *Sameck*, which are not found on the Maccabean coins. In the Samaritan letters *Aleph*, *Cheth*, *Lamed*, *Shin*, there is a closer relationship with the forms of the old Hebrew: the only marked deviation is in the form of *Tau*. To these considerations Hupfeld adds the traditions of Origen and Jerome and the Talmud already given, and the fact that the Samaritans have preserved their letters unchanged, a circumstance which is intelligible on the supposition that these letters were regarded by them with superstitious reverence as a sacred character which had come to them from without, and which, in the absence of any earlier indigenous tradition of writing, necessarily became a lifeless permanent type.

The names of the letters, and the correspondence of their forms to their names in the Phœnician and Phœnicio-Samaritan alphabets, supply another argument for the superior antiquity of this to the Hebrew square character: *e. g.* *Ain* (an eye), which on the coins and Phœnician monuments has the form *o*; *Resh* (a head), *q*. On the other hand, the names *Vau* (a nail or peg), *Zain* (a weapon), *Capht* (the hollow hand), correspond to their forms better in the square character: this, however, at most, would only prove that both are derived from the same original alphabet in which the correspondence between the shape and name of each letter was more complete. Again, we trace the Phœnician alphabet much further back than the square character. The famous inscription on the sarcophagus of Eschmunazar, found at Sidon in 1855, is referred by the Duc de Luynes to the sixth century B.C. The date of the inscription at Marseilles is more uncertain. Some would place it before the foundation of the Greek colony there, B.C. 600.

VOL. III.

There is reason to believe, however, that it is much more recent. Besides these we have the inscriptions at Sigæum and Amyclæ in the ancient Greek character, which is akin to the Phœnician. On the other hand, the Hebræo-Chaldeæ character is not found on historic monuments before the birth of Christ. A consideration of the various readings which have arisen from the interchange of similar characters in the present text leads, as might naturally be expected, to results which are rather favourable to the square character, for in this alone are the manuscripts written which have come down to us. The following examples are given, with one exception, by Gesenius:—

(a) In the square alphabet are confounded—

כ and כ. שְׁכַנְיָה Neh. xii. 14=שְׁכַנְיָה Neh. xii. 3;
כ and כ. 1 Chr. ix. 15=כְּכַר Neh. xi. 17.
י and י. יַעֲקֹב Gen. xvi. 27=יַעֲקֹב 1 Chr. i. 42.
כ and כ. כִּירוֹת 1 K. vi. 40=כִּירוֹת 2 Chr. iv. 11.
כ and כ. חֲשֵׁכֶת Pa. xviii. 12=חֲשֵׁכֶת 2 Sam. xxii. 12.
י and י. כַּעֲזֹן Pa. xxxi. 3=כַּעֲזֹן Pa. lxxi. 3.

(b) In both alphabets are confounded—

ד and ד. דִּיפֶת 1 Chr. i. 6=דִּיפֶת Gen. x. 3;
ד and ד. דְּדִנִּים 1 Chr. i. 7=דְּדִנִּים Gen. x. 4;
ד and ד. דָּאָה Lev. xi. 14=דָּאָה Deut. xiv. 13;
ד and ד. דִּירָא Pa. xviii. 11=דִּירָא 2 Sam. xxii. 11.

(c) In the Phœnician alone—

כ and כ. חֲלָב 2 Sam. xxii. 39=חֲלָב 1 Chr. xi. 30.
י and י. וְעַן Josh. xxi. 16=וְעַן 1 Chr. vi. 44.
י and י. נַעֲרִי 1 Chr. xi. 37=נַעֲרִי 2 Sam. xxiii. 38.

(d) In neither—

י and י. נָחוֹם Neh. vii. 7=נָחוֹם Est. ii. 2.
י and י. נָחוֹם Num. xxvi. 35=נָחוֹם 1 Chr. vii. 29.
י and י. נָחוֹם 1 Chr. vi. 76 [81]=נָחוֹם Josh. xxi. 32.

The third class of these readings seems to point to a period when the Hebrews used the Phœnician character, and a comparison of the Phœnician alphabet and the Hebrew coin-writing shows that the examples of which Gesenius makes a fourth class, might really be included under the third: for in these some forms of כ and כ, as well as of י and י, are by no means unlike. This circumstance takes away some of the importance which the above results otherwise give to the square character. Indeed, after writing his *Hebräische Sprache und Schrift*, Gesenius himself appears to have modified some of the conclusions at which he arrived in that work, and instead of maintaining that the square character, or one essentially similar to it, was in use in the time of the LXX., and that the Maccabees retained the old character for their coins, as the Arabs retained the Cufic some centuries after the introduction of the Nischi, he concludes as most probable, in his article *Palæographie* (in Ersch and Gruber's *Encycl.*), that the ancient Hebrew was first changed for the square character about the birth of Christ. A comparison of the Phœnician with the square alphabet shows that the latter could not be the immediate development of the former, and that it could not have been formed gradually from it at some period subsequent to the time of the Maccabees. The essential difference of some characters, and the similarity of others, render it probable that the two alphabets are both descended from one more ancient than either, of which each has retained some peculiarities. This more

ancient form, Hupfeld (*Hebräische Grammatik*, §7) maintains, is the original alphabet invented by the Babylonians, and extended by the Phoenicians. From this the square character was developed by three stages.

1. In its oldest form it appears on Phoenician monuments, stones, and coins. The number of the inscriptions containing Phoenician writing was 77, greater and smaller, in the time of Gesenius, but it has since been increased by the discovery of the famous sarcophagus of Eshmunazar king of Sidon, and the excavations which have still more recently been made in the neighbourhood of Carthage have brought to light many others which are now in the British Museum. Those described by Gesenius were found at Athens (three bilingual), at Malta (four, one of which is bilingual), in Cyprus among the ruins of Kitium (thirty-three), in Sicily, in the ruins of Carthage (twelve), and in the regions of Carthage and Numidia. They belong for the most part to the period between Alexander and the age of Augustus. A Punic inscription on the arch of Septimius Severus brings down the Phoenician character as late as the beginning of the third century after Christ. Besides these inscriptions on stone, there are a number of coins bearing Phoenician characters, of which those found in Cilicia are the most ancient, and belong to the times of the Persian domination. The character on all these is essentially the same. In its best form it is found on the Sicilian, Maltese, Cyprian, and Carthaginian inscriptions. On the Cilician coins it is perhaps most original, degenerating on the later coins of Phoenicia, Spain, and the neighbouring islands, and becoming almost a cursive character in the monuments of Numidia and the African provinces. There are no final letters and no divisions of words. The characteristics of the Phoenician alphabet as it is thus discovered are, that it is purely consonantal; that it consists of twenty-two letters written from right to left, and is distinguished by strong perpendicular strokes and the closed heads of the letters; that the names and order of the letters were the same as in the Hebrew alphabet, as may be inferred from the names of the Greek letters which came immediately from Phoenicia; and that originally the alphabet was pictorial, the letters representing figures. This last position has been strongly opposed by Wuttke (*Zeitsch. d. D. M. G.* xi. 75, &c.), who maintains that the ancient Phoenician alphabet contains no traces of a pictorial character, and that the letters are simply combinations of strokes. It is impossible here to give his arguments, and the reader is referred for further information to his article. This ancient Phoenician character in its earliest form was probably, says Hupfeld, adopted by the Hebrews from the Canaanites, and used by them during the whole period of the living language till shortly before the birth of Christ. Closely allied with it are the characters on the Moabite coins, and the Samaritan alphabet.

2. While the old writing remained so almost unchanged among the Phoenicians and Samaritans, it was undergoing a gradual transformation among its original inventors, the Aramaeans, especially those of the West. This transformation was effected by opening the heads of the letters, and by bending the perpendicular stroke into a horizontal one, which in the cursive character served for a connecting stroke, and in the inscriptions on stone for a basis or foundation for the letters. The character in this form is found in the earliest stage on the stone of

Carpentras, where the letters β , γ , δ , have open heads; and later in the inscriptions on the ruins of Palmyra, where the characters are distinguished by the open heads degenerating sometimes to a point, and by horizontal connecting strokes. Besides the stone of Carpentras, the older form of the modified Aramaean character is found on some fragments of papyrus found in Egypt, and preserved in the Library at Turin, and in the Museum of the Duke of Blacas. Plates of these are given in Gesenius' *Monumenta Phoenicia* (tab. 28-33). They belong to the time of the later Ptolemies, and are written in an Aramaic dialect. The inscription on the Carpentras stone was the work of heathen scribes, probably, as Dr. Levy suggests (*Zeitsch. d. D. M. G.* xi. 67), the Babylonian colonists of Egypt; the writing of the papyri he attributes to Jews. The inscription on the vase of the Serapeum at Memphis is placed by the Duc de Luynes and M. Mariette in the 4th century B.C. In the Blacas fragments the heads of the letters β , γ , δ , have fallen away altogether. In the forms of β , γ , δ we see the origin of the figures of the square character. The final forms of *Caph* and *Nun* occur for the first time. The Palmyrene writing represents a later stage, and belongs principally to the second and third centuries after Christ, the time of the greatest prosperity of Palmyra. The oldest inscription belongs to the year 396 of the Greeks (A.D. 84), and the latest to the year 569 (A.D. 257). The writing was not confined to Palmyra, for an inscription in the same character was found at Abilene. The Palmyrene inscriptions are fifteen in number: ten bilingual, in Syriac and Greek, and Syriac and Latin. Two are preserved at Rome, four at Oxford. Those at Rome differ from the rest, in having lost the heads of the letters β , γ , δ , while the forms of the γ , δ , β are like the Phoenician. Of the cursive Assyrian writing, which appears to be allied to the Aramaean, Mr. Layard remarks, "On monuments and remains purely Syriac, or such as cannot be traced to a foreign people, only one form of character has been discovered, and it so closely resembles the cursive of Assyria, that there can be little doubt as to the identity of the origin of the two. If, therefore, the inhabitants of Syria, whether Phoenicians or others, were the inventors of letters, and those letters were such as exist upon the earliest monuments of that country, the cursive character of the Assyrians may have been as ancient as the cuneiform. However that may be, this hieratic character has not yet been found in Assyria on remains of a very early epoch, and it would seem probable that simple perpendicular and horizontal lines preceded rounded forms, being better suited to letters carved on stone tablets or rocks. At Nimroud the cursive writing was found on part of an alabaster vase, and on fragments of pottery, taken out of the rubbish covering the ruins. On the alabaster vase it accompanied an inscription in the cuneiform character, containing the name of the Khorsabad king, to whose reign it is evident, from several circumstances, the vase must be attributed. It has also been found on Babylonian bricks of the time of Nebuchadnezzar" (*Nin.* ii. pp. 165, 166). M. Fresnel discovered at Kasr some fifty fragments of pottery covered with this cursive character in ink. These, too, are said to be of the age of Nebuchadnezzar (*Journ. Asiat.* July 1853, p. 77). Dr. Levy (*Zeitsch. d. D. M. G.* ix. 465) maintains, in accordance with the Talmudic tradition, that the Jews acquired this cursive writing in Babylonia, and brought it back with them after the Captivity.

together with the Chaldean language, and that it gradually displaced the older alphabet, of which fragments remain in the forms of the final letters.

3. While this modification was taking place in the Aramaic letters, a similar process of change was going on in the old character among the Jews. We already find indications of this in the Blackabean coins, where the straight strokes of some letters are broken. The Aramaic character, too, had apparently an influence upon the Hebrew, proportioned to the influence exercised by the Aramaic dialect upon the Hebrew language. The heads of the letters still left in the Palmyrene character are removed, the position and length of several oblique strokes are altered (as in פ, מ, ב, נ). It lost the character of a cursive hand by the separation of the several letters, and the stiff ornaments which they received at the hands of calligraphers, and thus became an angular, uniform, broken character, from which it receives its name *square* (כתיב עברי).

In the letters מ, ב, נ, ד, ז, ט, י, ק, ר, the Aegypto-Aramaic appears the older, and the Palmyrene most resembles the square character. In others, on the contrary, as פ, מ, ב, נ, the square character is closely allied to the forms in the Black fragments; and in some, as פ, מ, ב, נ, ש, both the older alphabets agree with the square character. So far as regards the development of the square character from the Aramaean, as it appears on the stone of Carpentras and the ruins of Palmyra, Hupfeld and Gesenius are substantially agreed, but they differ widely on another and very important point. Gesenius is disposed to allow some weight to the tradition as preserved in the Talmud, Origen, and Jerome, that the Hebrews at some period adopted a character different from their own. The Chaldean square alphabet he considers as originally of Aramaic origin, but transferred to the Hebrew language. To this conclusion he appears to be drawn by the name *Assyrian* applied in the Talmud to the square character, which he infers was probably the ancient character of Assyria. If this were the case, it is remarkable that no trace of it should be found on the Assyrian monuments; and, in the absence of other evidence, it is unsafe to build a theory upon a name, the interpretation of which is uncertain. The change of alphabet from the Phœnician to the Aramaean, and the development of the Syriac from the Aramaean, Gesenius regards as two distinct circumstances, which took place at different times, and were separated by a considerable interval. The formation of the square character he maintains cannot be put earlier than the second century after Christ. Hupfeld, on the other hand, with more show of reason, rejects altogether the theory of an abrupt change of character, because he doubts whether any instance can be shown of a simple exchange of alphabets in the case of a people who have already a tradition of writing. The ancient letters were in use in the time of the Maccabees, and from that period writing did not cease, but was rather more practised in the transcription of the sacred books. Besides, on comparing the Palmyrene with the square character, it is clear that the former has been altered and developed, a result which would have been impossible in the case of a communication from without which overwhelmed all tradition and spontaneity. The case of the Samaritans, on the other hand, is that of a people who received an alphabet entire, which they regarded as sacred in consequence of its association

with their sacred book, and which they therefore retained unaltered with superstitious fidelity. Moreover, in the old Hebrew writing on the coins we see already a tendency to several important alterations, as, for example, in the open heads of ב and ג, and the base lines of ב, ג, ד, ז; and many letters, as מ, are derived rather from the coin-character than from the Palmyrene, while פ and ק are entirely Phœnician. Finally, Hupfeld adds, "It is in the highest degree improbable—nay, almost inconceivable—that the Jews, in the fervour of their then enthusiasm for their sacred books, should, consciously and without apparent reason, have adopted a foreign character and abandoned the ancient writing of their fathers."

Assuming, then, as approximately true, that the square character of the Hebrews was the natural result of a gradual process of development, and that it was not adopted in its present shape from without, but became what it is by an internal organic change, we have further to consider at what time it acquired its present form. Kopp (*Bilder und Schriften*, ii, p. 177) places it as late as the 4th century after Christ; but he appears to be guided to his conclusion chiefly by the fact that the Palmyrene character, to which it is most nearly allied, extended into the 3rd century. It is evident, however, from several considerations, that in the 4th century the square character was substantially the same as it is to this day, and had for some time been so. The descriptions of the forms of the letters in the Talmud and Jerome coincide most exactly with the present; for both are acquainted with *final* letters, and describe as similar those letters which resemble each other in the modern alphabet, as, for instance, ב and ג, ג and ד, ד and מ, מ and נ, נ and י, י and פ, פ and ק. The calligraphic ornaments which were employed in the writing of the synagogue rolls, as the *Tuggin* on the letters פ ז י י ד ע ש, the point in the broken headline of מ (ר), and many other prescriptions for the orthography of the Torah are found in the Talmud, and show that Hebrew calligraphy, under the powerful protection of minute laws observed with superstitious reverence, had long received its full development, and was become a fixed unalterable type, as it has remained ever since. The change of character, moreover, not only in the time of Jerome and the Talmud, but even as early as Origen, was an event already long past, and so old and involved in the darkness of fable as to be attributed in the common legend to Ezra, or by most of the Talmudists to God Himself. The very obscurity which surrounds the meaning of the terms עברי and אשורי as applied to the old and new writing respectively, is another proof that in the time of the Talmudists the square character had become permanent, and that the history of the changes through which it had passed had been lost. In the Mishna (*Shabb. xii. 5*) the case is mentioned of two *Zaïms* (זימין) being written for *Cheth* (ח), which could only be true of the square character. The often-quoted passage, Matt. v. 18, which is generally brought forward as a proof that the square character must have been in existence in the time of Christ, who mentions *lāra*, or *yod*, as the smallest letter of the alphabet, proves at least that the old Hebrew or Phœnician character was no longer in use, but that the Palmyrene character, or one very much like it, had been introduced. From these circumstances we may infer, with Hupfeld (*Stud. und Krit.* 1830, ii. 288), that Whiston's conjecture is

approximately true; namely, that about the first or second century after Christ the square character assumed its present form; though in a question involved in so much uncertainty, it is impossible to pronounce with great positiveness.^a

Next to the scattered hints as to the shape of the Hebrew letters which we find in the writings of Jerome, the most direct evidence on this point is supplied by the so-called *Alphabetum Jesuitarum*, which is found in a MS. (Codex Marchallanus, now lost) of the LXX. of Lam. ii. It is the work of a Greek scribe, imperfectly acquainted with, or more probably entirely ignorant of Hebrew, who copied slavishly the letters which were before him. In this alphabet א is written Α; and י and ך are of nearly equal length, the latter being distinguished by two dots; ד is made like ρ, and ן like Η. The letters on the two Abraxas gems in his possession were thought by Montfaucon (*Praefat. ad Hex. Orig.* i. 22, 23) to have been Hebrew; but as they have not been fairly deciphered, nothing can be inferred from them. Other instances of the occurrence of the Hebrew alphabet written by ignorant scribes are found in a Codex of the New Testament, of which an account is given by Treschow (*Tent. descr. Cod. Vet. aliquot Gr. N. T.*), and three have been edited from Greek and Latin MSS. in the *Nouveau Traité Diplomatique* published by the Benedictines. To these, as to the *Alphabetum Jesuitarum*, Kennicott justly attributes no value (*Dissert. Gen.* p. 69 note). The same may be said of the Hebrew writing of a monk, taken from the work of Rabanus Maurus, *De inventionibus linguarum*. The Jews themselves recognize a double character in the writing of their synagogue rolls. The earlier of these is called the *Tam* writing (תם כתב), as some suppose, from Tam, the grandson of Rashi, who flourished in the 12th century, and is thought to be the inventor; or, according to others, from the perfect form of the letters, the epithet *Tam* being then taken as a significant epithet of the square character, in which sense the expression תמימים, *shammim* occurs in the Talmud (*Shabbath*, fol. 103 b). Phylacteries written in this character were hence called *Tam tephillin*. The letters have fine pointed corners and perpendicular *taggin* (תגין), or little strokes attached to the seven letters שׁ, ז, ט, י, ך, ם, ן. The *Tam* writing is chiefly found in German synagogue rolls, and probably also in those of the Polish Jews. The *Welsh* writing (וולש כתב), to which the Jews assign a later date than to the other, usually occurs in the synagogue rolls and other manuscripts of the Spanish and Eastern Jews. The figures of the letters are rounder than in the *Tam* writing, and the *taggin*, or crown-like ornaments, terminate in a thick point. But besides these two forms of writing, which are not essentially distinct, there are minor differences observable in the manuscripts of different countries. The Spanish character is the most regular and simple, and is for the most part large and bold, forming a true square character. The German is more sloping and compressed, with pointed corners; but finer than the Spanish. Between these the French and Italian character is intermediate, and is hence called by Kennicott (*Diss. Gen.* p. 71) *character intermedius*. It is for the most part rather smaller than the others, and the forms of the letters are rounder (Eichhorn, *Etw.* ii. 37-41; Tychsen, *Tentamen de var. cod. Hebr. V. T. MSS. generibus*, p. 264; Bellermann, *De usu palaeog. Hebr.* p. 43).

reacter intermedius. It is for the most part rather smaller than the others, and the forms of the letters are rounder (Eichhorn, *Etw.* ii. 37-41; Tychsen, *Tentamen de var. cod. Hebr. V. T. MSS. generibus*, p. 264; Bellermann, *De usu palaeog. Hebr.* p. 43).

The Alphabet.—The oldest evidence on the subject of the Hebrew alphabet is derived from the alphabetical Psalms and poems; *Ps.* xlv., xlviv., xlvvii., cxl., cxli., cxli., cxlv.; *Prov.* xxxi. 10-31; *Lam.* i.-iv. From these we ascertain that the number of the letters was twenty-two, as at present. The Arabic alphabet originally consisted of the same number. Irenaeus (*Adv. Haer.* ii. 24) says that the ancient sacred letters were ten in number. It has been argued by many that the alphabet of the Phoenicians at first consisted only of sixteen letters, or according to Hug of fifteen, א, ב, ג, ד, ה, ו, ז, ח, ט, י, כ, ל, מ, נ, ס, ע, being omitted. The legend as told by Pliny (vii. 56) is as follows. Cadmus brought with him into Greece sixteen letters; at the time of the Trojan war Palamedes added four others, θ, ς, φ, χ, and Simonides of Melos four more, ζ, η, ψ, Ω. Aristotle recognized eighteen letters of the original alphabet, Α Β Γ Δ Ε Ζ Ι Κ Λ Μ Ν Ο Π Ξ Τ Θ Φ, to which θ and χ were added by Epicharmus (comp. *Tac. Ann.* xi. 14). By Isidore of Seville (*Orig.* i. 3) it is said there were seventeen. But in the oldest story of Cadmus, as told by Herodotus (v. 58) and Diodorus (v. 24), nothing is said of the number of the letters. Recent investigations, however, have rendered it probable that at first the Shemitic alphabet consisted of but sixteen letters. It is true that no extant monuments illustrate the period when the alphabet was thus curtailed, but as the theory is based upon an organic arrangement first proposed by Lepsius, it may be briefly noticed. Dr. Donaldson (*New Cratylus*, p. 171, 3rd ed.) says, "Besides the mutes and breathings, the Hebrew alphabet, as it now stands, has four sibilants א, ב, ג, ד. Now it is quite clear that all these four sibilants could not have existed in the oldest state of the alphabet. Indeed we have positive evidence that the Ephraimites could not pronounce ע, but substituted for it the simpler articulation ח (Judges xii. 6). We consider it quite certain, that at the first there was only one sibilant, namely this א, or *samech*. Finally, to reduce the Semitic alphabet to its oldest form, we must omit *capa*, which is only a softened form of *kaph*, the liquid *resh*, and the semivowel *jod*, which are of more recent introduction. . . The remaining 16 letters appear in the following order: א, ב, ג, ד, ה, ו, ז, ח, ט, י, כ, ל, מ, נ, ס, ע. If we examine this order more minutely, we shall see that it is not arbitrary or accidental, but strictly organic according to the Semitic articulation. We have four classes, each consisting of 4 letters: the first and second classes consist each of 3 mutes preceded by a breathing, the third of the 3 liquids and the sibilant, which perhaps closed the oldest alphabet of all, and the fourth contains the three supernumerary mutes preceded by a breathing." The original 16 letters of the Greek alphabet, corresponding to those of the Shemitic, are thus given by Dr. Donaldson (*ibid.* p. 175).

א ב ג ד ה ו ז ח ט י כ ל מ נ ס ע
Α Β Γ Δ Ε Ζ Η Θ Ι Κ Λ Μ Ν Ξ Ο Π Ϻ

^a Another link between the Palmyrene and the square character is supplied by the writing on some of the Babylonian bowls, described by Mr. Layard (*Nineveh*, and

Bab. 509), which Dr. Levy (*Zeitsch. d. D. M. G.*) assigns to the 7th century A.D.

In the Greek alphabet, as it is now given in the grammars, F and Q are omitted, and 10 other characters added to these." The Shemitic *tsade* (צ) became *zeta* (Ζ), *caph* (כ) became *kappa* (κ), and *yod* (י) became *iota* (ι). *Rash* (ר) was adopted and called *rho* (ρ), and *ladr*, which was used by the Dorians for *laryna* (Her. i. 139), is only another form of *sain* (ש). *Shin* (ש) or *Sin* (ס), is the original of ξ, which from some cause or other has changed places with σ, the Shemitic *samech*, just as *štra* has been transferred from its position. In like manner *mem* became μ, and *num* became ν. With the remaining Greek letters we have nothing to do, as they do not appear to have been Shemitic in origin, and will therefore proceed to consider the Hebrew alphabet as known to us.

With regard to the arrangement of the letters, our chief sources of information are as before the alphabetical acrostics in the Psalms and Lamentations. In these poems some irregularities in the arrangement of the alphabet are observable. For instance, in Lam. ii., iii., iv., מ stands before נ: in Ps. xxvii. נ stands before מ, and נ is wanting: in Ps. xxv., xxiv. י is omitted, and in both there is a final verse after מ beginning with מ. Hence מ has been compared with the Greek φ, and the transposition of נ and נ has been explained from the interchange of these letters in Aramaic. But as there are other irregularities in the alphabetical Psalms, no stress can be laid upon these points. We find for example, in Ps. xxv. two verses beginning with מ, while מ is omitted; in Ps. xxiv. two begin with י, and so on.

The names of the letters are given in the LXX. of the Lamentations as found in the Vatican MS. as printed by Mai, and in the Codex Friderico-Augustanus, published by Tischendorf. Both these ancient witnesses prove, if proof were wanting, that in the 4th century after Christ the Hebrew letters were known by the same names as at the present day. These names all denote sensible objects which had a resemblance to the original form of the letters, preserved partly in the square alphabet, partly in the Phoenician, and partly perhaps in the Alphabet from which both were derived.

The following are the letters of the Hebrew alphabet in their present shape, with their names and the meanings of these names, so far as they can be ascertained with any degree of probability.

א, *Aleph*. אָלֶפֶּךָ = אָלֶפֶּךָ, an ox (comp. Plot. *Symp. Quæst.* ix. 2, §3). In the old Phoenician forms of this letter can still be traced some resemblance to an ox-head, אָלֶפֶּךָ. Gr. ἄλφα.

ב, *Beth*. בֵּית = בֵּית, a house. The figure in the square character corresponds more to its name, while the Ethiopic β has greater resemblance to a tent. Gr. βῆτα (β).

ג, *Gimel*. גִּמְלָה = גִּמְלָה, a camel. The ancient form is supposed to represent the head and neck of this animal. In Phoenician it is ג, and in Ethiopic ג, which when turned round became the Greek γάμμα (= γάμμα), Γ. Gesenius holds that the earliest form ג represented the camel's hump.

ד, *Daleth*. דֶּלֶת = דֶּלֶת, a door. The significance of the name is seen in the older form ד, whence the Greek δάλα, Δ, a tent-door.

ה, *He*. הָה, without any probable derivation;

perhaps corrupted, or merely a technical term. Ewald says it is the same as the Arabic هَوْء, a hole, fissure. Hupfeld connects it with the interjection הָה, "lo!" The corresponding Greek letter is Ε, which is the Phoenician ה turned from left to right.

ו, *Vau*. וָ, a hook or tent-peg; the same as the old Greek βαῦ (F), the form of which resembles the Phoenician ו.

ז, *Zain*. זָ, probably = זָ, *zaino*, a weapon, sword (Ps. xlii. 7): omitting the final letter, it was called also זָ, *zai* (Mish. *Shabb.* xii. 5). It appears to be the same as the ancient Greek Ζα.

ח, *Cheth*. חָ, a fence, enclosure (= Arab. حائط, from حائط. Syr. ܚܝܬ, to surround). Compare the Phoen. ח. *Cheth* is the Greek χῆτα (H).

ט, *Tet*. טָ, a snake, or טָ, a basket. The Greek θῆτα.

י, *Yod*. יָ, a hand. The form of the letter was perhaps originally longer, as in the Greek Ι (iota). The Phoenician י and Samaritan י figures have a kind of distant resemblance to three fingers. In Ethiopic the name of the letter is *yaman*, the right hand.

כ, *Caph*. כָּ, the hollow of the hand. The Greek κάψα (κ) is the old Phoenician form (x) reversed.

ל, *Lamed*. לָ, a cudgel or ox-goad (comp. Judg. iii. 31). The Greek λάββα (Λ); Phoenician, ל, /.

מ, *Mem*. מָ, water, as it is commonly explained, with reference to the Samaritan מ. In the old alphabets it is מ, in which Gesenius sees the figure of a trident, and so possibly the symbol of the sea. The Greek μ corresponds to the old word מ, "water," Job ix. 30.

נ, *Nun*. נָ, a fish, in Chaldee, Arabic, and Syriac. In almost all Phoenician alphabets the figure is נ. On the Maltese inscriptions it is nearly straight, and corresponds to its name. The Greek νῦ is derived from it.

ס, *Samech*. סָ, a prop, from סָ, to support; perhaps, says Gesenius, the same as the Syriac סָ, *s'moco*, a tricladium. But this interpretation is solely founded on the rounded form of the letter in the square alphabet; and he has in another place (*Mon. Phoen.* p. 83) shewn how this has come from the old Phoenician, which has no likeness to a tricladium, or to anything else save a flash of lightning striking a church spire. The Greek σῆμα is undoubtedly derived from *Samech*, as its form is from the Phoenician character, although its place in the Greek alphabet is occupied by ξ.

ע, *Ain*. עָ, an eye; in the Phoenician and Greek

alphabet O. Originally it has two forms, as in Arabic, and was represented in the LXX. by Γ, or a simple breathing.

D. *Pe*. מֵ = מֶ, a mouth. The Greek π is from מֵ, the construct form of מֶ.

ז, *Tade*. זֶ or זֵ, a fish-hook or prong, for spearing the larger fish. Others explain it as a nose, or an owl. One of the Phoenician forms is ז. From *tade* is derived the Greek ζῆρα.

Q, *Kaph*. קֶ, perhaps the same as the Arabic قف, the back of the head. Gesenius originally explained it as equivalent to the Chaldee קֶפ, the eye of a needle, or the hole for the handle of an axe. Hitzig rendered it "ear," and others "a pole." The old Hebrew form (P), inverted Q, became the Greek κέρρα (Q); and the form (Q), which occurs on the ancient Syracusan coins, suggests the origin of the Roman Q.

ר, *Resh*. רֶ, a head (comp. Aram. רֶשׁ = רֶשֶׁת). The Phoenician Q when turned round became the Greek P, the name of which, פֶּ, is corrupted from *Resh*.

ש *Shin*. שֶׁ } Compare שֶׁ, a tooth, sometimes
& & } used for a jagged promontory.

ש *Sin*. שֵׁ } The letters שֶׁ and שֵׁ were probably
at first one letter, and afterwards became distinguished by the diacritic point, which was known to Jerome, and called by him *accentus* (*Quæst. Hebr. in Gen.* li. 23; *Am.* viii. 12). In *Pe*. cxix. 161-166, and *Lam.* iii. 61-63, they are used promiscuously, and in *Lam.* iv. 21 שֶׁ is put for שֵׁ. The narrative in *Judg.* xii. 6 points to a difference of dialect, marked by the difference in sound of these two letters. The Greek σ is derived from *Shin*, as σῶ from *Nun*.

T, *Taw*. תֶּ, a mark or sign (*Ex.* ix. 4); probably a sign in the shape of a cross, such as cattle were marked with. This signification corresponds to the shapes of the old Hebrew letter on coins +, X, from the former of which comes the Greek ταῦ (T).

In the mystical interpretation of the alphabet given by Eusebius (*Præp. Evang.* x. 5) it is evident that *Tade* was called *Tadek*, and *Kaph* was called *Kol*. The Polish Jews still call the former *Tadek*.

Divisions of words.—Hebrew was originally written, like most ancient languages, without any divisions between the words. In most Greek inscriptions there are no such divisions, though in several of the oldest, as the Eugubine Tablets and the Sigeian inscription, there are one or two, while others have as many as three points which serve this purpose. The same is the case with the Phoenician inscriptions. Most have no divisions of words at all, but others have a point, except where the words are closely connected. The cuneiform character has the same point, as well as the Samaritan, and in Cufic the words are separated by spaces, as in the Aramaeo-Egyptian writing. The various readings in the LXX. show that, at the time this version was made, in the Hebrew MSS. which the translators used the words were written in a continuous series. The modern synagogue rolls and

the MSS. of the Samaritan Pentateuch have no vowel-points, but the words are divided, and the Samaritan in this respect differs but little from the Hebrew.

Final letters, &c.—In addition to the letters above described, we find in all Hebrew MSS. and printed books the forms ק. Q. י. Y. which are the shapes assumed by the letters Q. Q. Y. B. Y., when they occur at the end of words. Their invention was clearly due to an endeavour to render reading more easy by distinguishing one word from another, but they are of comparatively modern date. The various readings of the LXX. show, as has been already said, that that version was made at a time when the divisions of words were not marked, and consequently at this time there could be no final letters. Gesenius at first maintained that on the Palmyrene inscriptions there were neither final letters nor divisions of words, but he afterwards admitted, though with a little exhibition of temper, that the final nun was found there, after his error had been pointed out by Kopp (*Bild. u. Schr.* ii. 132; *Gen. Mon. Phoen.* p. 82). In the Aramaeo-Egyptian writing both final קֶ and final נֶ occur, as may be seen in the *Blacas* fragments given by Gesenius. The five final letters "are mentioned in *Bereshith Rabba* (parash. i. fol. 1, 4), and in both Talmuds; in the one (*T. Bab. Sabbat.* fol. 104, 1) they are said to be used by the scribes or prophets, and in the other (*T. Hieros. Megillah.* fol. 71, 4) to be an *Halacah* or tradition of Moses from Sinai; yes, by an ancient writer (*Pirke Eli-ezer*, c. 48) they are said to be known by Abraham" (Gill, *Dissertation concerning the Antiquity of the Heb. Language*, &c., p. 69). The final mem

in the middle of the word מֶמֶר (Is. ix. 6) is mentioned in both Talmuds (*Talm. Bab. Sanhedrin.* fol. 94, 1; *Talm. Jer. Sanh.* fol. 27, 4), and by Jerome (*in loc.*). In another passage Jerome (*Prolog. ad Libr. Reg.*) speaks of the final letters as if of equal antiquity with the rest of the alphabet. The similarity of shape between final mem (D) and samech (D) is indicated by the dictum of Rab Chasda, as given in the Babylonian Talmud (*Megillah.* c. 1; *Shabbath.* fol. 104, 1), that "mem and samech, which were on the Tables (of the Law) stood by a miracle." It was a tradition among the Jews that the letters on the tables of stone given to Moses were cut through the stone, so as to be legible on both sides; hence the miracle by which mem and samech kept their place. The final letters were also known to Epiphanius (*De Mens. et Ponderibus*, §4). In our present copies of the Hebrew Bible there are instances in which final letters occur in the middle of words (see Is. ix. 6, as above), and, on the contrary, at the end of words the ordinary forms of the letters are employed (*Neh.* ii. 3, *Job* xxxviii. 1); but these are only to be regarded as clerical errors, which in some MSS. are corrected. On the ancient Phoenician inscriptions, just as in the Greek uncial MSS., the letters of a word were divided at the end of a line without any indication being given of such division, but in Hebrew MSS. a twofold course has been adopted in this case. If at the end of a line the scribe found that he had not space for the complete word, he either wrote as many letters as he could of this word, but left them unpointed, and put the complete word in the next line, or he made use of what are called extended letters, *literæ dilatabiles* (as בֶּ, יֶ, and the like), in order to fill up the superabundant

space. In the former case, in order to indicate that the word at the end of the line was incomplete, the last of the unpointed letters was left unfinished, or a sign was placed after them, resembling sometimes an inverted 3, and sometimes like Π , Υ , or Σ . If the space left at the end of the line is inconsiderable it is either filled up by the first letter of the next word, or by any letter whatever, or by an arbitrary mark. In some cases, where the space is too small for one or two consonants, the scribe wrote the excluded letters in a smaller form on the margin above the line (Eichhorn, *Einl.* ii. 57-59). That abbreviations were employed in the ancient Hebrew writing is shown by the inscriptions on the Maccabaean coins. In MSS. the frequently recurring words are represented by writing some of their letters only, as למלך or למלכ for למלך , and a frequently recurring phrase by the first letters of its words with the mark of abbreviation; as כי למלך חסדו for כי למלך חסדו , or ייהוה for יהוה , which is also written י , or י . The greater and smaller letters which occur in the middle of words (comp. Pa. lxxx. 16; Gen. ii. 4), the suspended letters (Judg. xviii. 30; Pa. lxxx. 14), and the inverted letters (Num. x. 35), are transferred from the MSS. of the Masoretes, and have all received at the hands of the Jews an allegorical explanation. In Judg. xviii. 30 the suspended nun in the word "Manasseh," without which the name is "Moses," is said to be inserted in order to conceal the disgrace which the idolatry of his grandson conferred upon the great lawgiver. Similarly the small כ in the word לכננתה , "to weep for her" (Gen. xxiii. 2), is explained by Bial Hatturim as indicating that Abraham wept little, because Sarah was an old woman.

Numbers were indicated either by letters or figures. The latter are found on Phœnician coins, on the sarcophagus of Eschmunazar, on the Palmyrene inscriptions, and probably also in the Aramaeo-Egyptian writing. On the other hand, letters are found used as numerals on the Maccabaean coins, and among the Arabs, and their early adoption for the same purpose among the Greeks may have been due to the Phœnicians. It is not too much to conjecture from these analogies that figures and letters representing numbers may have been employed by the ancient Hebrews. It is even possible that many discrepancies in numbers may be explained in this way. For instance, in 1 Sam. vi. 19, for 50,070 the Syriac has 5070; in 1 K. iv. 28 [v. 6] Solomon had 40,000 horses, while in the parallel passage of 2 Chr. ix. 25 he has only 4000; according to 2 Sam. x. 18 David destroyed 700 chariots of the Syrians, while in 1 Chr. xix. 18 the number is increased to 7000. If figures were in use such discrepancies are easily intelligible. On the other hand, the seven years of famine in 2 Sam. xiv. 13 may be reconciled with the three of 1 Chr. xxi. 12 and the LXX. by supposing that a scribe, writing the square character, mistook 3 (= 3) for 7 (= 7). Again, in 2 Chr. xxi. 20, Jehoram dies at the age of 40, leaving a son, Ahaziah, who was 42 (2 Chr. xxii. 2). In the parallel passage of 2 K. viii. 26 Ahaziah is only 22, so that the scribe probably read כב instead of כז . On the whole, Gesenius concludes, the preponderance would be in favour of the letters, but he deprecates any attempt to explain by this means the enormous numbers we

meet with in the descriptions of armies and wealth, and the variations of the Samaritan and LXX. from the Hebrew text in Gen. v.

Vowel-points and diacritical marks.—It is impossible here to discuss fully the origin and antiquity of the vowel-points and other marks which are found in the writing of Hebrew MSS. The most that can be done will be to give a summary of results, and to refer the reader to the sources of fuller information. Almost all the learned Jews of the middle ages maintained the equal antiquity of the vowels and consonants, or at least the introduction of the former by Ezra and the men of the Great Synagogue. The only exceptions to this uniformity of opinion are some few hints of Aben Ezra, and a doubtful passage of the book Cozri. The same view was adopted by the Christian writers Raymond Martini (cir. 1278), Perez de Valentin (cir. 1460), and Nicholas de Lyra, and these are followed by Luther, Calvin, and Pellicanus. The modern date of the vowel-points was first argued by Elias Levita, followed on the same side by Cappellus, who was opposed by the younger Buxtorf. Later defenders of their antiquity have been Gill, James Robertson, and Tychsen. Others, like Hottinger, Pridaux, Schultens, J. D. Michaelis, and Eichhorn, have adopted an intermediate view, that the Hebrews had some few ancient vowel-points which they attached to ambiguous words. "The dispute about the antiquity and origin of the Hebrew vowels commenced at a very early date; for while Mar-Natronai II., Gaon in Sura (858-869), prohibited to provide the copies of the Law with vowels, because these signs had not been communicated on Mount Sinai, but had only been introduced by the sages to assist the reader; the Karaites allowed no scroll of the Pentateuch to be used in the synagogue, unless it was furnished with vowels and accents, because they considered them as a divine revelation, which, like the language and the letter, was already given to Adam, or certainly to Moses" (Dr. Kalisch, *Heb. Gr.* ii. 65). No vowel-points are to be found on any of the Jewish coins, or in the Palmyrene inscriptions, and they are wanting in all the relics of Phœnician writing. Some of the Maltese inscriptions were once thought by Gesenius to have marks of this kind (*Gesch. der Hebr. Spr.* p. 184), but subsequent examination led him to the conclusion that the Phœnician monuments have not a vestige of vowel-points. The same was the case originally in the Estrangelo and Cufic alphabets. A single example of a diacritical mark occurs for the first time on one of the Carthaginian inscriptions (*Gesen. Mon. Phœn.* pp. 56, 179). It appears to correspond to the diacritical mark which we meet with in Syriac writing, and which is no doubt first alluded to by Ephraem Syrus (on Gen. xxxvi. 24, *Opp.* i. 184). The age of this mark in Syriac is uncertain, but it is most nearly connected with the *marketho* of the Samaritans, which is used to distinguish words which have the same consonants, but a different pronunciation and meaning. The first certain indication of vowel-points in a Semitic language is in the Arabic. Three were introduced by Ali, son of Abu-Thaleb, who died A.H. 40. The Sabian writing also has three vowel-points, but its age is uncertain. Five vowel-points and several reading marks were introduced into the Syriac writing by Theophilus and Jacob of Edessa. The present Arabic system of punctuation originated with the introduction of the Nischi character by Ebn Moïsa, who died A.D.

system of points is not indigenous, but transmitted or suggested from without (*Stud. u. Krit.* 1830, ii. p. 589). On such a question it is impossible to pronounce with absolute certainty, but the above conclusion has been arrived at by one of the first Hebrew scholars of Europe, who has devoted especial attention to the subject, and to whose opinion all deference is due.

"According to a statement on a scroll of the Law, which may have been in Susa from the eighth century, Moses the Punctator (Hannakdan) was the first who, in order to facilitate the reading of the Scriptures for his pupils, added vowels to the consonants, a practice in which he was followed by his son Judah, the Corrector or Reviser (Hammagiah). These were the beginnings of a full system of Hebrew points, the completion of which has, by tradition, been associated with the name of the Karaites Acha of Irak, living in the first half of the sixth century, and which comprised the vowels and accents, dagah and raphah, kerī and kethiv. It was, from its local origin, called the Babylonian or Assyrian system. Almost simultaneously with these endeavours, the scholars of Palestine, especially of Tiberias, worked in the same direction, and here Rabbi Mocha, a disciple of Anan the Karaites, and his son Moses, fixed another system of vocalisation (about 570), distinguished as that of Tiberias, which marks still more minutely and accurately the various shades and niceties of tone and pronunciation, and which was ultimately adopted by all the Jews. For though the Karaites, with their characteristic tenacity, and their antagonism to the Rabbinites, clung for some time to the older signs, because they had used them before their secession from the Talmudical sects, they were, at last, in 957, induced to abandon them in favour of those adopted in Palestine. Now the Babylonian signs, besides differing from those of Tiberias in shape, are chiefly remarkable by being almost uniformly placed above the letters. There still exist some manuscripts which exhibit them, and many more would probably have been preserved had not, in later times, the habit prevailed of substituting in old codices the signs of Tiberias for those of Babylonia" (Dr. Kalisch, *Hebr. Gram.* ii. 63, 64).^b From the sixth century downwards the traces of punctuation become more and more distinct. The Masorah mentions by name two vowels, *hamets* and *pathach* (Kalisch, p. 66). The collation of the Palestinian and Babylonian readings (8th cent.) refers at least in two passages to the *mappik* in *He* (Eichhorn, *Eint.* i. 274); but the collation set on foot by Ben Asher and Ben Naphtali (cir. A.D. 1034) has to do exclusively with vowels and readings, and their existence is presupposed in the Arabic of Saadia and the Veneto-Greek version, and by all the Jewish grammarians from the 11th century onwards.

It now remains to say a few words on the accents. Their special properties and the laws by which they are regulated properly belong to the department of Hebrew grammar, and full information on these points will be found in the works of Gesenius, Hupfeld, Ewald, and Kalisch. The object of the accents is twofold. 1. They serve to mark the tone syllable, and at the same time to show the

relation of each word to the sentence: hence they are called *מַעְבָּרִים*, as marking the sense. 2. They indicate the modulation of the tone according to which the Old Testament was recited in the synagogues, and were hence called *מִלְחָמָה*. "The manner of recitation was different for the Pentateuch, the prophets, and the metrical books (Job, the Proverbs, and the Psalms): old modes of cantillation of the Pentateuch and the prophets (in the Haphtharoth) have been preserved in the German and Portuguese synagogues; both differ, indeed, considerably, yet manifestly show a common character, and are almost like the same composition sung in two different keys; while the chanting of the metrical books, not being employed in the public worship, has long been lost" (Kalisch, p. 84). Several modern investigators have decided that the use of the accents for guiding the public recitations is anterior to their use as marking the tone of words and syntactical construction of sentences. The great number of the accents is in favour of this hypothesis, since one sign alone would have been sufficient to mark the tone, and the logical relation of the different parts of a sentence could have been indicated by a much smaller number. Gesenius, on the other hand, is inclined to think that the accents at first served to mark the tone and the sense (*Gesch.* p. 221). The whole question is one of mere conjecture. The advocates for the antiquity of the accents would carry them back as far as the time of the ancient Temple service. The Gemara (*Nedarim*, fol. 37, 2; *Megillah*, c. i. fol. 3) makes the Levites recite according to the accents even in the days of Nehemiah.

Writing materials, &c.—The oldest documents which contain the writing of a Semitic race are probably the bricks of Nineveh and Babylon on which are impressed the cuneiform Assyrian inscriptions. Inscribed bricks are mentioned by Pliny (vii. 56) as used for astronomical observations by the Babylonians. There is, however, no evidence that they were ever employed by the Hebrews,^c who certainly at a very early period practised the more difficult but not more durable method of writing on stone (Ex. xxiv. 12, xxxi. 18, xxxii. 15, xxxiv. 1, 28; Dent. x. 1, xxvii. 1; Josh. viii. 32), on which inscriptions were cut with an iron graver (Job xix. 24; Jer. xvii. 1). They were moreover acquainted with the art of engraving upon metal (Ex. xxviii. 36) and gems (Ex. xxviii. 9). Wood was used upon some occasions (Num. xvii. 3; comp. Hom. *Il.* vii. 175), and writing tablets of box-wood are mentioned in 2 Esd. xiv. 24. The "lead," to which allusion is made in Job xix. 24, is supposed to have been poured when melted into the cavities of the stone made by the letters of an inscription, in order to render it durable,^d and does not appear ever to have been used by the Hebrews as a writing material, like the *χαλκράς μολύβδινος* at Thebes, on which were written Hesiod's *Works and Days* (Paus. ix. 31, §4; comp. Plin. xiii. 21). Inscriptions and documents which were intended to be permanent were written on tablets of brass (1 Macc. viii. 22, xiv. 27), but from the manner in which they are mentioned it is clear that their use was exceptional. It is most probable that the most

^b For further information on the Babylonian system of punctuation, see Pinsker's *Einkleitung in die Babylonisch-Hebräische Punctations-system*, just published at Vienna (1863).

^c The case of Ezekiel (iv. 1) is evidently an exception.

^d Copper was used for the same purpose. M. Bolla found traces of it in letters on the parchment stela of Khorsabad (Layard, *Vin.* iii. 165).

ancient as well as the most common material which the Hebrews used for writing was dressed skin in some form or other. We know that the dressing of skins was practised by the Hebrews (Ex. xxv. 5; Lev. xvi. 48), and they may have acquired the knowledge of the art from the Egyptians, among whom it had attained great perfection, the leather-cutters constituting one of the principal subdivisions of the third caste. The fineness of the leather, says Sir G. Wilkinson, "employed for making the straps placed across the bodies of mummies, discovered at Thebes, and the beauty of the figures stamped upon them, satisfactorily prove the skill of the leather-cutters," and the antiquity of embossing: some of these bearing the names of kings who ruled Egypt about the period of the Exodus, or 3300 years ago" (*Anc. Eg.* iii. 155). Perhaps the Hebrews may have borrowed, among their other acquirements, the use of papyrus from the Egyptians, but of this we have no positive evidence. Papyrus are found of the most remote Pharaonic age (Wilkinson, *Anc. Eg.* iii. 148), so that Pliny is undoubtedly in error when he says that the papyrus was not used as a writing material before the time of Alexander the Great (xiii. 21). He probably intended to indicate that this was the date of its introduction to Europe. In the Bible the only allusions to the use of papyrus are in 2 John 12, where *χάρτις* occurs, which refers especially to papyrus paper, and 3 Macc. iv. 20, where *χαρτίς* is found in the same sense. In Josephus (*Ant.* iii. 11, §8) the trial of adultery is made by writing the name of God on a skin, and the 70 men who were sent to Ptolemy from Jerusalem by the high-priest Eleazar, to translate the Law into Greek, took with them the skins on which the Law was written in golden characters (*Ant.* xii. 2, §10). The oldest Persian annals were written on skins (Diod. Sic. ii. 32), and these appear to have been most frequently used by the Shemitic races if not peculiar to them.* Of the byssus which was used in India before the time of Alexander (Strabo xv. p. 717), and the palm-leaves mentioned by Pliny (vii. 23) there is no trace among the Hebrews, although we know that the Arabs wrote their earliest copies of the Koran upon the roughest materials, as stones, the shoulder-bones of sheep, and palm-leaves (De Sacy, *Mém. de l'Acad. des Inscriptions* i. p. 307). Herodotus, after telling us that the Ionians learnt the art of writing from the Phœnicians, adds that they called their books skins (*τὰς βιβλους δερμάτινας*), because they made use of sheep-skins and goat-skins when short of paper (*βιβλος*). Among the Cyprians, a writing-master was called *δερματιστα*. Parchment was used for the MSS. of the Pentateuch in the time of Josephus, and the *μεμβράνη* of 2 Tim. iv. 13, were skins of parchment. It was one of the provisions in the Talmud that the Law should be written on the skins of clean animals, tame or wild, or even of clean birds. There are three kinds of skins distinguished, on which the roll of the Pentateuch may be written: 1. *הָעֵלֶף*, *keleph* (*May.* ii. 2; *Shabb.* viii. 3); 2. *דֶּם־חַסִּידִים* = *δερματίδων* or *δέρματος*; and 3. *גִּבֹּל*, *gibol*. The last is made of the undivided skin, after the hair is removed and it has

* The word for "book," *סֵפֶר*, *sépher*, is from a root, *סָפַר*, *sáphar*, "to scrape, shave," and indirectly points to the use of skin as a writing-material.

been properly dressed. For the other two the skin was split. The part with the hairy side was called *keleph*, and was used for the *tephillin* or phylacteries; and upon the other ("דָּבָר") the *mezuzoth* were written (Maimonides, *Hilc. Tephil.*). The skins when written upon were formed into rolls (*מִגִּלְלוֹת*, *megillóth*; Pa. xl. 8; comp. Is. xxxiv. 4; Jer. xxxvi. 14; Ex. ii. 9; Zech. v. 1). They were rolled upon one or two sticks and fastened with a thread, the ends of which were sealed (Is. xxix. 11; Dan. xii. 4; Rev. v. 1, &c.). Hence the words *גָּבַל*, *gábal* (*εἰσέβαλεν*), to roll up (Is. xxxiv. 4; Rev. vi. 14), and *פָּתַח*, *páts* (*ἀνατίσκειν*), to unroll (2 K. xix. 14; Luke iv. 17), are used of the closing and opening of a book. The rolls were generally written on one side only, except in Ex. ii. 9; Rev. v. 1. They were divided into columns (*מִלְחָמָה*, *milchámá*, lit. "doon," A. V. "leaves," Jer. xxxvi. 23); the upper margin was to be not less than three fingers broad, the lower not less than four; and a space of two fingers' breadth was to be left between every two columns (Wachner, *Ant. Ebraeor.* vol. i. sect. 1, cap. xiv. §337). In the Herculaneum rolls the columns are two fingers broad, and in the MSS. in the library at Stuttgart there are three columns on each side, each three inches broad, with an inch space between the columns, and margins of three inches wide (Leyrer in Herzog's *Encycl.* "Schriftzeichen"). The case in which the rolls were kept was called *revex* or *תֵּיבָה*, Talmudic *תֵּיבָה*, *teibá*, or *תֵּיבָה*, *teibá*, *corod*. But besides skins, which were used for the more permanent kinds of writing, tablets of wood covered with wax (Luke i. 63, *παραβία*) served for the ordinary purposes of life. Several of these were fastened together and formed volumes (*מִסְכָּה* = *tomos*). They were written upon with a pointed style (*דָּבָר*, 'et, Job xix. 24), sometimes of iron (Pa. xiv. 2; Jer. viii. 8, xvii. 1). For harder materials a graver (*חֶרֶט*, *cheret*, Ex. xxxii. 4; Is. viii. 1) was employed: the hard point was called *חֶרֶט*, *cheret* (*Jer.* xvii. 1). For parchment or skins a reed was used (3 John 13; 3 Macc. iv. 20), and according to some the Law was to be written with nothing else (Wachner, §334). The ink, *חֹלֶם*, *chólém* (*Jer.* xxxvi. 18), literally "black," like the Greek *μέλας* (2 Cor. iii. 3; 2 John 12; 3 John 13), was to be of lamp-black dissolved in gall juice, though sometimes a mixture of gall juice and vitriol was allowable (Wachner, §335). It was carried in an inkstand (*תֵּיבַת הַחֹלֶם*, *teibát hachólém*, which was suspended at the girdle (Ex. ix. 2, 3), as is done at the present day in the East. The modern scribes "have an apparatus consisting of a metal or ebony tube for their reed pens, with a cup or bulb of the same material, attached to the upper end, for the ink. This they thrust through the girdle, and carry with them at all times" (Thomson, *The Land and the Book*, p. 131). Such a case for holding pens, ink, and other materials for writing is called in the Mishna *תֵּיבַת הַחֹלֶם*, *teibát hachólém*, or *תֵּיבַת הַחֹלֶם*, *teibát hachólém* (*colamarién*; Mishn. *Celim*, ii. 7; *Mikv.* x. 1), while *תֵּיבַת הַחֹלֶם*, *teibát hachólém* (*Mishn. Celim*, xvi. 8), is a case for carrying pens, pen-knife style, and other implements of the writer.

YARN

art. To professional scribes there are allusions in Pt. xiv. 1 [2]; Exr. vii. 6; 2 Esdr. xiv. 24. In the language of the Talmud these are called *לִבְרִית*, *liblrit*, which is a modification of the Lat. *libellari* (Talm. *Shabb.* fol. 16, 1).

For the literature of this subject, see especially Gesenius, *Geschichte der hebräischen Sprache und Schrift*, 1815; *Lehrgebäude der Hebr. Sprache*, 1817; *Monumenta Phœnicia*, 1837; Art. *Palaographie* in Ersch and Gruber's *Allg. Encycl.*; Hupfeld, *Ausführliche Hebräische Grammatik*, 1841, and his articles in the *Studien und Kritiken*, 1830, Band 2; A. T. Hoffmann, *Grammatica Syriaca*, 1827; A. G. Hoffmann, Art. *Hebräische Schrift* in Ersch and Gruber's *Lehrgebäude der Aramäischen Idiome*, 1835; Ewald, *Ausführliches Lehrbuch der Hebr. Sprache*; Saalschütz, *Forschungen im Gebiete der Hebräisch-Aegyptischen Archäologie*, 1838; besides other works, which have been referred to in the course of this article. [W. A. W.]

X

XANTHIOUS. [MONTH, p. 417.]

Y

YARN (יָרֵן; יָרֵן). The notice of yarn is contained in an extremely obscure passage in 1 K. x. 28 (2 Chr. i. 18): "Solomon had horses brought out of Egypt, and linen yarn; the king's merchants received the linen yarn at a price." The LXX. gives *αὐτὸν τοῦ βασιλέως*, implying an original reading of *יָרֵן*; the Vulg. has *de Coa*, which is merely a Latinized form of the original. The Hebrew Received Text is questionable, from the circumstance that the second *miklah* has its final vowel lengthened as though it were in the *status constructus*. The probability is that the term does refer to some entrepôt of Egyptian commerce, but whether Tekoah, as in the LXX., or Coa, as in the Vulg., is doubtful. Gesenius (*Thes.* p. 1202) gives the sense of "number" as applying equally to the merchants and the horses:—"A band of the king's merchants bought a *droes* (of horses) at a price"; but the verbal arrangement in 2 Chr. is opposed to this rendering. Thenius (*Exeg. Hdb.* on 1 K. x. 28) combines this sense with the former, giving to the first *miklah* the sense "from Tekoah," to the second the sense of "drove." Bertheau (*Exeg. Hdb.* on 2 Chr. i. 10) and Fürst (*Lex. s. v.*) side with the Vulgate, and suppose the place called Coa to have been on the Egyptian frontier:—"The king's merchants from Coa (*i. e.* stationed at Coa) took the horses from Coa at a price." The sense adopted in the A. V. is derived from Jewish interpreters. [W. L. B.]

YEAR (שָׁנָה; *šer: annus*), the highest ordinary division of time. The Hebrew name is identical with the root שָׁנָה, "he or it repeated, did the second time;" with which are cognate the ordinal numeral שֵׁנִי, "second," and the cardinal, שְׁנַיִם, "two." The meaning is therefore thought to be "an iteration," by Gesenius, who compares the Latin *annus*, properly a circle. Gesenius also

YEAR

1803

compares the Arabic حَوْل, which he says signifies "a circle, year." It signifies "a year," but not "a circle," though sometimes meaning "around:"

its root is حَالَ, "it became altered or changed, it shifted, passed, revolved and passed, or became complete" (on Mr. Lane's authority). The ancient Egyptian RENP, "a year," seems to resemble *annus*; for in Coptic one of the forms of its equivalent, ϣⲉⲛⲓ, the Bashmuric ϣⲉⲛⲓ, ϣⲉⲛⲓ, is identical with the Sahidic ϣⲉⲛⲓ, "a handle, ring," ϣⲉⲛⲓ, "rings." The sense of the Hebrew might either be a recurring period, or a circle of seasons, or else a period circling through the seasons. The first sense is agreeable with any period of time; the second, with the Egyptian "primitive year," which, by the use of tropical seasons as divisions of the "Vague year," is shown to have been tropical in reality or intention; the third agrees with all "wandering years."

I. Years, properly so called.

Two years were known to, and apparently used by, the Hebrews.

1. A year of 360 days, containing twelve months of thirty days each, is indicated by certain passages in the prophetic Scriptures. The time, times, and a half, of Daniel (vii. 25, xii. 7), where "time" (Ch. יָמִים, Heb. יָמִים) means "year," evidently represent the same period as the 42 months (Rev. xi. 2) and 1260 days of the Revelation (xi. 3, xii. 6), for $360 \times 3 \cdot 5 = 1260$, and $30 \times 42 = 1260$. This year perfectly corresponds to the Egyptian Vague year, without the five intercalary days. It appears to have been in use in Noah's time, or at least in the time of the writer of the narrative of the Flood, for in that narrative the interval from the 17th day of the 2nd month to the 17th day of the 7th of the same year appears to be stated to be a period of 150 days (Gen. vii. 11, 24, viii. 3, 4, comp. 13), and, as the 1st, 2nd, 7th, and 10th months of one year are mentioned (viii. 13, 14, vii. 11, viii. 4, 5), the 1st day of the 10th month of this year being separated from the 1st day of the 1st month of the next year by an interval of at least 54 days (viii. 5, 6, 10, 12, 13), we can only infer a year of 12 months. Ideler disputes the former inference, arguing that as the water first began to sink after 150 days (and then had been 15 cubits above all high mountains), it must have sunk for some days ere the Ark could have rested on Ararat, so that the second date must have been more than 150 days later than the first (*Handbuch*, i. 69, 70, 478, 479). This argument depends upon the meaning of the expression "high mountains," and upon the height of "the mountains of Ararat," upon which the Ark rested (Gen. viii. 4), and we are certainly justified by Shemitic usage, if we do not consider the usual inference of the great height attained by the Flood to be a necessary one (*Genesis of the Earth and of Man*, 2nd ed. pp. 97, 98). The exact correspondence of the interval mentioned to 5 months of 30 days each, and the use of a year of 360 days, or 12 such months, by the prophets, the latter fact overlooked by Ideler, favour the idea that such a year is here meant, unless indeed one identical with the Egyptian Vague Year, of 12 months of 30 days and 5 intercalary days. The settlement of this question de-

pends upon the nature and history of these years, and our information on the latter subject is not sufficiently certain to enable us to do more than hazard a conjecture.

A year of 360 days is the rudest known. It is formed of 12 spurious lunar months, and was probably the parent of the lunar year of 354 days, and the Vague Year of 365. That it should have continued any time in use would be surprising were it not for the convenient length of the months. The Hebrew year, from the time of the Exodus, as we shall see, was evidently lunar, though in some manner rendered virtually solar, and we may therefore infer that the lunar year is as old as the date of the Exodus. As the Hebrew year was not an Egyptian year, and as nothing is said of its being new, save in its time of commencement, it was perhaps earlier in use among the Israelites, and either brought into Egypt by them or borrowed from Shemite settlers.

The Vague Year was certainly in use in Egypt as remote an age as the earlier part of the xliith dynasty (B.C. cir. 2000), and there can be no reasonable doubt that it was there used at the time of the building of the Great Pyramid (B.C. cir. 2350). The intercalary days seem to be of Egyptian institution, for each of them was dedicated to one of the great gods, as though the innovation had been thus made permanent by the priests, and perhaps rendered popular as a series of days of feasting and rejoicing. The addition would, however, date from a very early period, that of the final settlement of the Egyptian religion.

As the lunar year and the Vague Year run up parallel to so early a period as that of the Exodus, and the former seems to have been then Shemite, the latter then, and for several centuries earlier, Egyptian, and probably of Egyptian origin, we may reasonably conjecture that the former originated from a year of 360 days in Asia, the latter from the same year in Africa, this primitive year having been used by the Noachians before their dispersion.

2. The year used by the Hebrews from the time of the Exodus may be said to have been then instituted, since a current month, Abib, on the 14th day of which the first Passover was kept, was then made the first month of the year. The essential characteristics of this year can be clearly determined, though we cannot fix those of any single year. It was essentially solar, for the offerings of productions of the earth, first-fruits, harvest-produce, and ingathered fruits, were fixed to certain days of the year, two of which were in the periods of great feasts, the third itself a feast reckoned from one of the former days. It seems evident that the year was made to depend upon these times, and it may be observed that such a calendar would tend to cause thankfulness for God's good gifts, and would put in the background the great luminaries which the heathen worshipped in Egypt and in Canaan. Though the year was thus essentially solar, it is certain that the months were lunar, each commencing with a new moon. There must therefore have been some method of adjustment. The first point to be decided is how the commencement of each year was fixed. On the 16th day of Abib ripe ears of corn were to be offered as first-fruits of the harvest (Lev. ii. 14, xiii. 10, 11): this was the day on which the sickle was begun to be put to the corn (Deut. xvi. 9), and no doubt Josephus is right in stating that until the offering of first-fruits had been made no harvest-work was

to be begun (*Ant.* iii. 10, §5). He also states that ears of barley were offered (*ibid.*). That this was the case, and that the ears were the earliest ripe, is evident from the following circumstances. The reaping of barley commenced the harvest (2 Sam. xxi. 9), that of wheat following, apparently without any considerable interval (Ruth ii. 23). On the day of Pentecost thanksgiving was offered for the harvest, and it was therefore called the "Feast of Harvest." It was reckoned from the commencement of the harvest, on the 16th day of the 1st month. The 50 days must include the whole time of the harvest of both wheat and barley throughout Palestine. According to the observations of modern travellers, barley is ripe, in the warmest parts of Palestine, in the first days of April. The barley-harvest therefore begins about half a month or less after the vernal equinox. Each year, if solar, would thus begin at about that equinox, when the earliest ears of barley must be ripe. As, however, the months were lunar, the commencement of the year must have been fixed by a new moon near this point of time. The new moon must have been that which fell about or next after the equinox, not more than a few days before, on account of the offering of first-fruits. Ideler, whose observations on this matter we have thus far followed, supposes that the new moon was chosen by observation of the forwardness of the barley-crops in the warmer parts of the country (*Handbuch*, i. 490). But such a method would have caused confusion on account of the different times of the harvest in different parts of Palestine; and in the period of the Judges there would often have been two separate commencements of the year in regions divided by hostile tribes, and in each of which the Israelite population led an existence almost independent of any other branch. It is more likely that the Hebrews would have determined their new year's day by the observation of heliacal or other star-risings or settings known to mark the right time of the solar year. By such a method the beginning of any year could have been fixed a year before, either to one day, or, supposing the month-commencements were fixed by actual observation, within a day or two. And we need not doubt that the Israelites were well acquainted with such means of marking the periods of a solar year. In the ancient Song of Deborah we read how "They fought from heaven; the stars in their courses fought against Sisera. The river of Kishon swept them away, that ancient river, the river Kishon" (Judg. v. 20, 21). The stars that marked the times of rain are thus connected with the swelling of the river in which the fugitive Canaanites perished. So too we read how the LORD demanded of Job, "Canst thou bind the sweet influences of Cimah, or loose the bands of Cesil?" (Job xxxviii. 31). "The best and most fertilizing of the rains," in Palestine and the neighbouring lands, save Egypt, "fall when the Pleiades set at dawn (not exactly heliacally), at the end of autumn; rain scarcely ever falling at the opposite season, when Scorpio sets at dawn." That Cimah signifies the Pleiades does not admit of reasonable doubt, and Cesil, as opposite to it, would be Scorpio, being identified with Cor Scorpiionis by Aben Ezra. These explanations we take from the *ARTIC FAMINE* [vol. i. p. 610 b, and note]. Therefore it cannot be questioned that the Israelites, even during the troubled time of the Judges, were well acquainted with the method of determining the

YEAR

seasons of the solar year by observing the stars. Not alone was this the practice of the civilised Egyptians, but, at all times of which we know their history, of the Arabs, and also of the Greeks in the time of Hesiod, while yet their material civilization and science were rudimentary. It has always been the custom of pastoral and scattered peoples, rather than of the dwellers in cities; and if the Egyptians be thought to form an exception, it must be recollected that they used it at a period not remote from that at which their civilization came from the plain of Shinar.

It follows, from the determination of the proper new moon of the first month, whether by observation of a stellar phenomenon, or of the forwardness of the crops, that the method of intercalation can only have been that in use after the Captivity, the addition of a thirteenth month whenever the twelfth ended too long before the equinox for the offering of the first-fruits to be made at the time fixed. This method is in accordance with the permission granted to postpone the celebration of the Passover for one month in the case of any one who was legally unclean, or journeying at a distance (Num. ix. 9-13); and there is a historical instance in the case of Hezekiah of such a postponement for both reasons, of the national celebration (2 Chr. xxx. 1-3, 15). Such a practice as that of an intercalation varying in occurrence is contrary to western usage; but the like prevails in all Muslim countries in a far more inconvenient form in the case of the commencement of every month. The day is determined by actual observation of the new moon, and thus a day is frequently unexpectedly added to or deducted from a month at one place, and months commence on different days at different towns in the same country. The Hebrew intercalation, if determined by stellar phenomena, would not be liable to a like uncertainty, though such may have been the case with the actual day of the new moon.

The later Jews had two commencements of the year, whence it is commonly but inaccurately said that they had two years, the sacred year and the civil. We prefer to speak of the sacred and civil reckonings. Ideler admits that these reckonings obtained at the time of the Second Temple. The sacred reckoning was that instituted at the Exodus, according to which the first month was Abib: by the civil reckoning the first month was the seventh. The interval between the two commencements was thus exactly half a year. It has been supposed that the institution at the time of the Exodus was a change of commencement, not the introduction of a new year, and that thenceforward the year had two beginnings, respectively at about the vernal and the autumnal equinoxes. The former supposition is a hypothesis, the latter may almost be proved. The strongest point of evidence as to two beginnings of the year from the time of the Exodus, strangely unnoticed in this relation by Ideler, is the circumstance that the sabbatical and jubilee years commenced in the 7th month, and no doubt on the 10th day of the 7th month, the Day of Atonement (Lev. xiv. 9, 10), and as this year immediately followed a sabbatical year, the latter must have begun in the same manner. Both were full years, and therefore must have commenced on the first day of the month, the Day of Atonement

YEAR

1805

standing in the same relation to its beginning, and perhaps to the civil beginning of the year, as did the Passover to the sacred beginning. This would be the most convenient, if not the necessary commencement of a year of total cessation from the labours of agriculture, as a year so commencing would comprise the whole round of such occupations in regular sequence from seed-time to harvest, and from harvest to vintage and gathering of fruit. The command as to both years, apart from the mention of the Day of Atonement, clearly shows this, unless we suppose, but this is surely unwarrantable, that the injunction in the two places in which it occurs follows the regular order of the seasons of agriculture (Ex. xxiii. 10, 11; Lev. xiv. 3, 4, 11), but that this was not intended to apply in the case of the observance. Two expressions, used with reference to the time of the Feast of Ingathering on the 15th day of the 7th month, must be here noticed. This feast is spoken of as *הַיָּמִין הַשְּׁמִינִי*, "in the going out" or "end of the year" (Ex. xxiii. 16), and as *הַיָּמִין הַשְּׁמִינִי*, "[at] the change of the year" (xxxiv. 22), the latter a vague expression, as far as we can understand it, but quite consistent with the other, whether indicating the turning-point of a natural year, or the half of the year by the sacred reckoning. The Rabbins use the term *הַיָּמִין הַשְּׁמִינִי* to designate the commencement of each of the four seasons into which they divide the year (*Handbuch*, i. pp. 550, 551). Our view is confirmed by the similarity of the 1st and 7th months as to their observances, the one containing the Feast of Unleavened Bread from the 15th to the 21st inclusive; the other, that of Tabernacles, from the 15th to the 22nd. Evidence in the same direction is found in the special sanctification of the 1st day of the 7th month, which in the blowing of trumpets resembles the proclamation of the Jubilee year on the Day of Atonement. We therefore hold that from the time of the Exodus there were two beginnings of the year, with the 1st of the 1st and the 1st of the 7th month, the former being the sacred reckoning, the latter, used for the operations of agriculture, the civil reckoning. In Egypt, in the present day, the Muslims use the lunar year for their religious observances, and for ordinary affairs, except those of agriculture, which they regulate by the Coptic Julian year.

We must here notice the theories of the derivation of the Hebrew year from the Egyptian Vague year, as they are connected with the tropical point or points, and agricultural phenomena, by which the former was regulated. The Vague year was commonly used by the Egyptians; and from it only, if from an Egyptian year, is the Hebrew likely to have been derived. Two theories have been formed connecting the two years at the Exodus. (1.) Some hold that Abib, the first month of the Hebrew year by the sacred reckoning, was the Egyptian Epiphi, called in Coptic *ΕΠΙΦΙ*, and in Arabic, by the

modern Egyptians, *أبيب*, Abee, or Ebee, the 11th month of the Vague year. The similarity of sound is remarkable, but it must be remembered that the Egyptian name is derived from that of the goddess of the month, PEP-T or APAP-T (?), whereas the

* The names of the Egyptian months, derived from their divinities, are alone known to us in Greek and

Coptic forms. These forms are shown by the names of the divinities given in the sculptures of the ceiling of the

Hebrew name has the sense of "an ear of corn, a green ear," and is derived from the unused root קנע , "to grow" in קנע , "verdure," קנע , Chaldean, "fruit," קנע .

קנע , "green fodder." Moreover, the Egyptian P is rarely, if ever, represented by the Hebrew ק , and the converse is not common. Still stronger evidence is afforded by the fact that we find in Egyptian the root AB, "a nosegay," which is evidently related to Abib and its cognates. Supposing, however, that the Hebrew calendar was formed by fixing the Egyptian Epiphi as the first month, what would be the chronological result? The latest date to which the Exodus is assigned is about B.C. 1320. In the Julian year B.C. 1320, the month Epiphi of the Egyptian Vague year commenced May 16, 44 days after the day of the vernal equinox, April 2, very near which the Hebrew year must have begun. Thus at the latest date of the Exodus, there is an interval of a month and a half between the beginning of the Hebrew year and Epiphi 1. This interval represents about 180 years, through which the Vague year would retrograde in the Julian until the commencement of Epiphi corresponded to the vernal equinox, and no method can reduce it below 100. It is possible to effect thus much by conjecturing that the month Abib began somewhat after this tropical point, though the precise details of the state of the crops at the time of the plagues, as compared with the phenomena of agriculture in Lower Egypt at the present day, make half a month an extreme extension. At the time of the plague of hail, the barley was in the ear and was smitten with the flax, but the wheat was not sufficiently forward to be destroyed (Ex. ix. 31, 32). In Lower Egypt, at the present day, this would be the case about the end of February and beginning of March. The Exodus cannot have taken place many days after the plague of hail, so that it must have occurred about or a little after the time of the vernal equinox, and thus Abib cannot possibly have begun much after that tropical point: half a month is therefore excessive. We have thus carefully examined the evidence as to the supposed derivation of Abib from Epiphi, because it has been carelessly taken for granted, and more carelessly alleged in support of the latest date of the Exodus.

(2.) We have founded an argument for the date of the Exodus upon another comparison of the Hebrew year and the Vague year. We have seen that the sacred commencement of the Hebrew year was at the new moon about or next after, but not much before, the vernal equinox: the civil commencement must usually have been at the new moon nearest the autumnal equinox. At the earliest date of the Exodus computed by modern chronologists, about the middle of the 17th century B.C., the Egyptian Vague year commenced at or about the latter time. The Hebrew year, reckoned from the civil commencement, and the Vague year,

therefore, then nearly or exactly coincided. We have already seen that the Hebrews in Egypt, if they used a foreign year, must be supposed to have used the Vague year. It is worth while to inquire whether a Vague year of this time would further suit the characteristics of the first Hebrew year. It would be necessary that the 14th day of Abib, on which fell the full moon of the Passover of the Exodus, should correspond to the 14th of Phamenoth, in a Vague year commencing about the autumnal equinox. A full moon fell on the 14th of Phamenoth, or Thursday, April 21, B.C. 1652, of a Vague year commencing on the day of the autumnal equinox, Oct. 10, B.C. 1653. A full moon would not fall on the same day of the Vague year within a shorter interval than twenty-five years, and the triple near coincidence of new moon, Vague year, and autumnal equinox, would not recur in less than 1500 Vague years (*Enc. Brit.* 8th ed. *Egypt*, p. 458). This date of the Exodus, B.C. 1652, is only four years earlier than Hale's, B.C. 1648. In confirmation of this early date, it must be added that in a list of confederates defeated by Thothmes III. at Megiddo in the 23rd year of his reign, are certain names that we believe can only refer to Israelite tribes. The date of this king's accession cannot be later than about B.C. 1460, and his 23rd year cannot therefore be later than about B.C. 1440.¹ Were the Israelites then settled in Palestine, no date of the Exodus but the longest would be tenable. [CHRONOLOGY.]

II. Divisions of the Year.—1. *Seasons*. Two seasons are mentioned in the Bible, קַיִץ , "summer," and חֹרֶף , "winter." The former properly means the time of cutting fruits, the latter, that of gathering fruits; they are therefore originally rather summer and autumn than summer and winter. But that they signify ordinarily the two grand divisions of the year, the warm and cold seasons, is evident from their use for the whole year in the expression קַיִץ וְחֹרֶף , "summer and winter" (Ps. lxxiv. 17; Zech. xiv. 8, perhaps Gen. viii. 22), and from the mention of "the winter house" (Jer. xxxvi. 22) and "the summer house" (Am. iii. 15, where both are mentioned together). Probably חֹרֶף , when used without reference to the year (as in Job xxix. 4), retains its original signification. In the promise to Noah, after the Flood, the following remarkable passage occurs: "While the earth remaineth, seed-time and harvest, and cold and heat, and summer and winter, and day and night shall not cease" (Gen. viii. 22). Here "seed-time," זֶרְעָה , and "harvest," קָצִיר , are evidently the agricultural seasons. It seems unreasonable to suppose that they mean winter and summer, as the beginnings of the periods of sowing and of harvest are not separated by six months, and they do not last for six months each, or nearly so long a time. The phrase "cold and heat," חֹרֶף וְקַיִץ , probably

Ramesseum of El-Karnah to be corrupt; but in several cases they are traceable. The following are certain:—

1. ṯwt , ṯwt , divinity TEET (Thoth), as well as a goddess. 2. ṯwt , ṯwt , PTEH, i.e. PA-PTEH, belonging to Ptah. 3. ṯwt , ṯwt , HAT-HAR. 9. ṯwt , ṯwt , KHUNS, i.e. PA-KHUNS. 11. ṯwt , ṯwt , PEP-T, or APA-T. The names of months are therefore, in their corrupt

forms, either derived from the names of divinities, or the same as those names. The name of the goddess of Epiphi is written PT TEE, or PT, "twice." As T is the feminine termination, the root appears to be P, "twice," thus PEP-T or APAT-T, the latter being Lepsius's reading. (See Lepsius, *Denkmäler*, abth. iii. bl. 170, 171, *Chron. d. Äg.* i. p. 141, and Poole, *Horae Aegyptiacae*, p. 7-8, 14, 18, 18.)

¹ The writer's paper on this subject not having yet been published, he must refer to the abstract in the *Athenaeum* No. 1647, Mar. 21, 1863.

indicates the great alternations of temperature. The whole passage indeed speaks of the alternations of nature, whether of productions, temperature, the seasons, or light and darkness. As we have seen, the year was probably then a wandering one, and therefore the passage is not likely to refer to it, but to natural phenomena alone. [SEASONS; CHRONOLOGY.]

2. *Months*.—The Hebrew months, from the time of the Exodus, were lunar. The year appears ordinarily to have contained twelve, but, when intercalation was necessary, a thirteenth. The older year contained twelve months of thirty days each. [MONTH; CHRONOLOGY.]

3. *Weeks*.—The Hebrews, from the time of the institution of the Sabbath, whether at or before the Exodus, reckoned by weeks, but, as no lunar year could have contained a number of weeks without a fractional excess, this reckoning was virtually independent of the year as with the Muslims. [WEEK; SABBATH; CHRONOLOGY.]

4. *Festivals, holy days, and fasts*.—The Feast of the Passover was held on the 14th day of the 1st month. The Feast of Unleavened Bread lasted 7 days; from the 15th to the 21st, inclusive, of the same month. Its first and last days were kept as sabbaths. The Feast of Weeks, or Pentecost, was celebrated on the day which ended seven weeks counted from the 18th of the 1st month, that day being excluded. It was called the "Feast of Harvest," and "Day of First-fruits." The Feast of Trumpets (lit. "of the sound of the trumpet") was kept as a sabbath on the 1st day of the 7th month. The Day of Atonement (lit. "of Atonements") was a fast, held the 10th day of the 7th month. The "Feast of Tabernacles," or "Feast of Gathering," was celebrated from the 15th to the 22nd day, inclusive, of the 7th month. Additions made long after the giving of the Law, and not known to be of higher than priestly authority, are the Feast of Purim, commemorating the defeat of Haman's plot; the Feast of the Dedication, recording the cleansing and re-dedication of the Temple by Judas Maccabeus; and four fasts.

III. *Sacred Years*.—1. The Sabbatical year, שְׁנַת הַשְּׁבִיעִית, "the fallow year," or, possibly, "year of remission," or שְׁנַת הַרְמִיָּה alone, kept every seventh year, was commanded to be observed as a year of rest from the labours of agriculture and of remission of debts. Two Sabbatical years are recorded, commencing and current, B.C. 164-3 and 136-5. [SABBATICAL YEAR; CHRONOLOGY.]

2. The Jubilee year, שְׁנַת הַיּוֹבֵל, "the year of the trumpet," or יוֹבֵל alone, a like year, which immediately followed every seventh Sabbatical year. It has been disputed whether the Jubilee year was every 49th or 50th: the former is more probable. [JUBILEE; CHRONOLOGY.] [R. S. P.]

YOKE. 1. A well-known implement of husbandry, described in the Hebrew language by the terms *mét*, *médáh*, and *'ól*, the two former specifically applying to the bows of wood out of which it was constructed, and the last to the application (*'binding*) of the article to the neck of the ox. The expressions are combined in Lev. xvi. 13 and Ex. xxxiv. 27, with the meaning, "bands of the yoke." The term "yoke" is frequently used metaphorically

for subjection (e. g. 1 K. xii. 4, 9-11, Is. ix. 4; Jer. v. 5): hence an "iron yoke" represents an unusually galling bondage (Deut. xxviii. 48; Jer. xxviii. 13). 2. A pair of oxen, so termed as being yoked together (1 Sam. xi. 7; 1 K. xix. 19, 21). The Hebrew term, *tzemed*, is also applied to asses (Judg. xix. 10) and mules (2 K. v. 17), and even to a couple of riders (Is. xxi. 7). 3. The term *tzemed* is also applied to a certain amount of land, equivalent to that which a couple of oxen could plough in a day (Is. v. 10; A. V. "acre"), corresponding to the Latin *jugum* (Varro, *R. R.* i. 10). The term stands in this sense in 1 Sam. xiv. 14 (A. V. "yoke"); but the text is doubtful, and the rendering of the LXX. suggests that the true reading would refer to the instruments (*δεμάχλασι*) wherewith the slaughter was effected. [W. L. B.]

Z

ZAAN'AIM, THE PLAIN OF (צֶאֱנַיִם)

צֶאֱנַיִם: *δρύς κλωνεκτόντων*; Alex. 3. *αναφανομένων*: *Vallis quae vocatur Sennim*; or, more accurately "the oak by Zaannaim," such being probably the meaning of the word *šēn*. [PLAIN, 890 b.] A tree—probably a *mad* tree—mentioned as marking the spot near which Heber the Kenite was encamped when Siera took refuge in his tent (Judg. iv. 11). Its situation is defined as "near Kedesh," i. e. Kedesh-Naphtali, the name of which still lingers on the high ground, north of *Safed*, and west of the Lake of *el Huleh*, usually identified with the Waters of Merom. The Targum gives as the equivalent of the name, *miškor agga-riya*, "the plain of the swamp," and in the well-known passage of the Talmud (*Megillah Jerush.* i.) which contains a list of several of the towns of Galilee with their then identifications, the equivalent for "Elon (or Aijalon) be-Zaannaim" is *Agriya haš-kodesh*. *Agne* appears to signify a swamp, and can hardly refer to anything but the marsh which borders the lake of *Huleh* on the north side, and which was probably more extensive in the time of Deborah than it now is [MEROM]. On the other hand, Professor Stanley has pointed out (*Jewish Church*, 324; *Localities*, 197) how appropriate a situation for this memorable tree is afforded by "a green plain . . . studded with massive terebinths," which adjoins on the south the plain containing the remains of Kedesh. The whole of this upland country is more or less rich in terebinths. One such, larger than usual, and bearing the name of *Sejar em-Messiah*, is marked on the map of Van de Velde as 6 miles N.W. of *Kedes*. Those two suggestions—of the ancient Jewish and the modern Christian student—may be left side by side to await the result of future investigation. In favour of the former is the slight argument to be drawn from the early date of the interpretation, and the fact that the basin of the *Huleh* is still the favourite camping ground of Bedouins. In favour of the latter is the instinct of the observer and the abundance of trees in the neighbourhood.

No name answering to either Zaannaim or *Agne* has yet been encountered.

The *Keri*, or correction, of Judg. iv. 11, substitutes *Zaannaim* for *Zaannaim*, and the same form is found in Josh. xix. 33. This correction the lexicographers adopt as the more accurate form of the name. It appears to be derived (if a Hebrew word)

from a root signifying to load beasts as nomads do when they change their places of residence (Gesen. *Thes.* 1177). Such a meaning agrees well with the habits of the Kenites. But nothing can be more uncertain than such explanations of topographical names—most to be distrusted when most plausible. [G.]

ZAAAN'AN (זַאנָאן; *Za'anān*; in *critu*). A place named by Micah (i. 11) in his address to the towns of the Shephelah. This sentence, like others of the same passage, contains a play of words founded on the meaning (or on a possible meaning) of the name Zaanān, as derived from *yata'an*, to go forth:—

"The inhabitants of Zaanān came not forth."

The division of the passage shown in the LXX. and A. V., by which Zaanān is connected with Beth-ezel—is now generally recognized as inaccurate. It is thus given by Dr. Pusey, in his *Commentary*:—"The inhabitant of Zaanān came not forth. The mourning of Beth-ezel shall take from you its standing." So also Ewald, De Wette, and Zuns.

Zaanān is doubtless identical with ZENAN. [G.]

ZA'AVAN (זַאבָּאן; *Zavvān*; Alex. *'Izavvān*, *'Izavvān*; *Zavan*). A Horite chief, son of Ezer the son of Seir (Gen. xxxvi. 27; 1 Chr. i. 42). The LXX. appear to have read זַאבָּאן. In 1 Chr. the A. V. has ZAVAN.

ZARAD (זָרָד; *Zarād*, *Zarār*; Alex. *Zarār* in 1 Chr.: *Zarad*; short for זָרָדָא; see Zabadiah, Zabdi, Zabdriel, Zebedes, "God hath given him").

1. Son of Nathan, son of Attai, son of Ahlai, Shehan's daughter (1 Chr. ii. 31-37), and hence called son of Ahlai (1 Chr. xi. 41). He was one of David's mighty men, but none of his deeds have been recorded. The chief interest connected with him is his genealogy, which is of considerable importance in a chronological point of view, and as throwing incidental light upon the structure of the Book of Chronicles, and the historical value of the genealogies in it. Thus in 1 Chr. ii. 26-41, we have the following pedigree, the generations preceding Jeralmoel being prefixed:—

- | | |
|--------------------------------------|----------------|
| (1) Judah. | (13) Nathan. |
| (2) Phares. | (14) ZARAD. |
| (3) Hezron. | (15) Ephlai |
| (4) Jerahmeel. | (16) Obed. |
| (5) Onam. | (17) Jehu. |
| (6) Shammai. | (18) AZARIAH. |
| (7) Nadab. | (19) Heles. |
| (8) Appaim. | (20) Eleasah. |
| (9) Ishi. | (21) Shammal. |
| (10) Shehan. | (22) Shallum. |
| (11) Ahlai, his daughter } Egyptian. | (23) Jekamiah. |
| (12) Attai. | (24) Eleasama. |

Here, then, is a genealogy of twenty-four generations, commencing with the patriarch, and terminating we know not, at first sight, where; but as we happen to know, from the history, where Zabad the son of Ahlai lived, we are at least sure of this fact, that the *fourteenth* generation brings us to the time of David; and that this is about the correct number we are also sure, because out of seven other perfect genealogies, covering the same interval of time, four have the same number (*fourteen*), two have *fifteen*, and David's own has *eleven*. [GENEAL. OF JESUS CHRIST, p. 667.]

But it also happens that another person in the line is an historical personage, whom we know to have lived during the usurpation of Athaliah.

viz. Azariah the son (i. e. grandson) of Jeeb (1 Chr. xxiii. 1). [AZARIAH, 13.] He was *fourth* after Zabad, while Jehoram, Athaliah's husband, was *sixth* after David—a perfectly satisfactory correspondence when we take into account that Zabad may probably have been considerably younger than David, and that the early marriages of the kings have a constant tendency to increase the number of generations in the royal line. Again, the last name in the line is the sixth after Azariah; but Hezekiah was the sixth king after Athaliah, and we know that many of the genealogies were written out by "the men of Hezekiah," and therefore of course came down to his time [BECHER, p. 176] (see 1 Chr. iv. 41; Prov. xiv. 1). So that we may conclude, with great probability, both that this genealogy ends in the time of Hezekiah, and that all its links are perfect.

One other point of importance remains to be noticed, viz. that Zabad is called, after his great-grandmother, the founder of his house, son of Ahlai. For that Ahlai was the name of Shehan's daughter is certain from 1 Chr. ii. 31; and it is also certain, from vers. 35, 36, that from her marriage with Jarha descended, in the third generation, Zabad. It is therefore as certain as such matters can be, that Zabad the son of Ahlai, David's mighty man, was so called from Ahlai his female ancestor. The case is analogous to that of Joab, and Abiabai, and Asahel, who are always called sons of Zeruiah, Zeruiah, like Ahlai, having married a foreigner. Or if any one thinks there is a difference between a man being called the son of his mother, and the son of his great-grandmother, a more exact parallel may be found in Gen. xiv. 4, xxxvi. 12, 13, 16, 17, where the descendants of Keturah, and of the wives of Esau, in the third and fourth generation, are called "the sons of Keturah," "the sons of Adah" and "of Bashemath" respectively.

2. (*Zarād*; Alex. *Zarād*). An Ephraimite, in the text of 1 Chr. vii. 21 is correct. [See SHUTHELAH.]

3. (*Zarād*; Alex. *Zarād*). Son of Shimeath, an Ammonitess, an assassin who, with Jehozabad, slew king Josiah, according to 2 Chr. xxiv. 26; but in 2 K. xii. 21, his name is written, probably more correctly, Jozachar [JOZACHAR]. He was one of the domestic servants of the palace, and apparently the agent of a powerful conspiracy (2 Chr. xxv. 3; 2 K. xiv. 5). Josiah had become unpopular from his idolatries (2 Chr. xxiv. 18), his oppression (ib. 22), and above all, his calamities (ib. 23-25). The explanation given in the article JOZACHAR is doubtless the true one, that the chronicler represents this violent death of the king, as well as the previous invasion of the Syrians, as a Divine judgment against him for the innocent blood of Zechariah shed by him. not that the assassins themselves were actuated by the desire to avenge the death of Zechariah. They were both put to death by Amaziah, but their children were spared in obedience to the law of Moses (Deut. xxiv. 16). The coincidence between the names *Zechariah* and *Jozachar* is remarkable. [A. C. H.]

4. (*Zarād*; A layman of Israel, of the sons of Zattu, who put away his foreign wife at Ezra's command (Ezr. x. 27). He is called SABATUS in 1 Est. ix. 28.

5. (*Zarād*; *Zarād*). One of the descendants of

* He does not appear in the list in 2 Sam. xxiv., and may therefore be presumed to have been added in the latter part of David's reign.

Hashum, who had married a foreign wife after the Captivity (Exr. x. 33): called BAKKATA in 1 Esd. ix. 33.

6. (Zabds; Alex. om.) One of the sons of Nebo, whose name is mentioned under the same circumstances as the two preceding (Exr. x. 43). It is represented by ZARADAIAS in 1 Esd. ix. 35. [W. A. W.]

ZABADATAS (Zaβaδaτας: Sabatus). ZABAD 6 (1 Esd. ix. 35; comp. Exr. x. 43).

ZARADEANS (Zaβedaioi; Alex. Zaβaδeoi: Zabadaei). An Arab tribe who were attacked and spoiled by Jonathan, on his way back to Damascus from his fruitless pursuit of the army of Demetrius (1 Macc. xii. 31). Josephus calls them Nabataeans (Ant. xiii. 5, §10), but he is evidently in error. Nothing certain is known of them. Ewald (*Gesch.* iv. 382) finds a trace of their name in that of the place *Zabda* given by Robinson in his lists; but this is too far south, between the *Yarmuk* and the *Zurka*. Michaelis suggests the Arab tribe *Zobeideh*; but they do not appear in the necessary locality. Jonathan had pursued the enemy's army as far as the river Eleutherus (*Nahr el Kebir*), and was on his march back to Damascus when he attacked and plundered the Zabadeans. We must look for them, therefore, somewhere to the north-west of Damascus. Accordingly, on the road from Damascus to Bealbek, at a distance of about 8½ hours (26 miles) from the former place, is the village *Zabdany*, standing at the upper end of a plain of the same name, which is the very centre of Antilibanus. The name *Zabdany* is possibly a relic of the ancient tribe of the Zabadeans. According to Burckhardt (*Syria*, p. 3), the plain "is about three quarters of an hour in breadth, and three hours in length; it is called *Ard Zabdani*, or the district of *Zabdeni*; it is watered by the Barrada, one of whose sources is in the midst of it; and by the rivulet called *Moiet Zabdani*, whose source is in the mountain behind the village of the same name." The plain is "limited on one side by the eastern part of the Antilibanus, called here *Djebel Zabdani*." The village is of considerable size, containing nearly 3000 inhabitants, who breed cattle, and the silkworm, and have some dyeing-houses (*ibid.*). Not far from *Zabdany*, on the western slopes of Antilibanus, is another village called *Kefr Zabd*, which again seems to point to this as the district formerly occupied by the Zabadeans. [W. A. W.]

ZABBA'I (זבאי: Zaboi; Alex. Zaboi). 1. One of the descendants of Bebai, who had married a foreign wife in the days of Ezra (Exr. x. 28). He is called JOSABAD in 1 Esd. ix. 29.

2. (Zabou; FA. Zabou: Zachai.) Father of Baruch, who assisted Nehemiah in rebuilding the city wall (Neh. iii. 20).

ZAB'BUD (זבבד, Keri זבבד; Zaβoδ: Zachor). One of the sons of Bigvai, who returned in the second caravan with Ezra (Ezr. viii. 14). In 1 Esd. viii. 40 his name is corrupted into ISTALCURUS.

ZABDEUS (Zaβdeios: Vulg. om.). ZERADIAH of the sons of Immer (1 Esd. ix. 21; comp. Exr. x. 20).

ZAB'DI (זבדי: Zabi; Alex. Zabi). 1. Son of Zerah, the son of Judah, and ancestor of Achan (Josh. vii. 1, 17, 18).

2. (Zabdi.) A Benjamite, of the sons of Shizbi (1 Chr. viii. 19).

3. (Zabdiac.) David's officer over the produce of the vineyards for the wine-cellars (1 Chr. xvi. VOL. III.

27). He is called "the Shipbmite," that is, in all probability, native of Sinepham; but his native place has not been traced.

4. (Vat. and Alex. om.; FA. third hand Zayp: Zebederis.) Son of Asaph the minstrel (Neh. xi. 17); called elsewhere ZACCUR (Neh. xii. 35) and ZICHRI (1 Chr. ix. 15).

ZAB'DIEL (זבדיאל: Zaβdiel: Zabdial). 1. Father of Jaohbeam, the chief of David's guard (1 Chr. xxvii. 2).

2. (Baθiηλ; Alex. Zoxpηiηλ.) A priest, son of the great men, or, as the margin gives it, "Hagedolim" (Neh. xi. 14). He had the oversight of 128 of his brethren after the return from Babylon.

3. (Zaβdiηλ; Joseph. Zδβηηλs: Zabdial.) An Arabian chieftain who put Alexander Balas to death (1 Macc. xi. 17; Joseph. Ant. xiii. 4, §8). According to Diodorus, Alex. Balas was murdered by two of the officers who accompanied him (Müller, *Fragm. Hist.* ii. 16).

ZA'BUD (זבד: Zaβoδ; Alex. Zaβoδoδ: Zabud). The son of Nathan (1 K. iv. 5). He is described as a priest (A. V. "principal officer;" PRIEST, p. 915), and as holding at the court of Solomon the confidential post of "king's friend," which had been occupied by Hushai the Archite during the reign of David (2 Sam. xv. 37, xvi. 18; 1 Chr. xxvii. 33). This position, if it were an official one, was evidently distinct from that of counsellor, occupied by Ahithophel under David, and had more of the character of private friendship about it, for Absalom conversely calls David the "friend" of Hushai (2 Sam. xvi. 17). In the Vat. MS. of the LXX. the word "priest" is omitted, and in the Arabic of the London Polyglot it is referred to Nathan. The Peshito-Syriac and several Hebrew MSS. for "Zabud" read "Zaccur." The same occurs in the case of ZABBUD.

ZABUL'ON (Zaβουλων: Zabulon). The Greek form of the name ZEBULON (Matt. iv. 13, 15; Rev. vii. 8).

ZACCAI (זכאי: Zachai; Alex. Zachai in Ezra: Zachai). The sons of Zaccal, to the number of 760, returned with Zerubbabel (Ezr. ii. 9; Neh. vii. 14). The name is the same which appears in the N. T. in the familiar form of ZACCHAEUS.

ZACCHAEUS (Zachaias: Zacchaeus). The name of a tax-collector near Jericho, who being short in stature climbed up into a sycamore-tree, in order to obtain a sight of Jesus as He passed through that place. Luke only has related the incident (xix. 1-10). Zacchaeus was a Jew, as may be inferred from his name and from the fact that the Saviour speaks of him expressly as "a son of Abraham" (υιός Αβραάμ). So the latter expression should be understood, and not in a spiritual sense; for it was evidently meant to assert that he was one of the chosen race, notwithstanding the prejudice of some of his countrymen that his office under the Roman government made him an alien and outcast from the privileges of the Israelite. The term which designates this office (ἀρχιτελώνης) is unusual, but describes him no doubt as the superintendent of customs or tribute in the district of Jericho, where he lived, as one having a commission from his Roman principal (*maniceps, publicanus*) to collect the imposts levied on the Jews by the Romans, and who in the execution of that trust employed sub-terms (the ordinary τελωνεῖς), who were

accountable to him, as he in turn was accountable to his superior, whether he resided at Rome, as was more commonly the case, or in the province itself (see Winer, *Realw.* ii. 711, and *Dict. of Ant.* p. 806.). The office must have been a lucrative one in such a region, and it is not strange that Zacchaeus is mentioned by the Evangelist as a rich man (*οὐτως ὡς πλούσιος*). Josephus states (*Ant.* xv. 4, §2) that the palm-groves of Jericho and its gardens of balsam were given as a source of revenue by Antony to Cleopatra, and, on account of their value, were afterwards redeemed by Herod the Great for his own benefit. The sycamore-tree is no longer found in that neighbourhood (Robinson, *Bib. Res.* i. 559); but no one should be surprised at this, since "even the solitary relic of the palm-forest, seen as late as 1838"—which existed near Jericho, has now disappeared (Stanley, *S. & P.* p. 307). The eagerness of Zacchaeus to behold Jesus indicates a deeper interest than that of mere curiosity. He must have had some knowledge, by report at least, of the teachings of Christ, as well as of His wonder-working power, and could thus have been awakened to some just religious feeling, which would make him the more anxious to see the announcer of the good tidings, so important to men as sinners. The readiness of Christ to take up His abode with him, and His declaration that "salvation" had that day come to the house of his entertainer, prove sufficiently that "He who knows what is in man" perceived in him a religious susceptibility which fitted him to be the recipient of spiritual blessings. Reflection upon his conduct on the part of Zacchaeus himself appears to have revealed to him deficiencies which disturbed his conscience, and he was ready, on being instructed more fully in regard to the way of life, to engage to "re-tore fourfold" for the illegal exactions of which he would not venture to deny (*εἰ τινός τι ἐσυκοφάνησα*) that he might have been guilty. At all events he had not lived in such a manner as to overcome the prejudice which the Jews entertained against individuals of his class, and their censure fell on him as well as on Christ when they declared that the latter had not scorned to avail himself of the hospitality of "a man that was a sinner." The Saviour spent the night probably (*μεῖναι*, ver. 5, and *καταλῆσαι*, ver. 7, are the terms used) in the house of Zacchaeus, and the next day pursued his journey to Jerusalem. He was in the caravan from Galilee, which was going up thither to keep the Passover. The entire scene is well illustrated by Oosterzee (*Lange's Bibelwerk*, iii. 285).

We read in the Rabbinic writings also of a Zacchaeus who lived at Jericho at this same period, well known on his own account, and especially as the father of the celebrated Rabbi Jochanan ben Zachai (see Sepp's *Leben Jesu*, iii. 166). This person may have been related to the Zacchaeus named in the sacred narrative. The family of the Zachaei was an ancient one, as well as very numerous. They are mentioned in the Books of Ezra (ii. 9) and Nehemiah (vii. 14) as among those who returned from the Babylonian Captivity under Zerubbabel, when their number amounted to seven hundred and sixty. It should be noticed that the name is given as ZACCAR in the Authorised Version of the Old Testament.

[H. B. H.]

ZACCHAEUS (*Ζαχαῖος*: *Zacchaeus*). An officer of Judas Maccabaeus (2 Macc. x. 19). Grotius, from a mistaken reference to 1 Macc. v. 56, wishes to read καὶ τὸν τοῦ Ζαχαίου.

[B. F. W.]

ZAC'CHUR (זכר: *Zachur*: *Zachur*). A Simeonite, of the family of Mishma (1 Chr. iv. 26). His descendants, through his son Shimei, became one of the most numerous branches of the tribe.

ZACCUR (זכר: *Zachur*; Alex. *Zaxxol*: *Zechur*). 1. A Reubenite, father of Shammus, the spy selected from his tribe (Num. xiii. 4).

2. (*Zachur*; Alex. *Zachur*: *Zachur*.) A Merarite Levite, son of Jaaziah (1 Chr. xiv. 27).

3. (*Zachur*, *Zachur*; Alex. *Zachur*: *Zachur*, *Zachur*.) Son of Asaph, the singer, and chief of the third division of the Temple choir as arranged by David (1 Chr. xiv. 2, 10; Neh. xii. 35).

4. (*Zachur*; FA. *Zaxxol*: *Zachur*.) The son of Imri, who assisted Nehemiah in rebuilding the city wall (Neh. iii. 2).

5. (*Zachur*.) A Levite, or family of Levites, who signed the covenant with Nehemiah (Neh. x. 12).

6. (*Zachur*.) A Levite, whose son or descendant Hanan was one of the treasurers over the treasures appointed by Nehemiah (Neh. xiii. 13).

ZACHARIAH, or properly **ZECHARIAH** (זכריה: "remembered by Jehovah": *Zacharias*),

was son of Jeroboam II., 14th king of Israel, and the last of the house of Jehu. There is a difficulty about the date of his reign. We are told that Amaziah ascended the throne of Judah in the second year of Joash king of Israel, and reigned 29 years (2 K. xiv. 1, 2). He was succeeded by Uzziah or Azariah, in the 27th year of Jeroboam II., the successor of Joash (2 K. xv. 1), and Uzziah reigned 52 years. On the other hand, Joash king of Israel reigned 16 years (2 K. xiii. 10), was succeeded by Jeroboam, who reigned 41 (2 K. xiv. 23), and he by Zachariah, who came to the throne in the 38th year of Uzziah king of Judah (2 K. xv. 8). Thus we have (1) from the accession of Amaziah to the 38th of Uzziah, 29+38=67 years: but (2) from the second year of Joash to the accession of Zachariah (or at least to the death of Jeroboam) we have 15+41=56 years. Further, the accession of Uzziah, placed in the 27th year of Jeroboam, according to the above reckoning occurred in the 15th. And this latter synchronism is confirmed, and that with the 27th year of Jeroboam contradicted, by 2 K. xiv. 17 which tells us that Amaziah king of Judah survived Joash king of Israel by 15 years. Most chronologers assume an interregnum of 11 years between Jeroboam's death and Zachariah's accession, during which the kingdom was suffering from the anarchy of a disputed succession, but this seems unlikely after the reign of a resolute ruler like Jeroboam, and does not solve the difference between 2 K. xiv. 17 and xv. 1. We are reduced to suppose that our present MSS. have here incorrect numbers, to substitute 15 for 27 in 2 K. xv. 1, and to believe that Jeroboam II. reigned 52 or 53 years. Josephus (ix. 10, §3) places Uzziah's accession in the 14th year of Jeroboam, a variation of a year in these synchronisms being unavoidable, since the Hebrew annalists in giving their dates do not reckon fractions of years. [ISRAEL, KINGDOM OF, vol. i. p. 900.] But whether we assume an interregnum, or an error in the MSS., we must place Zachariah's accession A.C. 771-2. His reign lasted only six months. He was killed in a conspiracy, of which Shallum was the head, and by which the prophecy in 2 K. x. 30 was accomplished. We are told that during his brief term of power he did evil, and kept up the calf-worship inherited from the first Jeroboam.

which his father had maintained in regal splendour at Bethel (Am. vii. 13). [SHALLUX.] [G. E. L. C.]

2. (Alex. Ζαχαρίας.) The father of Abi, or Abijah, Hezekiah's mother (2 K. xviii. 2). In 2 Chr. xxix. 1 he is called ZECHARIAH.

ZACHARIAS (Ζαχαρίας: Vulg. om.). 1. Zachariah the priest in the reign of Josiah (1 Esd. i. 8).

2. In 1 Esd. i. 15 Zacharias occupies the place of Heman in 2 Chr. xxxv. 15.

3. (Ζαχαρίας; Alex. Ζαχάρις: Arcorea.) = SERAIAH 8, and AZARIAH (1 Esd. v. 8; comp. Ezr. ii. 2; Neh. vii. 7). It is not clear from whence this rendering of the name is derived. Our translators follow the Geneva Version.

4. (Ζαχαρίας: Zacharias.) The prophet ZECHARIAH (1 Esd. vi. 1, vii. 3).

5. ZECHARIAH of the sons of Pharoah (1 Esd. vii. 30; comp. Ezr. viii. 3).

6. ZECHARIAH of the sons of Bebai (1 Esd. viii. 37; Ezr. viii. 11).

7. ZECHARIAH, one of "the principal men and learned," with whom Ezra consulted (1 Esd. viii. 44; comp. Ezr. viii. 16).

8. ZECHARIAH of the sons of Elam (1 Esd. ix. 27; comp. Ezr. x. 28).

9. Father of Joseph, a leader in the first campaign of the Maccabean war (1 Macc. v. 18, 56-62).

10. Father of John the Baptist (Luke, i. 5, &c.) [JOHN THE BAPTIST.]

11. Son of Barachias, who, our Lord says, was slain by the Jews between the altar and the temple (Matt. xxiii. 35; Luke, xi. 51). There has been much dispute who this Zacharias was. From the time of Origen, who relates that the father of John the Baptist was killed in the temple, many of the Greek Fathers have maintained that this is the person to whom our Lord alludes; but there can be little or no doubt that the allusion is to Zacharias, the son of Jehoiada (2 Chr. xxiv. 20, 21). As the Book of Chronicles—in which the murder of Zacharias, the son of Jehoiada, occurs—closes the Hebrew canon, this assassination was the last of the murders of righteous men recorded in the Bible, just as that of Abel was the first. (Comp. Renan, *Vie de Jésus*, p. 353.) The name of the father of Zacharias is not mentioned by St. Luke; and we may suppose that the name of Barachias crept into the text of St. Matthew from a marginal gloss, a confusion having been made between Zacharias, the son of Jehoiada, and Zacharias, the son of Barachias (Berechiah), the prophet. [Comp. ZECHARIAH, 6, p. 1832.]

ZACH'ARY (Zacharias). The prophet Zachariah (2 Esd. i. 40).

ZACH'ER (זַחֵר, in pause זַחֵר: Ζαχ'ούρ: Zacher). One of the sons of Jehiel, the father or founder of Gibeon, by his wife Manahah (1 Chr. viii. 31). In 1 Chr. ix. 37 he is called ZECHARIAH.

ZADOK (זָדוֹק: Zádók: Sadok: "righteous").

1. Son of Ahitub, and one of the two chief priests in the time of David, Abiathar being the other. [ABIATHAR.] Zadok was of the house of Eleazar, the son of Aaron (1 Chr. xxiv. 3), and eleventh in descent from Aaron. The first mention of him is in 1 Chr. xii. 28, where we are told that he joined David at Hebron after Saul's death with 22 captains of his father's house, and, apparently, with 900 men (4600-3700, vers. 26, 27). Up to this time, it may be concluded, he had adhered to the

house of Saul. But henceforth his fidelity to David was inviolable. When Absalom revolted, and David fled from Jerusalem, Zadok and all the Levites bearing the Ark accompanied him, and it was only at the king's express command that they returned to Jerusalem, and became the medium of communication between the king and Hushai the Archite (2 Sam. xv., xvii.). When Absalom was dead, Zadok and Abiathar were the persons who persuaded the elders of Judah to invite David to return (2 Sam. xix. 11). When Adonijah, in David's old age, set up for king, and had persuaded Joab, and Abiathar the priest, to join his party, Zadok was unmoved, and was employed by David to anoint Solomon to be king in his room (1 K. i.). And for this fidelity he was rewarded by Solomon, who "thrust out Abiathar from being priest unto the Lord," and "put in Zadok the priest" in his room (1 K. ii. 27, 35). From this time, however, we hear little of him. It is said in general terms in the enumeration of Solomon's officers of state that Zadok was the priest (1 K. iv. 4; 1 Chr. xxix. 22), but no single act of his is mentioned. Even in the detailed account of the building and dedication of Solomon's Temple, his name does not occur, so that though Josephus says that "Sadok the high-priest was the first high-priest of the Temple which Solomon built" (*Ant.* x. 8, §6), it is very doubtful whether he lived till the dedication of Solomon's Temple, and it seems far more likely that Azariah, his son or grandson, was high-priest at the dedication (comp. 1 K. iv. 2, and 1 Chr. vi. 10, and see AZARIAH 2). Had Zadok been present, it is scarcely possible that he should not have been named in so detailed an account as that in 1 K. viii. [HIGH-PRIEST, p. 810.]

Several interesting questions arise in connexion with Zadok in regard to the high-priesthood. And first, as to the causes which led to the descendants of Ithamar occupying the high-priesthood to the prejudice of the house of Eleazar. There is, however, nothing to guide us to any certain conclusion. We only know that Phinehas the son of Eleazar was high-priest after his father, and that at a subsequent period Eli of the house of Ithamar was high-priest, and that the office continued in his house till the time of Zadok, who was first Abiathar's colleague, and afterwards superseded him. Zadok's descendants continued to be hereditary high-priests till the time of Antiochus Eupator, and perhaps till the extinction of the office. [HIGH-PRIEST, p. 812.] But possibly some light may be thrown on this question by the next which arises, viz., what is the meaning of the double priesthood of Zadok and Abiathar (2 Sam. xv. 29; 1 Chr. xxiv. 8, 31). In later times we usually find two priests, the high-priest, and the second priest (2 K. xxv. 18), and there does not seem to have been any great difference in their dignity. So too Luke iii. 2. The expression "the chief priest of the house of Zadok" (2 Chr. xxxi. 10), seems also to indicate that there were two priests of nearly equal dignity. Zadok and Abiathar were of nearly equal dignity (2 Sam. xv. 35, 36, xix. 11). Hophni and Phinehas again, and Eleazar and Ithamar are coupled together, and seem to have been holders of the office as it were in commission. The duties of the office too were in the case of Zadok and Abiathar divided. Zadok ministered before the Tabernacle at Gibeon (1 Chr. xvi. 39), Abiathar had the care of the Ark at Jerusalem. Not, however, exclusively, as appears from 1 Chr. xv. 11

2 Sam. xv. 24, 25, 29. Hence, perhaps, it may be concluded that from the first there was a tendency to consider the office of the priesthood as somewhat of the nature of a corporate office, although some of its functions were necessarily confined to the chief member of that corporation; and if so, it is very easy to perceive how superior abilities on the one hand, and infancy or incapacity on the other, might operate to raise or depress the members of this corporation respectively. Just as in the Saxon royal families, considerable latitude was allowed as to the particular member who succeeded to the throne. When hereditary monarchy was established in Judaea, then the succession to the high-priesthood may have become more regular. Another circumstance which strengthens the conclusion that the origin of the double priesthood was anterior to Zadok, is that in 1 Chr. ix. 11; Neh. xi. 11, Ahitub the father of Zadok, seems to be described as "ruler of the House of God," an office usually held by the chief priest, though sometimes by the second priest. [HIGH-PRIEST, p. 808.] And if this is so, it implies that the house of Eleazar had maintained its footing side by side with the house of Ithamar, although for a time the chief dignity had fallen to the lot of Eli. What was Zadok's exact position when he first joined David, is impossible to determine. He there appears inferior to Jehoiada "the leader of the Aaronites."

2. According to the genealogy of the high-priests in 1 Chr. vi. 12, there was a second Zadok, son of a second Ahitub, son of Amariah; about the time of King Ahaziah. But it is highly improbable that the same sequence, Amariah, Ahitub, Zadok, should occur twice over; and no trace whatever remains in history of this second Ahitub, and second Zadok. It is probable, therefore, that no such person as this second Zadok ever existed; but that the insertion of the two names is a copyist's error. Moreover, these two names are quite insufficient to fill up the gap between Amariah in Jehoshaphat's reign, and Shallum in Amon's, an interval of much above 200 years.

3. Father of Jerushah, the wife of King Uzziah, and mother of King Jotham. He was probably of a priestly family.

4. Son of Baana, who repaired a portion of the wall in the time of Nehemiah (Neh. iii. 4). He is probably the same as is in the list of those that sealed the covenant in Neh. x. 21, as in both cases his name follows that of Meshezabeel. But if so, we know that he was not a priest, as his name would at first sight lead one to suppose, but one of "the chief of the people," or laity. With this agrees his patronymic Baana, which indicates that he was of the tribe of Judah; for Baanah, one of David's mighty men, was a Netophathite (2 Sam. xxi. 29), i. e. of Netophah, a city of Judah. The men of Tekoah, another city of Judah, worked next to Zadok. Meshullam of the house of Meshezabeel, who preceded him in both lists (Neh. iii. 4, and x. 20, 21), was also of the tribe of Judah (Neh. xi. 24). Intermarriages of the priestly houses with the tribe of Judah were more frequent

than with any other tribe. Hence probably the name of Sadoc (Matt. i. 14).

5. Son of Immer, a priest who repaired a portion of the wall over against his own house (Neh. iii. 29). He belonged to the 16th course (1 Chr. xxiv. 14), which was one of those which returned from Babylon (Ezr. ii. 37).

6. In Neh. xi. 11, and 1 Chr. ix. 11, mention is made in a genealogy of Zadok, the son of Meraioth, the son of Ahitub. But as such a sequence occurs nowhere else, Meraioth being always the grandfather of Ahitub (or great-grandfather, as in Ezr. vii. 2, 3),* it can hardly be doubtful that Meraioth is inserted by the error of a copyist, and that Zadok the son of Ahitub is meant.

It is worth noticing that the N. T. name Justus (Acts i. 23, xviii. 7; Col. iv. 11) is the literal translation of Zadok. Zedekiah, Jehozadak, may be compared.

The name appears occasionally in the post-biblical history. The associate of Judah the Gaulonite, the well-known leader of the agitation against the census of Quirinus, was a certain Pharisee named Zadok (Joseph. Ant. xviii. 1, §1), and the sect of the Sadducees is reputed to have derived both its name and origin from a person of the same name, a disciple of Antigonius of Socho. (See the citations of Lightfoot, *Hebr. and Talm. Exerc.* on Matt. iii. 8.) The personality of the last mentioned Zadok has been strongly impugned in the article SADDUCEES (p. 1084); but see, on the other hand, the remark of M. Renan (*Vie de Jésus*, 216). [A. C. H.]

ZAHAM (זָחָם): *Zādu*; Alex. *Zādū*: *Zom*.

Son of Rehoboam by Abihail, the daughter of Eliab (2 Chr. xi. 19). As Eliab was the eldest of David's brothers, it is more probable that Abihail was his granddaughter.

ZAIR (זַיִר): *Zāip*; Alex. omits: *Sair*.

A place named, in 2 K. viii. 21 only, in the account of Joram's expedition against the Edomites. He went over to Zair with all his chariots; there he and his force appear to have been surrounded,^b and only to have escaped by cutting their way through in the night. The parallel account in Chronicles (2 Chr. xxi. 9) agrees with this, except that the words "to Zair" are omitted, and the words "with his princes" inserted. This is followed by Josephus (Ant. ix. 5, §1). The omitted and inserted words have a certain similarity both in sound and in their component letters, זַיִר and זַיִרָא; and on this it has been conjectured that the latter were substituted for the former, either by the error of a copyist, or intentionally, because the name Zair was not elsewhere known (see Keil, *Comm.* on 2 K. viii. 21). Others again, as Movers (*Chronik*, 218) and Ewald (*Gesch.* iii. 524), suggest that Zair is identical with Zoar (זֹאֵר or זֹאֵרָא). Certainly in the middle ages the road by which an army passed from Judaea to the country formerly occupied by Edom lay through the place which was then believed to be Zoar, below *Arak*, at the S.E. quarter of the Dead Sea (Fulcher, *Gesta Dei*, 405), and so far this is in favour of the identification; but there is no other support to it in the MS. readings either of the original or the Versions.

^b This is not, however, the interpretation of the Jewish commentators, who take the word זַיִרָא to refer to the neighbouring parts of the country of Edom. See Rashi on 2 Chr. xxi. 9.

* Compare the following pedigrees:—

1 Chr. vi. 6-16.	1b. 24, 26.	Ezr. vi. 1-6.	Neh. xi. 11, & 1 Chr. ix. 11.
Meraioth.	Meraioth.	Meraioth.	Ahitub.
Amariah.	Amariah.	Amariah.	Meraioth.
Ahitub.	Ahitub.	Ahitub.	
Zadok.	Zadok.	Zadok.	Zadok.
Shallum.		Shallum.	Meshullam.
Eliah.		Mikiah.	Mikiah.
Amariah.		Amariah.	
Seraiah.		Seraiah.	Seraiah. Amariah.

The Zou of Genesis (as will be seen under that head) was probably near the N.E. end of the lake, and the chief interest that exists in the identification of Zeir and Zoar, resides in the fact that if it could be established it would show that by the time 2 K. viii. 21 was written, Zoar had been shifted from its original place, and had come to be located where it was in the days of Joseph, Jerome, and the Crusades. Possibly the previous existence there of a place called Zair, assisted the transfer.

A third conjecture grounded on the readings of the Vulgate (*Seira*) and the Arabic version (*Seir*, ساعر) is, that Zair is an alteration for Seir (סעיר), the country itself of the Edomites (Theophrastus, *Kurzg. Ex. Handb.*). The objection to this is, that the name of Seir appears not to have been known to the author of the Book of Kings. [G.]

ZALAPH (זלפ): זלפ; Alex. Ζαλφ: *Salaph*. Father of Hanun, who assisted in rebuilding the city wall (Neh. iii. 30).

ZALMON (זלמן): זלמן; Alex. Ζαλμν: *Selmon*. An Aholite, one of David's guard (2 Sam. xxiii. 28). In 1 Chr. xi. 29 he is called ILAI, which Kennicott (*Diss.* p. 187) decides to be the true reading.

ZALMON, MOUNT (זלמן-הר): ὄρος Ἐρμὸν: *mons Selmon*. A wooded eminence in the immediate neighbourhood of Shechem, from which Abimelech and his people cut down the boughs with which he suffocated and burnt the Shechemites who had taken refuge in the citadel (Judg. ix. 48). It is evident from the narrative that it was close to the city. But beyond this there does not appear to be the smallest indication either in or out of the Bible of its position. The Rabbis mention a place of the same name, but evidently far from the necessary position (Schwarz, 137). The name *Saleimijeh* is attached to the S.E. portion of Mount Ebal (see the map of Dr. Rosen, *Zeitsch. der D. M. G.* xiv. 634); but without further evidence, it is hazardous even to conjecture that there is any connexion between this name and Tsalmon.

The reading of the LXX. is remarkable both in itself, and in the fact that the two great MSS. agree in a reading so much removed from the Hebrew; but it is impossible to suppose that Hermon (at any rate the well-known mountain of that name), is referred to in the narrative of Abimelech.

The possibility of a connexion between this mount and the place of the same name in Ps. lxxviii. 14 (A. V. *Salmon*), is discussed under the head of *SALMON*, pp. 1094, 5.

The name of Dalmanutha has been supposed to be a corruption of that of Tsalmon (Otho, *Lex. Rab.* "Dalmanutha"). [G.]

ZALMONAH (זלמנה): Ζαλμονα: *Salmona*. The name of a desert-station of the Israelites, which they reached between leaving Mount Hermon and camping at Punon, although they must have turned the northern point of Edomitish territory by the way (Num. xxxiii. 41). It lies on the east side of

Edom; but whether or not identical with *Maana*, a few miles E. of Petra, as Baumer thinks, is doubtful. More probably Zalmolah may be in the *Wady Ithm*, which runs into the Arabah close to where Elath anciently stood. [H. H.]

ZALMUNNA (זלמנא): Ζαλμνα; Alex. Ζαλμνα, and so also Josephus: *Salmuna*. One of the two "kings" of Midian whose capture and death by the hands of Gideon himself formed the last act of his great conflict with Midian (Judg. viii. 5-21; Ps. lxxviii. 11). No satisfactory explanation of the name of Zalmunna has been given. That of Gesenius and Furst ("shelter is denied him")^b can hardly be entertained.

The distinction between the "kings" (מלכים) and the "princes" (שרים) of the Midianites on this occasion is carefully maintained throughout the narrative (viii. 5, 12, 26). "Kings" of Midian are also mentioned in Num. xxxi. 8. But when the same transaction is referred to in Josh. xiii. 21 they are designated by the title *Nesid* (נסידי), A. V.

"princes." Elsewhere (Num. xxii. 4, 7) the term *sehmim* is used, answering in signification, if not in etymology, to the Arabic *sheikh*. It is difficult, perhaps impossible, to tell how far these distinctions are accurate, and how far they represent the imperfect acquaintance which the Hebrews must have had with the organisation of a people with whom, except during the orgies of Shittim, they appear to have been always more or less at strife and warfare (1 Chr. v. 10, 19-22).

The vast horde which Gideon repelled must have included many tribes under the general designation of "Midianites, Amalekites, children of the East;" and nothing would be easier or more natural than for the Hebrew scribes who chronicled the events to confuse one tribe with another in so minute a point as the title of a chief.

In the great Bedouin tribes of the present day, who occupy the place of Midian and Amalek, there is no distinctive appellation answering to the *molek* and *sar* of the Hebrew narrative. Differences in rank and power there are, as between the great chief, the acknowledged head of the parent tribe, and the lesser chiefs who lead the sub-tribes into which it is divided, and who are to a great extent independent of him. But the one word *sheikh* is employed for all. The great chief is the *Sheikh el-hedr*, the others are *min el-nasheikh*, "of the sheikhs," i. e. of sheikh rank. The writer begs to express his acknowledgments to Mr. Layard and Mr. Cyril Graham for information on this point. [G.]

ZAMBIS (Ζαμβί): Alex. Ζαμβίς: *Zambrie*. The same as AMARIAH (1 Eud. ix. 34; comp. Exr. x. 42).

ZAM BRI (Ζαμβρί: *Zamri*). ZIMRI the Simeonite slain by Phinehas (1 Macc. ii. 26).

ZAMOTH (Ζαμόθ; Alex. Ζαμόθ: *Zathoin*) = ZATTU (1 Eud. ix. 28; comp. Exr. x. 27).

ZAMZUMMIMS (Ζαμζυμμιμ): Ζοχζυμμιμ; Alex. ομμιμ: *Zonsummim*. The Ammonite name for

^a The variations of the MSS. of the LXX. (Holmes and Parsons) are very singular—ακ Ζαμν, εκ Ζαμν, εν Ζαμν. But they do not point to any difference in the Hebrew text from that now existing.

^b The unintelligibility of the names is in favour of their being correctly retained rather than the reverse. And it

should not be overlooked that they are not, like Oreb and Zeeb, attached also to localities, which always throws a doubt on the name when attributed to a person as well.

^c Josephus inverts the distinction. He styles Oreb and Zeeb βαρβαροι, and Zebah and Zalmunna ἀγαθοι (ant. v. 7, §8).

the people who by others (though who they were does not appear) were called KEPHAIM (Deut. ii. 20 only). They are described as having originally been a powerful and numerous nation of giants:—"great, many, and tall,"—inhabiting the district which at the time of the Hebrew conquest was in the possession of the Ammonites, by whom the Zamzumim had a long time previously been destroyed. Where this district was, it is not perhaps possible exactly to define; but it probably lay in the neighbourhood of Rabbath-Ammon (*Ammds*), the only city of the Ammonites of which the name or situation is preserved to us, and therefore eastward of that rich undulating country from which Moab had been forced by the Amorites (the modern *Beika*), and of the numerous towns of that country, whose ruins and names are still encountered.

From a slight similarity between the two names, and from the mention of the Emim in connexion with each, it is usually assumed that the Zamzumim are identical with the ZUZIM (Gesenius, *Thes.* 410 a; Ewald, *Geogr.* i. 308 note; Knobel on Gen. xiv. 5). Ewald further supports this by identifying HAM, the capital city of the Zuzim (Gen. xiv. 5) with Ammon. But at best the identification is very conjectural.

Various attempts have been made to explain the name:—as by comparison with the Arabic **زَنْم** "long-necked;" or **صَبِيح**, "strong and big" (Simonis, *Onom.* 135); or as "obstinate," from **נִצְנִי** (Luther), or as "noisy," from **נִצְנִי** (Gesenius, *Thes.* 419), or as Onomatopoeic,* intended to imitate the unintelligible jabber of foreigners. Michaelis (*Suppl.* No. 629) playfully recalls the likeness of the name to that of the well Zem-zem at Mecca, and suggests thereupon that the tribe may have originally come from Southern Arabia. Notwithstanding this banter, however, he ends his article with the following discreet words, "Nihil historice, nihil originali populi novimus: fas sit etymologiam aque ignorare." [G.]

ZANO'AH (נָזוֹחַ; *Zanoh* in both MSS.: *Zano*). In the genealogical lists of the tribe of Judah in 1 Chron., Jekuthiel is said to have been the father of Zanoah (iv. 18); and, as far as the passage can be made out, some connexion appears to be intended with "Bithiah, the daughter of Pharaoh." Zanoah is the name of a town of Judah [ZANOAH 2], and this mention of Bithiah probably points to some colonization of the place by Egyptians or by Israelites directly from Egypt. In Seetzen's account of Sanûta (or more accurately *Za'nûtah*), which is possibly identical with Zanoah, there is a curious token of the influence which events in Egypt still exercised on the place (*Reisen*, iii. 29).

The Jewish interpreters considered the whole of this passage of 1 Chr. iv. to refer to Moses, and interpret each of the names which it contains as titles of him. "He was chief of Zanoach," says the Targum, "because for his sake God put away (נָזַח) the sins of Israel." [G.]

* In this sense the name was applied by controversialists of the 17th century as a nickname for fanatics who pretended to speak with tongues.

† This name, however (زَنْوَح), exhibits the 'ain, which

ZANO'AH (נָזוֹחַ). The name of two towns in the territory of Judah.

1. (*Tâv*, *Zavû*; Alex. *Zavû*: *Zavû* in the Shefelah (Josh. xv. 34), named in the same group with Zorah and Jarmuth. It is possibly identical with *Zânû'a*,^b a site which was pointed out to Dr. Robinson from *Beit Nettif* (*B. R.* ii. 18), and which in the maps of Van de Velle and of Tobler (*3te Wanderung*) is located on the N. side of the *Wady Ismail*, 2 miles E. of *Zorah*, and 4 miles N. of *Yarmut*. This position is sufficiently in accordance with the statement of Jerome (*Onomast.* "Zanohua"), that it was in the district of Eleutheropolis, on the road to Jerusalem, and called Zanoa.

The name recurs in its old connexion in the lists of Nehemiah, both of the towns which were re-inhabited by the people of Judah after the Captivity (xi. 30*), and of those which assisted in repairing the wall of Jerusalem (iii. 13). It is an entirely distinct place from

2. (*Zakavasi*; Alex. *Zavavasi*: *Zonoe*.) A town in the highland district, the mountain proper (Josh. xv. 56). It is named in the same group with Maon, Carmel, Ziph, and other places known to lie south of Hebron. It is (as Van de Velle suggests, *Memoir*, 354) not improbably identical with *Sanûta*, which is mentioned by Seetzen (*Reisen*, iii. 29) as below *Sanûda*, and appears to be about 10 miles S. of Hebron. At the time of his visit it was the last inhabited place to the south. Robinson (*B. R.* ii. 204 note) gives the name differently, **زَنْوَات**, *Za'nûtah*; and it will be observed that like *Zano'ah* just mentioned, it contains the 'Ain, which the Hebrew name does not, and which rather shakes the identification.

According to the statement of the genealogical lists of 1 Chr. Zanoah was founded or colonized by a person named Jekuthiel (iv. 18). Here it is also mentioned with Socho and Eshtemoa, both of which places are recognizable in the neighbourhood of *Za'nûtah*. [G.]

ZAPHNATH-PAANEAH (נִפְתָּח־פָּנֵאָה; *Nephthah-Paneah*; *Salvator mundi*), a name given by Pharaoh to Joseph (Gen. xli. 45). Various forms of this name, all traceable to the Heb. or LXX. original, occur in the works of the early Jewish and Christian writers, chiefly Josephus, from different MSS. and editions of whose *Ant.* (ii. 6, §1) no less than eleven forms have been collected, following both originals, some variations being very corrupt; but from the translation given by Josephus it is probable that he transcribed the Hebrew. Philo (*De Nominaum Mut.* p. 819 c. ed. Col. 1613) and Theodoret (i. p. 106, ed. Schulz) follow the LXX., and Jerome, the Hebrew. The Coptic version nearly transcribes the LXX., **ΨΟΝΘΩΛΕΦΑΝΗΚ**.

In the Hebrew text the name is divided into two parts. Every such division of Egyptian words being in accordance with the Egyptian orthography; as No-Ammon, Pi-beseth, Poti-pherah; we cannot, if the name be Egyptian, reasonably propose any change in this case; if the name be Hebrew, the

is not present in the Hebrew name.

* Here the name is contracted to נָזַח.

† These curious words are produced by joining Zanoah to the name following it, Cain, or hac-Cain.

name is certain. There is no *prima facie* reason for any change in the consonants.

The LXX. form seems to indicate the same division, as the latter part, *πανηχ*, is identical with the second part of the Hebrew, while what precedes is different. There is again no *prima facie* reason for any change from the ordinary reading of the name. The cause of the difference from the Hebrew in the earlier part of the name must be discussed when we come to examine its meaning.

This name has been explained as Hebrew or Egyptian, and always as a proper name. It has not been supposed to be an official title, but this possibility has to be considered.

1. The Rabbins interpreted Zaphnath-paaneah as Hebrew, in the sense "revealer of a secret." This explanation is as old as Josephus (*κρυπτῶν εἰρη-της*, *Ant.* ii. 6, §1); and Theodoret also follows it (*τῶν ἀποκρύφτων ἐρμηνεύτης*, i. p. 106, Schulz). Philo offers an explanation, which, though seemingly different, may be the same (*ἐν ἀποκρίσει σόφια κλειστή*; but Mangey conjectures the true reading to be *ἐν ἀποκρίσει σόφια ἀνακρινόμενος*, *l. c.*). It must be remembered that Josephus perhaps, and Theodoret and Philo certainly, follow the LXX. form of the name.

2. Isidore, though mentioning the Hebrew interpretation, remarks that the name should be Egyptian, and offers an Egyptian etymology:—"Joseph . . . hunc Pharaon Zaphanath Phaaneah appellavit, quod Hebraice absconditorum repertorem sonat . . . tamen quia hoc nomen ab Aegypto ponitur, ipsius linguae debet habere rationem. Interpretatur ergo Zaphanath Phaaneah Aegypto sermone salvator mundi" (*Orig.* vii. c. 7, t. iii. p. 327, Arev.). Jerome adopts the same rendering.

3. Modern scholars have looked to Coptic for an explanation of this name, Jänilsoni and others proposing as the Coptic of the Egyptian original *ΠΩΤ ΦΕΚΕΖ*, or *ΠΩΤ*, &c., "the preservation" or "preserver of the age." This is evidently the etymology intended by Isidore and Jerome.

We dismiss the Hebrew interpretation, as unsound in itself, and demanding the improbable concession that Pharaoh gave Joseph a Hebrew name.

It is impossible to arrive at a satisfactory result without first inquiring when this name was given, and what are the characteristics of Egyptian titles and names. These points having been discussed, we can show what ancient Egyptian sounds correspond to the Hebrew and LXX. forms of this name, and a comparison with ancient Egyptian will then be possible.

After the account of Joseph's appointment to be governor, of his receiving the insignia of authority, and Pharaoh's telling him that he held the second place in the kingdom, follow these words:—"And Pharaoh called Joseph's name Zaphnath-paaneah; and he gave him to wife Asenath the daughter of Poti-pherah priest of On." It is next stated, "And Joseph went out over [all] the land of Egypt" (*Gen.* xli. 45). As Joseph's two sons were born "before the years of famine came" (*ver.* 50), it seems evident that the order is here strictly chronological, at least that the events spoken of are of the time before the famine. It is scarcely to be supposed that Pharaoh would have named Joseph "the preserver of the age," or the like, when the calamity, from the worst effects of which his administration preserved Egypt, had not come. The

name, at first sight, seems to be a proper name, but, as occurring after the account of Joseph's appointment and honours, may be a title.

Ancient Egyptian titles of dignity are generally connected with the king or the gods, as SUTEN-SA, king's son, applied not only to royal princes, but to the governors of KEESH, or Cush. Titles of place are generally simply descriptive, as MER-KETU, "superintendent of buildings" ("public works"?). Some few are tropical. Ancient Egyptian names are either simple or compound. Simple names are descriptive of occupation, as MA, "the shepherd," an early king's name, or are the names of natural objects, as PE-MAY (?), "the cat," &c.; more rarely they indicate qualities of character, as S-NUFRE, "doer of good." Compound names usually express devotion to the gods, as PET-AMEN-APT, "Belonging to Amen of Thebes;" some are composed with the name of the reigning king, as SHAFRA-SHA, "Shafra ruler;" SESERTESEN-ANKH, "Sesertesen lives." Others occur which are more difficult of explanation, as AMEN-EM-HA, "Amen in the front," a warrior? Double names, not merely of kings, but of private persons, are found, but are very rare, as SNUFRE ANKHEE, "Doer of good, living one." These double names are usually of the period before the xviiiith dynasty.

Before comparing Zaphnath-paaneah and Psenthomphanech with Egyptian names, we must ascertain the probable Egyptian equivalents of the letters of these forms. The Egyptian words occurring in Hebrew are few, and the forms of some of them evidently Shemiticized, or at least changed by their use by foreigners: a complete and systematic alphabet of Hebrew equivalents of Egyptian letters therefore cannot be drawn up. There are, on the other hand, numerous Shemitic words, either Hebrew or of a dialect very near it, the geographical names of places and tribes of Palestine, given, according to a system, in the Egyptian inscriptions and papyri, from which we can draw up, as M. de Rougé has done (*Revue Archéologique*, N. S. iii. 351-354), a complete alphabet, certain in nearly all its details, and approximately true in the few that are not determined, of the Egyptian equivalents of the Hebrew alphabet. The two comparative alphabets do not greatly differ, but we cannot be sure that in the endeavour to ascertain what Egyptian sounds are intended by Hebrew letters, or their Greek equivalents, we are quite accurate in employing the latter. For instance, different Egyptian signs are used to represent the Hebrew *ṭ* and *ḥ*, but it is by no means certain that these signs in Egyptian represented any sound but R, except in the vulgar dialect.

It is important to observe that the Egyptians had a hard "t," the parent of the Coptic *ϫ* and *Ϯ*, which we represent by an italic *T*; that they had an "a" corresponding to the Hebrew *א*, which we represent by an italic *A*; and that the Hebrew *ב* may be represented by the Egyptian *P*, also pronounced *P'h*, and by the *F*. The probable originals of the Egyptian name of Joseph may be thus stated:—

Ṣ	Ḍ	Ḑ	Ḥ	Ḍ	Ḑ	Ḥ
<i>T</i>	<i>P</i>	<i>N</i>	<i>T</i>	<i>P</i>	<i>A</i>	<i>N</i> KH
			<i>F</i>			
Ṣ	Ḍ	Ḑ	Ḥ	Ḍ	Ḑ	Ḥ
<i>PS</i>	<i>N</i>	<i>T</i>	<i>M</i>	<i>P</i>	<i>N</i>	<i>KH</i>
				<i>F</i>		

The second part of the name in the Hebrew is the same as in the LXX., although in the latter it is not separate: we therefore examine it first. It is identical with the ancient Egyptian proper name P-ANKHEE, "the living," borne by a king who was an Ethiopian ruling after Tirhakah, and probably contemporary with the earlier part of the reign of Psammetichus I. The only doubtful point in the identification is that it is not certain that the "a" in P-ANKHEE is that which represents the Hebrew *א*. It is a symbolic sign of the kind which serves as an initial, and at the same time determines the signification of the word it partly expresses and sometimes singly represents, and it is only used in the single sense "life," "to live." It may, however, be conjectured from its Coptic equivalents to have begun with either a long or a guttural "a" (ⲁⲛⲁⲅ B, ⲁⲛⲉ B, ⲁⲛⲁⲅ B, ⲁⲛⲉⲅ S, ⲁⲛⲁⲅ, ⲁⲛⲁⲅ M, ⲁⲛⲁⲅ B, ⲁⲛⲉⲅ S).

The second part of the name, thus explained, affords no clue to the meaning of the first part, being a separate name, as in the case of a double name already cited SNUFRE ANKHEE. The LXX. form of the first part is at once recognised in the ancient Egyptian words P-SENT-N, "the defender" or "preserver of," the Coptic ⲡⲥⲱⲧⲉⲛ, "the preserver of." It is to be remarked that the ancient Egyptian form of the principal word is that found in the LXX., but that the preposition N in hieroglyphics, however pronounced, is always written N, whereas in

Coptic ⲡ becomes ⲡⲥ before ⲡ. The word SENT does not appear to be used except as a divine, and, under the Ptolemies, regal title, in the latter case for Soter. The Hebrew form seems to represent a compound name commencing with TETEF, or TEF, "he says," a not infrequent element in compound names (the root being found in the Coptic ⲭⲟ, ⲭⲟⲧ: ⲥⲭⲟⲟ, ⲭⲟⲧ), or TEF, "in-cense, delight" (?) the name of the sacred incense, also known to us in the Greek form *κῆπι* (Plutarch, *de Isid. et Osir.* c. 80, p. 383; *Diosc. M.* m. l. 24, Spr.) But, if the name commence with either of these words, the rest seems inexplicable. It is remarkable that the last two consonants are the same as in Asenath, the name of Joseph's wife. It has been supposed that in both cases this element is the name of the goddess Neith, Asenath having been conjectured to be AS-NEET; and Zaphnath, by Mr. Osburn, we believe, TEF-NEET, "the delight (?) of Neith." Neith, the goddess of Sais, is not likely to have been revered at Heliopolis, the city of Amonath. It is also improbable that Pharaoh would have given Joseph a name connected with idolatry; for Joseph's position, unlike Daniel's, when he was first called Belteshazzar, would have enabled him effectually to protest against receiving such a name. The latter part of the name might suggest the possibility of the letters "aneah" corresponding to ANKH, and the whole preceding portion, Zaphnath and the initial of this part, forming the name of Joseph's Pharaoh; the form being that of SESER-TESEN-ANKH, "Sesertesen lives," already mentioned; but the occurrence of the letter P shows that the form is P-ANKHEE, and were this not sufficient proof, no name of a Pharaoh, or other proper name is known that can be compared with the supposed first portion. We have little doubt

that the monuments will unexpectedly supply us with the information we need, giving us the original Egyptian name, though probably not applied to Joseph, of whose period there are, we believe, but few Egyptian records. [R. S. P.]

ZAPHON (ⲫⲉⲩ: *Zaphō*; Alex. *Zaphō*: *Saphon*). The name of a place mentioned in the enumeration of the allotment of the tribe of Gad (Josh. xiii. 27). It is one of the places in "the valley" which appear to have constituted the "remainder" (ⲙⲓⲛⲓ) of the kingdom of Siben"—apparently referring to the portion of the same kingdom previously allotted to Reuben (vers. 17-21). The enumeration appears to proceed from south to north, and from the mention of the Sea of Chinnereth it is natural to infer that Zaphon was near that lake. No name resembling it has yet been encountered.

In Judg. xii. 1, the word rendered "northward" (*tsaphnōdā*) may with equal accuracy be rendered "to Zaphon." This rendering is supported by the Alex. LXX. (*ⲛⲉⲫⲉⲣⲱⲛ*) and a host of other MSS. and it has consistency on its side. [G.]

ZA'RA (*Zapā*: *Zara*). ZARAH the son of Judah (Matt. i. 3).

ZAR'ACES (*Zapācs*: *Zaracles*). Brother of Jucim, or Jehoiakim, king of Judah (1 Ead. i. 38). His name is apparently a corruption of Zedekiah.

ZA'RAH (ⲫⲉⲩ: *Zapā*: *Zara*). Properly ZERAH, the son of Judah by Tamar (Gen. xxxviii. 30, xvi. 12).

ZARATAS (Vat. omits; Alex. *Zapatas*: *Vulg.* omits). 1. ZERAHIAH, one of the ancestors of Ezra (1 Ead. viii. 2); called ARNA in 2 Ead. i. 2.

2. (*Zapatas*: *Zaratus*). ZERAHIAH, the father of Elihoenai (1 Ead. viii. 31).

3. (*Zapatas*: *Zarias*). ZERADIAH, the son of Michael (1 Ead. viii. 34).

ZAREAH (ⲫⲉⲩⲁ: *Zapē*: *Saraa*). The form in which our translators have once (Neh. xi. 29) represented the name, which they elsewhere present (less accurately) as ZORAH and ZOREAH. [G.]

ZAREATHITES, THE (ⲫⲉⲩⲁⲧⲏⲧⲏⲥ: *ⲛⲉⲫⲉⲩⲁⲧⲏⲧⲏⲥ*: *Saraitae*). The inhabitants of ZARAH or ZORAH. The word occurs in this form only in 1 Chr. ii. 53. Elsewhere the same Hebrew word appears in the A. V. as THE ZORATHITES. [G.]

ZARED, THE VALLEY OF (ⲫⲉⲩⲁⲣⲉⲩ: *Zapē*; Alex. *ⲫⲉⲩⲁⲣⲉⲩ*: *torrens Zared*). The name is accurately ZERED; the change in the first syllable being due to its occurring at a pause. It is found in the A. V. in this form only in Num. xxi. 12; though in the Hebr. it occurs also Deut. ii. 13. [G.]

ZAREPHATH (ⲫⲉⲩⲣⲉⲫⲁⲧⲏⲥ: *ⲛⲉⲫⲉⲩⲣⲉⲫⲁⲧⲏⲥ*: *Sarephtha*). A town which derives its claim to notice from having been the residence of the prophet Elijah during the latter part of the drought (1 K. xvii. 9, 10). Beyond stating that it was near to, or dependent on, Zidon (ⲫⲉⲩⲣⲉⲫⲁⲧⲏⲥ), the Bible gives no clue to its position.

* In 1 K. xvii. 9, the Alex. MS. has *Zapha*, but in the other two passages agrees with the Vat.

It is mentioned by Obadiah (ver. 20), but merely as a Canaanite (that is Phœnician) city. Josephus (*Ant.* viii. 13, §2), however, states that it was "not far from Sidon and Tyre, for it lies between them." And to this Jerome adds (*Onom.* "Sarepta") that it "lay on the public road," that is the coast-road. Both these conditions are implied in the mention of it in the Itinerary of Paula by Jerome (*Epit. Paulae*, §8), and both are fulfilled in the situation of the modern village of *Sārafend* (صرفند), a name which, except in its termination, is almost identical with the ancient Phœnician.

Sārafend has been visited and described by Dr. Robinson (*B. R.* ii. 475) and Dr. Thomson (*Land and Book*, ch. xii.). It appears to have changed its place, at least since the 11th century, for it is now more than a mile from the coast, high up on the slope of a hill (Rob. 474), whereas, at the time of the Crusades, it was on the shore. Of the old town, considerable indications remain. One group of foundations is on a headland called *Ain el-Kentarāh*; but the chief remains are south of this, and extend for a mile or more, with many fragments of columns, slabs, and other architectural features. The Roman road is said to be unusually perfect there (Beaumont, *Diary*, &c., ii. 186). The site of the chapel erected by the Crusaders on the spot then reputed to be the site of the widow's house, is probably still preserved.* (See the citations of Robinson.) It is near the water's edge, and is now marked by a wily and small khan dedicated to *el Khudr*, the well-known personage who unites, in the popular Moslem faith, Elijah and S. George.

In the N. T. Zarephath appears under the Greek form of ΣΑΡΕΨΑ. [G.]

ZAR'ETAN (צָרֶתָן, i. e. Tsarthan: LXX. omits in both MSS.: *Sarthan*). An inaccurate representation of the name elsewhere more correctly given as ZARTHAN. In occurs only in Josh. iii. 16, in defining the position of Adam, the city by which the upper waters of the Jordan remained during the passage of the Israelites:—"The waters rushing down from above stood and rose up upon one heap very far off—by Adam, the city that is by the side of Zarthan." No trace of these names has been found, nor is anything known of the situation of Zarthan.

It is remarkable that the LXX. should exhibit no trace of the name. [G.]

ZAR'ETH-SHA'HAR (צָרֶת שָׁחַר, i. e. Zareth has-shachar: Σαραθ καὶ Σαῖον; Alex. Σαραθ καὶ Σαῖον: *Sareth Assahar*). A place mentioned only in Josh. xiii. 19, in the catalogue of the towns allotted to Reuben. It is named between SIDMAH and BETHPEOR, and is particularly specified as "in Mount ha-Emek" (A. V. "in the Mount of the Valley"). From this, however, no clue can be gained to its position. Setzen (*Reisen*, ii. 369) proposes, though with hesitation (see his note), to identify it with a spot called *Sarā* at the mouth of the *Wady Zerka Main*, about a mile from the edge of the Dead Sea. A place *Shakār* is marked on Van de Velde's map, about six miles south of *as Salt*, at the head of the valley of the *Wady*

Seir. But nothing can be said of either of these in the present state of our knowledge. [G.]

ZAR'HITES, THE (זָרְחִי: δ Ζαρά; Alex. 'O Zapaal, Zapiel in Josh.: *Zarethas, Zare, stēpe Zarahis and Zarat*). A branch of the tribe of Judah: descended from Zerah the son of Judah (Num. xxvi. 13, 20; Josh. vii. 17; 1 Chr. xxvii. 11, 13). Achan was of this family, and it was represented in David's time by two distinguished warriors, Sibbechai the Hushathite and Maharai the Netophathite.

ZART'ANAH (צָרְתָּנָה: Ζαρτάνη; Alex. Ζαρτάνη: *Sarthana*). A place named in 1 K. iv. 12, to define the position of BETHSHEAN. It is possibly identical with ZARTHAN, but nothing positive can be said on the point, and the name has not been discovered in postbiblical times. [G.]

ZAR'THAN (צָרְתָּן: Ζαρτ; Alex. Ζαρτάνη: *Sarthan*).

1. A place in the ciccar or circle of Jordan, mentioned in connexion with Succoth (1 K. vii. 46).

2. It is also named, in the account of the passage of the Jordan by the Israelites (Josh. iii. 16), as defining the position of the city Adam, which was beside (צָרְתָּן) it. The difference which the translators of the A. V. have introduced into the name in this passage (ZARETAN) has no existence in the original.

3. A place with the similar name of ZARTANAH (which in the Hebrew differs from the two forms already named only in its termination) is mentioned in the list of Solomon's commissariat districts. It is there specified as "close to" (צָרְתָּן) Bethshean, that is, in the upper part of the Jordan valley.

4. Further, in Chronicles, Zeredathah is substituted for Zarthan, and this again is not impossibly identical with the Zerah, Zererah, or Zeredathah, of the story of Gideon. All these spots agree in proximity to the Jordan, but beyond this we are absolutely at fault as to their position. ADAM is unknown; SUCCOTH is, to say the least, uncertain; and no name approaching Zarthan has yet been encountered, except it be *Surtabeh* (صُرْتَابَة), the name of a lofty and isolated hill which projects from the main highlands into the Jordan valley, about 17 miles north of Jericho (Van de Velde, *Memoir*, 354). But *Surtabeh*, if connected with any ancient name, would seem rather to represent some compound of the ancient Hebrew or Phœnician *Tsor*, which in Arabic is represented by *Sār* (سار), as in the name of the modern Tyre. [G.]

ZATH'OE (Ζαθόν: *Zathus*). This name occurs in 1 Esd. viii. 32, for ZATTU, which appears to have been omitted in the Hebrew text of Esd. viii. 5, which should read, "Of the sons of Zattu, Shechaniah the son of Jahaziel."

ZATHU'I (Ζαθούλ: *Demu*). ZATTU (1 Esd. v. 12; comp. Esd. ii. 8).

ZAT'THU (Ζατθί: *Zathoula*; Alex. Ζατθούλα *Zethu*). Elsewhere ZATTU (Neh. x. 14).

* The name is given as *Sarphand* by Ibn Edris; *Sarphen* by Maunderville; and *Sarphen* by Maundrell.

* A grotto (as usual) at the foot of the hill on which the modern village stands is now shown as the residence

of Elijah (Van de Velde, *S. & P.* i. 102).

* This is not only the case in the two principal MSS. the edition of Holmes and Parsons shows it in one only and that a cursive MS. of the 13th cent.

ZAT'TU (זַטְתּוּ): *Zatoud, Zathua, Zathua*; Alex. *Zatoud, Zathua*; FA. *Zathua, Zathua*; *Zethua*). The sons of Zattu were a family of laymen of Israel who returned with Zerubbabel (Ezr. B. 8; Neh. vii. 13). A second division accompanied Ezra, though in the Hebrew text of Ezr. viii. 5 the name has been omitted. [ZATHOE.] Several members of this family had married foreign wives (Ezr. x. 27).

ZAT'VAN = **ZAAVAN** (1 Chr. i. 42).

ZA'ZA (זֶזָּא): 'O'Zu; Alex. 'O'Zu: *Ziza*). One of the sons of Jonathan, a descendant of Jerahmeel (1 Chr. ii. 33).

ZEBADIAH (זְבַדְיָהּ): *Zabdia: Zabdia*.

1. A Benjamite of the sons of Beriah (1 Chr. viii. 15).

2. A Benjamite of the sons of Elpaal (1 Chr. viii. 17).

3. One of the sons of Jeroham of Gedor, a Benjamite who joined the fortunes of David in his retreat at Ziklag (1 Chr. xii. 7).

4. (*Zabdia*; Alex. *Zabdia: Zabdia*.) Son of Asahel the brother of Joab (1 Chr. xxvii. 7).

5. (*Zebdia*.) Son of Michael of the sons of Shephatiah (Ezr. viii. 8). He returned with 80 of his clan in the second caravan with Ezra. In 1 Esdr. viii. 34 he is called *ZARALAS*.

6. (*Zabdia*; FA. *Zabdia*.) A priest of the sons of Immer who had married a foreign wife after the return from Babylon (Ezr. x. 20). Called *ZANDEUS* in 1 Esdr. ix. 21.

7. (*Zabdia*; Alex. *Zabdia: Zabdia*.) Third son of Meshelemiah the Korhite (1 Chr. xvi. 2).

8. (*Zabdia*.) A Levite in the reign of Jehoahaphat who was sent to teach the Law in the cities of Judah (2 Chr. xvii. 8).

9. The son of Ishmael and prince of the house of Judah in the reign of Jehoahaphat (2 Chr. xix. 11). In conjunction with Amariah the chief priest, he was appointed to the superintendence of the Levites, priests and chief men who had to decide all causes, civil and ecclesiastical, which were brought before them. They possibly may have formed a kind of court of appeal, Zebadiah acting for the interests of the king, and Amariah being the supreme authority in ecclesiastical matters.

ZE'BAH (זֶבֶּה): *Zebé: Zebé*). One of the two "kings" of Midian who appear to have commanded the great invasion of Palestine, and who finally fell by the hand of Gideon himself. He is always coupled with Zalmunna, and is mentioned in Judg. vii. 5-21; Ps. lxxxiii. 11.

It is a remarkable instance of the unconscious artlessness of the narrative contained in Judg. vi. 33-viii. 28, that no mention is made of any of the chiefs of the Midianites during the early part of the story, or indeed until Gideon actually comes into contact with them. We then discover (viii. 18) that while the Bedonins were ravaging the crops in the valley of Jezreel, before Gideon's attack, three or more of his brothers had been captured by the Arabs and put to death, by the hands of Zebah and Zalmunna themselves. But this material fact is only incidentally mentioned, and is of a piece with the later references by prophets and psalmists to

other events in the same struggle, the interest and value of which have been alluded to under *OREB*.

Ps. lxxxiii. 12, purports to have preserved the very words of the cry with which Zebah and Zalmunna rushed up at the head of their horses from the Jordan into the luxuriant growth of the great plain, "Seize these goodly pastures"!

While Oreb and Zeb, two of the inferior leaders of the incursion, had been slain, with a vast number of their people, by the Ephraimites, at the central fords of the Jordan (not improbably those near *Jisr Damieh*), the two kings had succeeded in making their escape by a passage further to the north (probably the ford near Bethshean), and thence by the *Wady Yabbe*, through Gilead, to Karkar, a place which is not fixed, but which lay doubtless high up on the Hauran. Here they were reposing with 15,000 men, a mere remnant of their huge horde, when Gideon overtook them. Had they resisted there is little doubt that they might have easily overcome the little band of "fainting" heroes who had toiled after them up the tremendous passes of the mountains; but the name of Gideon was still full of terror, and the Bedonins were entirely unprepared for his attack—they fled in dismay, and the two kings were taken.

Such was the Third Act of the great Tragedy. Two more remain. First the return down the long defiles leading to the Jordan. We see the cavalcade of camels, jingling the golden chains and the crescent-shaped collars or trappings hung round their necks. High aloft rode the captive chiefs clad in their brilliant *kefiyehs* and embroidered *abbayahs*, and with their "collars" or "jewels" in nose and ear, on neck and arm. Gideon probably strode on foot by the side of his captives. They passed Penuel, where Jacob had seen the vision of the face of God; they passed Succoth; they crossed the rapid stream of the Jordan; they ascended the highlands west of the river, and at length reached Ophrah, the native village of their captor (Joseph. Ant. iv. 7, §5). Then at last the question which must have been on Gideon's tongue during the whole of the return found a vent. There is no appearance of its having been alluded to before, but it gives, as nothing else could, the key to the whole pursuit. It was the death of his brothers, "the children of his mother," that had supplied the personal motive for that steady perseverance, and had led Gideon on to his goal against hunger, faintness, and obstacles of all kinds. "What manner of men were they which ye slew at Tabor?" Up to this time the sheikh may have believed that they were reserved for ransom; but these words once spoken there can have been no doubt what their fate was to be. They met it like noble children of the Desert, without fear or weakness. One request alone they make—that they may die by the sure blow of the hero himself—"and Gideon arose and slew them;" and not till he had revenged his brothers did any thought of plunder enter his heart—then, and not till then, did he lay hands on the treasures which ornamented their camels. [G.]

ZE'BADM (זֶבֶּדִּים): in Neh. vi. זֶבֶּדִּים: *Zebadim*; Alex. *Zebadim*; in Neh. vi. זֶבֶּדִּים: *Zebadim, Zebadim*). The sons of Pochereth of ha-Taebaim are mentioned in the catalogue of the families of "Solomon's slaves," who returned from

It is perhaps allowable to infer this from the use of the plural (not the dual) to the word brethren (ver. 19).

Such is the meaning of "pastures of God" in the early idiom.

the Captivity with Zerubbabel (Ezra ii. 57; Neh. vii. 59). The name is in the original ill but identical with that of ZEBOIM,* the fellow-city of Sodom; and as many of "Solomon's slaves" appear to have been of Canaanite⁴ stock, it is possible that the family of Pochereth were descended from one of the people who escaped from Zeboim in the day of the great catastrophe in the Valley of the Jordan. This, however, can only be accepted as conjecture, and on the other hand the two names Pochereth bat-Tsebam are considered by some to have no reference to place, but to signify the "snarer or hunter of roes" (Gesenius, *Thes.* 1102 b; Bertheau, *Exeg. Handb.* Ezr. ii. 57). [G.]

ZEBEDEE (זְבִידִי or זְבִידִי: *Zēbedāies*). A fisherman of Galilee, the father of the Apostles James the Great and John (Matt. iv. 21), and the husband of Salome (Matt. xxvii. 56; Mark xv. 40). He probably lived either at Bethsaida or in its immediate neighbourhood. It has been inferred from the mention of his "hired servants" (Mark i. 20), and from the acquaintance between the Apostle John and Annas the high-priest (John xviii. 15) that the family of Zebedee were in easy circumstances (comp. John xix. 27), although not above manual labour (Matt. iv. 21). Although the name of Zebedee frequently occurs as a patronymic, for the sake of distinguishing his two sons from others who bore the same names, he appears only once in the Gospel narrative, namely in Matt. iv. 21, 22, Mark i. 19, 20, where he is seen in his boat with his two sons mending their nets. On this occasion he allows his sons to leave him at the bidding of the Saviour, without raising any objection; although it does not appear that he was himself ever of the number of Christ's disciples. His wife, indeed, appears in the catalogue of the pious women who were in constant attendance on the Saviour towards the close of His ministry, who watched Him on the cross, and ministered to Him even in the grave (Matt. xxvii. 55, 56; Mark xv. 40, xvi. 1; comp. Matt. xx. 20, and Luke viii. 3). It is reasonable to infer that Zebedee was dead before this time. It is worthy of notice, and may perhaps be regarded as a minute confirmation of the evangelical narrative, that the name of Zebedee is almost identical in signification with that of John, since it is likely that a father would desire that his own name should be, as it were, continued, although in an altered form. [JOHN THE APOSTLE.] [W. B. J.]

ZEBINA (זְבִינָה: *Zēbīnā*; Alex. omits: *Zabina*). One of the sons of Nebo, who had taken foreign wives after the return from Babylon (Ezr. x. 45).

ZEBOIM. This word represents in the A. V. two names which in the original are quite distinct.

1. (זְבוֹיִם, זְבוֹיִים, זְבוֹיִם, and, in the *Keri*, זְבוֹיִם: **Zēboiēm*; Alex. *Zēboiēm*, *Zēboiēm*: *Sēboim*). One of the five cities of the "plain" or circle of Jordan. It is mentioned in Gen. x. 19, xiv. 2, 8; Dent. xxix. 23; and Hos. xi. 8, in each of which passages it is either coupled with Admah, or placed next it in the lists. The name of its king, Shemeber, is preserved (Gen. xiv. 2); and it perhaps

appears again, as ZERAIM, in the lists of the men, *ais* of the Temple.

No attempt appears to have been made to discover the site of Zeboim, till M. de Saulcy suggested the *Taldu Sēdān*, a name which he, and he alone, reports as attached to extensive ruins on the high ground between the Dead Sea and *Kerak* (*Voyage*, Jan. 22; *Map*, sht. 7). Before however this can be accepted, M. de Saulcy must explain how a place which stood in the plain or circle of the Jordan, can have been situated on the highlands at least 50 miles from that river. [See SCODOM and ZOAR.]

In Gen. xiv. 2, 8, the name is given in the A. V. ZEBOIM, a more accurate representative of the form in which it appears in the original both there and in Deut. xxix. 23.

2. THE VALLEY OF ZEBOIM (וְאֵי זְבוֹיִם: *Fau-ry Zēboim*; the passage is lost in Alex.: *Vallis Sēboim*). The name differs from the preceding, not only in having the definite article attached to it, but also in containing the characteristic and stubborn letter *Ain*, which imparts a definite character to the word in pronunciation. It was a ravine or gorge, apparently east of Michmash, mentioned only in 1 Sam. xiii. 18. It is there described with a curious minuteness, which is unfortunately no longer intelligible. The road running from Michmash to the east, is specified as "the road of the border that looketh to the ravine of Zeboim towards the wilderness." The wilderness (*mīdbar*) is no doubt the district of uncultivated mountain tops and sides which lies between the central district of Benjamin and the Jordan Valley; and here apparently the ravine of Zeboim should be sought. In that very district there is a wild gorge, bearing the name of

Shuk ed-Dubba (شُق الضبع), "ravine of the hyena," the exact equivalent of *Ge hat-tseboim*. Up this gorge runs the path by which the writer was conducted from Jericho to *Mukhmas*, in 1859. It does not appear that the name has been noticed by other travellers, but it is worth investigation. [G.]

ZEBUDAH (זְבוּדָה, *Keri* זְבוּדָה: **Zēbūdā*; Alex. *Elebūdā*: *Zēbūdā*). Daughter of Pedaiah of Ruman, wife of Josiah and mother of king Jeboiakim (2 K. xxiii. 36). The Peshito-Syriac and Arabic of the London Polyglot read זְבוּדָה: the Targum has זְבוּדָה.

ZEBUL (זְבֻל: *Zēbūl*; Alex. *Zēbūl*). Chief man (זְבֻל, A. V. "ruler") of the city of Shechem at the time of the contest between Abimelech and the native Canaanites. His name occurs Judg. ix. 28, 30, 36, 58, 41. He governed the town as the "officer" (פָּקִיד: *phōkidos*) of Abimelech while the latter was absent, and he took part against the Canaanites by shutting them out of the city when Abimelech was encamped outside it. His conversation with Gaal the Canaanite leader, as they stood in the gate of Shechem watching the approach of the armed bands, gives Zebul a certain individuality amongst the many characters of that time of confusion. [G.]

* Even to the double yod. This name, on the other hand, is distinct from the ZEBONIM of Benjamin.

⁴ See this noticed more at length under MANUSIM, GEPHRA, &c.

⁵ In Gen. x. 19 only, this appears in Vat. (Mal) *Zēboiēm*.

⁶ The writer was accompanied by Mr. Consul E. T. Rogers, well known as one of the best living scholars in the common Arabic, who wrote down the name for him at the moment.

ZEBULONITE (זְבֻלֹּנִי, with the def. article: *ὁ Ζαβουλωνεὶτης*, Alex. in both verses, *ὁ Ζαβουλωνίτης*: *Zabulonites*), i. e. member of the tribe of Zebulun. Applied only to ELON, the one judge produced by the tribe (Judg. xii. 11, 12). The article being found in the original, the sentence should read, "Elon the Zebulonite." [G.]

ZEBULUN (זְבֻלֹּן, זְבֻלֹּן, and זְבֻלֹּן): *Zabulon*. The tenth of the sons of Jacob, according to the order in which their births are enumerated; the sixth and last of Leah (Gen. xxx. 20, xxxiv. 23, xli. 14; 1 Chr. ii. 1). His birth is recorded in Gen. xxx. 19, 20, where the origin of the name is as usual ascribed to an exclamation of his mother's—"Now will my husband dwell-with-me (*isbeleni*), for I have borne him six sons!" and she called his name Zebulun."

Of the individual Zebulun nothing is recorded. The list of Gen. xli. ascribes to him three sons, founders of the chief families of the tribe (comp. Num. xxvi. 28) at the time of the migration to Egypt. In the Jewish traditions he is named as the first of the five who were presented by Joseph to Pharaoh—Dan, Naphtali, Gad, and Asher being the others (*Targ. Pseudojoh.* on Gen. xlvii. 2).

During the journey from Egypt to Palestine the tribe of Zebulun formed one of the first camp, with Judah and Issachar (also sons of Leah), marching under the standard of Judah. Its numbers, at the census of Sinai, were 57,000, surpassed only by Simeon, Dan, and Judah. At that of Shittim they were 60,500, not having diminished, but not having increased nearly so much as might naturally be expected. The head of the tribe at Sinai was Eliab son of Helon (Num. vii. 24); at Shiloh, Elizaphan son of Parnach (ib. xxxiv. 25). Its representative amongst the spies was Gaddiel son of Sodi (xiii. 10). Besides what may be implied in its appearances in these lists, the tribe is not recorded to have taken part, for evil or good, in any of the events of the wandering or the conquest. Its allotment was the third of the second distribution (Josh. xix. 10). Judah, Joseph, Benjamin, had acquired the south and the centre of the country. To Zebulun fell one of the fairest of the remaining portions. It is perhaps impossible, in the present state of our knowledge, exactly to define its limits;* but the statement of Josephus (*Ant.* v. 1, §22) is probably in the main correct, that it reached on the one side to the lake of Genesareth, and on the other to Carmel and the Mediterranean. On the south it was bounded by Issachar, who lay in the great plain or valley of the Kishon; on the north it had Naphtali and Asher. In this district the tribe possessed the outlet (the "going-out," Deut. xxxiii. 18) of the plain of *Atta*; the fisheries of the lake of Galilee; the splendid agricultural capabilities of the great plain of the *Buttauf* (equal in

fertility, and almost equal in extent, to that of Jezreel, and with the immense advantage of not being, as that was, the high road of the Bedonias), and, last not least, it included sites so strongly fortified by nature, that in the later struggles of the nation they proved more impregnable than any in the whole country.[†] The sacred mountains of TABOR, Zebulun appears to have shared with Issachar (Deut. xxxiii. 19), and it and Rimmon were allotted to the Merarite Levites (1 Chr. vi. 77). But these ancient sanctuaries of the tribe were eclipsed by those which arose within it afterwards, when the name of Zebulun was superseded by that of Galilee. Nazareth, Cana, Tiberias, and probably the land of Genesareth itself, were all situated within its limits.

The fact recognized by Josephus that Zebulun extended to the Mediterranean, though not mentioned or implied, as far as we can discern, in the lists of Joshua and Judges, is alluded to in the Blessing of Jacob (Gen. xlix. 13):—

"Zebulun dwells at the shore of the sea,
Even he at the shore of ships:
And his thighs are upon Zidon."

—a passage which seems to show that at the date at which it was written, the tribe was taking a part in Phœnician commerce. The "way of the sea" (Is. ix. 1), the great road from Damascus to the Mediterranean, traversed a good portion of the territory of Zebulun, and must have brought its people into contact with the merchants and the commodities of Syria, Phœnicia, and Egypt.

Situated so far from the centre of government, Zebulun remains throughout the history, with one exception, in the obscurity which envelops the whole of the northern tribes. That exception, however, is a remarkable one. The conduct of the tribe during the struggle with Sisera, when they fought with desperate valour side by side with their brethren of Naphtali, was such as to draw down the especial praise of Deborah, who singles them out from all the other tribes (Judg. v. 18):—

"Zebulun is a people that threw away its life even unto death:
And Naphtali, on the high places of the field."

The same poem contains an expression which seems to imply that, apart from the distinction gained by their conduct in this contest, Zebulun was already in a prominent position among the tribes:—

"Out of Machir came down governors;
And out of Zebulun those that handle the pen (or the wand) of the scribe;"

referring probably to the officers, who registered and marshalled the warriors of the host (comp. Josh. i. 10). One of these "scribes" may have been ELON, the single judge produced by the tribe, who is recorded as having held office for ten years (Judg. xii. 11, 12).

put a different point on the exclamation of Leah: "My husband will choose me" (*isgeruni me*). This, however, hardly implies any difference in the original text. Josephus (*Ant.* i. 18, §8) gives only a general explanation: "a pledge of goodwill towards her."

* Few of the towns in the catalogue of Josh. xix. 10-28 have been identified. The tribe is omitted in the lists of 1 Chronicles.

† Sepphoris, Jotapata, &c.

§ In the "Testament of Zebulun" (Fahrichen, *Pseudo-epigr.* v. f. l. 630-48) great stress is laid on his skill in fishing, and he is commemorated as the first to navigate a ship on the sea.

* Of these three forms the first is employed in Genesis, Isaiah, Psalms, and Chronicles, except Gen. xlix. 13, and 1 Chr. xxvii. 18; also occasionally in Judges: the second is found in the rest of the Pentateuch, in Joshua, Judges, Ezekiel, and the above place in Chronicles. The third and more extended form is found in Judg. i. 30 only. The first and second are used indiscriminately: e. gr. Judg. iv. 6 and v. 18 exhibit the first; Judg. iv. 10 and v. 14 the second form.

† This play is not preserved in the original of the "Blessing of Jacob," though the language of the A. V. implies it. The word rendered "dwell" in Gen. xlix. 13 is זָבַן, with no relation to the name Zebulun. The LXX.

A similar reputation is alluded to in the mention of the tribe among those who attended the inauguration of David's reign at Hebron. The expressions are again peculiar:—"Of Zebulun such as went forth to war, rangers of battle, with all tools of war, 50,000; who could set the battle in array; they were not of double heart" (1 Chr. xii. 33). The same passage, however, shows that while proficient in the arts of war they did not neglect those of peace, but that on the wooded hills and fertile plains of their district they produced bread, meal, figs, grapes, wine, oil, oxen, and sheep in abundance (ver. 40). The head of the tribe at this time was Ishmaiah ben-Obadiah (1 Chr. xxvii. 19).

We are nowhere directly told that the people of Zebulun were carried off to Assyria. Tiglath-pileser swept away the whole of Naphtali (2 K. xv. 29; Tob. i. 2), and Salmanneser in the same way took "Samaria" (xvii. 6); but though the deportation of Zebulun and Issachar is not in so many words asserted, there is the statement (xvii. 18) that the whole of the northern tribes were removed; and there is also the well-known allusion of Isaiah to the affliction of Zebulun and Naphtali (ix. 1), which can hardly point to anything but the invasion of Tiglath-pileser. It is satisfactory to reflect that the very latest mention of the Zebulunites is the account of the visit of a large number of them to Jerusalem to the passover of Hezekiah, when, by the enlightened liberality of the king, they were enabled to eat the feast, even though, through long neglect of the provisions of the Law, they were not cleansed in the manner prescribed by the ceremonial law.—In the visions of Ezekiel (xviii. 28-33) and of St. John (Rev. vii. 8) this tribe finds its due mention. [G.]

ZEBULUNITES, THE (זְבֻלֻנִי, i. e. "the Zebulonite": Ζαβουλων: *Zabulon*). The members of the tribe of Zebulun (Num. xxvi. 27 only). It would be more literally accurate if spelt ZEBULONITES. [G.]

ZECHARIAH (זְכַרְיָה): Ζαχαρίας: *Zacharias*. 1. The eleventh in order of the twelve minor prophets. Of his personal history we know but little. He is called in his prophecy the son of Berechiah, and the grandson of Iddo, whereas in the Book of Ezra (v. 1, vi. 14) he is said to have been the son of Iddo. Various attempts have been made to reconcile this discrepancy. Cyril of Alexandria (*Pref. Comment. ad Zech.*) supposes that Berechiah was the father of Zechariah, according to the flesh, and that Iddo was his instructor, and might be regarded as his spiritual father. Jerome too, according to some MSS., has in Zech. i. 1, "filium Berachias, filium Addo," as if he supposed that Berechiah and Iddo were different names of the same person; and the same mistake occurs in the LXX.: τὸν υἱὸν Βαπαχίου, υἱὸν Ἀδδῆ. Gesenius (*Lex. s. v.* [2]) and Rosenmüller (*On Zech.* i. 1) take זְכַרְיָה in the passages in Ezra to mean "grandson," as in Gen. xxix. 5. Laban is termed "the son," i. e. "grandson," of Nahor. Others, again, have suggested that in the text of Ezra no mention is made of Berechiah, because he was already dead, or because Iddo was the more distinguished person, and the generally recognised head of the family. Knobel thinks that the name of Berechiah has crept into the present

text of Zechariah from Isaiah viii. 2, where mention is made of a Zechariah "the son of Jeberechiah," which is virtually the same name (LXX. Βαπαχίω) as Berechiah.^a His theory is that chapters ix.-xi. of our present Book of Zechariah are really the work of the older Zechariah (Is. viii. 2, that a later scribe finding the two books, one bearing the name of Zechariah the son of Iddo, and the other that of Zechariah the son of Berechiah, united them into one, and at the same time combined the titles of the two, and that hence arose the confusion which at present exists. This, however, is hardly a probable hypothesis. It is surely more natural to suppose, as the Prophet himself mentions his father's name, whereas the historical Books of Ezra and Nehemiah mention only Iddo, that Berechiah had died early, and that there was now no intervening link between the grandfather and the grandson. The son, in giving his pedigree, does not omit his father's name: the historian passes it over, as of one who was but little known, or already forgotten. This view is confirmed if we suppose the Iddo here mentioned to have been the Iddo the priest who, in Neh. xii. 4, is said to have returned from Babylon in company with Zerubbabel and Joshua. He is there said to have had a son Zechariah (ver. 18), who was contemporary with Joiakim the son of Joshua; and this falls in with the hypothesis that, owing to some unexplained cause—perhaps the death of his father—Zechariah became the next representative of the family after his grandfather Iddo. Zechariah, according to this view, like Jeremiah and Ezekiel before him, was priest as well as prophet. He seems to have entered upon his office while yet young (זָעַר, Zech. ii. 4; comp. Jer. i. 6), and must have been born in Babylon, whence he returned with the first caravan of exiles under Zerubbabel and Joshua.

It was in the eighth month, in the second year of Darius, that he first publicly discharged his office. In this he acted in concert with Haggai, who must have been considerably his senior, if, as seems not improbable, Haggai had been carried into captivity, and hence had himself been one of those who had seen "the house" of Jehovah "in her first glory" (Hagg. ii. 3). Both prophets had the same great object before them; both directed all their energies to the building of the Second Temple. Haggai seems to have led the way in this work, and then to have left it chiefly in the hands of his younger contemporary. The foundations of the new building had already been laid in the time of Cyrus; but during the reigns of Cambyses and the pseudo-Smerdis the work had been broken off through the jealousies of the Samaritans. When, however, Darius Hystaspis ascended the throne (521), things took a more favourable turn. He seems to have been a large-hearted and gracious prince, and to have been well-disposed towards the Jews. Encouraged by the hopes which his accession held out, the Prophets exerted themselves to the utmost to secure the completion of the Temple.

It is impossible not to see of how great moment, under such circumstances, and for the discharge of the special duty with which he was entrusted, would be the priestly origin of Zechariah.

Too often the Prophet had had to stand forth in direct antagonism to the Priest. In an age when the service of God had stiffened into formalism,

^a As Hamekiah (Is. i. 1, Hos. i. 1) and Jeberechiah (2 K. xxiii. 1, 9, 10), Omlah (Jer. xxii. 24, xxxvii. 1) and Je-

coniah (Jer. xxiv. 1, xxvii. 20), Azah' (Jer. xv. 30) and Iaziel (1 Chr. xv. 18).

and the Priests' lips no longer kept knowledge, the Prophet was the witness for the truth which lay beneath the outward ceremonial, and without which the outward ceremonial was worthless. But the thing to be decried now was not superstitious formalism, but cold neglect. There was no fear now lest in a gorgeous temple, amidst the splendours of an imposing ritual and the smoke of sacrifices ever ascending to heaven, the heart and life of religion should be lost. The fear was all the other way, lest even the body, the outward form and service, should be suffered to decay.

The foundations of the Temple had indeed been laid, but that was all (Exr. v. 16). Discouraged by the opposition which they had encountered at first, the Jewish colony had begun to build, and were not able to finish; and even when the letter came from Darius sanctioning the work, and promising his protection, they showed no hearty disposition to engage in it. At such a time, no more fitting instrument could be found to rouse the people, whose heart had grown cold, than one who united to the authority of the Prophet the zeal and the traditions of a sacerdotal family.

Accordingly, to Zechariah's influence we find the rebuilding of the Temple in a great measure ascribed. "And the elders of the Jews builded," it is said, "and they prospered through the prophesying of Haggai the prophet, and Zechariah the son of Iddo" (Exr. vi. 14). It is remarkable that in this juxtaposition of the two names both are not styled prophets: not "Haggai and Zechariah the prophets," but "Haggai the prophet, and Zechariah the son of Iddo." Is it an improbable conjecture that Zechariah is designated by his father's (or grandfather's) name, rather than by his office, in order to remind us of his priestly character? Be this as it may, we find other indications of the close union which now subsisted between the priests and the prophets. Various events connected with the taking of Jerusalem and the Captivity in Babylon had led to the institution of solemn fast-days; and we find that when a question arose as to the propriety of observing these fast-days, now that the city and the Temple were rebuilt, the question was referred to "the priests which were in the house of Jehovah, and to the prophets,"—a recognition, not only of the joint authority, but of the harmony subsisting between the two bodies, without parallel in Jewish history. The manner, too, in which Joshua the High-Priest is spoken of in this prophecy shows how lively a sympathy Zechariah felt towards him.

Later traditions assume, what is indeed very probable, that Zechariah took personally an active part in providing for the Liturgical service of the Temple. He and Haggai are both said to have composed Psalms with this view. According to the LXX., Pss. cxxxvii. cxlv.—cxlviii.; according to the Peshito, Pss. cxv. cxvi.; according to the Vulg., Ps. cxi.;

^b Hence Pseudoepiphanius, speaking of Haggai, says καὶ αὐτὸς ἔψαλλον ἐκείνους ἀλλήλους (in allusion to the Hallelujah with which some of these Psalms begin) καὶ λέγοντες ἀλλήλους ὁ δότιος ἄνθρωπος Ἀγγαίου καὶ Ζαχαρίου.

^c Tr. Megilla, fol. 17, 2. 18, 1; Raab ad Baba Bathra, fol. 18, 1.

^d Pseudoepiph. de Propht. cap. 21, οὗτος γὰρ ἐκὼν γὰρ Χαλδαίων ἦδ' ἀραβίων καὶ ἐκείνους πολλὰ τὰ λαὸν προ-εφύρευσεν, κτλ. Dorotheus, p. 144: Hic Zacharias a Chaldaee venit cum aetate jam esset provectus atque ibi populo multa vaticinatus est prodigiaque probandi gratia

are Psalms of Haggai and Zechariah.^b The triumphant "Hallelujah," with which many of them open, was supposed to be characteristic of those Psalms which were first chanted in the Second Temple, and came with an emphasis of meaning from the lips of those who had been restored to their native land. The allusions, moreover, with which these Psalms abound, as well as their place in the Psalter, leave us in no doubt as to the time when they were composed, and lend confirmation to the tradition respecting their authorship.

If the later Jewish accounts^c may be trusted, Zechariah, as well as Haggai, was a member of the Great Synagogue. The patristic notices of the Prophet are worth nothing. According to these, he exercised his prophetic office in Chaldaea, and wrought many miracles there; returned to Jerusalem at an advanced age, where he discharged the duties of the priesthood, and where he died and was buried by the side of Haggai.^d

The genuine writings of Zechariah help us but little in our estimation of his character. Some faint traces, however, we may observe in them of his education in Babylon. Less free and independent than he would have been, had his feet trod from childhood the soil,

* Where each old poetic mountain
Inspiration breathed around,"

he leans avowedly on the authority of the older prophets, and copies their expressions. Jeremiah especially seems to have been his favourite; and hence the Jewish saying, that "the spirit of Jeremiah dwelt in Zechariah." But in what may be called the peculiarities of his prophecy, he approaches more nearly to Ezekiel and Daniel. Like them he delights in visions; like them he uses symbols and allegories, rather than the bold figures and metaphors which lend so much force and beauty to the writings of the earlier prophets; like them he beholds angels ministering before Jehovah, and fulfilling his behests on the earth. He is the only one of the prophets who speaks of Satan. That some of these peculiarities are owing to his Chaldaean education can hardly be doubted. It is at least remarkable that both Ezekiel and Daniel, who must have been influenced by the same associations, should in some of these respects so closely resemble Zechariah, widely as they differ from him in others.

Even in the form of the visions a careful criticism might perhaps discover some traces of the Prophet's early training. Possibly the "valley of myrtles" in the first vision may have been suggested by Chaldaea rather than by Palestine. At any rate it is a curious fact that myrtles are never mentioned in the history of the Jews before the exile. They are found, besides this passage of Zechariah, in the Deutero-Isaiah xli. 19, lv. 13, and in Neh. viii. 15. The forms of trial in the third vision, where Joshua

edidit, et sacerdotio Hierosolymis functus est, etc. Isidorus, esp. 61. Zacharias de regione Chaldaeorum valde senex in terram suam reversus est, in qua et mortuus est ac sepultus juxta Agagorum quiescit in pace.

^e In the last passage the people are told to "fetch olive-branches and cypress-branches, and myrtle-branches and palm-branches . . . to make booths" for the celebration of the feast of tabernacles. It is interesting to compare this with the original direction, as given in the wilderness, when the only trees mentioned are "palms and willows of the brook." Palestine was rich in the olive and cypress. Is it very improbable that the myrtle may have

the High-Priest is arraigned, seem borrowed from the practice of Persian rather than Jewish courts of law. The filthy garments in which Joshua appears are those which the accused must assume when brought to trial; the white robe put upon him is the caftan or robe of honour which to this day in the East is put upon the minister of state who has been acquitted of the charges laid against him.

The vision of the woman in the Ephah is also Oriental in its character. Ewald refers to a very similar vision in Tod's *Rajasthan*, t. ii. p. 688.

Finally, the chariots issuing from between two mountains of brass must have been suggested, there can scarcely be any doubt, by some Persian symbolism.

Other peculiarities of style must be noticed, when we come to discuss the question of the integrity of the Book. Generally speaking, Zechariah's style is pure, and remarkably free from Chaldaisms. As is common with writers in the decline of a language, he seems to have striven to imitate the purity of the earlier models; but in orthography, and in the use of some words and phrases, he betrays the influence of a later age. He writes *לֵי*, and *לֵיךְ*; and employs *לְכָל* (v. 7) in its later use as the indefinite article, and *לְכָל־עֵלְיוֹן* with the fem. termination (lv. 12). A full collection of these peculiarities will be found in Köster, *Metamata in Zech.*, &c.

Contents of the Prophecy.—The Book of Zechariah, in its existing form, consists of three principal parts, chaps. i.-viii., chaps. ix.-xi., chaps. xii.-xiv.

1. The first of these divisions is allowed by all critics to be the genuine work of Zechariah the son of Iddo. It consists, first, of a short introduction or preface, in which the prophet announces his commission; then of a series of visions, descriptive of all those hopes and anticipations of which the building of the Temple was the pledge and sure foundation; and finally of a discourse, delivered two years later, in reply to questions respecting the observance of certain established facts.

1. The short introductory oracle (chap. i. 1-6) is a warning voice from the past. The prophet solemnly reminds the people, by an appeal to the experience of their fathers, that no word of God had ever fallen to the ground, and that therefore, if with sluggish indifference they refused to co-operate in the building of the Temple, they must expect the judgments of God. This warning manifestly rests upon the former warnings of Haggai.

2. In a dream of the night there passed before the eyes of the prophet a series of visions (chap. i. 7-vi. 15) descriptive in their different aspects of events, some of them shortly to come to pass, and others losing themselves in the mist of the future. These visions are obscure, and accordingly the prophet asks their meaning. The interpretation is given, not as to Amos by Jehovah Himself, but by an angel who knows the mind and will of Jehovah, who intercedes with Him for others, and by whom Jehovah speaks and issues his commands: at one time he is called "the angel who spake with me"

been an importation from Babylon? Esther was also called Hadassah (the myrtle) perhaps her Persian designation (Ezth. ii. 7); and the myrtle is said to be a native of Persia.

¹ Ewald understands by *לְכָל־עֵלְיוֹן* not "a valley" or "bottom," as the A. V. renders, but the heavenly tent or tabernacle (the expression being chosen with reference to

for "by me") (i. 9); at another, "the angel of Jehovah" (i. 11, 12, iii. 1-6).

(1.) In the first vision (chap. i. 7-15) the prophet sees, in a valley of myrtles, a rider upon a roan horse, accompanied by others who, having been sent forth to the four quarters of the earth, had returned with the tidings that the whole earth was at rest (with reference to Hagg. ii. 20). Hereupon the angel asks how long this state of things shall last, and is assured that the indifference of the heathen shall cease, and that the Temple shall be built in Jerusalem. This vision seems to have been partly borrowed from Job i. 7, &c.

(2.) The second vision (chap. ii. 1-17, A. V. i. 18-ii. 13), explains how the promise of the first is to be fulfilled. The four horns are the symbols of the different heathen kingdoms in the four quarters of the world, which have hitherto combined against Jerusalem. The four carpenters or smiths symbolise their destruction. What follows, ii. 5-9 (A. V. ii. 1-5), betokens the vastly extended area of Jerusalem, owing to the rapid increase of the new population. The old prophets, in foretelling the happiness and glory of the times which should succeed the Captivity in Babylon, had made a great part of that happiness and glory to consist in the gathering together again of the whole dispersed nation in the land given to their fathers. This vision was designed to teach that the expectation thus raised—the return of the dispersed of Israel—should be fulfilled; that Jerusalem should be too large to be compassed about by a wall, but that Jehovah Himself would be to her a wall of fire—a light and defence to the holy city, and destruction to her adversaries. A song of joy, in prospect of so bright a future, closes the scene.

(3.) The next two visions (iii. iv.) are occupied with the Temple, and with the two principal persons on whom the hopes of the returned exiles rested. The permission granted for the rebuilding of the Temple had no doubt stirred afresh the malice and the animosity of the enemies of the Jews. Joshua the High-Priest had been singled out, it would seem, as the especial object of attack, and perhaps formal accusations had already been laid against him before the Persian court.⁵ The prophet, in vision, sees him summoned before a higher tribunal, and solemnly acquitted, despite the charges of the Satan or Adversary. This is done with the forms still usual in an Eastern court. The filthy garments in which the accused is expected to stand are taken away, and the caftan or robe of honour is put upon him in token that his innocence has been established. Acquitted at that bar, he need not fear, it is implied, any earthly accuser. He shall be protected, he shall carry on the building of the Temple, he shall so prepare the way for the coming of the Messiah, and upon the foundation-stone laid before him shall the seven eyes of God, the token of His ever-watchful Providence, rest.

(4.) The last vision (iv.) supposes that all opposition to the building of the Temple shall be removed. This sees the completion of the work. It has evidently a peculiarly impressive character; for the

the Mosaic tabernacle), which is the dwelling-place of Jehovah. Instead of "myrtles" he understands by *לְכָל־עֵלְיוֹן* (with the LXX. *ἀπὸ μέσων τῶν ὄρεων τῶν κερκασίων*) "mountains," and supposes these to be the "two mountains" mentioned vi. 1, and which are there called "mountains of brass."

⁵ So Ewald, *Die Propheten*, ii. 526.

prophet, though his dream still continues, seems to himself to be awakened out of it by the angel who speaks to him. The candlestick (or more properly chandelier) with seven lights (borrowed from the candlestick of the Mosaic Tabernacle, Ex. xxv. 31 ff.) supposes that the Temple is already finished. The seven pipes which supply each lamp answer to the seven eyes of Jehovah in the preceding vision (iii. 9), and this sevenfold supply of oil denotes the presence and operation of the Divine Spirit, through whose aid Zerubbabel will overcome all obstacles, so that as his hands had laid the foundation of the house, his hands should also finish it (iv. 9). The two olive-branches of the vision, belonging to the olive-tree standing by the candlestick, are Zerubbabel himself and Joshua.

The two next visions (v. 1-11) signify that the land, in which the sanctuary has just been erected, shall be purged of all its pollutions.

(5.) First, the curse is recorded against wickedness in the whole land (not in the whole earth, as A. V.), v. 3; that due solemnity may be given to it, it is inscribed upon a roll, and the roll is represented as flying, in order to denote the speed with which the curse will execute itself.

(6.) Next, the unclean thing, whether in the form of idolatry or any other abomination, shall be utterly removed. Caught and shut up as it were in a cage, like some savage beast, and pressed down with a weight as of lead upon it so that it cannot escape, it shall be carried into that land where all evil things have long made their dwelling (Is. xxxiv. 13), the land of Babylon (Shinar, v. 11), from which Israel had been redeemed.

(7.) And now the night is waning fast, and the morning is about to dawn. Chariots and horses appear, issuing from between two brazen mountains, the horses like those in the first vision; and these receive their several commands and are sent forth to execute the will of Jehovah in the four quarters of the earth. The four chariots are images of the four winds, which, according to Ps. civ. 4, as servants of God, fulfil His behests; and of the one that goes to the north it is particularly said that it shall let the Spirit of Jehovah rest there—is it a spirit of anger against the nations, Assyria, Babylon, Persia, or is it a spirit of hope and desire of return in the hearts of those of the exiles who still lingered in the land of their captivity? Stähelin, Maurer, and others adopt the former view, which seems to be in accordance with the preceding vision: Ewald gives the latter interpretation, and thinks it is supported by what follows.

Thus, then, the cycle of visions is completed. Scene after scene is unrolled till the whole glowing picture is presented to the eye. All enemies crushed; the land re-peopled and Jerusalem girt as with a wall of fire; the Temple rebuilt, more truly splendid than of old, because more abundantly filled with a Divine Presence; the leaders of the people assured in the most signal manner of the Divine protection; all wickedness solemnly sentenced, and the land for ever purged of it;—such is the magnificent panorama of hope which the prophet displays to his countrymen.

And very consolatory must such a prospect have seemed to the weak and disheartened colony in Jerusalem. For the times were dark and troublous. According to recent interpretations of newly-discovered inscriptions, it would appear that Darius I. found it no easy task to hold his vast dominions. Province after province had revolted both in the

east and in the north, whither, according to the prophet (vi. 8), the winds had carried the wrath of God; and if the reading *Mudraja, i. e. Egypt*, is correct (Lassen gives Kurdistan), Egypt must have revolted before the outbreak mentioned in Herod. vii. 1, and have again been reduced to subjection. To such revolt there may possibly be an allusion in the reference to "the land of the south" (vi. 6).

It would seem that Zechariah anticipated as a consequence of these perpetual insurrections, the weakening and overthrow of the Persian monarchy and the setting up of the kingdom of God, for which Judah in faith and obedience was to wait.¹

Immediately on these visions there follows a symbolical act. Three Israelites had just returned from Babylon, bringing with them rich gifts to Jerusalem, apparently as contributions to the Temple, and had been received in the house of Josiah the son of Zephaniah. Thither the prophet is commanded to go,—whether still in a dream or not, is not very clear,—and to employ the silver and the gold of their offerings for the service of Jehovah. He is to make of them two crowns, and to place these on the head of Joshua the High-Priest,—a sign that in the Messiah who should build the Temple, the kingly and priestly offices should be united. This, however, is expressed somewhat enigmatically, as if king and priest should be perfectly at one, rather than that the same person should be both king and priest. These crowns moreover, were to be a memorial in honour of those by whose liberality they had been made, and should serve at the same time to excite other rich Jews still living in Babylon to the like liberality. Hence their symbolical purpose having been accomplished, they were to be laid up in the Temple.

3. From this time, for a space of nearly two years, the Prophet's voice was silent, or his words have not been recorded. But in the fourth year of King Darius, in the fourth day of the ninth month, there came a deputation of Jews to the Temple, anxious to know whether the fast-days which had been instituted during the seventy years' Captivity were still to be observed. On the one hand, now that the Captivity was at an end, and Jerusalem was rising from her ashes, such set times of mourning seemed quite out of place. On the other hand, there was still much ground for serious uneasiness; for some time after their return they had suffered severely from drought and famine (Hagg. i. 6-11), and who could tell that they would not so suffer again? the hostility of their neighbours had not ceased; they were still regarded with no common jealousy; and large numbers of their brethren had not yet returned from Babylon. It was a question therefore, that seemed to admit of much debate.

It is remarkable, as has been already noticed, that this question should have been addressed to priests and prophets conjointly in the Temple. This close alliance between two classes hitherto so separate, and often so antagonistic, was one of the most hopeful circumstances of the times. Still Zechariah, as chief of the prophets, has the decision of this question. Some of the priests, it is evident (vii. 7), were inclined to the more gloomy view; but not so the Prophet. In language worthy of his position and his office, language which reminds us of one of the most striking passages of his great

¹ Stähelin, *Finkel. in die Kon. Bähr.* p. 318

predecessor (Is. lviii. 5-7), he lays down the same principle that God loves mercy rather than fasting, and truth and righteousness rather than sackcloth and a sad countenance. If they had perished, he reminds them it was because their hearts were hard while they fasted; if they would dwell safely, they must abstain from fraud and violence and not from food (vii. 4-14).

Again he foretells, but not now in vision, the glorious times that are near at hand when Jehovah shall dwell in the midst of them, and Jerusalem be called a city of truth. He sees her streets thronged by old and young, her exiles returning, her Temple standing in all its beauty, her land rich in fruitfulness, her people a praise and a blessing in the earth (viii. 1-15). Again, he declares that "truth and peace" (vers. 16, 19) are the bulwarks of national prosperity. And once more reverting to the question which had been raised concerning the observance of the fasts, he announces, in obedience to the command of Jehovah, not only that the fasts are abolished, but that the days of mourning shall henceforth be days of joy, the fasts be counted for festivals. His prophecy concludes with a prediction that Jerusalem shall be the centre of religious worship to all nations of the earth (viii. 16-23).

II. The remainder of the Book consists of two sections of about equal length, ix.-xi. and xii.-xiv., each of which has an inscription. They have the general prophetic tone and character, and in subject they so far harmonize with i.-viii., that the Prophet seeks to comfort Judah in a season of depression with the hope of a brighter future.

1. In the first section he threatens Damascus and the sea-coast of Palestine with misfortune; but declares that Jerusalem shall be protected, for Jehovah himself shall encamp about her (where ix. 8 reminds us of ii. 5); her king shall come to her, he shall speak peace to the heathen, so that all weapons of war shall perish, and his dominion shall be to the ends of the earth. The Jews who are still in captivity shall return to their land; they shall be mightier than Javan (or Greece); and Ephraim and Judah once more united shall vanquish all enemies. The land too shall be fruitful as of old (comp. viii. 12). The Teraphim and the false prophets may indeed have spoken lies, but upon these will the Lord execute judgment, and then He will look with favour upon His people and bring back both Judah and Ephraim from their captivity. The possession of Gilead and Lebanon is again promised, as the special portion of Ephraim; and both Egypt and Assyria shall be broken and humbled.

The prophecy now takes a sudden turn. An enemy is seen approaching from the north, who having forced the narrow passes of Lebanon, the great bulwark of the northern frontier, carries desolation into the country beyond. Hereupon the prophet receives a commission from God to feed his flock, which God Himself will no more feed because of their divisions. The prophet undertakes the office, and makes to himself two staves (naming the one Beauty, and the other Union), in order to tend the flock, and cuts off several evil shepherds whom his soul abhors; but observes at the same time that the flock will not be obedient. Hence he throws up his office; he breaks asunder the one crook in token that the covenant of God with Israel was dissolved. A few of the poor of the flock, acknowledge God's hand herein; and the prophet demanding the wages of his service, receives thirty pieces

of silver, and casts it into the house of Jehovah. At the same time he sees that there is no hope of union between Judah and Israel whom he has trusted to feed as one flock, and therefore cuts in pieces the other crook, in token that the brotherhood between them is dissolved.

2. The Second Section, xii.-xiv., is entitled, "The burden of the word of Jehovah for Israel." But *Israel* is here used of the nation at large, not of Israel as distinct from Judah. Indeed, the prophecy which follows, concerns Judah and Jerusalem. In this the prophet beholds the near approach of troublous times, when Jerusalem should be hard pressed by enemies. But in that day Jehovah shall come to save them: "the house of David be as God, as the angel of Jehovah" (xii. 8), and all the nations which gather themselves against Jerusalem shall be destroyed. At the same time the deliverance shall not be from outward enemies alone. God will pour out upon them a spirit of grace and supplications, so that they shall bewail their sinfulness with a mourning greater than that with which they bewailed the beloved Josiah in the valley of Megiddon. So deep and so true shall be this repentance, so lively the aversion to all evil, that neither idol nor false prophet shall again be seen in the land. If a man shall pretend to prophesy, "his father and his mother that begat him shall thrust him through when he prophesieth," fired by the same righteous indignation as Phinehas was when he slew those who wrought folly in Israel (xii. 1-xiii. 6).

Then follows a short apostrophe to the sword of the enemy to turn against the shepherds of the people; and a further announcement of searching and purifying judgments; which, however, it must be acknowledged, is somewhat abrupt. Ewald's suggestion that the passage xiii. 7-9, is here out of place, and should be transposed to the end of chap. xi. is certainly ingenious, and does not seem improbable.

The prophecy closes with a grand and stirring picture. All nations are gathered together against Jerusalem; and seem already sure of their prey. Half of their cruel work has been accomplished, when Jehovah Himself appears on behalf of His people. At his coming all nature is moved: the Mount of Olives on which His feet rest cleaves asunder; a mighty earthquake heaves the ground, and even the natural succession of day and night is broken. He goes forth to war against the adversaries of His people. He establishes His kingdom over all the earth. Jerusalem is safely inhabited, and rich with the spoils of the nations. All nations that are still left, shall come up to Jerusalem, as the great centre of religious worship, there to worship "the King, Jehovah of hosts," and the city from that day forward shall be a holy city.

Such is, briefly, an outline of the second portion of that book which is commonly known as the Prophecy of Zechariah. It is impossible, even on a cursory view of the two portions of the prophecy, not to feel how different the section xi.-xiv. is from the section i.-viii. The next point, then, for our consideration is this,—Is the book in its present form the work of one and the same prophet, Zechariah the son of Iddo, who lived after the Babylonish exile?

Integrity.—Mede was the first to call this in question. The probability that the later chapters from the 9th to the 14th were by some other prophet, seems first to have been suggested to him by

the citation in St. Matthew. He says (Epist. xxxi.), "It may seem the Evangelist would inform us that those latter chapters ascribed to Zachary (namely, 9th, 10th, 11th, &c.), are indeed the prophecies of Jeremy; and that the Jews had not rightly attributed them." Starting from this point, he goes on to give reasons for supposing a different author. "Certainly, if a man weighs the contents of some of them, they should in likelihood be of an elder date than the time of Zachary; namely, before the Captivity: for the subjects of some of them were scarce in being after that time. And the chapter out of which St. Matthew quotes may seem to have somewhat much unsuitable with Zachary's time; as, a prophecy of the destruction of the Temple, then when he was to encourage them to build it. And how doth the sixth verse of that chapter suit with his time? There is no scripture saith they are Zachary's; but there is scripture saith they are Jeremy's, as this of the Evangelist." He then observes that the mere fact of these being found in the same book as the prophecies of Zechariah does not prove that they were his; difference of authorship being allowable in the same way as in the collection of Agur's Proverbs under one title with those of Solomon, and of Psalms by other authors with those of David. Even the absence of a fresh title is, he argues, no evidence against a change of author. "The Jews wrote in rolls or volumes, and the title was but once. If aught were added to the roll, *ὁ συνιτιθίνων ἀργυμένσι*, or for some other reason, it had a new title, as that of Agur; or perhaps none, but was ἀνεμύνηται." The utter disregard of anything like chronological order in the prophecies of Jeremiah, where "sometimes all is ended with Zedekiah; then we are brought back to Jehoiakim, then to Zedekiah again"—makes it probable, he thinks, that they were only hastily and loosely put together in those distracted times. Consequently some of them might not have been discovered till after the return from the Captivity, when they were approved by Zechariah, and so came to be incorporated with his prophecies. Mede evidently rests his opinion, partly on the authority of St. Matthew, and partly on the contents of the later chapters, which he considers require a date earlier than the exile. He says again (Epist. lxi.): "That which moveth me more than the rest is in chap. xii., which contains a prophecy of the destruction of Jerusalem, and a description of the wickedness of the inhabitants, for which God would give them to the sword, and have no more pity on them. It is expounded of the destruction by Titus; but methinks such a prophecy was nothing seasonable for Zachary's time when the city yet, for a great part, lay in her ruins, and the Temple had not yet recovered her's, nor agreeable to the scope of Zachary's commission, who, together with his colleague Haggai, was sent to encourage the people lately returned from captivity to build their temple, and to inaugurate their commonwealth. Was this a fit time to foretel the destruction of both, while they were but yet a building? and by Zachary, too, who was to encourage them? would not this better beseem the denunciation by Nebuchadnezzar?"

Archbishop Newcome went further. He insisted on the great dissimilarity of style as well as subject between the earlier and later chapters. And he was the first who advocated the theory which Bunse calls one of the triumphs of modern criticism, that the last six chapters of Zechariah are

the work of two distinct prophets. His words are: "The eight first chapters appear by the introductory parts to be the prophecies of Zechariah, stand in connexion with each other, are pertinent to the time when they were delivered, are uniform in style and manner, and constitute a regular whole. But the six last chapters are not expressly assigned to Zechariah; are unconnected with those which precede; the three first of them are unsuitable in many parts to the time when Zechariah lived; all of them have a more adorned and poetical turn of composition than the eight first chapters; and they manifestly break the unity of the prophetic book."

"I conclude," he continues, "from internal marks in chaps. ix., x., xi., that these three chapters were written much earlier than the time of Jeremiah and before the captivity of the tribes. Israel is mentioned chaps. ix. 1, xi. 14. (But that this argument is inconclusive, see Mal. ii. 11.) Ephraim chaps. ix. 10, 13, x. 7; and Assyria, chap. x. 10, 11. . . . They seem to suit Hosea's age and manner. . . . The xiiith, xliith, and xlvth chapters form a distinct prophecy, and were written after the death of Josiah; but whether before or after the Captivity, and by what prophets, is uncertain. Though I incline to think that the author lived before the destruction of Jerusalem by the Babylonians." In proof of this he refers to xiii. 2, on which he observes that the "prediction that idols and false prophets should cease at the final restoration of the Jews seems to have been uttered when idolatry and groundless pretensions to the spirit of prophecy were common among the Jews, and therefore before the Babylonish Captivity."

A large number of critics have followed Mede and Archbishop Newcome in denying the later date of the last six chapters of the Book. In England, Bishop Kidder, Whiston, Hammond, and more recently Pye Smith, and Davidson; in Germany, Flügge, Eichhorn, Bauer, Bertholdt, Augusti, Forberg, Rosenmüller, Gramberg, Crudner, Ewald, Maurer, Knobel, Hitzig, and Bleek, are agreed in maintaining that these later chapters are not the work of Zechariah the son of Iddo.

On the other hand, the later date of these chapters has been maintained among ourselves by Blayney and Henderson, and on the continent by Carpeov, Beckhaus, Jahn, Köster, Hengstenberg, Hävernick, Keil, De Wette (in later editions of his *Einführung*; in the first three he adopted a different view), and Stähelin.

Those who impugn the later date of these chapters of Zechariah rest their arguments on the change in style and subject after the 8th chapter, but differ much in the application of their criticism. Rosenmüller, for instance (*Schol. in Prop. Aem.* vol. iv. 257), argues that chaps. ix.-xiv. are as alike in style, that they must have been written by one author. He alleges in proof his fondness for images taken from pastoral life (ix. 16, x. 2, 3, xi. 3, 4, 5, 7, 8, 9, 11, 15, 17, xiii. 7, 8). From the allusion to the earthquakes (xiv. 5, comp. Am. i. 1), he thinks the author must have lived in the reign of Ussiah.

Davidson (in Horne's *Introd.* ii. 982) in like manner declares for one author, but supposes him to have been the Zechariah mentioned in viii. 2 who lived in the reign of Ahas.

Eichhorn, on the other hand, whilst also assigning (in his *Einführung*, iv. 444) the whole of chaps. ix.-xiv. to one writer, is of opinion that they are

the work of a *later* prophet who flourished in the time of Alexander.

Others again, as Bertholdt, Gesenius, Knobel, Maurer, Bunsen, and Ewald, think that chaps. ix.-xi. (to which Ewald adds xiii. 7-9) are a distinct prophecy from chaps. xii.-xiv., and separated from them by a considerable interval of time. These critics conclude from internal evidence, that the former portion was written by a prophet who lived in the reign of Ahas (Knobel gives ix., x. to the reign of Jotham, and xi. to that of Ahas), and most of them conjecture that he was the Zechariah the son of Jeberchiah (or Berechiah), mentioned Is. viii. 2.

Ewald, without attempting to identify the prophet with any particular person, contents himself with remarking that he was a subject of the Southern kingdom (as may be inferred from expressions such as that in ix. 7, and from the Messianic hopes which he utters, and in which he resembles his countryman and contemporary Isaiah); and that like Amos and Hosea before him, though a native of Judah, he directs his prophecies against Ephraim.

There is the same general agreement among the last-named critics as to the date of the section xii.-xiv.

They all assign it to a period immediately previous to the Babylonish Captivity, and hence the author must have been contemporary with the prophet Jeremiah. Bunsen identifies him with Urijah the son of Shemaiah of Kirjath-jearim (Jer. xvi. 20-23), who prophesied "in the name of Jehovah" against Judah and Jerusalem.

According to this hypothesis we have the works of three different prophets collected into one book, and passing under one name:—

1. Chapters ix.-xi., the book of Zechariah I., a contemporary of Isaiah, under Ahas, about 736.

2. Chapters xii.-xiv., author unknown (or perhaps Urijah, a contemporary of Jeremiah), about 607 or 606.

3. Chapters i.-viii., the work of the son (or grandson) of Iddo, Haggai's contemporary, about 520-518.

We have then two distinct theories before us. The one merely affirms that the six last chapters of our present book are not from the same author as the first eight. The other carries the dismemberment of the book still further, and maintains that the six last chapters are the work of two distinct authors who lived at two distinct periods of Jewish history. The arguments advanced by the supporters of each theory rest on the same grounds. They are drawn partly from the difference in style, and partly from the difference in the nature of the contents, the historical references, &c., in the different sections of the book; but the one sees this difference only in ix.-xiv., as compared with i.-viii.; the other sees it also in xii.-xiv., as compared with ix.-xi. We must accordingly consider,—

1. The difference generally in the style and contents of chapters ix.-xiv., as compared with chapters i.-viii.

2. The differences between xii.-xiv., as compared with ix.-xi.

1. The difference in point of style between the latter and former portions of the prophecy is admitted by all critics. Rosentmüller characterizes that of the first eight chapters as "prosaic, feeble, poor," and that of the remaining six as "poetic, vigorous, concise, glowing." But without admitting so sweeping a criticism, and one which the verdict of

abler critics on the former portion has contradicted, there can be no doubt that the general tone and character of the one section is in decided contrast with that of the other. "As he passes from the first half of the Prophet to the second," says Eichhorn, "no reader can fail to perceive how strikingly different are the impressions which are made upon him by the two. The manner of writing in the second portion is far loftier and more mysterious; the images employed grander and more magnificent; the point of view and the horizon are changed. Once the Temple and the ordinances of religion formed the central point from which the Prophet's words radiated, and to which they ever returned; now these have vanished. The favourite modes of expression, hitherto so often repeated, are now as it were forgotten. The chronological notices which before marked the day on which each several prophecy was uttered, now fail us altogether. Could a writer all at once have forgotten so entirely his habits of thought? Could he so completely disguise his innermost feelings? Could the world about him, the mode of expression, the images employed, be so totally different in the case of one and the same writer?" (*Ewald* iv. 443, §605).

I. Chapters i.-viii. are marked by certain peculiarities of idiom and phraseology which do not occur afterwards. Favourite expressions are—"The word of Jehovah came unto," &c. (i. 7, iv. 8, vi. 9, vii. 1, 4, 8, viii. 1, 18); "Thus saith Jehovah (God) of hosts" (i. 4, 18, 17, ii. 11, viii. 2, 4, 6, 7, 9, 14, 18, 20, 23); "And I lifted up mine eyes and saw" (i. 18, ii. 1, v. 1, vi. 1); none of these modes of expression are to be met with in chapters ix.-xiv. On the other hand, the phrase "In that day" is entirely confined to the latter chapters, in which it occurs frequently. The form of the inscriptions is different. Introductions to the separate oracles, such as those in ix. 1, xii. 1, do not present themselves in the earlier portion. Zechariah, in several instances, states the time at which a particular prophecy was uttered by him (i. 1, 7, vii. 1). He mentions his own name in these passages, and also in vii. 8, and the names of contemporaries in iii. 1, iv. 8, vi. 10, vii. 2: the writer (or writers) of the second portion of the book never does this. It has also been observed that after the first eight chapters we hear nothing of "Satan," or of "the seven eyes of Jehovah;" that there are no more visions; that chap. xi. contains an allegory, not a symbolic action; that there are no riddles which need to be solved, no *angelus interpres* to solve them.

II. Chapters ix.-xi. These chapters, it is alleged, have also their characteristic peculiarities:—

(1.) In point of style, the author resembles Hosea more than any other prophet: such is the verdict both of Knobel and Ewald. He delights to picture Jehovah as the Great Captain of His people. Jehovah comes to Zion, and pitches His camp there to protect her (ix. 8, 9). He blows the trumpet, marches against His enemies, makes His people His bow, and shoots His arrows (ix. 13, 14); or He rides on Judah as His war-horse, and goes forth thereon to victory (x. 3, 5). Again, he speaks of the people as a flock, and the leaders of the people as their shepherds (ix. 16, x. 2, 3, xi. 4, &c.). He describes himself also, in his character of prophet, as a shepherd in the last passages, and assumes to himself, in a symbolic action, which however may have been one only of the imagination, all the guise and the gear of a shepherd. In general he delights

in images (ix. 3, 4, 13-17, x. 3, 5, 7, &c.), some of which are striking and forcible.

(2) The notes of time are also peculiar:—

1. It was a time when the pride of Assyria was yet at its height (x. xi.), and when the Jews had already suffered from it. This first took place in the time of Menahem (B.C. 722-761).

2. For Trans-jordanic territory had already been swept by the armies of the invader (x. 10), but a still further desolation threatened it (xi. 1-3). The first may have been the invasion of Pul (1 Chr. v. 26), the second that of Tiglath-Pileser.¹

3. The kingdoms of Judah and Ephraim are both standing (ix. 10, 13, x. 8), but many Israelites are nevertheless exiles in Egypt and Assyria (ix. 11, x. 6, 10, &c.).

4. The struggle between Judah and Israel is supposed to be already begun (xi. 14). At the same time Damascus is threatened (ix. 1). If so, the reference must be to the alliance formed between Pekah king of Israel and Rezin of Damascus, the consequence of which was the loss of Elath (739).

5. Egypt and Assyria are both formidable powers (x. 9, 10, 11). The only other prophets to whom these two nations appear as formidable, at the same time, are Hosea (vii. 11, xii. 1, xiv. 3) and his contemporary Isaiah (vii. 17, &c.); and that in prophecies which must have been uttered between 743 and 740. The expectation seems to have been that the Assyrians, in order to attack Egypt, would march by way of Syria, Phoenicia, and Philistia, along the coast (Zech. ix. 1-9), as they did afterwards (Is. xx. 1), and that the kingdom of Israel would suffer chiefly in consequence (Zech. ix. 9-12), and Judah in a smaller degree (ix. 8, 9).

6. The kingdom of Israel is described as "a flock for the slaughter" in chap. xi., over which three shepherds have been set in one month. This corresponds with the season of anarchy and confusion which followed immediately on the murder of Zechariah the son of Jeroboam II. (760). This son reigned only six months, his murderer Shallum but one (2 K. xv. 8-15), being put to death in his turn by Menahem. Meanwhile another rival king may have arisen, Bensen thinks, in some other part of the country, who may have fallen as the murderer did, before Menahem.

The symbolical action of the breaking of the two shepherds' staves—Favour and Union—points the same way. The breaking of the first showed that God's favour had departed from Israel, that of the second that all hope of union between Judah and Ephraim was at an end.

All these notes of time point in the same direction, and make it probable that the author of chaps ix.-xi. was a contemporary of Isaiah, and prophesied during the reign of Ahas.²

Chaps. xii.-xiv.—By the majority of those critics who assign these chapters to a third author, that author is supposed to have lived shortly before the Babylonish Captivity. The grounds for separating these three chapters from chapters ix.-xi. are as follows:—

¹ So Knobel supposes. Ewald also refers, xi. 1-3, to the deportation of Tiglath-Pileser, and thinks that x. 10 refers to some earlier deportation, the Assyrians having invaded this portion of the kingdom of Israel in the former half of Pekah's reign of twenty years. To this Bensen (*Gott in der Gesch.* i. 486) objects that we have no record of any earlier removal of the inhabitants from the land than that of Tiglath-Pileser, which occurred at the close of Pekah's reign, and which in x. 10 is supposed to have taken place

1. This section opens with its own introductory formula, as the preceding one (ix. 1) does. This, however, only shows that the sections are distinct, not that they were written at different times.

2. The object of the two sections is altogether different. The author of the former (ix.-xi.) has both Israel and Judah before him; he often speaks of them together (ix. 13, x. 6, xi. 14, comp. x. 7); he directs his prophecy to the Trans-jordanic territory, and announces the discharge of his office in Israel (xi. 4, &c.). The author of the second section, on the other hand, has only to do with Judah and Jerusalem: he nowhere mentions Israel.

3. The political horizon of the two prophets is different. By the former, mention is made of the Syrians, Phoenicians, Philistines (ix. 1-7), and Greeks, (ix. 13), as well as of the Assyrians and Egyptians, the two last being described as at that time the most powerful. It therefore belongs to the earlier time when these two nations were beginning to struggle for supremacy in Western Asia. By the latter, the Egyptians only are mentioned as a hostile nation: not a word is said of the Assyrians. The author consequently must have lived at a time when Egypt was the chief enemy of Judah.

4. The anticipations of the two Prophets are different. The first trembles only for Ephraim. He predicts the desolation of the Trans-jordanic territory, the carrying away captive of the Israelites, but also the return from Assyria and Egypt (x. 7, 10). But for Judah he has no cause of fear. Jehovah will protect her (ix. 8), and bring back those of her sons who in earlier times had gone into captivity (ix. 11). The second Prophet, on the other hand, making no mention whatever of the northern kingdom, is full of alarm for Judah. He sees hostile nations gathering together against her, and two-thirds of her inhabitants destroyed (xii. 6); he sees the enemy laying siege to Jerusalem, taking and plundering it, and carrying half of her people captive (xii. 3, xiv. 2, 5). Of any return of the captives nothing is here said.

5. The style of the two Prophets is different. The author of this last section is fond of the prophetic formulae: *וַיְהִי*, "And it shall come to pass" (xii. 9, xiii. 2, 3, 4, 8, xiv. 6, 8, 13, 16); *וּבְיוֹם* *וְהָיָה*, "in that day" (xii. 3, 4, 6, 8, 9, 11, xiii. 1, 2, 4, xiv. 8, 9, 13, 20, 21); *וַיְהִי* *וְהָיָה*, "saith Jehovah" (xii. 1, 4, xiii. 2, 7, 8). In the section ix.-xi the first does not occur at all, the second but once (ix. 16), the third only twice (x. 12, xi. 6). We have moreover in this section certain favourite expressions: "all peoples," "all people of the earth," "all nations round about," "all nations that come up against Jerusalem," "the inhabitants of Jerusalem," "the house of David," "family" for nation, "the families of the earth," "the family of Egypt," &c.

6. There are apparently few notes of time in this section. One is the allusion to the death of Josiah already.

² According to Knobel, ix. and x. were probably delivered in Jotham's reign, and xi. to that of Ahas, who summoned Tiglath-Pileser to his aid. Maurer thinks that ix. and x. were written between the first (2 K. xv. 29) and second (2 K. xvii. 4-6) Assyrian invasions, chap. x. during the seven years interregnum which followed the death of Pekah, and xi. in the reign of Hosea.

in "the mourning of Hadadrimmon in the valley of Megiddon;" another to the earthquake in the days of Uzziah king of Judah. This addition to the name of the king shows, Knobel suggests, that he had been long dead; but the argument, if it is worth anything, would make even more for those who hold a post-exile date. It is certainly remarkable occurring thus in the body of the prophecy, and not in the inscription as in Isaiah i. 1.

In reply to all these arguments, it has been urged by Keil, Stäkelin, and others, that the difference of style between the two principal divisions of the prophecy is not greater than may reasonably be accounted for by the change of subject. The language in which visions are narrated would, from the nature of the case, be quieter and less animated than that in which prophetic anticipations of future glory are described. They differ as the style of the narrator differs from that of the orator. Thus, for instance, how different is the style of Hosea, chaps. i.-iii., from the style of the same Prophet in chaps. iv.-xiv.; or again, that of Ezekiel vi. vii. from Ezekiel iv.

But besides this, even in what may be termed the more oratorical portions of the first eight chapters, the Prophet is to a great extent occupied with warnings and exhortations of a practical kind (see i. 4-6, vii. 4-14, viii. 9-23); whereas in the subsequent chapters he is rapt into a far distant and glorious future. In the one case, therefore, the language would naturally sink down to the level of prose; in the other, it would rise to an elevation worthy of its exalted subject.

In like manner the notes of time in the former part (i. 1, 7, vii. 1), and the constant reference to the Temple, may be explained on the ground that the Prophet here busies himself with the events of his own time, whereas afterwards his eye is fixed on a far distant future.

On the other hand, where predictions do occur in the first section, there is a general similarity between them and the predictions of the second. The scene, so to speak, is the same; the same visions float before the eyes of the seer. The times of the Messiah are the theme of the predictions in chaps. i.-iv., in ix., x., and in xli.-xlii. 6, whilst the events which are to prepare the way for that time, and especially the sifting of the nation, are dwelt upon in chap. v., in xi., and in xiii. 7-xiv. 2.

(3.) The same peculiar forms of expression occur in the two divisions of the prophecy. Thus, for instance, we find **מַעֲרֹב וּמִזְרָח** not only in vii. 14, but also in ix. 8; **הַמַּעְרִיב**, in the sense of "to remove," in iii. 4, and in xiii. 2—elsewhere it occurs in this unusual sense only in later writings (2 K. xvi. 3; 2 Chr. xv. 8)—"the eye of God," as denoting the Divine Providence, in iii. 9, iv. 10, and in ix. 1, 8.

In both sections the return of the whole nation after the exile is the prevailing image of happiness, and in both it is similarly portrayed. As in ii. 10, the exiles are summoned to return to their native land, because now, according to the principles of righteous recompense, they shall rule over their enemies, so also a similar strain occurs in ix. 12, &c. Both in ii. 10 and in ix. 9 the renewed protection

wherewith God will favour Zion is represented as an entrance into His holy dwelling; in both the people are called on to rejoice, and in both there is a remarkable agreement in the words. In ii. 14, **רְנִי וְשִׂמְחִי בַת צִיּוֹן כִּי הִנְנִי בָא**, and in ix. 9, **נִילִי מֵאֵד בַּת צִיּוֹן הַרְעִי בַת יְרוּשָׁלַם הִנֵּה מַלְכְּךָ יָבוֹא לָךְ**.

Again, similar forms of expression occur in ii. 9, 11, and xi. 11; the description of the increase in Jerusalem, xiv. 10, may be compared with ii. 4; and the prediction in viii. 20-23 with that in xiv. 16. The resemblance which has been found in some other passages is too slight to strengthen the argument; and the occurrence of Chaldaisms, such as **צָבָא** (ix. 8), **רָאָהָה** (xiv. 10), **בֹּחַל** (which occurs besides only in Prov. xx. 21), and the phrase **מֵלֶךְ קָשָׁת** (ix. 13), instead of **דֶּרֶךְ קָשָׁת**, really prove nothing as to the age of the later chapters of Zechariah. Indeed, generally, as regards these minute comparisons of different passages to prove an identity of authorship, Maurer's remark holds true: "Sed quæ potest vis esse disjectorum quorundam locorum, ubi res judicanda est ex toto?"

Of far more weight, however, than the arguments already advanced is the fact that the writer of these last chapters (ix.-xiv.) shows an acquaintance with the later prophecies of the time of the exile. That there are numerous allusions in it to earlier prophets, such as Joel, Amos, Micah, has been shown by Hitzig (*Comment.* p. 354, 2nd ed.), but there are also, it is alleged, allusions to Zephaniah, Jeremiah, Ezekiel, and the later Isaiah (chaps. xl.-lxvi.). If this can be established, it is evidence that this portion of the book, if not written by Zechariah himself, was at least written after the exile. We find, then, in Zech. ix. 2 an allusion to Ez. xxviii. 3; in ix. 3 to 1 K. x. 27; in ix. 5 to Zeph. ii. 4; in ix. 11 to Is. li. 14; in ix. 12 to Is. xlix. 9 and Is. lxi. 7; in x. 3 to Ez. xxxiv. 17. Zech. xi. is derived from Ez. xxxiv. (comp. esp. xi. 4 with xxxiv. 4), and Zech. xi. 3 from Jer. xii. 5. Zech. xii. 1 alludes to Is. li. 13; xiii. 8, 9, to Ez. v. 12; xiv. 8 to Ez. xlvii. 1-12; xiv. 10, 11, to Jer. xxxi. 38-40; xiv. 16-19 to Is. lxvi. 23 and ix. 12; xiv. 20, 21, to Ez. xliii. 12 and xiv. 9.

This manifest acquaintance on the part of the writer of Zech. ix.-xiv. with so many of the later prophets seemed so convincing to De Wette that, after having in the first three editions of his *Introduction* declared for two authors, he found himself compelled to change his mind, and to admit that the later chapters must belong to the age of Zechariah, and might have been written by Zechariah himself.

Bleek, on the other hand, has done his best to weaken the force of this argument, first by maintaining that in most instances the alleged agreement is only apparent, and next, that where there is a real agreement (as in Zech. ix. 12, xi. 3, xii. 1, xiv. 16), with the passages above cited, Zechariah may be the original from whom Isaiah and Jeremiah borrowed. It must be confessed, however, that it is more probable that one writer should have allusions to many others, than that many others should

= Maurer's reply to this, viz., that the like phrase, **עֵינֵי יְהוָה** occurs in Exod. xxxii. 27, and **עֵינֵי יְהוָה** in Ezek. xxxv. 7, it must be confessed is of little force, because those who argue for one author build not only on

the fact that the same forms of expression are to be found in both sections of the Prophecy, but that the second section, like the first, evinces a familiarity with other writings, and especially with later prophets like Ezekiel. See below.

borrow from one; and this probability approaches certainty in proportion as we multiply the number of quotations or allusions. If there are passages in Zechariah which are manifestly similar to other passages in Zephaniah, in Jeremiah, Ezekiel, and the Deutero-Isaiah, which is the more probable, that they all borrowed from him, or he from them? In ix. 12 especially, as Stähelin argues, the expression is decidedly one to be looked for after the exile rather than before it, and the passage rests upon Jer. xvi. 18, and has an almost verbal accordance with Is. lxi. 7.

Again, the same critics argue that the *historical references* in the later chapters are perfectly consistent with a post-exile date. This had been already maintained by Eichhorn, although he supposes these chapters to have been written by a *later* prophet than Zechariah. Stähelin puts the case as follows: Even under the Persian rule the political relations of the Jews continued very nearly the same as they were in earlier times. They still were placed between a huge Eastern power on the one side and Egypt on the other, the only difference now being that Egypt as well as Judaea was subject to the Persians. But Egypt was an unwilling vassal, and as in earlier times when threatened by Assyria she had sought for alliances among her neighbours or had endeavoured to turn them to account as a kind of outwork in her own defences, so now she would adopt the same policy in her attempts to cast off the Persian yoke. It would follow as a matter of course that Persia would be on the watch to check such efforts, and would wreak her vengeance on those among her own tributary or dependent provinces which should venture to form an alliance with Egypt. Such of these provinces as lay on the sea-coast must indeed suffer in any case, even if they remained true in their allegiance to the Persians. The armies which were destined for the invasion of Egypt would collect in Syria and Phoenicia, and would march by way of the coast; and, whether they came as friends or as foes, they would probably cause sufficient devastation to justify the prophecy in Zech. ix. 1, &c., delivered against Damascus, Phoenicia, and Philistia. Meanwhile the prophet seeks to calm the minds of his own people by assuring them of God's protection, and of the coming of the Messiah, who at the appointed time shall again unite the two kingdoms of Judah and Ephraim. It is observable moreover that the prophet, throughout his discourses, is anxious not only to tranquillise the minds of his countrymen, but to prevent their engaging in any insurrection against their Persian masters, or forming any alliance with their enemies. In this respect he follows the example of Jeremiah and Ezekiel, and, like these two prophets, he foretells the return of Ephraim, the union of Ephraim and Judah, and the final overthrow both of Assyria (x. 11), that is, Persia,* and of Egypt, the two countries which had, more than all others, vexed and devastated Israel. That a large portion of the nation was still supposed to be in exile is clear from ix. 11, 12, and hence verse 10 can only be regarded as a reminiscence of Mic. v. 10; and even if x. 9 must be explained of the past (with De Wette, *Evid.* §250, 6, note a), still it appears from Josephus (*Ant.* xii. 2, §5) that the Persians carried away Jews into Egypt, and from

Syneellus (p. 486, Niebuhr's ed.) that Oedus transplanted large numbers of Jews from Palestine to the east and north; the earlier custom of thus forcibly removing to a distance those conquered nations who from disaffection or a turbulent spirit were likely to give occasion for alarm, having not only continued among the Persians, but having become even more common than ever (Havern. *Ideen*, i. 254, 2nd ed.). This well-known policy on the part of their conquerors would be a sufficient ground for the assurance which the prophet gives in x. 9. Even the threats uttered against the false prophets and the shepherds of the people are not inconsistent with the times after the exile. In Neh. v. and vi. we find the nobles and rulers of the people oppressing their brethren, and false prophets active in their opposition to Nehemiah. In like manner "the idols" (עֲצָבִים) in xiii. 1-5 may be the same as the "Teraphim" of x. 2, where they are mentioned in connexion with "the diviners" (מְחַבְּדֵי חֵלֶם). Malachi (iii. 5) speaks of "sorcerers" (מְחַבְּדֵי חֵלֶם), and that such superstition long held its ground among the Jews is evident from Joseph. *Ant.* viii. 2, §5. Nor does xiv. 21 of necessity imply either idol-worship or heathen pollution in the Temple. Chapter xi. was spoken by the prophet later than ix. and x. In verse 14 he declares the impossibility of any reunion between Judah and Ephraim, either because the northern territory has already been laid waste, or because the inhabitants of it had shown a disposition to league with Phoenicia in a vain effort to throw off the Persian yoke which would only involve them in certain destruction. This difficult passage Stähelin admits he cannot solve to his satisfaction, but contends that it may have been designed to teach the new colony that it was not a part of God's purpose to reunite the severed tribes; and in this he sees an argument for the post-exile date of the prophecy, inasmuch as the union of the ten tribes with the two was ever one of the brightest hopes of the prophets who lived before the Captivity.

Having thus shown that there is no reason why the section ix.-xi. should not belong to a time subsequent to the return from Babylon, Stähelin proceeds to argue that the prophecy directed against the nations (ix. 1-7) is really more applicable to the Persian era than to any other. It is only the coast-line which is here threatened; whereas the earlier prophets, whenever they threaten the maritime tribes, unite with them Moab and Amman, or Edom. Moreover the nations here mentioned are not spoken of as enemies of Judah; for being Persian subjects they would not venture to attack the Jewish colony when under the special protection of that power. Of Ashdod it is said that a foreigner (גֵּר, A. V. "bastard") shall dwell in it. This, too, might naturally have happened in the time of Zechariah. During the exile, Arabs had established themselves in Southern Palestine, and the prophet foresees that they would occupy Ashdod; and accordingly we learn from Neh. xiii. 24, that the dialect of Ashdod was unintelligible to the Jews, and in Neh. iv. 7, the people of Ashdod appear as a distinct tribe united with other Arabians against Judah. The king of Gaza (mentioned Zech. ix. 5) may have been a Persian vassal, as the kings of Tyre and Sidon were, according to Herodot. viii. 67. A king in Gaza would only be in conformity with the

* Although the Persians had succeeded to the Assyrians, the land might still be called by its ancient name of Assyria. See *Eur.* vi. 22 and Ewald, *Geogr.* iv. 120.

Persian custom (see Herod. *liv.* 15), although this was no longer the case in the time of Alexander. The mention of the "sons of Javan" (*Is.* 13; *A. V.* "Greece") is suitable to the Persian period (which is also the view of Eichhorn), as it was then that the Jews were first brought into any close contact with the Greeks. It was in fact the fierce struggle between Greece and Persia which gave a peculiar meaning to his words when the prophet promised his own people victory over the Greeks, and so reversed the earlier prediction of Joel *iv.* 6, 7 (*A. V.* *iii.* 6, 7). If, however, we are to understand by Javan Arabia, as some maintain, this again equally suits the period supposed, and the prophecy will refer to the Arabians, of whom we have already spoken.

We come now to the section *xii.-xiv.* The main proposition here is, that however hard Judah and Jerusalem may be pressed by enemies of Israel there is no further mention, still with God's help they shall be victorious; and the result shall be that Jehovah shall be more truly worshipped both by Jews and Gentiles. That this anticipation of the gathering of hostile armies against Jerusalem was not unnatural in the Persian times may be inferred from what has been said above. Persian hosts were often seen in Judaea. We find an instance of this in Josephus (*Ant.* *xi.* 7, §1), and Sidon was laid in ashes in consequence of an insurrection against Persia (*Diod.* *xvi.* 45). On the other hand, how could a prophet in the time immediately preceding the exile—the time to which, on account of *xii.* 12, most critics refer this section—have uttered predictions such as these? Since the time of Zephaniah all the prophets looked upon the fate of Jerusalem as sealed, whereas here, in direct contradiction to such views, the preservation of the city is announced even in the extremest calamities. Any analogy to the general strain of thought in this section is only to be found in *Is.* *xxix.-xxxiii.* Besides, no king is here mentioned, but only "the house of David," which, according to Jewish tradition (Hersfeld, *Gesch. des Volkes Israel*, p. 378, ff.), held a high position after the exile, and accordingly is mentioned (*xii.* 12, 13) in its different branches (comp. Meyer, *Das Phönix. Alterth.* *i.* 531), together with the tribe of Levi; the prophet, like the writer of *Ps.* *lxxxix.*, looking to it with a kind of yearning, which before the exile, whilst there was still a king, would have been inconceivable. Again, the manner in which Egypt is alluded to (*xiv.* 19) almost of necessity leads us to the Persian times; for then Egypt, in consequence of her perpetual efforts to throw off the Persian yoke, was naturally brought into hostility with the Jews, who were under the protection of Persia. Before the exile this was only the case during the interval between the death of Josiah and the battle of Carchemish.

It would seem then that there is nothing to compel us to place this section *xii.-xiv.* in the times before the exile; much, on the contrary,

which can only be satisfactorily accounted for on the supposition that it was written during the period of the Persian dominion. Nor must it be forgotten that we have here that fuller development of the Messianic idea which at such a time might be expected, and one which in fact rests upon all the prophets who flourished before the exile.

Such are the grounds, critical and historical, on which Stähelin rests his defence of the later date of the second portion of the prophet Zechariah. We have given his arguments at length as the ablest and most complete, as well as the most recent, on his side of the controversy. Some of them, it must be admitted, are full of weight. And when critics like Eichhorn maintain that of the whole section *ix.* 1-*x.* 17, no explanation is possible, unless we derive it from the history of Alexander the Great; and when De Wette, after having adopted the theory of different authors, felt himself obliged to abandon it for reasons already mentioned, and to vindicate the integrity of the book, the grounds for a post-exile date must be very strong. Indeed, it is not easy to say which way the weight of evidence preponderates.

With regard to the quotation in St. Matthew there seems no good reason for setting aside the received reading. Jerome observes, "This passage is not found in Jeremiah. But in Zechariah, who is nearly the last of the twelve prophets, something like it occurs; and though there is no great difference in the meaning, yet both the order and the words are different. I read a short time since, in a Hebrew volume, which a Hebrew of the sect of the Nazarenes presented to me, an apocryphal book of Jeremiah, in which I found the passage word for word. But still I am rather inclined to think that the quotation is made from Zechariah, in the usual manner of the Evangelists and Apostles, who neglecting the order of the words, only give the general sense of what they cite from the Old Testament."^o

Eusebius (*Evangel. Demonstr.* *lib.* *x.*) is of opinion that the passage thus quoted stood originally in the prophecy of Jeremiah, but was either erased subsequently by the malice of the Jews [a very improbable supposition it need hardly be said]; or that the name of Zechariah was substituted for that of Jeremiah through the carelessness of copyists. Augustine (*de Cons. Evangel.* *iii.* 30) testifies that the most ancient Greek copies had *Jeremiah*, and thinks that the mistake was originally St. Matthew's, but that this was divinely ordered, and that the Evangelist would not correct the error even when pointed out, in order that we might thus infer that all the prophets spoke by one Spirit, and that what was the work of one was the work of all (et singula esse omnium, et omnia singulorum.)^p Some later writers accounted for the non-appearance of the passage in Jeremiah, by the confusion in the Greek MSS. of his prophecies—a confusion, however, it

^o *Comment. in Evang. Matth.* cap. *xviii.* § 10.

^p This extraordinary method of solving the difficulty has been adopted by Dr. Wordsworth in his note on the passage in St. Matthew. He says: "On the whole there is reason to believe . . . that the prophecy which we read in *Zech.* (*xi.* 12, 13) had, in the first instance, been delivered by Jeremiah; and that by referring here not to *Zech.* where we read it, but to *Jer.* where we do not read it, the Holy Spirit teaches us not to regard the Prophets as the Authors of their Prophecies," &c. And again: "He intends to teach, that all prophecies proceed from One Spirit, and that those by whom they were uttered

are not sources, but only channels of the same Divine truth." But if so, why, it may be asked, do the writers of the Sacred Books ever give their names at all? Why trouble ourselves with the question whether St. Luke wrote the Acts, or whether St. Paul wrote the Ep. to the Hebrews or the Pastoral Epistles? What becomes of the argument, usually deemed so strong, derived from the testimony of the Four Evangelists, if, after all, the true are but one?

It would not be too much to say that such a theory is as pernicious as that against which it is directed.

may be remarked, which is not confined to the Greek, but which is found no less in our present Hebrew text. Others again suggest that in the Greek autograph of Matthew, ΖΠΙΟΤ may have been written, and that copyists may have taken this for ΙΠΙΟΤ. But there is no evidence that abbreviations of this kind were in use so early. Epiphanius and some of the Greek Fathers seem to have read *de rebus prophetis*. And the most ancient copy of the Latin Version of the Gospels omits the name of Jeremiah, and has merely *dictum est per Prophetam*. It has been conjectured that this represents the original Greek reading *τὸ πρῶτον διὰ τοῦ Προφήτου*, and that some early annotator wrote *ἱεροσολ* on the margin, whence it crept into the text. The choice lies between this, and a slip of memory on the part of the Evangelist if we admit the integrity of our present Book of Zechariah, unless, indeed, we suppose, with Eichhorn, who follows Jerome, that an Apocryphal Book of Jeremiah is quoted. Theophylact proposes to insert a *καὶ*, and would read *διὰ ἱεροσολ καὶ τοῦ Προφήτου—ἔργον Ζαχαρίου*. He argues that the quotation is really a fusion of two passages; that concerning the price paid occurring in Zechariah, chap. xi.; and that concerning the field in Jeremiah, chap. xix. But what N. T. writer would have used such a form of expression "by Jeremy and the Prophet"? Such a mode of quotation is without parallel. At the same time it must be borne in mind that the passage as given in S. Matthew does not represent exactly either the Hebrew text of Zechariah, or the version of the LXX. The other passages of the Prophet quoted in the N. T. are ix. 9 (in Matt. xxi. 5; Joh. xii. 15); xii. 10 (in Joh. xix. 37; Rev. i. 7); xiii. 7 (in Matt. xxvi. 31; Mark xiv. 27); but in no instance is the Prophet quoted by name.

2. (*Zacharias*: *Zacharias*.) Son of Meshelemiah, or Shelemiah, a Korhite, and keeper of the north gate of the tabernacle of the congregation (1 Chr. ix. 21); in the arrangement of the porters in the reign of David. In 1 Chr. xxvi. 2, 14, his name appears in the lengthened form זַכְרְיָהוּ, and in the last quoted verse he is described as "one counselling with understanding."

3. (*Zachab*; Alex. Ζαχχαβ.) One of the sons of Jehiel, the father or founder of Gibeon (1 Chr. ix. 37). In 1 Chr. viii. 31 he is called ZACHER.

4. (*Zacharias*.) A Levite in the Temple band so arranged by David, appointed to play "with psalteries on Alamoth" (1 Chr. xv. 20). He was of the second order of Levites (ver. 18), a porter or gatekeeper, and may possibly be the same as Zechariah the son of Meshelemiah. In 1 Chr. xv. 13 his name is written in the longer form, זַכְרְיָהוּ.

5. One of the princes of Judah in the reign of Jehoshaphat who were sent with priests and Levites to teach the people the law of Jehovah (2 Chr. xvi. 7).

6. (*Zacharias*.) Son of the high-priest Jehoiada, in the reign of Josiah king of Judah (2 Chr. xxiv. 20), and therefore the king's cousin. After the death of Jehoiada Zechariah probably succeeded at his office, and in attempting to check the reaction in favour of idolatry which immediately followed, he fell a victim to a conspiracy formed against him by the king, and was stoned with stones in the court of the Temple. The memory of this uprighteous deed lasted long in Jewish tradition. In the Jerusalem Talmud (*Zacitha*, fol. 69, quoted by Lightfoot, *Temple Service*, c. xxvii.) there is

legend told of eighty thousand young priests who were slain by Nebuzaradan for the blood of Zechariah, and the evident hold which the story had taken upon the minds of the people renders it probable that "Zechariah son of Barachias," who was slain between the Temple and the altar (Matt. xxiii. 35), is the same with Zechariah the son of Jehoiada, and that the name of Barachias as his father crept into the text from a marginal gloss, the writer confusing this Zechariah either with Zechariah the prophet, who was the son of Berechiah, or with another Zechariah the son of Jeberchiah (Is. viii. 2).

7. (*Zaxaplas*.) A Kohathite Levite in the reign of Josiah, who was one of the overseers of the workmen engaged in the restoration of the Temple (2 Chr. xxxiv. 12).

8. The leader of the sons of Pharosh who returned with Ezra (Ezr. viii. 3).

9. Son of Bebai, who came up from Babylon with Ezra (Ezr. viii. 11).

10. (*Zacharia* in Neh.) One of the chiefs of the people whom Ezra summoned in council at the river Abana, before the second caravan returned from Babylon (Ezr. viii. 16). He stood at Ezra's left hand when he expounded the Law to the people (Neh. viii. 4).

11. (*Zaxapla*: *Zacharias*.) One of the family of Elam, who had married a foreign wife after the Captivity (Ezr. x. 28).

12. Ancestor of Athaiab, or Uthai (Neh. xi. 4).

13. (*Zaxaplas*.) A Shilonite, descendant of Perez (Neh. xi. 5).

14. (*Zaxapla*.) A priest, son of Pashur (Neh. xi. 12).

15. (*Zacharia*.) The representative of the priestly family of Iddo in the days of Joiakim the son of Jeshua (Neh. xii. 16). Possibly the same as Zechariah the prophet the son of Iddo.

16. (*Zacharias*, *Zacharia*.) One of the priests, son of Jonathan, who blew with the trumpets at the dedication of the city wall by Ezra and Nehemiah (Neh. xii. 35, 41).

17. (*זַחַרְיָא*): *Zaxapla*. A chief of the Reubenites at the time of the captivity by Tiglath-Pileser (1 Chr. v. 7).

18. One of the priests who blew with the trumpets in the procession which accompanied the ark from the house of Obed-edom (1 Chr. xv. 24).

19. Son of Ishiah, or Josiah, a Kohathite Levite descended from Uzziel (1 Chr. xxiv. 25).

20. (*Zaxaplas*.) Fourth son of Hoshai of the children of Merari (1 Chr. xxvi. 11).

21. (*Zabaias*; Alex. *Zabaias*.) A Manassite, whose son Iddo was chief of his tribe in Gilead in the reign of David (1 Chr. xxvii. 21).

22. (*Zaxaplas*.) The father of Jahaziel, a Gerashonite Levite in the reign of Jehoshaphat (2 Chr. xx. 14).

23. One of the sons of Jehoshaphat (2 Chr. xxi. 3).

24. A prophet in the reign of Uzziah, who appears to have acted as the king's counsellor, but of whom nothing is known (2 Chr. xxvi. 5). The chronicler in describing him makes use of a most remarkable and unique expression, "Zechariah, who understood the seeing of God," or, as our A. V. has it, "who had understanding in the visions of God"

(comp. Dan. i. 17). As no such term is ever employed elsewhere in the description of any prophet, it has been questioned whether the reading of this received text is the true one. The LXX., Targum, Syriac, Arabic, Rashi, and Kimchi, with many of Kennicott's MSS., read זַחַרְיָא, "in the fear of," for זַחַרְיָא, and their reading is most probably the correct one.

25. The father of Abijah, or Abi, Hezekiah's mother (2 Chr. xxix. 1); called also ZACHARIAH in the A. V.

26. One of the family of Asaph the minstrel, who in the reign of Hezekiah took part with other Levites in the purification of the Temple (2 Chr. xxix. 13).

27. One of the rulers of the Temple in the reign of Josiah (2 Chr. xxxv. 8). He was probably, as Berthieu conjectures, "the second priest" (comp. 2 K. xxv. 18).

28. The son of Jeberchiah, who was taken by the prophet Isaiah as one of the "faithful witnesses to record," when he wrote concerning Maher-shalhash-baz (Is. viii. 2). He was not the same as Zechariah the prophet, who lived in the time of Uzziah and died before that king, but he may have been the Levite of that name, who in the reign of Hezekiah assisted in the purification of the Temple (2 Chr. xxix. 13). As Zechariah the prophet is called the son of Berechiah, with which Jeberchiah is all but identical, Bertholdt (*Eint.* iv. 1722, 1727) conjectured that some of the prophecies attributed to him, at any rate chaps. ix.-xi., were really the production of Zechariah, the contemporary of Isaiah, and were appended to the volume of the later prophet of the same name (Gesen. *Der Proph. Jesai.* i. 327). Another conjecture is that Zechariah the son of Jeberchiah is the same as Zechariah the father of Abijah, the queen of Ahas (Poli *Synopsis*, in loc.): the witnesses summoned by Isaiah being thus men of the highest ecclesiastical and civil rank. [W. A. W.]

ZEDAD' (זֶדָד; *Zadad*, *Humarad*; Alex. *Zadad*, *Edad*; *Sadada*, *Sadada*). One of the landmarks on the north border of the land of Israel, as promised by Moses (Num. xxxiv. 8) and as restored by Ezekiel (xlvii. 15), who probably passed through it on his road to Assyria as a captive. In the former case it occurs between "the entrance of Hamath" and Ziphron, and in the latter between the "road to Hethlon" and Hamath. A place named *Sidad* exists to the east of the northern extremity of the chain of Antilibanus, about 50 miles E.N.E. of *Baalbec*, and 35 S.S.E. of *Hama*. It is possible that this may ultimately turn out to be identical with Zedad; but at present the passages in which the latter is mentioned are so imperfectly understood, and this part of the country has been so little explored with the view of arriving at topographical conclusions, that nothing can be done beyond directing attention to the coincidence in the names (see Porta, *Five Years*, &c., ii. 354-6). [G.]

ZEDECHIAS (*Zeberias*: *Sedecias*). ZEDEKIAH king of Judah (1 Ead. i. 46).

ZEDEKIAH. 1. (זֶדְקִיָּהּ, *Tsidkityahu*, and thrice זֶדְקִיָּהּ, *Tsidkityah*: *Zeberias*, *Zeberias*:

cases of Hezekiah, Hizkiah, and Hizkiah; Ezekiel and Jehezkel.

The peculiarities of the name, as it appears in the Vatican LXX. (Mal), may be noted:— (a) It

* Jer. xxviii. 12, xxviii. 1, xxix. 3. In this form it is identical with the name which appears in the A. V. (in connexion with a different person) as ZIDEKIAH. A similar inconsistency of our translators is shewn in the

Sedecias). The last king of Judah and Jerusalem. He was the son of Josiah by his wife Hamutal, and therefore own brother to Jehoahaz (2 K. xxiv. 18; comp. xxiii. 31). His original name had been MATTATHAN, which was changed to Zedekiah by Nebuchadnezzar, when he carried off his nephew Jehoiachin to Babylon, and left him on the throne of Jerusalem. Zedekiah was but twenty-one years old when he was thus placed in charge of an impoverished kingdom, and a city which, though still strong in its natural and artificial impregnability, was bereft of well-nigh all its defenders. But Jerusalem might have remained the head of the Babylonian provinces of Judah, and the Temple of Jehovah continued standing, had Zedekiah possessed wisdom and firmness enough to remain true to his allegiance to Babylon. This, however, he could not do (Jer. xxxviii. 5). His history is contained in the short sketch of the events of his reign given in 2 K. xxiv. 17-xxv. 7, and, with some trifling variations, in Jer. xxxix. 1-7, lli. 1-11, together with the still shorter summary in 2 Chr. xxxvi. 10, &c.; and also in Jer. xli. xxiv. xxvii. xxviii. xxix. xxxii. xxxiii. xxxiv. xxxvii. xxxviii. (being the chapters containing the prophecies delivered by this prophet during this reign, and his relation of various events more or less affecting Zedekiah), and Ex. xvi. 11-21. To these it is indispensable to add the narrative of Josephus (*Ant.* x. 7, 1-8, §2), which is partly constructed by comparison of the documents enumerated above, but also contains information derived from other and independent sources. From these it is evident that Zedekiah was a man not so much bad at heart as weak in will. He was one of those unfortunate characters, frequent in history, like our own Charles I. and Louis XVI. of France, who find themselves at the head of affairs during a great crisis, without having the strength of character to enable them to do what they know to be right, and whose infirmity becomes moral guilt. The princes of his court, as he himself pathetically admits in his interview with Jeremiah, described in chap. xxxviii., had him completely under their influence. "Against them," he complains, "it is not the king that can do anything." He was thus driven to disregard the counsels of the prophet, which, as the event proved, were perfectly sound; and he who might have kept the fragments of the kingdom of Judah together, and maintained for some generations longer the worship of Jehovah, brought its final ruin on his country, destruction on the Temple, death to his family, and cruel torment and miserable captivity on himself.

It is evident from Jer. xxvii.* and xxviii. (apparently the earliest prophecies delivered during this reign), that the earlier portion of Zedekiah's reign was marked by an agitation throughout the whole of Syria against the Babylonian yoke. Jerusalem seems to have taken the lead, since in the fourth year of Zedekiah's reign we find ambassadors from all the neighbouring kingdoms—Tyre, Sidon, Edom, and Moab—at his court, to consult as to the steps to be taken. This happened

either during the king's absence or immediately after his return from Babylon, whether he went on some errand, the nature of which is not named, but which may have been an attempt to blind the eyes of Nebuchadnezzar to his contemplated revolt (Jer. li. 59). The project was attacked by Jeremiah with the strongest statement of the folly of such course—a statement corroborated by the very material fact that a man of Jerusalem named Hananiah, who had opposed him with a declaration in the name of Jehovah, that the spoils of the Temple should be restored within two years, had died, in accordance with Jeremiah's prediction, within two months of its delivery. This, and perhaps also the impossibility of any real alliance between Judah and the surrounding nations, seems to have put a stop, for the time, to the anti-Babylonian movement. On a man of Zedekiah's temperament the sudden death of Hananiah must have produced a strong impression; and we may without improbability accept this as the time at which he procured to be made in silver a set of the vessels of the Temple, to replace the golden plate carried off with his predecessor by Nebuchadnezzar (Bar. i. 8).

The first act of overt rebellion of which any record survives was the formation of an alliance with Egypt, of itself equivalent to a declaration of enmity with Babylon. In fact, according to the statement of Chroicidas and Esakiel (xvii. 13), with the expansion of Josephus, it was in direct contravention of the oath of allegiance in the name of Elohim, by which Zedekiah was bound by Nebuchadnezzar, namely, that he would keep the kingdom for Nebuchadnezzar, make no innovation, and enter into no league with Egypt (Ex. xvii. 13; 2 Chr. xxxvi. 13; Jos. *Ant.* x. 7, §1). As a natural consequence it brought on Jerusalem an immediate invasion of the Chaldeans. The mention of this event in the Bible, though sure, is extremely slight, and occurs only in Jer. xxxvii. 5-11, xxxiv. 21, and Ex. xvii. 15-20; but Josephus (x. 7, §3) relates it more fully, and gives the date of its occurrence, namely the eighth year of Zedekiah. Probably also the denunciations of an Egyptian alliance, contained in Jer. ii. 18, 36, have reference to the same time. It appears that Nebuchadnezzar, being made aware of Zedekiah's defection, either by the non-payment of the tribute or by other means, at once sent an army to ravage Judaea. This was done, and the whole country reduced, except Jerusalem and two strong places in the western plain, Lachish and Azekah, which still held out (Jer. xxxiv. 7). In the panic which followed the appearance of the Chaldeans, Zedekiah succeeded in inducing the princes and other inhabitants of Jerusalem to abolish the odious custom which prevailed of enslaving their countrymen. A solemn rite (ver. 18), recalling in its form that in which the original covenant of the nation had been made with Abram (Gen. xv. 9, &c.), was performed in the Temple (ver. 15), and a crowd of Israelites of both sexes found themselves released from slavery.

In the mean time Pharaoh had moved to the

N.B. The references above given to Jerusalem are according to the Hebrew capitulation.

* There can be no doubt that ver. 1 of xxviii., as it at present stands, contains an error, and that for Jehoiachin we should read Zedekiah. The mention of Zedekiah in vers. 2 and 12, and in xxviii. 1, as well as of the captivity of Jehoiachin in ver. 20, no less than the whole argument of the latter part of the chapter, renders this evident.

(a) It is *Zedecia* in 2 K. xxiv. 17; 1 Chr. lli. 16; Jer. xxiv. 4 only.

(b) The genitive is *Zedekio* in 2 K. xxv. 2, Jer. li. 59, lli. 1, 10, 11; but *Zedecia* in Jer. l. 3, xxviii. 1, xxxix. 1; and *Zedecia* in xxix. 2 only.

(c) The name is occasionally omitted where it is present in the Hebrew text, e.g. Jer. xxxviii. lli. 5, 8; but on the other hand is inserted in xli. 1, where also Eiam is put for "gentiles."

assistance of his ally. On hearing of his approach the Chaldeans at once raised the siege and advanced to meet him. The nobles seized the moment of respite to reassert their power over the king, and their defiance of Jehovah, by re-enslaving those whom they had so recently manumitted; and the prophet thereupon utters a doom on these miscreants which, in the fierceness of its tone and in some of its expressions, recalls those of Elijah on Ahab (ver. 20). This encounter was quickly followed by Jeremiah's capture and imprisonment, which but for the interference of the king (xxxvii. 17, 21) would have rapidly put an end to his life (ver. 20). How long the Babylonians were absent from Jerusalem we are not told. It must have required at least several months to move a large army and baggage through the difficult and tortuous country which separates Jerusalem from the Philistine Plain, and to effect the complete repulse of the Egyptian army from Syria, which Josephus affirms was effected. All we certainly know is that on the tenth day of the tenth month of Zedekiah's ninth year the Chaldeans were again before the walls (Jer. lii. 4). From this time forward the siege progressed slowly but surely to its consummation, with the accompaniment of both famine and pestilence (Joseph.). Zedekiah again interfered to preserve the life of Jeremiah from the vengeance of the princes (xxxviii. 7-13), and then occurred the interview between the king and the prophet of which mention has already been made, and which affords so good a clue to the condition of abject dependence into which a long course of opposition had brought the weak-minded monarch. It would seem from this conversation that a considerable desertion had already taken place to the besiegers, proving that the prophet's view of the condition of things was shared by many of his countrymen. But the unhappy Zedekiah throws away the chance of preservation for himself and the city which the prophet set before him, in his fear that he would be mocked by those very Jews who had already taken the step Jeremiah was urging him to take (xxxviii. 19). At the same time his fear of the princes who remained in the city is not diminished, and he even condescends to impose on the prophet a subterfuge, with the view of concealing the real purport of his conversation from these tyrants of his spirit (vers. 24-27).

But while the king was hesitating the end was rapidly coming nearer. The city was indeed reduced to the last extremity. The fire of the besiegers had throughout been very destructive (Joseph.), but it was now aided by a severe famine. The bread had for long been consumed (Jer. xxxviii. 9), and all the terrible expedients had been tried to which the wretched inhabitants of a besieged town are forced to resort in such cases. Mothers had boiled and eaten the flesh of their own infants (Bar. ii. 3; Lam. iv. 10). Persons of the greatest wealth and station were to be seen searching the dunghoops for a morsel of food. The effeminate nobles, whose fair complexions had been their pride, wandered in the open streets like blackened but living skeletons (Lam. iv. 5, 8). Still the king was seen in public, sitting in the gate where justice was administered, that his people might approach him, though indeed he had no help to give them (xxxviii. 7).

At last, after sixteen dreadful months had dragged on, the catastrophe arrived. It was on the ninth day of the fourth month, about the middle of July, at midnight, as Josephus with careful minuteness informs us, that the breach in those stout and vener-

able walls was effected. The moon, nine days old, had gone down below the hills which form the western edge of the basin of Jerusalem, or was, at any rate, too low to illuminate the utter darkness which reigns in the narrow lanes of an eastern town, where the inhabitants retire early to rest, and where there are but few windows to emit light from within the houses. The wretched remnants of the army, starved and exhausted, had left the walls, and there was nothing to oppose the entrance of the Chaldeans. Passing in through the breach, they made their way, as their custom was, to the centre of the city, and for the first time the Temple was entered by a hostile force, and all the princes of the court of the great king took their seats in state in the middle gate of the hitherto virgin house of Jehovah. The alarm quickly spread through the sleeping city, and Zedekiah, collecting his wives and children (Joseph.) and surrounding himself with the few soldiers who had survived the accidents of the siege, made his way out of the city at the opposite end to that at which the Assyrians had entered, by a street which, like the *Beis es-Sureis* at Damascus, ran between two walls (probably those on the east and west sides of the so-called Tyropoeon valley), and issued at a gate above the royal gardens and the Fountain of Siloam. Thence he took the road towards the Jordan, perhaps hoping to find refuge, as David had, at some fortified place in the mountains on its eastern side. On the road they were met and recognized by some of the Jews who had formerly deserted to the Chaldeans. By them the intelligence was communicated, with the eager treachery of deserters, to the generals in the city (Joseph.), and, as soon as the dawn of day permitted it, swift pursuit was made. The king's party must have had some hours' start, and ought to have had no difficulty in reaching the Jordan; but, either from their being on foot, weak and infirm, while the pursuers were mounted, or perhaps owing to the incumbrance of the women and baggage, they were overtaken near Jericho, when just within sight of the river. A few of the people only remained round the person of the king. The rest fled in all directions, so that he was easily taken.

Nebuchadnezzar was then at Riblah, at the upper end of the valley of Lebanon, some 35 miles beyond Baalbec, and therefore about ten days' journey from Jerusalem. Thither Zedekiah and his sons were despatched; his daughters were kept at Jerusalem, and shortly after fell into the hands of the notorious Ishmael at Mispah. When he was brought before Nebuchadnezzar, the great king reproached him in the severest terms, first for breaking his oath of allegiance, and next for ingratitude (Joseph.). He then, with a refinement of cruelty characteristic of those cruel times, ordered his sons to be killed before him, and lastly his own eyes to be thrust out. He was then loaded with brazen fetters, and at a later period taken to Babylon, where he died. We are not told whether he was allowed to communicate with his brother Jehoiachin, who at that time was also in captivity there; nor do we know the time of his death; but from the omission of his name in the statement of Jehoiakim's release by Evil-Merodach, 26 years after the fall of Jerusalem, it is natural to infer that by that time Zedekiah's sufferings had ended.

The fact of his interview with Nebuchadnezzar at Riblah, and his being carried blind to Babylon, reconciles two predictions of Jeremiah: and Ezekiel, which

at the time of their delivery must have appeared conflicting, and which Josephus indeed particularly states Zedekiah alleged as his reason for not giving more heed to Jeremiah. The former of these (Jer. xxxii. 4) states that Zedekiah shall "speak with the king of Babylon mouth to mouth, and his eyes shall behold his eyes;" the latter (Ex. xii. 13), that "he shall be brought to Babylon, yet shall he not see it, though he die there." The whole of this prediction of Ezekiel, whose prophecies appear to have been delivered at Babylon (Ex. i. 1-3; xl. 1), is truly remarkable as describing almost exactly the circumstances of Zedekiah's flight.

2. זְדַכְיָא and זְדַכְיָא: *Zedekias: Sedecias.*

Son of Chenaanah, a prophet at the court of Ahab, head, or, if not head, virtual leader of the college. He appears but once, viz., as spokesman when the prophets are consulted by Ahab on the result of his proposed expedition to Ramoth-Gilead (1 K. xxii.; 2 Chr. xviii.).

Zedekiah had prepared himself for the interview with a pair of iron horns after the symbolic custom of the prophets (comp. Jer. xiii. xix.), the horns of the *reem*, or buffalo, which was the recognised emblem of the tribe of Ephraim (Deut. xxxiii. 17). With these, in the interval of Micaiah's arrival, he illustrated the manner in which Ahab should drive the Syrians before him. When Micaiah appeared and had delivered his prophecy, Zedekiah sprang forward and struck him a blow on the face, accompanying it by a taunting sneer. For this he is threatened by Micaiah in terms which are hardly intelligible to us, but which evidently allude to some personal danger to Zedekiah.

The narrative of the Bible does not imply that the blow struck by Zedekiah was prompted by more than sudden anger, or a wish to insult and humiliate the prophet of Jehovah. But Josephus takes a very different view, which he develops at some length (*Ant.* viii. 15, §3). He relates that after Micaiah had spoken, Zedekiah again came forward, and denounced him as false on the ground that his prophecy contradicted the prediction of Elijah, that Ahab's blood should be licked up by dogs in the field of Naboth of Jezreel; and as a further proof that he was an impostor, he struck him, daring him to do what Iddo, in somewhat similar circumstances, had done to Jeroboam—viz., with his hand.

This addition is remarkable, but it is related by Josephus with great circumstantiality, and was doubtless drawn by him from that source, unhappily now lost, from which he has added so many admirable touches to the outlines of the sacred narrative.

As to the question of what Zedekiah and his followers were, whether prophets of Jehovah or of some false deity, it seems hardly possible to entertain any doubt. True, they use the name of Jehovah, but that was a habit of false prophets (Jer. xxviii. 2, comp. xxix. 21, 31), and there is a vast difference between the casual manner in which they mention the awful Name, and the full, and as it were, formal style in which Micaiah proclaims and reiterates it. Seeing also that Ahab and his queen were professedly worshippers of Baal and Ashtaroth, and that a few years only before this event they had an establishment consisting of two bodies—one of 450, the other of 400—prophets of this false worship, it is difficult to suppose that there could

have been also 400 prophets of Jehovah at his court. But the inquiry of the king of Judah seems to decide the point. After hearing the prediction of Zedekiah and his fellows, he asks at once for a prophet of Jehovah: "Is there not here besides (*וְיָ*) a prophet of Jehovah that we may enquire of him?" The natural inference seems to be that the others were not prophets of Jehovah, but were the 400 prophets of Ashtaroth (A. V. "the groves") who escaped the sword of Elijah (comp. 1 K. xviii. 19 with 22, 40). They had spoken in His name, but there was something about them—some trait of manner, costume, or gesture—which aroused the suspicions of Jehoshaphat, and, to the practised eye of one who lived at the centre of Jehovah-worship and was well versed in the marks of the genuine prophet, proclaimed them counterfeits. With these few words Zedekiah may be left to the oblivion in which, except on this one occasion, he remains. [G.]

3. זְדַכְיָא. The son of Masseiah, a false prophet in Babylon among the captives who were taken with Jeconiah (Jer. xxix. 21, 22). He was denounced in the letter of Jeremiah for having, with Ahab the son of Koliah, buoyed up the people with false hopes, and for profane and flagitious conduct. Their names were to become a byword, and their terrible fate a warning. Of this fate we have no direct intimation, or of the manner in which they incurred it: the prophet simply pronounces that they should fall into the hands of Nebuchadnezzar and be burnt to death. In the Targum of R. Joseph on 2 Chr. xxviii. 3 the story is told that Joshua the son of Jozadak the high-priest was cast into the furnace of fire with Ahab and Zedekiah, but that, while they were consumed, he was saved for his righteousness' sake.

4. The son of Hananiah, one of the princes of Judah who were assembled in the scribes' chamber of the king's palace, when Micaiah announced that Baruch had read the words of Jeremiah in the ears of the people from the chamber of Gemariah the scribe (Jer. xxxvi. 12). [W. A. W.]

ZEEB (זֵבִי): זֵבִי: *Zeb*. One of the two "princes" (נָשִׂים) of Midian in the great invasion of Israel—inferior to the "kings" Zebah and Zalmunna. He is always named with OREB (Judg. vii. 25, viii. 3; Ps. lxxxiii. 11). The name signifies in Hebrew "wolf," just as Oreb does "crow," and the two are appropriate enough to the customs of predatory warriors, who delight in conferring such names on their chiefs.

Zeeb and Oreb were not slain at the first rout of the Arabs below the spring of Harod, but at a later stage of the struggle, probably in crossing the Jordan at a ford further down the river, near the passes which descend from Mount Ephraim. An enormous mass of their followers perished with them. [OREB.] Zeeb, the wolf, was brought to bay in a winepress which in later times bore his name—the "winepress of Zeeb" (זֵבִי בֵּרֶק: 'Ιακωβ(ή)φ; Alex. 'Ιακωβ(ή)φ: *Throniar Zeb*). [G.]

ZE'LAH (זֵלָה and זֵלָה, c. e. *Zela*: in Josh. Vat. omits; Alex. Ζηλα[λεφ]; in Sam. זֵלָה κλεψ[α] in both: *Sela; in laterc*). One of the cities in the allotment of Benjamin (Josh. xviii. 28).

(*abdomen*), in the latter a "rib" (First, Josh. ii. 275 a). Compare the equivalents of the LXX. and Vulg. in German, as given above.

* Once only, viz. 1 K. xxii. 11.

* The meaning is slightly altered by the change as the vowel-points. In the former case it signifies an "addition."

its place in the list is between Taralah and as-Eleph. None of these places have, however, been yet discovered. The interest of Zelah resides in the fact that it contained the family tomb of Kish the father of Saul (2 Sam. xxi. 14), in which the bones of Saul and Jonathan, and also apparently of the two sons and five grandsons of Saul, sacrificed to Jehovah on the hill of Gibeah, at last found their resting-place (comp. ver. 13). As containing their sepulchre, Zelah was in all probability the native place^a of the family of Kish, and therefore his home, and the home of Saul before his selection as king had brought him into prominence. This appears to have been generally overlooked, but it is important, because it gives a different starting-point to that usually assumed for the journey of Saul in quest of his father's asses, as well as a different goal for his return after the anointing; and although the position of Zelah is not and may never be known, still it is one step nearer the solution of the complicated difficulties of that route to know that Gibeah—Saul's royal residence after he became king—was not necessarily the point either of his departure or his return.

The absence of any connexion between the names of Zelah and Zelzah (too frequently assumed) is noticed under the latter head. [G.]

ZELEK (זֶלֶק; *Ḥalé, Zelá; Alex. Ζελέ, Ζελά; Zelos*). An Ammonite, one of David's guard (2 Sam. xxiii. 37; 1 Chr. xi. 39).

ZELOPHEHAD (זִלְפִּהָדָ; *Salwadā; Salphad*). Son of Hephher, son of Gilead, son of Machir, son of Manasseh (Josh. xvii. 3). He was apparently the second son of his father Hephher (1 Chr. vii. 15), though Simonis and others, following the interpretation of the Rabbis, and under the impression that the etymology of his name indicates a first-born, explains the term זִלְפִּהָדָ as meaning that his lot came up second. Zelophehad came out of Egypt with Moses; and all that we know of him is that he took no part in Korah's rebellion, but that he died in the wilderness, as did the whole of that generation (Num. xiv. 35, xxvii. 3). On his death without male heirs, his five daughters, just after the second numbering in the wilderness, came before Moses and Eleazar to claim the inheritance of their father in the tribe of Manasseh. The claim was admitted by Divine direction, and a law was promulgated, to be of general application, that if a man died without sons his inheritance should pass to his daughters (Num. xxvi. 33, xxvii. 1-11), which led to a further enactment (Num. xxxvi.), that such heiresses should not marry out of their own tribe—a regulation which the five daughters of Zelophehad complied with, being all married to sons of Manasseh, so that Zelophehad's inheritance continued in the tribe of Manasseh. The law of succession, as exemplified in the case of Zelophehad, is treated at length by Selden (*De Success.* capp. xii. xiii.).

The interest of the case, in a legal point of view, has led to the careful preservation of Zelophehad's

genealogy. Beginning with Joseph, it will be seen that the daughters of Zelophehad are the seventh generation. So are Salmon, Bezael, and Zophai (apparently the first settler of his family), from their patriarchal ancestors; while Caleb, Achan, and Phinehas are the sixth; Joshua seems to have been the eighth. [SHUTHELAN.] The average, therefore, seems to be between 6 and 7 generations, which, at 40 years to a generation (as suited to the length of life at that time) gives between 240 and 280 years, which agrees very well with the reckoning of 215 years for the sojourning of the Israelites in Egypt + 40 years in the wilderness = 255 (Joseph. *Ant.* iv. 7, §5; Selden, *De Success.* xli. xliii.). [A. C. H.]

ZELOTES (Ζηλωταί; *Zelotes*). The epithet given to the Apostle Simon to distinguish him from Simon Peter (Luke vi. 15). In Matt. x. 4, he is called "Simon the Canaanite," the last word being a corruption of the Aramaic term, of which "Zelotes" is the Greek equivalent. [CANAANITE—SIMON 5.]

ZEL'ZAH (זֶלְזָח; i. e. Tseltsach; *ἄλλομενόν; μεγαλά*, in both MSS.: *in meridie*). A place named once only (1 Sam. x. 2), as on the boundary of Benjamin, close to (DW) Rachel's sepulchre. It was the first point in the homeward journey of Saul after his anointing by Samuel. Rachel's sepulchre is still shown a short distance to the north of Bethlehem, but no acceptable identification of Zelzakh has been proposed. It is usually considered as identical with Zelah, the home of Kish and Saul, and that again with *Beit-jala*. But this is not tenable; at any rate there is nothing to support it. The names Zelah and Zelzakh are not only not identical, but they have hardly anything in common, still less have זֶלְזָח and זֶלֶק; nor is *Beit-jala* close enough to the *Kubbet Rahil* to answer to the expression of Samuel. [G.]

ZEMARAIM (זִמְרַיִם; *Zāra; Alex. Ζιμριμ Zemaraim*). One of the towns of the allotment of Benjamin (Josh. xviii. 22). It is named between Beth ha-Arabah and Bethel, and therefore on the assumption that Arabah in the former name denotes as usual the Jordan Valley, we should expect to find Zemaraim either in the valley or in some position on its western edge, between it and Bethel. In the former case a trace of the name may remain in *Chérbet el-Sadmra*, which is marked in Seetzen's map (*Reisen*, vol. iv. map 2) as about 4 miles north of Jericho, and appears as *es-Simrah* in those of Robinson and Van de Velde.¹ (See also Rob. *B. R.* i. 569.) In the latter case Zemaraim may be connected, or identical, with MOUNT ZEMARAIM, which must have been in the highland district.

In either event Zemaraim may have derived its name from the ancient tribe of the Zemarim or Zemarites, who were related to the Hittites and Amorites; who, like them, are represented in the Biblical account as descendants of Canaan, but, from some cause or other unexplained, have left

in the Jordan valley. It is found close to the "Kumel fountain" in the Plain of Gennesareth; also at the S.W. end of the Lake of Tiberias.

¹ In the 2nd ed. of Robinson (i. 569) the name is given as *es-Simra*; but this is probably a misprint. See the Arabic Index to ed. i., the text, ii. 306, and the maps both editions.

^a In like manner the sepulchre of the family of Jesse was at Bethlehem (2 Sam. ii. 32).

⁴ Apparently reading זֶלֶק. The Talmud has numerous explanations, the favourite one being that Zelah was Jerusalem—"the shadow (זֶלֶק) of God." Something of this kind is at the root of the *meridie* of the Vulg.

⁵ The name *Simrah* occurs more than once elsewhere

but very scanty traces of their existence. The lists of the towns of Benjamin are remarkable for the number of tribes which they commemorate. The Avites, the Ammonites, the Ophnites, the Jebusites, are all mentioned in the catalogue of Josh. xviii. 22-28, and it is at least possible that the Zemarites may add another to the list. [G.]

ZEMARA'IM, MOUNT (זְמַרְאִים הָהָר: 78

Ἰσος Ζεμάραι: *mons Sameron*). An eminence mentioned in 2 Chr. xlii. 4 only. It was "in Mount Ephraim," that is to say within the general district of the highlands of that great tribe. It appears to have been close to the scene of the engagement mentioned in the narrative, which again may be inferred to have been south of Bethel and Ephraim (ver. 19). It may be said in passing, that a position so far south is no contradiction to its being in Mount Ephraim. It has been already shown under RAMAH [9986] that the name of Mount Ephraim probably extended as far as *er-Ram*, 4 miles south of *Beitin*, and 8 of *Taiyibeh*, the possible representative of Ephraim. Whether Mount Zemaraim is identical with, or related to, the place of the same name mentioned in the preceding article, cannot be ascertained. If they prove to be distinct places they will furnish a double testimony to the presence of the ancient tribe of Zemarites in this part of the country. No name answering to Zemaraim has been yet discovered in the maps or information of travellers on the highland.

It will be observed that in the LXX. and Vulgate, this name is rendered by the same word which in the former represents Samaria. But this, though repeated (with a difference) in the case of Zemarite, can hardly be more than an accidental error, since the names have little or no resemblance in Hebrew. In the present case Samaria is besides inadmissible on topographical grounds. [G.]

ZEMARITE, THE (זְמַרְאִים הָהָר: 8 Zemarites:

Samarites). One of the Hamite tribes who in the genealogical table of Gen. x. (ver. 18), and 1 Chr. i. (ver. 18), are represented as "sons of Canaan." It is named between the Arvadite, or people of Ruad, and the Hamathite, or people of Hamah. Nothing is certainly known of this ancient tribe. The old interpreters (Jerusalem Targum, Arabic Version, &c.) place them at Emessa, the modern *Hama*. Michaelis (*Spicilegium*, ii. 51), revolting at the want of similarity between the two names (which is perhaps the strongest argument in favour of the old identification), proposes to locate them at *Sumra* (the *Simyra* of the classical geographers), which name is mentioned by Shaw as attached to a site of ruins near *Arka*, on the west coast of Syria, 10 or 11 miles above Tripoli.

On the new French map of the Lebanon (*Carte du Liban*, &c., 1862) it appears as *Kobbet oum Shoumra*, and lies between *Arka* and the Mediterranean, 2 kilometres from the latter, and 5½ from the former. Beyond, however, the resemblance in the names, and the proximity of *Ruad* and *Arka*, the probable seats of the Arvadites and Arkites, and the consequent inference that the original seat of the Zemarites must have been somewhere in this direction, there is nothing to prove that *Sumra* or *Shoumra* have any connexion with the Zemarites of the ancient records.

Traces of their having wandered to the south are possibly afforded by the name Zemaraim, formerly attached to two places in the topographical lists of

ZEPHANIAH

Central Palestine—a district which appears to have been very attractive to the aboriginal wandering tribes from every quarter. [ZEMARAIM; see also AVIM, OPHNI, &c.]

The LXX. and Vulgate would connect the Zemarites with Samaria. In this they have been followed by some commentators. But the idea is a delusion, grounded on the inability of the Greek alphabet to express the Hebrew letters of both names. [G.]

ZEM'IRA (זְמִירָה: *Zemirah*; Alex. *Zamiras*: *Zamira*). One of the sons of Becher the son of Benjamin (1 Chr. vii. 8).

ZENAN' (זֵנָן: *Zenan*; Alex. *Zennan*: *Zenan*). One of the towns in the allotment of Judah, situated in the district of the Shephelah (Josh. xv. 37). It occurs in the second group of the enumeration, which contains amongst others Migdal-gad and Lachish. It is probably identical with ZANAN, a place mentioned by the prophet Micah in the same connexion.

Schwarz (103) proposes to identify it with "the village Zan-abra, situated 2½ English miles south-east of Maresbah." By this he doubtless intends the place which in the lists of Robinson (*B. R.* 1st ed. vol. iii. App. 117) is called *es-Sandbérak*, *السندبرك*, and in Tobler's *Dritte Wanderung* (149), *es-Sendbérak*. The latter traveller in his map places it about 2½ miles due east of *Marash* (*Marasha*). But this identification is more than doubtful. [G.]

ZENAS (Ζηνᾶς, a contraction from Ζηνόδοτος, as Ἀρτέμις from Ἀρτεμιδοτος, Νουφᾶς from Νουφόδοτος, and, probably, Ἐρμᾶς from Ἐρμόδοτος), a believer, and, as may be inferred from the context, a preacher of the Gospel, who is mentioned in Tit. iii. 13 in connexion with Apollos, and together with him, is there commended by St. Paul to the care and hospitality of Titus and the Cretan brethren. He is further described as "the lawyer" (*ῥῶν νομικόν*). It is impossible to determine with certainty whether we are to infer from this designation that Zenas was a Roman juriconsult or a Jewish doctor. Grotius accepts the former alternative, and thinks that he was a Greek who had studied Roman law. The N. T. usage of *νομικός* leads rather to the other inference. Tradition has been somewhat busy with the name of Zenas. The *Synopsis de Vita et Morte Prophetarum Apostolorum et Discipulorum Domini*, ascribed to Dorotheus of Tyre, makes him to have been one of the "seventy-two" disciples, and subsequently bishop of Dioepolis in Palestine (*Bibl. Patr.* iii. 150). The "seventy-two" disciples of Dorotheus are, however, a mere string of names picked out of salutations and other incidental notices in the N. T. The Greek Menologies on the festival of SS. Bartholomew and Titus (Aug. 25) refer to a certain Life of Titus, ascribed to Zenas, which is also quoted for the supposed conversion of the younger Pliny (compare Fabricius, *Codex Apoc. N. T.* ii. 831, 2). The association of Zenas with Titus, in St. Paul's Epistle to the latter, sufficiently accounts for the forgery. [W. B. J.]

ZEPHANT'AH (זְפַנְתָּא: *Zephantias*: *Sophania*

These forms refer to another punctuation, זְפַנְתָּא, a participial form). Jerome derives the name from

נְפִי, and suppose it to mean *speculator Domini*, "watcher of the Lord," an appropriate appellation for a prophet. The pedigree of Zephaniah, ch. i. 1, is traced to his fourth ancestor, Hezekiah: supposed by Aben Ezra to be the celebrated king of that name. This is not in itself improbable, and the fact that the pedigree terminates with that name, points to a personage of rank and importance. Late critics and commentators generally acquiesce in this hypothesis, viz. Eichhorn, Hitzig, F. Ad. Strauss (*Vaticinia Zephaniae*, Berlin, 1843), Hävernick, Keil, and Bleek (*Einführung in das Alte Testament*).

Analysis. Chap. i. The utter desolation of Judaea is predicted as a judgment for idolatry, and neglect of the Lord, the luxury of the princes, and the violence and deceit of their dependents (3-9). The prosperity, security, and insolence of the people is contrasted with the horrors of the day of wrath; the assaults upon the fenced cities and high towers, and the slaughter of the people (10-18). Ch. ii., a call to repentance (1-3), with prediction of the ruin of the cities of the Philistines, and the restoration of the house of Judah after the visitation (4-7). Other enemies of Judah, Moab, Ammon, are threatened with perpetual destruction, Ethiopia with a great slaughter, and Nineveh, the capital of Assyria, with desolation (8-15). Ch. iii. The prophet addresses Jerusalem, which he reproves sharply for vice and disobedience, the cruelty of the princes and the treachery of the priests, and for their general disregard of warnings and visitations (1-7). He then concludes with a series of promises, the destruction of the enemies of God's people, the restoration of exiles, the extirpation of the proud and violent, and the permanent peace and blessedness of the poor and afflicted remnant who shall trust in the name of the Lord. These exhortations to rejoicing and exertion are mingled with intimations of a complete manifestation of God's righteousness and love in the restoration of His people (8-20).

The chief characteristics of this book are the unity and harmony of the composition, the grace, energy, and dignity of its style, and the rapid and effective alternations of threats and promises. Its prophetic import is chiefly shown in the accurate predictions of the desolation which has fallen upon each of the nations denounced for their crimes; Ethiopia, which is menaced with a terrible invasion, being alone exempted from the doom of perpetual ruin. The general tone of the last portion is Messianic, but without any specific reference to the Person of our Lord.

The date of the book is given in the inscription; viz. the reign of Josiah, from 642 to 611 B.C. This date accords fully with internal indications. Nineveh is represented as in a state of peace and prosperity, while the notices of Jerusalem touch upon the same tendencies to idolatry and crime which are condemned by the contemporary Jeremiah.

It is most probable, moreover, that the prophecy was delivered before the 18th year of Josiah, when the reformation, for which it prepares the way, was carried into effect, and about the time when the Scythians overran the empires of Western Asia, extending their devastations to Palestine. The notices which are supposed by some critics to indicate a somewhat later date are satisfactorily explained. The king's children, who are spoken of, in ch. i. 8, as addicted to foreign habits, could not have been sons of Josiah, who was but eight years old at his

accession, but were probably his brothers or near relatives. The remnant of Baal (ch. i. 4) implies that some partial reformation had previously taken place, while the notices of open idolatry are incompatible with the state of Judah after the discovery of the Book of the Law. [F. C. C.]

2. (*Σαφάβια*; Alex. *Σαφάβιας*: *Sophonias*). A Kohathite Levite, ancestor of Samuel and Heman (1 Chr. vi. 38 [21]).

3. (*Σοφορίας*.) The son of Maaseiah (Jer. xxi. 1), and *sagan* or second priest in the reign of Zedekiah. He succeeded Jehoiada (Jer. xxix. 25, 28), and was probably a ruler of the Temple, whose office it was among others to punish pretenders to the gift of prophecy. In this capacity he was appealed to by Shemaiah the Nehelamite, in a letter from Babylon, to punish Jeremiah (Jer. xxix. 29). Twice was he sent from Zedekiah to inquire of Jeremiah the issue of the siege of the city by the Chaldeans (Jer. xxi. 1), and to implore him to intercede for the people (Jer. xxxvii. 3). On the capture of Jerusalem by Nebuzaradan he was taken with Seriah the high-priest and others, and slain at Riblah (Jer. lii. 24, 27; 2 K. xxv. 18, 21). In 2 K. xxv. 18, Jer. xxxvii. 3, his name is written in the longer form *סֹפְרִיָּה*.

4. Father of Josiah 2 (Zech. vi. 10), and of Hen, according to the reading of the received text of Zech. vi. 14, as given in the A. V. [W. A. W.]

ZEPHATH' (*נְפִי*: *Σεφέκ*; Alex. *Σεφερ*: *Sephath*). The earlier name (according to the single notice of Judg. i. 17) of a Canaanite town, which after its capture and destruction was called by the Israelites **HORMAH**. Two identifications have been proposed for Zephath:—that of Dr. Robinson with the well-known Pass *es-Sufa* (الصفا), by which the ascent is made from the borders of the *Arabah* to the higher level of the "South country" (B. R. ii. 181), and that of Mr. Rowlands (Williams's *Holy City*, i. 484) with *Sabdtā*, 2½ hours beyond *Khalasa*, on the road to Suez, and ½ of an hour north of *Bahdeh* or *Ruheibeh*.

The former of these, Mr. Wilton (*The Negab &c.*, 199, 200) has challenged, on account of the impracticability of the pass for the approach of the Israelites, and the inappropriateness of so rugged and desolate a spot for the position of a city of any importance. The question really forms part of a much larger one, which this is not the place to discuss—viz. the route by which the Israelites approached the Holy Land. But in the mean time it should not be overlooked that the attempt in question was an unsuccessful one, which is so far in favour of the steepness of the pass. The argument from the nature of the site is one which might be brought with equal force against the existence of many others of the towns in this region. On the identification of Mr. Rowlands some doubt is thrown by the want of certainty as to the name, as well as by the fact that no later traveller has succeeded in finding the name *Sabdtā*, or the spot. Dr. Stewart (*Tent and Khan*, 205) heard of the name, but east of *Khalasa* instead of south, and this was in answer to a leading question—always a dangerous experiment with Arabs.

It is earnestly to be hoped that some means may shortly be found, to attempt at least the examination and reconciliation of these and the like contradictory statements and inferences. [G.]

ZEPHATHAH, THE VALLEY OF (זֶפְתָּחָה: זֶפְתָּחָה; *ḥāp̄ayāḥ karā 'Bop̄ḥar*, in both MSS.; Joseph. φ. *Σαφάδ: Vallis Sephata*). The spot in which Asa joined battle with Zerah the Ethiopian (2 Chr. xiv. 10 only). It was "at" or rather "belonging to" Marashah (מַרְשָׁה: Joseph. οὐκ ἔγνωσεν). This would seem to exclude the possibility of its being, as suggested by Dr. Robinson (li. 31), at *Tell es-Safeh*, which is not less than 8 miles from *Marash*, the modern representative of Marashah. It is not improbable that an examination of the neighbourhood might reveal both spot and name. Considering the enormous number of the combatants, the valley must be an extensive one. [G.]

ZEPHI (זֶפְחִי: *Σαφάδ: Sephi*), 1 Chr. i. 36. [ZEPHO.]

ZEPHO (זֶפְחִי: *Σαφάδ: Sephu*). A son of Eliphaz son of Esau (Gen. xxxvi. 11), and one of the "dukes" or phylarchs, of the Edomites (ver. 15). In 1 Chr. i. 36 he is called ZEPHI. [E. S. P.]

ZEPHON (זֶפְחִי: *Σαφών*; Alex. omits: *Se-phon*). ZIPHON the son of Gad (Num. xvi. 15), and ancestor of the family of the ZEPHONITES.

ZEPHONITES, THE (זֶפְחִי: *δ Σαφώνι*; Alex. omits: *Sephonitae*). A branch of the tribe of Gad, descended from Zephon or Ziphion (Num. xvi. 15).

ZER (זֶר: *Τέρος*; Alex. omits: *Ser*). One of the fortified towns of the allotment of Naphtali (Josh. xii. 35 only). From the names which succeed it in the list it may be inferred that it was in the neighbourhood of the S.W. side of the Lake of Gennesareth. The versions of the LXX. and of the Peshito, both of this name and that which precedes it, are grounded on an obvious mistake. Neither of them has anything to do with Tyre or Zidon.

Ziddim may possibly be identified with *Hattin*; but no name resembling *Tser* appears to have been yet discovered in the neighbourhood of Tiberias. [G.]

ZERAH (זֶרַח: *Zaph: Zera*). A son of Reuel son of Esau (Gen. xxxvi. 13; 1 Chr. i. 37), and one of the "dukes," or phylarchs, of the Edomites (Gen. xxxvi. 17). Jobab of Bozrah, one of the early kings of Edom, perhaps belonged to his family (xxxvi. 33; 1 Chr. i. 44). [E. S. P.]

ZERAH, less properly, **ZARAH** (זָרַח, with the pause accent, זָרַח: *Zaod: Zara*). Twin son with his elder brother Pharez of Judah and Tamar (Gen. xxxviii. 30; 1 Chr. ii. 8; Matt. i. 3). His descendants were called Zarhites, Esrahites, and Israhites (Num. xxvi. 20; 1 K. iv. 31; 1 Chr. xxvii. 8, 11), and continued at least down to the time of Zerubbabel (1 Chr. ix. 6; Neh. xi. 24). Nothing is related of Zerah individually, beyond the peculiar circumstances of his birth (Gen. xxxviii. 27-30), concerning which see Heidegg. *Hist. Patriaroh.* xviii. 28. [A. C. H.]

2. *Zaphs*; Alex. *Zaphs: Zera*. Son of Simeon (1 Chr. iv. 24), called ZOHAR in Gen. xlii. 10.

3. (*Zaph, Zaphs*; Alex. *Zaph, 'Aupias*). A

* Probably reading זֶפְתָּחָה. It will be observed that Josephus here forsakes the LXX. & the Hebrew text.

Gershonite Levite, son of Ikdo or Adaiash (1 Chr. vi. 21, 41 [Heb. vi. 26]).

4. (זֶרַח: *Zaph: Zerah*). The Ethiopian or Cushite, זֶרַח, an invader of Judah, defeated by Asa.

1. In its form the name is identical with the Hebrew proper name above. It has been supposed to represent the Egyptian USARKEN, possibly pronounced USARCHEN, a name almost certainly of Semitic origin [SHISHAK, ii. 1289]. The difference is great, but may be partly accounted for, if we suppose that the Egyptian deviates from the original Semitic form, and that the Hebrew represents that form, or that a further deviation than would have been made was the result of the similarity of the Hebrew proper name Zerah. So, זֶרַח, even if pronounced SEWA, or SEVA, is more remote from SHEBEK or SHEBETEK than Zerah from USARKEN. It may be conjectured that these forms resemble those of Memphis, Moph, Noph, which evidently represent current pronunciation, probably of Shemites.

2. The war between Asa and Zerah appears to have taken place soon after the 10th, and shortly before the 15th, year of Asa, probably late in the 14th, as we shall see in examining the narrative. It therefore occurred in about the same year of Usarken II., fourth king of the xxiind dynasty, who began to reign about the same time as the king of Judah. Asa's reign, as far as the 14th year inclusive, was B.C. cir. 953-940, or, if Manasseh's reign be reckoned of 35 years, 933-920. [SHISHAK, ii. pp. 1287-1289.]

3. The first ten years of Asa's reign were undisturbed by war. Then Asa took counsel with his subjects, and walled and fortified the cities of Judah. He also maintained an army of 580,000 men, 300,000 spearmen of Judah, and 280,000 archers of Benjamin. This great force was probably the whole number of men able to bear arms (2 Chr. xiv. 1-8). At length, probably in the 14th year of Asa, the anticipated danger came. Zerah, the Ethiopian, with a mighty army of a million, Cushim and Lubim, with three hundred chariots, invaded the kingdom, and advanced unopposed in the field as far as Marashah. As the invaders afterwards retreated by way of Gerar, and Marashah lay on the west or the hill-country of Judah, where it rises out of the Philistine plain, in the line of march from Egypt to Jerusalem, it cannot be doubted that they came out of Egypt. Between the border on the side of Gerar and Marashah, lay no important city but Gath. Gath and Marashah were both fortified by Rehoboam before the invasion of Shishak (xi. 8), and were no doubt captured and probably dismantled by that king (comp. xii. 4), whose list of conquered towns, &c., shows that he not only took some strong towns, but that he subdued the country in detail. A delay in the capture of Gath, where the warlike Philistines may have opposed a stubborn resistance, would have removed the only obstacle on the way to Marashah, thus securing the retreat that was afterwards made by this route. From Marashah, or its immediate neighbourhood, was a route to Jerusalem, presenting no difficulties but those of a hilly country; for not one important town is known to have lain between the capital and this outpost of the tribe of Judah. The invading army had swarmed across the border and devoured the Philistine fields before Asa could march to meet it. The distance from Gerar, or the south-western border of Palestine, to Marashah, was not much

greater than from Mareslah to Jerusalem, and, considering the nature of the tracts, would have taken about the same time to traverse; and only such delay as would have been caused by the sieges of Gath and Mareslah could have enabled Asa hastily to collect a levy and march to relieve the beleaguered town, or hold the passes. "In the Valley of Zephathah at Mareslah," the two armies met. We cannot perfectly determine the site of the battle. Mareslah, according to the *Onomasticon*, lay within two miles of Eleutheropolis, and Dr. Robinson has reasonably conjectured its position to be marked by a remarkable "tell," or artificial mound, a mile and a half south of the site of the latter town. Its signification, "that which is at the head," would scarcely suit a position at the opening of a valley. But it seems that a narrow valley terminates, and a broad one commences, at the supposed site. The Valley of Zephathah, "the watch-tower," is supposed by Dr. Robinson to be the latter, a broad wādee, descending from Eleutheropolis in a north-westerly direction towards *Tell-es-Sāfah*, in which last name he is disposed to trace the old appellation (*Bib. Res.* ii. 31). The two have no connexion whatever, and Robinson's conjecture is extremely hazardous. If this identification be correct, we must suppose that Zerah retired from before Mareslah towards the plain, that he might use his "chariots and horsemen" with effect, instead of entangling them in the narrow valleys leading towards Jerusalem. From the prayer of Asa we may judge that, when he came upon the invading army, he saw its hugeness, and so that, as he descended through a valley, it lay spread out beneath him. The Egyptian monuments enable us to picture the general disposition of Zerah's army. The chariots formed the first corps in a single or double line; behind them, massed in phalanxes, were heavy-armed troops; probably on the flanks stood archers and horsemen in lighter formations. Asa, marching down a valley, must have attacked in a heavy column; for none but the most highly-disciplined troops can form line from column in the face of an enemy. His spearmen of Judah would have composed this column: each bank of the valley would have been occupied by the Benjamite archers, like those who came to David, "helpers of the war, armed with bows, and [who] could use both the right hand and the left in [hurling] stones and [shooting] arrows out of a bow" (1 Chr. xii. 1, 2). No doubt the Ethiopian, confident in his numbers, disdained to attack the Hebrews or clear the heights, but waited in the broad valley, or the plain. Asa's prayer before the battle is full of the noble faith of the age of the Judges: "LORD [it is] alike to Thee to help, whether the strong or the weak: help us, O LORD our God; for we rest on Thee, and in Thy name we go against this multitude. O LORD, Thou [art] our God; let not man prevail against Thee." From the account of Abijah's defeat of Jeroboam, we may suppose that the priests sounded their trumpets, and the men of Judah descended with a shout (2 Chr. xiii. 14, 15). The hills and mountains were the favourite camping-places of the Hebrews, who usually rushed down upon their more numerous or better-disciplined enemies in the plains and valleys. If the battle were deliberately set in array, it would have begun early in the morning, according to the usual practice of these times, when there was not a night-surprise, as when Goliath

VOL. III.

challenged the Israelites (1 Sam. xvii. 20-23), and when Thothmes III. fought the Canaanites at Megiddo, and as we may judge from the long pursuits at this period, the sun would have been in the eyes of the army of Zerah, and its archers would have been thus useless. The chariots, broken by the charge and with horses made unmanageable by flights of arrows, must have been forced back upon the cumbrous host behind. "So the LORD smote the Ethiopians before Asa, and before Judah; and the Ethiopians fled. And Asa and the people that [were] with him pursued them unto Gerar: and [or "for"] the Ethiopians were overthrown, that they could not recover themselves." This last clause seems to relate to an irremediable overthrow at the first; and, indeed, had it not been so, the pursuit would not have been carried, and, as it seems at once, beyond the frontier. So complete was the overthrow, that the Hebrews could capture and spoil the cities around Gerar, which must have been in alliance with Zerah. From these cities they took very much spoil, and they also smote "the tents of cattle, and carried away sheep and camels in abundance" (2 Chr. xiv. 9-15). More seems to have been captured from the Arabs than from the army of Zerah: probably the army consisted of a nucleus of regular troops, and a great body of tributaries, who would have scattered in all directions, leaving their country open to reprisals. On his return to Jerusalem, Asa was met by Azariah, who exhorted him and the people to be faithful to God. Accordingly Asa made a second reformation, and collected his subjects at Jerusalem in the 3rd month of the 15th year, and made a covenant, and offered of the spoil "seven hundred oxen and seven thousand sheep" (xv. 1-15). From this it would appear that the battle was fought in the preceding winter. The success of Asa, and the manifest blessing that attended him, drew to him Ephraimites, Manassites, and Simeonites. His father had already captured cities in the Israelite territory (xiii. 19), and he held cities in Mount Ephraim (xv. 8), and then was at peace with Israel. Simeon, always at the mercy of a powerful king of Judah, would have naturally turned to him. Never was the house of David stronger after the defection of the ten tribes; but soon the king fell into the wicked error, so constantly to be repeated, of calling the heathen to aid him against the kindred Israelites, and hired Benhadad, king of Syria-Damascus, to lay their cities waste, when Hanani the prophet recalled to him the great victory he had achieved when he trusted in God (xvi. 1-9). The after years of Asa were troubled with wars (ver. 9); but they were with Baasha (1 K. xv. 16, 32). Zerah and his people had been too signally crushed to attack him again.

4. The identification of Zerah has occasioned some difference of opinion. He has been thought to have been a Cushite of Arabia, or a Cushite of Ethiopia above Egypt. But lately it has been supposed that Zerah is the Hebrew name of Usarken I., second king of the Egyptian xxiind dynasty; or perhaps more probably Usarken II., his second successor. This question is a wider one than seems at first sight. We have to inquire whether the army of Zerah was that of an Egyptian king, and, if the reply be affirmative, whether it was led by either Usarken I. or II.

The war of Shishak had reduced the angle of Arabia that divided Egypt from Palestine. Probably Shishak was unable to attack the Assyrians, and endeavoured, by securing this tract, to guard

6 B

the approach to Egypt. If the army of Zerah were Egyptian, this would account for its connexion with the people of Gerar and the pastoral tribes of the neighbourhood. The sudden decline of the power of Egypt after the reign of Shishak would be explained by the overthrow of the Egyptian army about thirty years later.

The composition of the army of Zerah, of Cushim and Lubim (2 Chr. xvi. 8), closely resembles that of Shishak, of Lubim, Sukkium, and Cushim (xii. 3): both armies also had chariots and horsemen (xvi. 8, xii. 3). The Cushim might have been of an Asiatic Curb, but the Lubim can only have been Africans. The army, therefore, must have been of a king of Egypt, or Ethiopia above Egypt. The uncertainty is removed by our finding that the kings of the xxiind dynasty employed mercenaries of the MASHUWASHA, a Libyan tribe, which apparently supplied the most important part of their hired force. The army, moreover, as consisting partly, if not wholly, of a mercenary force, and with chariots and horsemen, is, save in the horsemen, exactly what the Egyptian army of the empire would have been, with the one change of the increased importance given to the mercenaries, that we know to have marked it under the xxiind dynasty. [SHISHAK, ii. p. 1289 a.] That the army was of an Egyptian king therefore cannot be doubted.

As to the identification of Zerah with an Usarken, we speak diffidently. That he is called a Cushite must be compared with the occurrence of the name NAMURET, Nimrod, in the line of the Usarkens, but that line seems rather to have been of eastern than of western Ethiopians (see, however, SHISHAK, ii. p. 1289). The name Usarken has been thought to be Sargon [SHISHAK, l. c.], in which case it is unlikely, but not impossible, that another Hebrew or Shemitic name should have been adopted to represent the Egyptian form. On the other hand, the kings of the xxiind dynasty were of a warlike family, and their sons constantly held military commands. It is unlikely that an important army would have been intrusted to any but a king or prince. Usarken is less remote from Zerah than seems at first sight, and, according to our computation, Zerah might have been Usarken II., but according to Dr. Hiuck's, Usarken I.

5. The defeat of the Egyptian army by Aza is without parallel in the history of the Jews. On no other occasion did an Israelite army meet an army of one of the great powers on either side and defeat it. Shishak was unopposed, Sennacherib was not met in the field, Necho was so met and overthrew Josiah's army. Nebuchadnezzar like Shishak was only delayed by fortifications. The defeat of Zerah thus is a solitary instance, more of the power of faith than of the bravery of the Hebrews, a single witness that the God of Israel was still the same who had led His people through the Red Sea, and would give them the same aid if they trusted in Him. We have, indeed, no distinct statement that the defeat of Zerah was a miracle, but we have proof enough that God providentially enabled the Hebrews to vanquish a force greater in number, stronger in the appliances of war, with horsemen and chariots, more accurate in discipline, no raw levies hastily equipped from the king's armoury, but a seasoned standing militia, strengthened and more terrible by the addition of swarms of hungry Arabs, bred to war, and whose whole life was a time of pillage. This great deliverance is one of the many proofs that God is to His people ever the

same, whether He bids them stand still and behold His salvation, or nerves them with that courage that has wrought great things in His name in our later age; thus it bridges over a chasm between two periods outwardly unlike, and bids us see in history the immutability of the Divine actions. [R. S. P.]

ZERAH'AH (זֶרַח): Zapala, Zapalas, Zapala; Alex. Zapalas, Zapids, Zapalas: Zarakis, Zarakhia). A priest, son of Uzzi, and ancestor of Ezra the Scribe (1 Chr. vi. 6, 51 [Heb. v. 32, vi. 38]; Exr. vii. 4).

2. (Zapala; Alex. Zapala: Zarahs.) Father of Elihoenai of the sons of Pahath Moab (Exr. viii. 4): called ZARAIAS in 1 Esdr. viii. 31.

ZERED (זֶרַד): Zaph, Zapher: Zared). The name of a brook or valley running into the Dead Sea near its S.E. corner, which Dr. Robinson (*Bib. Res.* ii. 157) with some probability suggests as identical with the *Wady el Ahsy*. It lay between Moab and Edom, and is the limit of the proper term of the Israelites' wandering (Deut. ii. 14). Laborde, arguing from the distance, thinks that the source of the *Wady Ghârindeh* in the Arabah is the site; as from Mount Hor to *el Ahsy* is by way of Esion-geber 65 leagues, in which only four stages occur: a rate of progress quite beyond their power. This argument, however, is feeble, since it is clear that the march-stations mentioned indicate not daily stages, but more permanent encampments. He also thinks the palm-trees of *Wady G.* would have attracted notice, and that *Wady Jethum (el Ithm)* could not have been the way consistently with the precept of Deut. ii. 3. The camping station in the catalogue of Num. xxiii., which corresponds to the "pitching in the valley of Zared" of xxi. 12, is probably Dibon-Gad, as it stands next to Ije-Abarim; compare Num. xxiii. 44-45 with xxi. 12. The *Wady el-Ahsy* forms the boundary between the districts of *Jebel* and *Kerek*. The stream runs in a very deep ravine and contains a hot spring which the Arabs call the "Bath of Solomon son of David" (Irby, May 29).

The Jewish interpreters translate the name in the first case "osiers," and in the second "baskets" (Targum Pseudojonathan), which recalls the "brook of the willows" of Isaiah (xv. 7). The name *Sufsaf* (willow) is attached to the valley which runs down from *Kerak* to the Dead Sea; but this appears to be too far north for the Zered. [WILLOWS, BROOK OF THE.] [H. H.]

ZER'EDA (זֶרְעָדָה, i. e. the Tzerédah, with the def. article: זֶרְעָדָה; Alex. זֶרְעָדָה: *Sareda*). The native place, according to the present Hebrew text, of Jeroboam, the leader of the revolt of the northern tribes, and the first king of the "Kingdom of Israel." It occurs in 1 K. xi. 26 only. The LXX. (in the Vatican Codex) for Zereda substitute Sareira, as will be seen above. This is not in itself remarkable, since it is but an instance of the exchange of r and d, which is so often observed both in the LXX. and Syriac Versions, and which has not improbably taken place in the Hebrew text itself of Judg. vii. 22, where the name Zererah appears attached to a place which is perhaps elsewhere called Zeredathah. But it is more remarkable that in the long addition to the history of Jeroboam which these translators insert between 1 K. xii. 24 and 25 of the Hebrew text, Sareira is frequently mentioned. In strong contrast to the merely casual mention of it in the Hebrew narrative

as Jeroboam's native place, it is elevated in the narrative of the LXX. into great prominence, and becomes in fact the most important and, it may naturally be presumed, the most impregnable fortress of Ephraim. It there appears as the town which Jeroboam fortified for Solomon in Mount Ephraim; thither he returns on his return from Egypt; there he assembles the tribe of Ephraim, and there he builds a fortress. Of its position nothing is said except that it was "in Mount Ephraim," but from the nature of the case it must have been central. The LXX. further make it the residence of Jeroboam at the time of the death of his child, and they substitute it for Tirzah (not only on the single occasion on which the latter name occurs in the Hebrew of this narrative, but) three times over. No explanation has been given of this change of תִּרְצַח into זֶרֶדָּתָא . It is hardly one which would naturally occur from the corruptions either of copyists or of pronunciation. The question of the source and value of these singular additions of the LXX. has never yet been fully examined; but in the words of Dean Milman (*Hist. of the Jews*, 3rd ed. i. 332), "there is a circumstantialness about the incidents which gives them an air of authenticity, or rather antiquity," and which it is to be hoped will prompt some scholar to a thorough investigation.

Zeredah has been supposed to be identical with ZEREDATHAH (2 Chr. iv. 17) and ZARTANAH. But even if the two last of these names were more similar to it than they are, there would remain the serious topographical difficulty to such an identification, that they were in the valley of the Jordan, while Zeredah was, according to the repeated statement of the LXX., on Mount Ephraim. If, however, the restricted statement of the Hebrew Bible be accepted, which names Zeredah merely as the native place of Jeroboam, and as not concerned in the events of his mature life, then there is no obstacle to its situation in that part of the tribe of Ephraim which lay in the Jordan Valley. [G.]

ZEREDATHAH (זֶרֶדָּתָא ; Σαρεδάθ ; Alex. Σαρεδάθ : *Saredatha*). Named (in 2 Chr. iv. 17 only) in specifying the situation of the foundries for the brass-work of Solomon's Temple. In the parallel passage in 1 K. vii. 46 ZARTANAH occupies the place of Zeredathah, the rest of the sentence being literally the same; but whether the one name is merely an accidental variation of the other, or whether, as there is some ground for believing, there is a connexion between Zeredah, Zeredathah, Zererah, and Zartanah, we have now no means of determining. It should be observed that Zeredah has in the original the definite article prefixed to it, which is not the case with either Zeredathah or Zerera. [G.]

ZERERATH (זֶרֶרָתָא , i. e. *Tsererah*; Ζερεράθ ; Alex. Ζερεράθ : *Zerera*). A place named only in Judg. vii. 22, in describing the flight of the Midianite host before Gideon. The A. V. has somewhat unnecessarily added to the

* The א terminating the name in the A. V. is the Hebrew mode of connecting it with the particle of motion.—*Zerersathah*, i. e. to Zererah.

† The ז at the commencement of this barbarous word no doubt belongs to the preceding name, Beth-ha-shittah; and they should be divided as follows, $\text{בֵּית הַשִּׁטָּה זֶרֶרָתָא}$. The Vatican Codex appears to be the only MS. which retains any trace of the name. The others quoted by Holmes

original obscurity of the passage, which runs as follows:—"And the host fled unto Beth-ha-shittah to Zererah, unto the brink of Abel Mehlah upon Tabbath"—apparently describing the two lines of flight taken by the two portions of the host.

It is natural to presume that Zererah is the same name as Zeredathah.* They both appear to have been in the Jordan valley, and as to the difference in the names, the termination is insignificant, and the exchange of ד and ר is of constant occurrence. Zeredathah, again, appears to be equivalent to Zartanah.

It is also difficult not to suppose that Zererah is the same place with the Sarira which the LXX. present as the equivalent of Zeredah and of Tirzah. But in the way of this there is the difficulty which has been pointed out under Zeredah, that the two last-named places appear to have been in the highlands of Ephraim, while Zererah and Zeredathah were in the Jordan Valley. [G.]

ZER'ESH (זֶרֶשׁ ; Ζερέσ ; Σαρεσα ; Joseph. Ζαρεσα : *Zares*). The wife of Haman the Agagite (Esth. v. 10, 14, vi. 13), who counselled him to prepare the gallows for Mordecai, but predicted her husband's ruin as soon as she knew that Mordecai was a Jew. [A. C. H.]

ZER'ETH (זֶרֶת ; Ζερέθ ; Alex. Ζαρέθ : *Sareth*). Son of Ashur the founder of Tekoa, by his wife Helah (1 Chr. iv. 7).

ZERI (זֶרִי ; Ζερύ : *Sori*). One of the sons of Jeduthun in the reign of David (1 Chr. xiv. 3). In ver. 11 he is called IZRI.

ZER'OR (זֶרֶר ; Ζερέρ ; Alex. Ζαρέρ : *Seror*). A Benjamite, ancestor of Kiah the father of Saul (1 Sam. ix. 1).

ZER'UAH (זֶרֶוּאָה ; Vat. omits; Alex. Ζαρούα : *Sarea*). The mother of Jeroboam the son of Nebat (1 K. xi. 26). In the additional narrative of the LXX. inserted after 1 K. xii. 24, she is called Sarira (a corruption of Zeredah), and is said to have been a harlot.

ZERUBBABEL (זְרֻבָּבֶל , "dispersed" or "begotten, in Babylon;" Ζερούββαλ : *Serubabel*). The head of the tribe of Judah at the time of the return from the Babylonish Captivity in the first year of Cyrus. His exact parentage is a little obscure, from his being always called the son of Shealtiel (Esr. iii. 2, 8, v. 2, &c.; Hagg. i. 1, 12, 14, &c.), and appearing as such in the genealogies (Matt. i. 12; Luke iii. 27), whereas in 1 Chr. iii. 19, he is represented as the son of Pedaiah, Shealtiel or Salathiel's brother, and consequently as Salathiel's nephew. Probably the genealogy in 1 Chr. exhibits his true parentage, and he succeeded his uncle as head of the house of Judah—a supposition which tallies with the facts that Salathiel appears as the first-born, and that no children are assigned to him.

There are two histories of Zerubbabel: the one, that contained in the canonical Scriptures; the other, that in the Apocryphal Books and Josephus.

The history of Zerubbabel in the Scriptures is as

and Parsons either substitute Ζερούββαλ for it, or exhibit some variation of the words quoted above from the Alex. MS. The Vulgate entirely omits the name.

* Or possibly the two first of these four names should be joined, Beth-ha-shittah-Zererah.

† Zererah appears in Judg. vii. 22, $\text{בֵּית הַשִּׁטָּה זֶרֶרָתָא}$, with the particle of motion attached, which is all but identical with זֶרֶדָּתָא , Zeredathah.

follows:—In the first year of Cyrus he was living at Babylon, and was the recognized prince (נָשִׂיא) of Judah in the Captivity, what in later times was called נְהִימְיָא, or נְהִימְיָהוּ (Rhem), “the Prince of the Captivity,” or “the Prince.” On the issuing of Cyrus’s decree he immediately availed himself of it, and placed himself at the head of those of his countrymen “whose spirit God had raised to go up to build the House of the Lord which is in Jerusalem.” It is probable that he was in the king of Babylon’s service, both from his having, like Daniel and the three children, received a Chaldean name [SHESEBBAZAR], and from his receiving from Cyrus the office of governor (נָתַן) of Judaea. The restoration of the sacred vessels, which Nebuchadnezzar had brought from the Temple, having been effected, and copious presents of silver and gold, and goods, and beasts, having been bestowed upon the captives, Zerubbabel went forth at the head of the returning colony, accompanied by Jeshua the high-priest, and perhaps by the prophets Haggai and Zechariah, and a considerable number of priests, Levites, and heads of houses of Judah and Benjamin, with their followers. On arriving at Jerusalem, Zerubbabel’s first care was to build the altar on its old site, and to restore the daily sacrifice. [JESHUA.] Perhaps also they kept the Feast of Tabernacles, as it is said they did in Exr. iii. 4; but there is some reason to suspect that vers. 4, 5, and the first half of ver. 6, are interpolated, and are merely an epitome of Neh. viii., which belongs to very different times. [EZRA, BOOK OF; NEHEMIAH, BOOK OF.] But his great work, which he set about immediately, was the rebuilding of the Temple. Being armed with a grant from Cyrus of timber and stone for the building, and of money for the expenses of the builders (Exr. vi. 4), he had collected the materials, including cedar-trees brought from Lebanon to Joppa, according to the precedent in the time of Solomon (2 Chr. ii. 18), and got together masons and carpenters to do the work, by the opening of the second year of their return to Jerusalem. And accordingly, in the second month of the second year of their return, the foundation of the Temple was laid with all the pomp which they could command: the priests in their vestments with trumpets, and the sons of Asaph with cymbals, singing the very same Psalm of praise for God’s unfailing mercy to Israel, which was sung when Solomon dedicated his Temple (2 Chr. v. 11-14); while the people responded with a great shout of joy, “because the foundation of the house of the Lord was laid.” How strange must have been the emotions of Zerubbabel at this moment! As he stood upon Mount Zion, and beheld from its summit the desolations of Jerusalem, the site of the Temple blank, David’s palace a heap of ashes, his fathers’ sepulchres defiled and overlaid with rubbish, and the silence of desertion and emptiness hanging oppressively over the streets and waste places of what was once the joyous city; and then remembered how his great ancestor David had brought up the ark in triumph to the very spot where he was then standing, how Solomon had reigned there in all his magnificence and power, and how the petty kings and potentates of the neighbouring nations had been his vassals and tributaries, how must his heart alternately have swelled with pride, and throbbed with anguish, and sunk in humiliation! In the midst of

these mighty memories he was but the officer of a foreign heathen despot, the head of a feeble remnant of half-emancipated slaves, the captain of a band hardly able to hold up their heads in the presence of their hostile and jealous neighbours; and yet there he was, the son of David, the heir of great and mysterious promises, returned by a wonderful Providence to the home of his ancestors. At his bidding the daily sacrifice had been restored after a cessation of half a century, and now the foundations of the Temple were actually laid, amidst the songs of the Levites singing according to David’s ordinance, and the shouts of the tribe of Judah. It was a heartstirring situation; and, despite all the discouragements attending it, we cannot doubt that Zerubbabel’s faith and hope were kindled by it into fresh life.

But there were many hindrances and delays to be encountered before the work was finished. The Samaritans or Cuthceans put in a claim to join with the Jews in rebuilding the Temple; and when Zerubbabel and his companions refused to admit them into partnership they tried to hinder them from building, and hired counsellors to frustrate their purpose. They probably contrived, in the first instance, to intercept the supplies of timber and stone, and the wages of the workmen, which were paid out of the king’s revenue, and then by misrepresentation to calumniate them at the court of Persia. Thus they were successful in putting a stop to the work during the seven remaining years of the reign of Cyrus, and through the eight years of Cambyzes and Smerdis. Nor does Zerubbabel appear quite blameless for this long delay. The difficulties in the way of building the Temple were not such as need have stopped the work; and during this long suspension of sixteen years Zerubbabel and the rest of the people had been busy in building costly houses for themselves, and one might even suspect that the cedar-wood which had been brought for the Temple had been used to decorate private dwellings (comp. the use of יָדָה in Hagg. i. 4, and 1 K. vii. 3, 7). They had, in fact, ceased to care for the desolation of the Temple (Hagg. i. 2-4), and had not noticed that God was rebuking their lukewarmness by withholding His blessing from their labours (Hagg. i. 5-11). But in the second year of Darius light dawned upon the darkness of the colony from Babylon. In that year—it was the most memorable event in Zerubbabel’s life—the spirit of prophecy suddenly blazed up with a most brilliant light amongst the returned captives; and the long silence which was to ensue till the ministry of John the Baptist was preceded by the stirring utterances of Haggai and Zechariah. Their words fell like sparks upon tinder. In a moment Zerubbabel, roused from his apathy, threw his whole strength into the work, zealously seconded by Jeshua and all the people. [JESHUA.] Undeterred by a fresh attempt of their enemies to hinder the progress of the building, they went on with the work even while a reference was being made to Darius; and when, after the original decree of Cyrus had been found at Ecbatana, a most gracious and favourable decree was issued by Darius, enjoining Tatnai and Shetharboznai to assist the Jews with whatsoever they had need of at the king’s expense, the work advanced so rapidly that on the third day of the month Adar, in the sixth year of Darius, the Temple was finished, and was forthwith dedicated with much pomp and rejoicing. It

is difficult to calculate how great was the effect of the prophecies of Haggai and Zechariah in sustaining the courage and energy of Zerubbabel in carrying his work to completion. Addressed, as many of them were, directly to Zerubbabel by name, speaking, as they did, most glorious things of the Temple which he was building, conveying to Zerubbabel himself extraordinary assurances of Divine favour, and coupling with them magnificent and consolatory predictions of the future glory of Jerusalem, and Judah, and of the conversion of the Gentiles, they necessarily exercised an immense influence upon his mind (Hagg. i. 13, 14, ii. 4-9, 21-23; Zech. iv. 6-10, viii. 3-8, 9, 18-23). It is not too much to say that these prophecies upon Zerubbabel were the immediate instrument by which the church and commonwealth of Judah were preserved from destruction, and received a life which endured till the coming of Christ.

The only other works of Zerubbabel which we learn from the Scripture history are the restoration of the courses of priests and Levites, and of the provision for their maintenance, according to the institution of David (Ezr. vi. 18; Neh. xii. 47); the registering the returned captives according to their genealogies (Neh. vii. 5); and the keeping of a Passover in the seventh year of Darius, with which last event ends all that we know of the life of Zerubbabel the son of Shealtiel: a man inferior to few of the great characters of Scripture, whether we consider the perilous undertaking to which he devoted himself, the importance, in the economy of the Divine government, of his work, his courageous faith, or the singular distinction of being the object of so many and such remarkable prophetic utterances.

The Apocryphal history of Zerubbabel, which, as usual, Josephus follows, may be summed up in a few words. The story told in 1 Esdr. iii.-vii. is, that on the occasion of a great feast made by Darius on his accession, three young men of his body-guard had a contest who should write the wisest sentence. That one of the three (Zerubbabel) writing "Women are strongest, but above all things Truth beareth away the victory;" and afterwards defending his sentence with much eloquence, was declared by acclamation^a to be the wisest, and claimed for his reward, at the king's hand, that the king should perform his vow which he had vowed to rebuild Jerusalem and the Temple. Upon which the king gave him letters to all his treasurers and governors on the other side the river, with grants of money and exemption from taxes, and sent him to rebuild Jerusalem and the Temple, accompanied by the families of which the list is given in Ezr. ii., Neh. vii.; and then follows, in utter confusion, the history of Zerubbabel as given in Scripture. Apparently, too, the compiler did not perceive that Sanabazar^b (Sheshbazzar) was the same person as Zerubbabel. Josephus, indeed, seems to identify Sheshbazzar with Zerubbabel, and tries to reconcile the story in 1 Esdr. by saying, "Now it so fell out that about this time Zorobabel, who had been made governor of the Jews that had been in captivity, came to Darius from Jerusalem, for there had been an old friendship between him and the king," &c. (Ant. xi. 3.). But it is obvious on the face of it that this is simply Josephus's invention to reconcile 1 Esdr. with the canonical Ezra. [ESDRAS, FIRST BOOK OF.] Josephus has also

another story (Ant. xi. 4, §9) which is not found in 1 Esdr., of Zorobabel going on an embassy to Darius to accuse the Samaritan governors and hipparchs of withholding from the Jews the grants made by Darius out of the royal treasury, for the offering of sacrifices and other Temple expenses and of his obtaining a decree from the king commanding his officers in Samaria to supply the high-priest with all that he required. But that this is not authentic history seems pretty certain from the names of the governors, *Sambabaz* being an imitation or corruption of *Sanballat*, *Tanyanes* of *Tutnai* (or *Thanthanai*, as in LXX.), *Sadraces* of *Sathrabouzan*, confused with *Shadrach*, *Bobelo* of *Zorobabel*; and the names of the ambassadors, which are manifestly copied from the list in 1 Esdr. v. 8, where Zorobabel, Esonius, and Mardocheus, correspond to Zorobabel, Ananias, and Mardocheus of Josephus. Moreover the letter or decree of Darius, as given by Josephus, is as manifestly copied from the decree of Darius in Ezr. vi. 6-10. In all probability, therefore, the document used by Josephus was one of those numerous Apocryphal religious romances which the Hellenistic Jews were so fond of about the 4th and 3rd century before Christ, and was written partly to explain Zorobabel's presence at the court of Darius, as spoken of in 1 Esdr., partly to explain that of Mordecai at the court of Ahasuerus, though he was in the list of those who were Zorobabel's companions (as it seemed), and partly to give an opportunity for reviling and humiliating the Samaritans. It also gratified the favourite taste for embellishing, and corroborating, and giving, as was thought, additional probability to the Scripture narrative, and dwelling upon bygone times of Jewish triumphs. [ESTHER, BOOK OF.]

It only remains to notice Zerubbabel's place in the genealogy of Christ. It has already been observed that in the genealogies Matt. i. 12, and Luke iii. 27, he is represented as son of Salathiel, though the Book of Chronicles tells us he was the son of Pedaiah, and nephew of Salathiel. It is of more moment to remark that, while St. Matthew deduces his line from Jeconias and Solomon, St. Luke deduces it through Neri and Nathan. Here then we have the head of the nation, the Prince of Judah, the foremost man of his country, with a double genealogy, one representing him as descending from all the kings of Judah, the other as the descendant indeed of David, but through a long line of private and unknown persons. We find him, too, filling the position of Prince of Judah at a time when, as far as the history informs us, the royal family was utterly extinct. And though, if descended from the last king, he would have been his grandson, neither the history, nor the contemporary prophets, nor Josephus, nor the apocryphal books, give the least hint of his being a near relative of Jeconiah, while at the same time the natural interpretation of Jer. xxii. 30 shows Jeconiah to have been childless. The inference from all this is obvious. Zerubbabel was the legal successor and heir of Jeconiah's royal estate, the grandson of Neri, and the lineal descendant of Nathan the son of David. [SALATHIEL; GENEALOGY OF CHRIST. For Zerubbabel's descendants see HANANIAH 8.]

In the N. T. the name appears in the Greek form of ZOROBABEL. [A. C. H.]

ZERUIAH (זְרֻיָּה, and once זְרֻיָּה: Zaphaniah)

^a With the shout, "Magna est veritas, et praevaluit!"
^b *Sanabazar* is merely a corruption of *Sanballat*.

Sarvia). A woman who, as long as the Jewish records are read, will be known as the mother of the three leading heroes of David's army—Abisha, Joab, and Asahel—the "sons of Zeruiah." She and Abigail are specified in the genealogy of David's family in 1 Chr. ii. 13-17 as "sisters of the sons of Jesse" (ver. 16; comp. Joseph. *Ant.* vii. 10, §1). The expression is in itself enough to raise a suspicion that she was not a daughter of Jesse, a suspicion which is corroborated by the statement of 2 Sam. xvii. 25, that Abigail was the daughter of Nahash. Abigail being apparently the younger of the two women, it is a probable inference that they were both the daughters of Nahash, but whether this Nahash be—as Professor Stanley has ingeniously conjectured—the king of the Ammonites, and the former husband of Jesse's wife, or some other person unknown, must for ever remain a mere conjecture. [DAVID, vol. i. p. 401.] Other explanations are given under NAHASH, vol. ii. p. 457. Her relation to Jesse (in the original Ishai) is expressed in the name of her son Abiahai.

Of Zeruiah's husband there is no mention in the Bible. Josephus (*Ant.* vii. 1, §3) explicitly states his name to have been Souri (Σοῦρι), but no corroboration of the statement appears to have been discovered in the Jewish traditions, nor does Josephus himself refer to it again. The mother of such remarkable sons must herself have been a remarkable woman; and this may account for the fact, unusual if not unique, that the family is always called after her, and that her husband's name has not been considered worthy of preservation in the sacred records. [G.]

ZETHAM (זֶתָם): Ζηθάμ, Ζεθάμ; Alex. Ζαθάμ, Ζεθάμ; *Zethan, Zathan*.) The son of Laadan, a Gershonite Levite (1 Chr. xxiii. 8). In 1 Chr. xxvi. 22 he appears as the son of Jehiel, or Jehieli, and so the grandson of Laadan.

ZETHAN (זֶתָן): Ζαθάμ; Alex. Ζηθάμ; *Zethan*.) A Benjamite of the sons of Bilhan (1 Chr. vii. 10).

ZETHAR (זֶתָר): Ἀβαραφάς; *Zethar*.) One of the seven eunuchs of Ahasnerus who attended upon the king, and were commanded to bring Vashti into his presence (*Esth.* i. 10).

ZIA (זִיא): Ζουά; *Zio*.) One of the Gadites who dwelt in Bashan (1 Chr. v. 13).

ZIBA (זִבָּא), once "זִבְיָא"; Ζεῖβᾶ; Alex. Ζίβα, and in ch. xvi. 2, Ζεῖββα; Joseph. Ζιβᾶς; *Siba*.) A person who plays a prominent part, though with no credit to himself, in one of the episodes of David's history (2 Sam. ix. 2-12, xvi. 1-4, xix. 17, 29). He had been a slave (זִבְיָא) of the house of Saul before the overthrow of his kingdom, and (probably at the time of the great Philistine incursion which proved so fatal to his master's family) had been set free (Joseph. *Ant.* vii. 5, §5). The opportunities thus afforded him he had so far improved, that when first encountered in the history he is head of an establishment of fifteen sons and twenty slaves. David's reception of Mephibosheth had the effect of throwing Ziba with his whole establishment back into the state of bondage from which he had for so long been free. It reduced him from being an independent landholder

to the position of a mere dependant. The knowledge of this fact gives the key to the whole of his conduct towards David and towards Mephibosheth. Beyond this the writer has nothing to add to his remarks on Ziba under the head of MEPHIBOSHETH. [G.]

ZIB'IA (זִיבְיָא): Ζεῖβῖα; *Sobia*.) A Benjamite, apparently, as the text now stands, the son of Shahrain by his wife Hodesh (1 Chr. viii. 9).

ZIB'IAH (זִיבְיָא): Ζεῖβῖα; *Sobia*.) A native of Beersheba, and mother of king Josiah (2 K. xii. 1; 2 Chr. xiv. 1).

ZIB'EON (זִיבְיָא): Ζεῖβυόν; *Sobon*.) Father of Anah, whose daughter Aholibamah was Esau's wife (Gen. xxxvi. 2). Although called a Hivite, he is probably the same as Zibeon the son of Seir the Horite (vers. 20, 24, 29; 1 Chr. i. 38, 40), the latter signifying "cave-dweller," and the former being the name of his tribe, for we know nothing of the race of the Troglodytes; or more probably זִיבְיָא (the Hivite), is a mistranscription for זִיבְיָא (the Horite).

Another difficulty connected with this Zibeon is, that Anah in ver. 2 is called his daughter, and in ver. 24 his son; but this difficulty appears to be easily explained by supposing that זִיבְיָא refers to Aholibamah, and not to the name next preceding it: the Samaritan, it should be observed, has זִיבְיָא. An allusion is made to some unrecorded fact in the history of the Horites in the passage, "this [was that] Anah that found the mules in the wilderness, as he fed the asses of Zibeon his father" (Gen. xxxvi. 24). The word rendered "mules" in the A. V. is the Heb. מִמְלָא, perhaps the Emims or giants, as in the reading of the Sam. מִמְלָאִים, and so also Onkelos and Pseudejonathan, Gesenius prefers "hot-springs," following the *Vulg.* rendering. Zibeon was also one of the dukes, or phylarchs, of the Horites (ver. 29). For the identification with Beeri, father of Judith the Hittite (Gen. xxvi. 34), see BEERI, and see also ANAH. [E. S. P.]

ZICH'RI (זִיכְרִי): Ζεχρη; *Zechri*.) 1. Son of Ishar the son of Kohath (Ex. vi. 21). His name is incorrectly given in modern editions of the A. V. "Zithri," though it is printed ZICHRI in the ed. of 1611.

2. (Ζεχρη; Alex. Ζεχρη.) A Benjamite of the sons of Shimhi (1 Chr. viii. 19).

3. (Ζεχρη; Alex. Ζεχρη.) A Benjamite of the sons of Shashak (1 Chr. viii. 23).

4. (Ζεχρη.) A Benjamite of the sons of Jeroham (1 Chr. viii. 27).

5. Son of Asaph, elsewhere called ZABDI and ZACOUR (1 Chr. ix. 15).

6. A descendant of Eleazar the son of Moses (1 Chr. xxvi. 25).

7. The father of Eliezer, the chief of the Benjamites in the reign of David (1 Chr. xxvii. 16).

8. (Ζαφ; Alex. Ζεχρη.) Of the tribe of Judah. His son Amasiah commanded 200,000 men in Jehoshaphat's army (2 Chr. xvii. 16).

9. (Ζεχρη.) Father of Elishaphat, one of the conspirators with Jehoiada (2 Chr. xxiii. 1).

10. (Ζεχρη; Alex. Ζεχρη.) An Ephraimite hero in the invading army of Pekah the son of Remaliah (2 Chr. xxviii. 7). In the battle which was so disastrous to the kingdom of Judah, Manasseh the king's son, Azrikam, the prefect of the

palace, and Elkanah, who was next to the king ^{by} the hand of Zichri.

11. ('Zeypl.) Father or ancestor of JOEL 14 (Neh. xi. 9). He was probably a Benjamite.

12. A priest of the family of Abijah, in the days of Jeiakim the son of Jeshua (Neh. xii. 17). [W. A. W.]

ZIDDIM (צִידִים), with the def. article: *צִידִים* *Tsidim*; Alex. omits: *Aseddin*. One of the fortified towns of the allotment of Naphtali, according to the present condition of the Hebrew text (Josh. xix. 35). The translators of the Vat. LXX. appear to have read the word in the original, צִידִים, "the Tyrians," while those of the Peshito-Syriac, on the other hand, read it as צִידִן, Zidon. These readings were probably both influenced by the belief that the same next following that in question, viz. ZER, was that of Tyre. But this is more than doubtful, and indeed Tyre and Zidon were included in the allotment, not of Naphtali, but of Asher (xix. 28, 29). The Jerusalem Talmud (*Megillah*, i.) is probably nearer the mark in identifying bat-Tsiddim with *Kefr Chittai*, which Schwarz (182) with much probability takes to be the present *Hattin*, at the northern foot of the well known *Kurn Hattin*, or "Horns of Hattin," a few miles west of Tiberias. This identification falls in with the fact that the three next names in the list are all known to have been connected with the lake. [G.]

ZIDKIJAH (צִדְקִיָּה: *Sedekias*: *Sedecias*). A priest, or family of priests, who signed the covenant with Nehemiah (Neh. x. 1). The name is identical with that elsewhere in the A. V. rendered ZEDEKIAH.

ZIDON or SIDON (צִידֹן and סִידֹן: *Sidon*). Gen. x. 19, 15; Josh. xi. 8, xix. 28; Judg. i. 31, xviii. 28; Joel iii. 4 (iv. 4); Is. xxiii. 2, 4, 12; Jer. xxv. 22, xxvii. 3; Ez. xxviii. 21, 22; Zech. ix. 2; Matt. xi. 21, 22, xv. 21; Luke vi. 17, x. 13, 14; Mark iii. 8, vii. 24, 31.—An ancient and wealthy city of Phoenicia, on the eastern coast of the Mediterranean Sea, in latitude 33° 34' 05" N., less than twenty English miles to the north of Tyre. Its Hebrew name, Tsiddôn, signifies "Fishing," or "Fishery" (see Gesenius, s.v.). Its modern name is *Saida*. It is situated in the narrow plain between the Lebanon and the sea, to which it once gave its own name (Joseph. *Ant.* v. 3, §1, τὸ μέγα πῆλον Σιδῶνος πόλεως) at a point where the mountains recede to a distance of two miles (Kenrick's *Phoenicia*, p. 19). Adjoining the city there are luxuriant gardens and orchards, in which there is a profusion of the finest fruit trees suited to the climate. "The plain is flat and low," says Mr. Porter, author of the *Handbook for Syria and Palestine*, "but near the coast line rises a little hill, a spur from which shoots out a few hundred yards into the sea in a south-western direction. On the northern slope of the promontory thus formed stands the old city of Zidon. The hill behind on the south is covered by the citadel" (*Enc. Britannica*, 8th edition, s.v.).

From a Biblical point of view, this city is inferior in interest to its neighbour Tyre, with which its name is so often associated. Indeed, in all the passages above referred to in which the two cities are mentioned together, Tyre is named first—a circumstance which might at once be deemed accidental, or the mere result of Tyre's being the acutest of the two cities to Palestine, were it not

that some doubt on this point is raised by the order being reversed in two works which were written at a period, after Zidon had enjoyed a long temporary superiority (Ez. iii. 7; 1 Chr. xxii. 4). However this may be, it is certain that, of the two, Tyre is of the greater importance in reference to the writings of the most celebrated Hebrew prophets; and the splendid prophecies directed against Tyre, as a single colossal power (Ez. xxvi., xxvii., xxviii. 1-19; Is. xxiii.), have no parallel in the shorter and vaguer utterances against Zidon (Ez. xxviii. 21-23). And the predominant Biblical interest of Tyre arises from the prophecies relating to its destiny.

If we could believe Justin (xviii. 3), there would be no doubt that Zidon was of greater antiquity than Tyre, as he says that the inhabitants of Sidon, when their city had been reduced by the king of Ascalon, founded Tyre the year before the capture of Troy. Justin, however, is such a weak authority for any disputed historical fact, and his account of the early history of the Jews, wherein we have some means of testing his accuracy, seems to be so much in the nature of a romance (xxvi. 2) that, without laying stress on the unreasonableness of any one's assuming to know the precise time when Troy was taken, he cannot be accepted as an authority for the early history of the Phoenicians. In contradiction of this statement, it has been further insisted on, that the relation between a colony and the mother-city among the Phoenicians was sacred, and that as the Tyrians never acknowledged this relation towards Zidon, the supposed connexion between Tyre and Zidon is morally impossible. This is a very strong point; but, perhaps, not absolutely conclusive, as no one can prove that this was the custom of the Phoenicians at the very distant period when alone the Zidonians would have built Tyre, if they founded it at all; or that it would have applied not only to the conscious and deliberate founding of a colony, but likewise to such an almost accidental founding of a city, as is implied in the account of Justin. Certainly, there is otherwise nothing improbable in Zidonians having founded Tyre, as the Tyrians are called Zidonians, but the Zidonians are never called Tyrians. And at any rate this circumstance tends to show that in early times Zidon was the most influential of the two cities. This is shadowed forth in the Book of Genesis by the statement that Zidon was the first-born of Canaan (Gen. x. 15), and is implied in the name of "Great Zidon," or "the Metropolis Zidon," which is twice given to it in Joshua (xi. 8, xix. 28). It is confirmed, likewise, by Sidonians being used as the generic name of the Phoenicians, or Canaanites (Josh. xiii. 6; Judg. xviii. 7); and by the reason assigned for there being no deliverer to Laish when its peaceable inhabitants were massacred, that "it was far from Zidon;" whereas, if Tyre had been then of equal importance, it would have been more natural to mention Tyre, which professed substantially the same religion, and was almost twenty miles nearer (Judg. xviii. 28). It is in accordance with the inference to be drawn from these circumstances that in the Homeric poems Tyre is not named, while there is mention both of Sidon and the Sidonians (*Od.* xv. 423, *Il.* xxiii. 743); and the land of the Sidonians is called "Sidonia" (*Od.* xiii. 285). One point, however, in the Homeric poems deserves to be specially noted concerning the Sidonians, that they are never here mentioned as traders, or praised for

their nautical skill, for which they were afterwards so celebrated (Herod. vii. 44, 96). The traders are invariably known by the general name of Phoenicians, which would, indeed, include the Sidonians; but still the special praise of Sidonians was as skilled workmen. When Achilles distributed prizes at the games in honour of Patroclus, he gave as the prize of the swiftest runner, a large silver bowl for mixing wine with water, which had been cunningly made by the skilful Sidonians, but which Phoenicians had brought over the sea (*Il.* xliii. 743, 744). And when Menelaus wished to give to Telemachus what was most beautiful and most valuable, he presented him with a similar mixing-bowl of silver, with golden rim, a divine work, the work of Hephaestus, which had been a gift to Menelaus himself from Phaedimus, king of the Sidonians (*Od.* iv. 614-618, and *Od.* xv. l. c.). And again, all the beautifully embroidered robes of Andromache, from which she selected one as an offering to Athens, were the productions of Sidonian women, which Paris, when coming to Troy with Helen, had brought from Sidonia (*Il.* vi. 289-295). But in no case is anything mentioned as having been brought from Sidon in Sidonian vessels or by Sidonian sailors. Perhaps at this time the Phoenician vessels were principally fitted out at seaports of Phoenicia to the north of Sidon.

From the time of Solomon to the invasion of Nebuchadnezzar Sidon is not often directly mentioned in the Bible, and it appears to have been subordinate to Tyre. When the people called "Zidonians" is mentioned, it sometimes seems that the Phoenicians of the plain of Sidon are meant, as, for example, when Solomon said to Hiram that there was none among the Jews that could skill to hew timber like the Zidonians (1 K. v. 6); and possibly, when Eihbeal, the father of Jezebel, is called their king (1 K. xvi. 31), who, according to Menander in Josephus (*Ant.* viii. 13, §2), was king of the Tyrians. This may likewise be the meaning when Ashtoreth is called the Goddess, or Abomination, of the Zidonians (1 K. xi. 5, 33; 2 K. xxiii. 13), or when women of the Zidonians are mentioned in reference to Solomon (1 K. xi. 1). And this seems to be equally true of the phrases, "daughter of Zidon," and "merchants of Zidon," and even once of "Zidon" itself (*Isa.* xxiii. 12, 2, 4) in the prophecy of Isaiah against Tyre. There is no doubt, however, that Zidon itself, the city properly so called, was threatened by Joel (iii. 4) and Jeremiah (xxvii. 3). Still, all that is known respecting it during this epoch is very scanty, amounting to scarcely more than that one of its sources of gain was trade in slaves, in which the inhabitants did not shrink from selling inhabitants of Palestine [PHOENICIANS, p. 1001]; that the city was governed by kings (*Jer.* xxvii. 3 and xxv. 22); that, previous to the invasion of Nebuchadnezzar, it had furnished mariners to Tyre (*Ex.* xxvii. 8); that, at one period, it was subject, in some sense or other, to Tyre; and that, when Shalmaneser king of Assyria invaded Phoenicia, Zidon seized the opportunity to revolt. It seems strange to hear of the subjection of one great city to another great city only twenty miles off, inhabited by men of the same race, language, and religion; but the fact is rendered conceivable

by the relation of Athens to its allies after the Persian war, and by the history of the Italian republics in the middle ages. It is not improbable that its rivalry with Tyre may have been influential in inducing Zidon, more than a century later, to submit to Nebuchadnezzar, apparently without offering any serious resistance.

During the Persian domination, Zidon seems to have attained its highest point of prosperity; and it is recorded that, towards the close of that period, it far excelled all other Phoenician cities in wealth and importance (*Diod.* xvi. 44; *Mela.* i. 12). It is very probable that the long siege of Tyre by Nebuchadnezzar had tended not only to weaken and impoverish Tyre, but likewise to enrich Zidon at the expense of Tyre; as it was an obvious expedient for any Tyrian merchants, artisans, and sailors, who deemed resistance useless or unwise, to transfer their residence to Zidon. However this may be, in the expedition of Xerxes against Greece, the Sidonians were highly favoured, and were a pre-eminently important element of his naval power. When, from a hill near Abydos, Xerxes witnessed a boat-race in his fleet, the prize was gained by the Sidonians (*Herod.* vii. 44). When he reviewed his fleet, he sat beneath a golden canopy in a Sidonian galley (*vii.* 100); when he wished to examine the mouths of the river Peneus, he entrusted himself to a Sidonian galley, as was his wont on similar occasions (*vii.* 128); and when the Tyrants and general officers of his great expedition sat in order of honour, the king of the Sidonians sat first (*viii.* 67). Again, Herodotus states that the Phoenicians supplied the best vessels of the whole fleet; and of the Phoenicians, the Sidonians (*vii.* 96). And lastly, as Homer gives a vivid idea of the beauty of Achilles by saying that Nireus (thrice-named) was the most beautiful of all the Greeks who went to Troy, after the son of Peleus, so Herodotus completes the triumph of the Sidonians, when he praises the vessels of Artemisia (probably for the daring of their crews), by saying that they were the most renowned of the whole fleet, "after the Sidonians" (*vii.* 9).

The prosperity of Sidon was suddenly cut short by an unsuccessful revolt against Persia, which led to one of the most disastrous catastrophes recorded in history. Unlike the siege and capture of Tyre by Alexander the Great, which is narrated by several writers, and which is of commanding interest through its relation to such a renowned conqueror, the fate of Sidon is only known through the history of Diodorus (*xvi.* 42-45), and is mainly connected with Artaxerxes Ochus (B.C. 359-338), a monarch who is justly regarded with mingled aversion and contempt. Hence the calamitous overthrow of Sidon has not, perhaps, attracted so much attention as it deserves. The principal circumstances were these. While the Persians were making preparations in Phoenicia to put down the revolt in Egypt, some Persian satraps and generals behaved oppressively and insolently to Sidonians in the Sidonian division of the city of Tripolis. On this, the Sidonian people projected a revolt; and having first concerted arrangements with other Phoenician cities, and made a treaty with Nectanebus, they put their design into execution. They commenced by committing outrages in a residence and park (*ραψιδεύρας*) of

* In an excellent account of this revolt, Bp. Thirlwall seems to have regarded Diodorus as meaning Sidon itself by the words *ἐν τῇ Σιδωνίᾳ*, *xvi.* 41 (*History of Greece*, vi. 179); and Miot, in his French translation of Diodorus (*Bibliothèque Historique de Diodore de Sicile*, Paris, 1837,

tom. v. 73), actually translates the words by "Sidon." The real meaning, however, seems to be as stated in the text. Indeed, otherwise there was no sufficient reason for mentioning Tripolis as specially connected with the excess of the war.

the Persian king; they burnt a large store of fodder which had been collected for the Persian cavalry; and they seized and put to death the Persians who had been guilty of insults towards the Sidonians. Afterwards, under their King Tennes, with the assistance from Egypt of 4000 Greek mercenaries under Mentor, they expelled the Persian satraps from Phœnicia; they strengthened the defences of their city, they equipped a fleet of 100 triremes, and prepared for a desperate resistance. But their King Tennes proved a traitor to their cause—and in performance of a compact with Ochus, he betrayed into the king's power one hundred of the most distinguished citizens of Sidon, who were all shot to death with javelins. Five hundred other citizens, who went out to the king with ensigns of supplication, shared the same fate; and by concert between Tennes and Mentor, the Persian troops were admitted within the gates, and occupied the city walls. The Sidonians, before the arrival of Ochus, had burnt their vessels to prevent any one's leaving the town; and when they saw themselves surrounded by the Persian troops, they adopted the desperate resolution of shutting themselves up with their families, and setting fire each man to his own house (B.C. 351). Forty thousand persons are said to have perished in the flames. Tennes himself did not save his own life, as Ochus, notwithstanding his promise to the contrary, put him to death. The privilege of searching the ruins was sold for money.

After this dismal tragedy, Sidon gradually recovered from the blow; fresh immigrants from other cities must have settled in it; and probably many Sidonian sailors survived, who had been plying their trade elsewhere in merchant vessels at the time of the capture of the city. The battle of Issus was fought about eighteen years afterwards (B.C. 333), and then the inhabitants of the restored city opened their gates to Alexander of their own accord, from hatred, as is expressly stated of Darius and the Persians (Arrian, *Anab. Al.* ii. 15). The impolicy, as well as the cruelty of Ochus in his mode of dealing with the revolt of Sidon now became apparent; for the Sidonian fleet in joining Alexander was an essential element of his success against Tyre. After aiding to bring upon Tyre as great a calamity as had afflicted their own city, they were so far merciful that they saved the lives of many Tyrians by concealing them in their ships, and then transporting them to Sidon (Q. Curtius, iv. 4, 15). From this time Sidon, being dependent on the fortunes of war in the contests between the successors of Alexander, ceases to play any important political part in history. It became, however, again a flourishing town—and Polybius (v. 70) incidentally mentions that Antiochus in his war with Ptolemy Philopator encamped over against Sidon (B.C. 218), but did not venture to attack it from the abundance of its resources, and the great number of its inhabitants, either natives or refugees. Subsequently, according to Josephus (*Ant.* xiv. 10, §2), Julius Cæsar wrote a letter respecting Hyrcanus, which he addressed to the "Magistrates, Council and Demos of Sidon." This shows that up to that time the Sidonians enjoyed the forms of liberty, though Dion Cassius says (lxiv. 7) that Augustus, on his arrival in the East, deprived them of it for seditious

conduct. Not long after, Strabo in his account of Phœnicia, says of Tyre and Sidon, "Both were illustrious and splendid formerly, and now; but which should be called the capital of Phœnicia, is a matter of dispute between the inhabitants" (xvi. p. 756). He adds that it is situated on the mainland, on a fine naturally-formed harbour. He speaks of the inhabitants as cultivating the sciences of arithmetic and astronomy; and says that the best opportunities were afforded in Sidon for acquiring a knowledge of these and of all other branches of philosophy. He adds, that in his time, there were distinguished philosophers, natives of Sidon, as Boethus, with whom he studied the philosophy of Aristotle, and his brother Diodotus. It is to be observed that both these names were Greek; and it is to be presumed that in Strabo's time, Greek was the language of the educated classes at least, both in Tyre and Sidon. This is nearly all that is known of the state of Sidon when it was visited by Christ. It is about fifty miles distant from Nazareth, and is the most northern city which is mentioned in connexion with his journeys. Pliny notes the manufacture of glass at Sidon (*Nat. Hist.* v. 17 (19));^b and during the Roman period we may conceive Tyre and Sidon as two thriving cities, each having an extensive trade, and each having its staple manufacture; the latter of glass, and Tyre of purple dyes from shell-fish.

There is no Biblical reason for following minutely the rest of the history of Sidon. It shared generally the fortunes of Tyre, with the exception that it was several times taken and retaken during the wars of the Crusades, and suffered accordingly more than Tyre previous to the fatal year 1291 B.C. Since that time it never seems to have fallen quite so low as Tyre. Through Fakhr ed-Din, emir of the Druses between 1594 and 1634, and the settlement at Sayda of French commercial houses, it had a revival of trade in the 17th and part of the 18th century, and became the principal city on the Syrian coast for commerce between the east and the west (see *Mémoires du Chevalier d'Arvieux*, Paris, 1735, tom. i. p. 294-378). This was put an end to at the close of last century by violence and oppression (Kitter's *Erdkunde*, Siebenbürgen theil, erste abtheilung, drittes buch, pp. 405-6), closing a period of prosperity in which the population of the city was at one time estimated at 20,000 inhabitants. The population, if it ever approached such a high point, has since materially decreased, and apparently does not now exceed 5000; but the town still shows signs of former wealth: and the houses are better constructed and more numerous than those at Tyre, being many of them built of stone. Its chief exports are silk, cotton, and nutgalls (Robinson's *Biblical Researches*, iii. p. 418-419). As a protection against the Turks, its ancient harbour was filled up with stones and earth by the orders of Fakhr ed-Din, so that only small boats can now enter it; and larger vessels anchor to the northward, where they are only protected from the south and east winds (Porter's *Handbook for Syria and Palestine*, 1858, p. 398). The trade between Syria and Europe now mainly passes through Beyrout, as its most important commercial centre; and the natural advantages of Beyrout in this respect, for the purposes of modern navigation, are so

^b Pliny elsewhere (*Nat. Hist.* xxxvi. 65 [26]) gives an account of the supposed accidental invention of glass in Phœnicia. The story is that some merchants on the seashore made use of some lumps of natron to support their cauldrons; and that, when the natron was subjected to the

action of fire in conjunction with the sea sand, a translucent vitreous stream was seen to flow along the ground. This story, however, is now discredited; as it requires intense furnace heat to produce the fusion. See article "Glass" in the *Encyclopædia Britannica*, 8th edition.

Paran (1 Sam. xxv. 1). On the other hand, this is difficult to reconcile with its connexion with the Philistines, and with the fact—which follows from the narrative of 1 Sam. xxx. (see 9, 10, 21)—that it was north of the Brook Besor. The word employed in 1 Sam. xxvii. 5, 7, 11, to denote the region in which it stood, is peculiar. It is not *has-Shefelah*, as it must have been had Ziklag stood in the ordinary lowland of Philistia, but *has-Sideh*, which Prof. Stanley (*S. and P. App.* §15) renders “the field.” On the whole, though the temptation is strong to suppose (as some have suggested) that there were two places of the same name, the only conclusion seems to be that Ziklag was in the south or Negeb country, with a portion of which the Philistines had a connexion which may have lasted from the time of their residence there in the days of Abraham and Isaac. It is remarkable that the word *sideh* is used in Gen. xiv. 7, for the country occupied by the Amalekites, which seems to have been situated far south of the Dead Sea, at or near Kadesh. The name of Paran also occurs in the same passage. But further investigation is necessary before we can remove the residence of Nabal so far south. His Maon would in that case become, not the *Maon* which lies near Zif and *Kirmoth*, but that which was the head-quarters of the Maonites, or Mehunim.

Ziklag does not appear to have been known to Eusebius and Jerome, or to any of the older travellers. Mr. Rowlands, however, in his journey from Gaza to Suez in 1842 (in Williams's *Holy City*, i. 483-8), was told of “an ancient site called Aslood, or Kaslood, with some ancient walls,” three hours east of Sebâta, which again was two hours and a half south of Khalasa. This he considers as identical with Ziklag. Dr. Robinson had previously (in 1838) heard of *Asidj* as lying south-west of *Mila*, on the way to *Abdeh* (*B. R.* li. 201), a position not discordant with that of Mr. Rowlands. The identification is supported by Mr. Wilton (*Negeb*, 209); but it is impossible at present, and until further investigation into the district in question has been made, to do more than name it. If Dr. Robinson's form of the name is correct—and since it is repeated in the Lists of Dr.

Eli Smith (*جسلاج*, App. to vol. iii. of 1st ed. p. 115a) there is no reason to doubt this—the similarity which prompted Mr. Rowlands's conjecture almost entirely disappears. This will be evident if the two names are written in Hebrew, זִיקְלָג, זִיכְלָג. [G.]

ZIL'LAH (זִלְלָה: *Zella*). One of the two wives of Lamech the Cainite, to whom he addressed his song (Gen. iv. 19, 22, 23). She was the mother of Tubal-Cain and Naamah. Dr. Kalisch (*Comm. on Gen.*) regards the names of Lamech's wives and of his daughter as significant of the transition into the period of art which took place in his time, and the corresponding change in the position of the woman. “Naamah signifies the lovely, beautiful woman; whilst the wife of the first man was simply Eve, the life-giving. . . . The women were, in the age of Lamech, no more regarded merely as the propagators of the human family; beauty and gracefulness began to command homage. . . . Even the wives of Lamech manifest the transition into this epoch of beauty; for whilst one wife, Zillah reminds still of assistance and protection (זִלְלָה, “shadow”), the other Adah, bears

a name almost synonymous with Naamah, and likewise signifying ornament and loveliness.”

In the apocryphal book of Jasher, Adah and Zillah are both daughters of Cainan. Adah bare children, but Zillah was barren till her old age, in consequence of some noxious draught which her husband gave her to preserve her beauty and to prevent her from bearing. [W. A. W.]

ZIL'PAH (זִלְפָּה: *Zelpha*). A Syrian given by Laban to his daughter Leah as an attendant (Gen. xxix. 24), and by Leah to Jacob as a concubine. She was the mother of Gad and Asher (Gen. xxx. 9-13, xxxiv. 26, xxxvii. 2, xlv. 18).

ZILTHA'I (זִלְתָּאִי: *Zalath*; Alex. *Zalath*: *Selethal*). 1. A Benjamite, of the sons of Shimhi (1 Chr. viii. 20).

2. (*Zalath*; FA. *Zalath*: *Salathi*). One of the captains of thousands of Manasseh who deserted to David at Ziklag (1 Chr. xii. 20).

ZIM'MAH (זִמְמָה: *Zammah*; Alex. *Zamma*, *Zemmah*: *Zamma*, *Zemna*). 1. A Gershonite Levite, son of Jahath (1 Chr. vi. 20).

2. (*Zammah*). Another Gershonite, son of Shimmei (1 Chr. vi. 42); possibly the same as the preceding.

3. (*Zemmah*: *Zemna*). Father or ancestor of Joah, a Gershonite in the reign of Hezekiah (2 Chr. xxix. 12). At a much earlier period we find the same collocation of names, Zimmah and Joah as father and son (1 Chr. vi. 20). Compare “Mabath the son of Amasai” in 2 Chr. xxix. 12 with the same in 1 Chr. vi. 35; “Joel the son of Azariah” in 2 Chr. xxix. 12 and 1 Chr. vi. 36; and “Kiah the son of Abdi” 2 Chr. xxix. 12 with “Kishi the son of Abdi” in 1 Chr. vi. 44. Unless these names are the names of families and not of individuals, their recurrence is a little remarkable.

ZIM'RAM (זִמְרָם: *Zumram*, *Zumram*; Alex. *Zumram*, *Zumram*, *Zumram*: *Zamran*). The eldest son of Keturah (Gen. xxv. 2; 1 Chr. i. 32). His descendants are not mentioned, nor is any hint given that he was the founder of a tribe: the contrary would rather appear to be the case. Some would identify Zimran with the Zimri of Jer. xxv. 25, but these lay too far to the north. The Greek form of the name, as found in the LXX., has suggested a comparison with *Zabram*, the chief city of the Cinaedocolpitae, who dwelt on the Red Sea, west of Mecca. But this is extremely doubtful, for this tribe, probably the same with the ancient *Kanda*, was a branch of the Joktanite Arabs, who in the most ancient times occupied Yemen, and may only have come into possession of Zabram at a later period (Knobel, *Genesis*). Hitzig and Langerke propose to connect the name Zimran with Zimiria, a district of Ethiopea mentioned by Pliny (xxxvi. 25); but Grotius, with more plausibility, finds a trace of it in the Zamerani, a tribe of the interior of Arabia. The identification of Zimran with the modern Ben Omrao, and the Bani Zomaneis of Diodorus, proposed by Mr. Forster (*Geogr. of Arabia*, i. 431), cannot be seriously maintained. [W. A. W.]

ZIM'RI (זִמְרִי: *Zumri*: *Zamri*). 1. The son of Salu, a Simeonite chieftain, slain by Phinehas with the Midianitish princess Cozbi (Num. xxv. 14). When the Israelites at Shittim were smitten with plagues for their impure worship of Baal Peor, and were weeping before the tabernacle, Zimri with

a shameless disregard to his own high position and the sufferings of his tribe, brought into their presence the Midianites in the sight of Moses and in the sight of the whole congregation. The fierce anger of Phinehas was aroused, and in the swift vengeance with which he pursued the offenders, he gave the first indication of that uncompromising spirit which characterized him in later life. The whole circumstance is much softened in the narrative of Josephus (*Ant.* iv. 8, §10-12), and in the hands of the apologist is divested of all its vigour and point. In the Targum of Jonathan ben Ussiel several traditional details are added. Zimri retorts upon Moses that he himself had taken to wife a Midianite, and twelve miraculous signs attend the vengeance of Phinehas.

In describing the scene of this tragedy an unusual word is employed, the force of which is lost in the rendering "tent" of the A. V. of Num. xiv. 8. It was not the *ohel*, or ordinary tent of the encampment, but the *ḥubbāh* (whence Span. *alcova*, and our *alcove*), or dome-shaped tent, to which Phinehas pursued his victims. Whether this was the tent which Zimri occupied as chief of his tribe, and which was in consequence more elaborate and highly ornamented than the rest, or whether it was, as Gesenius suggests, one of the tents which the Midianites used for the worship of Peor is not to be determined, though the latter is favoured by the rendering of the Vulg. *hupanar*. The word does not occur elsewhere in Hebrew. In the Syriac it is rendered a cell, or inner apartment of the tent. [W. A. W.]

2. (זִמְרִי: *Zamri*; Joseph. *Ant.* viii. 12, §5, *Zamprys*: *Zambri*.) Fifth sovereign of the separate kingdom of Israel, of which he occupied the throne for the brief period of seven days in the year B.C. 930 or 929. Originally in command of half the chariots in the royal army, he gained the crown by the murder of king Elah son of Baasha, who, after reigning for something more than a year (compare 1 K. xvi. 8 and 10), was indulging in a drunken revel in the house of his steward Arza at Tirzah, then the capital. In the midst of this festivity Zimri killed him, and immediately afterwards all the rest of Baasha's family. But the army which at that time was besieging the Philistine town of Gibeon, when they heard of Elah's murder, proclaimed their general Omri king. He immediately marched against Tirzah, and took the city. Zimri retreated into the innermost part of the late king's palace, set it on fire and perished in the ruins (1 K. xvi. 9-20). Ewald's inference from Jezebel's speech to Jehu (2 K. ix. 31), that on Elah's death the queen-mother welcomed his murderer with smiles and blandishments, seems rather arbitrary and far-fetched. [JEZEHEL.] [G. E. L. C.]

3. (*Zamri*.) One of the five sons of Zarah the son of Judah (1 Chr. ii. 6).

4. Son of Jehoadah and descendant of Saul (1 Chr. viii. 36, ix. 42).

5. (זִמְרִי: *Zamri*.) An obscure name, mentioned Jer. xiv. 25 in probable connexion with Dedan, Tema, Buz, Arabia (זִמְרִי), the mingled people "ereb (עֶרֶב), all of which immediately

precede it, besides other peoples; and followed by Elam, the Medes, and others. The passage is of wide comprehension, but the reference, as indicated above, seems to be to a tribe of the sons of the East, the Beni-Kadem. Nothing further is known respecting Zimri, but it may possibly be the same as, or derived from, ZIMRAN, which see. [E. S. F.]

ZIN (זֵין: *Zin*). The name given to a portion of the desert tract between the Dead Sea, Ghôr, and Arabah (possibly including the two latter, or portions of them) on the E., and the general plateau of the Tāh which stretches westward. The country in question consists of two or three successive terraces of mountain converging to an acute angle (like stairs where there is a turn in the flight) at the Dead Sea's southern verge, towards which also they slope. Here the drainage finds its chief vent by the *Wady el-Fikrah* into the Ghôr, the remaining waters running by smaller channels into the Arabah, and ultimately by the *Wady el-Jisb* also to the Ghôr. Judging from natural features, in the vagueness of authority, it is likely that the portion between, and drained by these wadis, is the region in question; but where it ended westward, whether at any of the abovenamed terraces, or blending imperceptibly with that of Paran, is quite uncertain. Kadesh lay in it, or on this unknown boundary, and here also Idumea was conterminous with Judah; since Kadesh was a city in the border of Edom (see KADESH; Num. xiii. 21, xx. 1, xxvii. 14, xxxiii. 36, xxxiv. 3; Josh. xv. 1). The researches of Williams and Rowlands on this subject, although not conclusive in favour of the site *el-Kadeis* for the city, yet may indicate that the "wilderness of Kades," which is indistinguishable from that of Zin, follows the course of the *Wady Murrah* westward. The whole region requires further research; but its difficulties are of a very formidable character. Josephus (*Ant.* iv. 4, §6) speaks of a "hill called Sin" (זֵין), where Miriam, who died in Kadesh, when the people had "come to the desert of Zin," was buried. This "Sin" of Josephus may recall the name Zin, and, being applied to a hill, may perhaps indicate the most singular and wholly isolated conical acclivity named *Moderah* (*Madara*, or *Madara*), standing a little S. of the *Wady Fikrah*, near its outlet into the Ghôr. This would precisely agree with the tract of country above indicated (Num. xx. 1; Seetzen, *Reisen*, iii. *Hebron to Madara*; Wilton, *Negéb*, 127, 134). [H. H.]

ZINA (זֵינָה: *Ziza*). ZIZAN the second son of Shimei (1 Chr. xxiii. 10, comp. 11) the Gershonite. One of Kennicott's MSS. reads זֵינָה, Ziza, like the LXX. and Vulg.

ZI'ON. [JERUSALEM.]

ZI'OR (זִי'ור: *Zupar*; Alex. *Zup*: *Sior*). A town in the mountain district of Judah (Josh. xv. 54, only). It belongs to the same group with Hebron, next to which it occurs in the list. By Eusebius and Jerome (*Onom.* *Zupar*) it is spoken of as a village between Aelia (Jerusalem) and Eleutheropolis (*Beit jibrin*), in the tribe of Judah. A small village named *Sa'ir* (سائر) lies on the road

* The word is זִמְרִי which Ewald (after J. D. Michælis), both here and in 2 K. xv. 25, insists on translating "barren," with which word he thinks that it is etymologically connected, and hence seeks confirmation of his view that Zimri was a voluptuous slave of women. But

its root seems to be זִמְרָה, "to be high" (Gesenius); and in other passages, especially Prov. xviii. 19, the meaning is "a lofty fortress," rather than "a barren." Ewald, in his sketch of Zimri, is perhaps somewhat led astray by the desire of finding a historical parallel with Sardanapalus.

between Tekoa and Hebron, about six miles north-east of the latter (Rob. B. R. i. 488), which may probably be that alluded to in the *Onomasticon*; and but for its distance from Hebron, might be adopted as identical with Zior. So little, however, is known of the principle on which the groups of towns are collected in these lists, that it is impossible to speak positively on the point, either one way or the other. [G.]

ZIPH (זִפְּה). The name borne by two towns in the territory of Judah.

1. (*Masada*; Alex. *Ἰφά* [Ἰφ: *Ziph*). In the south (*negeb*); named between Ithnan and Telem (Josh. xv. 24). It does not appear again in the history—for the Ziph of David's adventures is an entirely distinct spot—nor has any trace of it been met with. From this, from the apparent omission of the name in the Vatican LXX., and from the absence of the "and" before it, Mr. Wilton has been led to suggest that it is an interpolation (*Negeb*, 85); but his grounds for this are hardly conclusive. Many names in this list have not yet been encountered on the ground; before several others the "and" is omitted; and though not now recognizable in the Vat. LXX., the name is found in the Alex. and in the Peshito (*Zib*). In our present ignorance of the region of the Negeb it is safer to postpone any positive judgment on the point.

2. (*Ozaiβ*, *Zaiβ*, † *Zaiβ*; Alex. *Ziφ*, *Zaiφ*: *Ziph*). In the highland district; named between Carmel and Juttah (Josh. xv. 55). The place is immortalized by its connexion with David, some of whose greatest perils and happiest escapes took place in its neighbourhood (1 Sam. xxiii. 14, 15, 24, xxvi. 2). These passages show, that at that time it had near it a wilderness (*midbar*, i. e. a

waste pasture ground) and a wood. The latter has disappeared, but the former remains. The name of *Zif* is found about three miles S. of Hebron, attached to a rounded hill of some 100 feet in height, which is called *Tell Zif*. About the same distance still further S. is *Karmel* (Carmel), and between them a short distance to the W. of the road is *Yutta* (Juttah). About half a mile E. of the Tell are some considerable ruins, standing at the head of two small Wadye, which commencing here, run off towards the Dead Sea. These ruins are pronounced by Dr. Robinson (*B. R. i. 492*) to be those of the ancient Ziph, but hardly on sufficient grounds. They are too far from the Tell for it to have been the citadel to them. It seems more probable that the Tell itself is the remnant of the ancient place which was fortified by Rehoboam (2 Chr. xi. 8).

"Zib" is mentioned in the *Onomasticon* as 8 miles east of Hebron; "the village," adds Jerome, "in which David hid is still shown." This can hardly be the spot above referred to, unless the distance and direction have been stated at random, or the passage is corrupt both in Eusebius and Jerome. At 7 Roman miles east of Hebron a ruin is marked on Van de Velde's map, but it does not appear to have been investigated. Elsewhere (under "Zeib" and "Ziph") they place it near Carmel, and connect it with Ziph the descendant of Caleb.

From Eusebius to Dr. Robinson no one appears to have mentioned *Zif*. Yet many travellers must have passed the Tell, and the name is often in the mouths of the Arab guides (Stanley, *S. & P. 101*).

There are some curious differences between the text of the LXX. and the Hebrew of these passages, which may be recorded here.

HEBREW	VATICAŒ LXX. (M ^{ss}).	ALEX. LXX.
1 SAM. xxiii. 14. . . . remained in the mountain in the wilderness of Ziph.	ἐκἀπυτο ἐν τῇ ὄρει ἐν τῇ ὄρει Ζεῖφ, ἐν τῇ γῇ τῇ αὐχμῶδου ἐν τῇ ὄρει ἐν τῇ ὄρει Ζεῖφ αὐτὸς οὐκ ἐστὶν αὐχμῶδου ἐν τῇ αὐχμῶδου.
15. . . . in the wilderness of Ziph in the wood.	ἐν τῇ ὄρει τῇ αὐχμῶδου ἐν τῇ καινῇ Ζεῖφ, γῇ καινῇ [καινῇ = ὁ γῇ read for ὁ γῇ] Ζεῖφ ἐν τῇ καινῇ.
19. And Ziphites came to Saul.	καὶ ἀνέστησαν οἱ Ζεῖφαιοι ἐκ τῆς αὐχμῶδου πρὸς Σ.
24. And they arose and went to Ziph before Saul.	καὶ ἀνέστησαν οἱ Ζεῖφαιοι καὶ ἐπορεύθησαν ἔμπροσθεν Σ. καὶ ἐπορεύθησαν οἱ Ζεῖφαιοι . . .
xxvi. 1. And the Ziphites came unto Saul.	καὶ ἔρχονται οἱ Ζεῖφαιοι ἐκ τῆς αὐχμῶδου πρὸς τὸν Σ.

The recurrence of the word *αὐχμῶδ*, "dried up," "parched," would almost suggest that the LXX. understood the Ziph of the *negeb* to be intended. [G.]

ZIPH (זִפְּה): *Ziβ*; Alex. *Ziφ*: *Siph*). Son of Jehaleleel (1 Chr. iv. 16).

ZIPH'AH (זִפְּהָא): *Zephā*; Alex. *Zaiφά*: *Zipha*). One of the sons of Jehaleleel, whose family is enumerated in an obscure genealogy of the tribe of Judah (1 Chr. iv. 16).

ZIPHIMS, THE (זִפְּחִים): *γούδς Ζεῖφαιοις*: *Ziphai*).

The inhabitants of ZIPH (see the foregoing article, No. 2). In this form the name is found in the A. V. only in the title of Ps. liv. In the narrative it occurs in the more usual ^b form of

ZIPHITI'β, THE (זִפְּחִי): *οἱ Ζεῖφαιοι*: *Ziphai*, 1 Sam. xxiii.^a 19; xxvi. 1. [C.]

ZIPH'ION (זִפְּחִיֹן): *Σαφῶν*: *Sephion*). Son of Gad (Gen. xlv. 16); elsewhere called ZEPHON.

^a See a remark curiously parallel to this by Mar-mont in his *Voyage between Naplouse and Jerusalem*.

^b Examples of the same inconsistency in the A. V. are

found in AVIET; HORIX, HORITIE; PHILISTIA PHILISTINE.

^c In this passage there is no article to the name in the Hebrew.

ZIPHRON (זִפְרוֹן: *Zeppurō*; Alex. *Zeppurō*: *Zephrona*). A point in the north boundary of the Promised Land as specified by Moses (Num. xxxiv. 9). It occurs between Zedad and Hatsar-Enan. If Zedad is *Sūdād*, and Hatsar-Enan *Kurietin*, as is not impossible, then Ziphron must be looked for somewhere between the two. At present no name at all suitable has been discovered in this direction. But the whole of this topography is in a most unsatisfactory state as regards both comprehension of the original record and knowledge of the ground; and in the absence of more information we must be content to abstain from conjectures.

In the parallel passage of Ezekiel (xlvii. 16, 17) the words "Hazar-hatticon, which is by the border of Ra'anan," appear to be substituted for Ziphron. The Hauran here named may be the modern village *Hawadān*, which lies between *Sūdād* and *Kurietin*, and not the district of the same name many miles further south. [G.]

ZIPPOR (זִפּוֹר, and twice זִפְּוֹר: *Zeppōp*: *Sepphor*). Father of Balak king of Moab. His name occurs only in the expression "son of Zippor" (Num. xii. 2, 4, 10, 16, xxiii. 18; Josh. xxiv. 9; Judg. xi. 25). Whether he was the "former king of Moab" alluded to in Num. xxi. 26, we are not told, nor do we know that he himself ever reigned. The Jewish tradition already noticed [MOAB, p. 393 a] is, that Moab and Midian were united into one kingdom, and ruled by a king chosen alternately from each. In this connexion the similarity between the names Zippor and Zipporah, the latter of which we know to have been the name of a Midianite, *pur sang*, is worthy of notice, as it suggests that Balak may have been of Midianite parentage. [G.]

ZIPPORAH (זִפְּוֹרָה: *Zeppōra*; Joseph. *Zeppōra*: *Sephora*). Daughter of Reuel or Jethro, the priest of Midian, wife of Moses, and mother of his two sons Gershom and Eliezer (Ex. ii. 21, iv. 25, xviii. 2, comp. 6). The only incident recorded in her life is that of the circumcision of Gershom (iv. 24-26), the account of which has been examined under the head of MOSES (p. 427 b. See also Stanley's *Jewish Church*, 114).

It has been suggested that Zipporah was the Cushite (A. V. "Ethiopian") wife who furnished Miriam and Aaron with the pretext for their attack on Moses (Num. xii. 1, &c.). The chief ground for this appears to be that in a passage of Habakkuk (iii. 7) the names of Cushan and Midian are mentioned together. But in the immense interval which had elapsed between the Exodus and the period of Habakkuk (at least seven centuries), the relations of Cush and Midian may well have altered too materially to admit of any argument being founded on the later passage, even if it were certain that their being mentioned in juxtaposition implied any connexion between them, further than that both were dwellers in tents and enemies of Israel; and unless the events of Num. xii. should be proved to be quite out of their proper place in the narrative, it is difficult to believe that a charge could have been made against Moses on the ground of his marriage, after so long a period, and when the children of his wife must have been several years old. The most feasible suggestion appears to be that of

Ewald (*Geschichte*, ii. 229, note), namely that the Cushite was a second wife, or a concubine, taken by Moses during the march through the wilderness—whether after the death of Zipporah (which is not mentioned) or from other circumstances must be uncertain. This—with the utmost respect to the eminent scholar who has supported the other alternative—the writer ventures to offer as that which commends itself to him.

The similarity between the names of Zippor and Zipporah, and the possible inference from that similarity, have been mentioned under the former head. [ZIPPOR.] [G.]

ZITHRI (זִיתְרִי: *Zeptel*; Alex. *Zeptel*: *Sethri*). Properly "Sithri;" one of the sons of Uzziel, the son of Kohath (Ex. vi. 22). In Ex. vi. 21, "Zithri" should be "Zichri," as in A. V. of 1611.

ZIZ, THE CLIFF OF (צִיץ הַקֵּלַעַן: *ḥi dāḥāsis 'Araḥ*, in both MSS.: *clivus nominis Sio*). The pass (such is more accurately the meaning of the word *madīḥ*; comp. ADUMMIM; GUR, &c.) by which the horde of Moabites, Ammonites, and Meunim, made their way up from the shores of the Dead Sea to the wilderness of Judah near Tekoa (2 Chr. xx. 16 only; comp. 20). There can be very little doubt that it was the pass of *Ain Jidy*—"the very same route," as Dr. Robinson remarks, "which is taken by the Arabs in their marauding expeditions at the present day; along the shore as far as to 'Ain Jidy, and then up the pass, and so northwards below Tekoa" (*Bib. Res.* i. 506, 530). The very name (which since it has the article prefixed is more accurately *haz-Ziz* than *Ziz*) may perhaps be still traceable in *el-Hūḥḥāḥ*, which is attached to a large tract of table-land lying immediately above the pass of *Ain Jidy*, between it and Tekoa, and bounded on the north by a *Wady* of the same name (*B. R.* i. 527). May not both *haz-Ziz* and *Hūḥḥāḥ* be descended from *Hazson-tamar*, the early name of Engedi? [G.]

ZI'ZA (זִיזָה: *Zou'ā*: *Zisa*). 1. Son of Shiphai a chief of the Simeonites, who in the reign of Hezekiah made a raid upon the peaceable Hamite shepherds of Gedor, and smote them, "because there was pasture there for their flocks" (1 Chr. iv. 37).

2. (Zū'ā.) Son of Rehobam by Manahat, the granddaughter of Absalom (2 Chr. xi. 20).

ZI'ZAH (זִיזָה: *Zi'ā*: *Zira*). A Geraonite Levite, second son of Shimei (1 Chr. xxiii. 11; called ZINA in ver. 10).

ZO'AN (זֹאֵן: *Tanis*: *Tanis*), an ancient city of Lower Egypt. It is mentioned by a Shemitic and by an Egyptian name, both of the same significance. Zoan, preserved in the Coptic ΖΑΝΗ, ΖΑΝΙ.

S. ΖΑΔΑΝΕ, ΖΑΔΑΝΙ, the Arabic زان (a village on the site), and the classical *Tanis*, Tanis, whence the Coptic transcription ΤΑΝΕΩC, comes from the root זָנַן, "he moved tents" (Is. xxxiii. 20), cognate with זָנַן, "he loaded a beast of burden;" and thus signifies "a place of de-

* The final *a* in LXX and Vulgate is due to the Hebrew particle of motion—"to Ziphron."

Num. xxii. 10, xxiii. 18.

In LXX. *vies* Z. except in Josh. xxiv. 9, *ἡ νεὺς* Z.

pasture," like צִיִּיִּי, Zaananaum (Josh. xix. 33), or צִיִּיִּי, Zaanaim* (Judg. iv. 11), "removings" (Gesen.), a place in northernmost Palestine, on the border of Naphtali near Kedesh. The place just mentioned is close to the natural and constant northern border of Palestine, whether under the spurs of Lebanon or of Hermon. Zoan lay near the eastern border of Lower Egypt. The sense of departure or removing, therefore, would seem not to indicate a mere resting-place of caravans, but a place of departure from a country. The Egyptian name HA-AWAR, or PA-AWAR, Avaris, Aouapis, means "the abode" or "house" of "going out" or "departure." Its more precise sense fixes that of the Shemitic equivalent.^b

Tanis is situate in N. lat. 31°, E. long. 31° 55', on the east bank of the canal which was formerly the Tanitic branch. Anciently a rich plain extended due east as far as Pelusium, about thirty miles distant, gradually narrowing towards the east, so that in a south-easterly direction from Tanis it was not more than half this breadth. The whole of this plain, about as far south and west as Tanis, was anciently known as "the Fields" or "Plains."

מַרְשֵׁי־יָם, "the Marshes," רֶאֱלֵי, 'Eaeqyia, or "the pasture-lands," Βουκολία. Through the subsidence of the Mediterranean-coast, it is now almost covered by the great Lake Menzeleh. Of old it was a rich marsh-land, watered by four of the seven branches of the Nile, the Pathmitic, Mendesian, Tanitic, and Pelusiatic, and swept by the cool breezes of the Mediterranean. Tanis, while Egypt was ruled by native kings, was the chief town of this territory, and an important post towards the eastern frontier.

At a remote period, between the age when the pyramids were built and that of the empire, seemingly about B.C. 2080, Egypt was invaded, overrun, and subdued, by the strangers known as the Shepherds, who, or at least their first race, appear to have been Arabs cognate with the Phœnicians. How they entered Egypt does not appear. After a time they made one of themselves king, a certain Salatis, who reigned at Memphis, exacting tribute of Upper and Lower Egypt, and garrisoning the fittest places, with especial regard to the safety of the eastern provinces, which he foresaw the Assyrians would desire to invade. With this view finding in the Salte (better elsewhere Sethroite) nome, on the east of the Bubastite branch, a very fit city called Avaris, he rebuilt, and very strongly walled it, garrisoning it with 240,000 men. He came hither in harvest-time (about the vernal equinox), to give corn and pay to the troops, and exercise them so as to terrify foreigners. This is Manetho's account of the foundation of Avaris, the great stronghold of the Shepherds. Several points are raised by it. We see at a glance that Manetho did not know that Avaris was Tanis. By his time the city had fallen into obscurity, and he could not connect the HA-AWAR of his native records with the Tanis of the Greeks. His account of its early history must therefore be received with caution. Throughout, we trace the influence of the pride that made the Egyptians hate, and affect to despise, the Shepherds above all their conquerors, except the Persians. The motive of Salatis is not to overawe

Egypt but to keep out the Assyrians; not to terrify the natives but these foreigners, who, if other history be correct, did not then form an important state. The position of Tanis explains the case. Like the other principal cities of this tract, Pelusium, Bubastis, and Heliopolis, it lay on the east bank of the river, towards Syria. It was thus outside a great line of defence, and afforded a protection to the cultivated lands to the east, and an obstacle to an invader, while to retreat from it was always possible, so long as the Egyptians held the river. But Tanis though doubtless fortified partly with the object of repelling an invader, was too far inland to be the frontier-fortress. It was near enough to be the place of departure for caravans, perhaps was the last town in the Shepherd-period, but not near enough to command the entrance of Egypt. Pelusium lay upon the great road to Palestine—it has been until lately placed too far north [SIN]—and the plain was here narrow, from north to south, so that no invader could safely pass the fortress; but it soon became broader, and, by turning in a south-westerly direction, an advancing enemy would leave Tanis far to the northward, and a bold general would detach a force to keep its garrison in check and march upon Heliopolis and Memphis. An enormous standing militia, settled in the Bucolia, as the Egyptian militia afterwards was in neighbouring tracts of the Delta, and with its headquarters at Tanis, would have overawed Egypt, and secured a retreat in case of disaster, besides maintaining hold of some of the most productive land in the country, and mainly for the former two objects we believe Avaris to have been fortified.

Manetho explicitly states Avaris to have been older than the time of the Shepherds; but there are reasons for questioning his accuracy in this matter. The name is more likely to be of foreign than of Egyptian origin, for Zoan distinctly indicates the place of departure of a migratory people, whereas Avaris has the simple signification "abode of departure."

A remarkable passage in the Book of Numbers, not hitherto explained, "Now Hebron was built seven years before Zoan in Egypt" (alii. 22), seems to determine the question. Hebron was anciently the City of Arba, Kirjath-Arba, and was under the rule of the Anakim. These Anakim were of the old warlike Palestinian race that long dominated over the southern Canaanites. Here, therefore, the Anakim and Zoan are connected. The Shepherds who built Avaris were apparently of the Phœnician stock which would be referred to this race as, like them, without a pedigree in the Noachian geographical list. Hebron was already built in Abraham's time, and the Shepherd-invasion may be dated about the same period. Whether some older village or city were succeeded by Avaris matters little: its history begins in the reign of Salatis.

What the Egyptian records tell us of this city may be briefly stated. Apepee, probably Apophis of the xvth dynasty, a Shepherd-king who reigned shortly before the xviiith dynasty, built a temple here to Set, the Egyptian Beal, and worshipped no other god. According to Manetho, the Shepherds, after 511 years of rule, were expelled from all Egypt and shut up in Avaris, whence they were allowed to depart by capitulation, by either Amosis or Thummosis (Aahmes or Thothmes IV.), the first and seventh kings of the xviiith dynasty. The monuments show that the honour of ridding Egypt of the Shepherds belongs to Aahmes, and that this

* Kerf, as in Joshua.

^b The identification of Zoan with Avaris is due to M. de Rougé.

event occurred about B.C. 1500. Ramses II. embellished the great temple of Tanis, and was followed by his son Menptah.

It is within the period from the Shepherd-invasion to the reign of Menptah, that the sojourn and Exodus of the Israelites are placed. We believe that the Pharaoh of Joseph as well as the oppressors were Shepherds, the former ruling at Memphis and Zoan, the latter probably at Zoan only; though in the case of the Pharaoh of the Exodus, the time would suit the annual visit Manetho states to have been paid by Salatis. Zoan is mentioned in connexion with the Plagues in such a manner as to leave no doubt that it is the city spoken of in the narrative in Exodus as that where Pharaoh dwelt. The workers were wrought "in the field of Zoan" (Ps. lxxviii. 12, 43), זֶאֱנָן , which may either denote the territory immediately around the city, or its name, or even a kingdom (Gesen. *Lex. s. v. זֶאֱנָן*). This would accord best with the Shepherd-period; but it cannot be doubted that Ramses II. paid great attention to Zoan, and may have made it a royal residence.

After the fall of the empire, the first dynasty is the xxiist, called by Manetho that of Tanites. Its history is obscure, and it fell before the stronger line of Bubastites, the xliiind dynasty, founded by Shishak. The expulsion of Set from the pantheon, under the xliiind dynasty, must have been a blow to Tanis; and perhaps a religious war occasioned the rise of the xliiind. The xliiind dynasty is called Tanite, and its last king is probably Sethos, the contemporary of Tirhakah, mentioned by Herodotus. At this time Tanis once more appears in sacred history, as a place to which came ambassadors, either of Hoshea, or Ahas, or else, possibly, Hezekiah:—"For his princes were at Zoan, and his messengers came to Hanes" (Is. xxx. 4). As mentioned with the frontier-town Tahpanhes, Tanis is not necessarily the capital. But the same prophet perhaps more distinctly points to a Tanite line where saying, in "the burden of Egypt," "the princes of Zoan are become fools; the princes of Noph are deceived" (xix. 13). The doom of Zoan is foretold by Ezekiel: "I will set fire in Zoan" (xx. 14), where it occurs among the cities to be taken by Nebuchadnezzar.

"The plain of Sān is very extensive, but thinly inhabited: no village exists in the immediate vicinity of the ancient Tanis; and, when looking from the mounds of this once splendid city towards the distant palms of indistinct villages, we perceive the desolation spread around it. The 'field' of Zoan, is now a barren waste: a canal passes through it without being able to fertilize the soil; 'fire' has been set in 'Zoan'; and one of the principal capitals or royal abodes of the Pharaohs is now the habitation of fishermen, the resort of wild beasts, and infested with reptiles and malignant fevers." It is "remarkable for the height and extent of its mounds, which are upwards of a mile from N. to S., and nearly $\frac{1}{2}$ of a mile from E. to W. The area in which the sacred enclosure of the temple stood is about 1500 ft. by 1250, surrounded by mounds of fallen houses. The temple was adorned by Ramses II. with numerous obelisks and most of its sculptures. It is very ruinous, but its remains prove its former grandeur. The number of its obelisks, ten or twelve, all now fallen, is un-

equalled, and the labour of transporting them from Syene shows the lavish magnificence of the Egyptian kings. The oldest name found here is that of Sesertesen III. of the xlii dynasty, the latest that of Tirhakah (Sir Gardner Wilkinson's *Handbook*, pp. 221, 222). Recently, M. Mariette has made excavations on this site and discovered remains of the Shepherd-period, showing a markedly-characteristic style, especially in the representation of face and figure, but of Egyptian art, and therefore afterwards appropriated by the Egyptian kings. [R. S. P.]

ZO'AB (זֹאֵב , and twice זֹאֵב ; Samar. throughout זֹאֵב : *Zōyopa*, *Zōyōp*, *Zōyōp*; Joseph. *Zōōp*, *ῥὰ Zoopa*, or *Zōapa*: *Segor*). One of the most ancient cities of the land of Canaan. Its original name was BELA, and it was still so called at the time of Abram's first residence in Canaan (Gen. xiv. 2, 8). It was then in intimate connexion with the cities of the "plain of Jordan"—Sodom, Gomorrah, Admah, and Zebaiim (see also xiii. 10; but not x. 19)—and its king took part with the kings of those towns in the battle with the Assyrian host which ended in their defeat and the capture of Lot. In the general destruction of the cities of the plain, Zoar was spared to afford shelter to Lot, and it was on that occasion, according to the quaint statement of the ancient narrative, that the change in its name took place (xix. 22, 23, 30).^a It is mentioned in the account of the death of Moses as one of the landmarks which bounded his view from Piagah (Deut. xxxiv. 3), and it appears to have been known in the time both of Isaiah (xv. 5) and Jeremiah (xlviii. 34). These are all the notices of Zoar contained in the Bible.

1. It was situated in the same district with the four cities already mentioned, viz. in the *cicor*, the "plain" or "circle" "of the Jordan," and the narrative of Gen. xix. evidently implies that it was very near to Sodom—sufficiently near for Lot and his family to traverse the distance in the time between the first appearance of the morning and the actual rising of the sun (ver. 15, 23, 27). The definite position of Sodom is, and probably will always be, a mystery, but there can be little doubt that the plain of the Jordan was at the north of the Dead Sea, and that the cities of the plain must therefore have been situated there instead of at the southern end of the lake, as it is generally taken for granted they were. The grounds for this conclusion have been already indicated under SODOM (p. 1339 a), but it will be well to state them here more at length. They are as follows:—

(a.) The northern and larger portion of the lake has undoubtedly existed in, or very nearly in, its present form since a date long anterior to the age of Abraham. (The conviction of the writer is that this is true of the whole lake, but everyone will agree as to the northern portion, and that is all that is necessary to the present argument.) The Jordan therefore at that date discharged itself into the lake pretty nearly where it does now, and thus the "plain of the Jordan," unless unconnected with the river, must have lain on the north of the Dead Sea.

(b.) The plain was within view of the spot from which Abram and Lot took their survey of the country (Gen. xiii. 1-13), and which, if there is any connexion in the narrative, was "the mountain

^a Gen. xix. 22, 30.

^b In the Targum Pseudojonathan, to vers. 22, 23, the

name of Zoar is given זֹאֵב , and the play on the "circle" of the town is suppressed.

east of Bethel," between Bethel and Ai" with "Bethel on the west and A. on the east" (xiii. 3, xii. 8). Now the lower part of the course of the Jordan is plainly visible from the hills east of Bethel—the whole of that rich and singular valley spread out before the spectator. On the other hand, the southern half of the Dead Sea is not only too far off to be discerned, but is actually shut out from view by intervening heights.

(c.) In the account of the view of Moses from Pisgah the *ciccar* is more strictly defined as "the ciccar of the plain of Jericho" (A. V. "plain of the valley of Jericho"), and Zoar is mentioned in immediate connexion with it. Now no person who knows the spot from actual acquaintance or from study of the topography can believe that the "plain of Jericho" can have been extended to the southern end of the Dead Sea. The Jerusalem Targum (not a very ancient authority in itself, but still valuable as a storehouse of many ancient traditions and explanations), in paraphrasing this passage, actually identifies Zoar with Jericho—"the plain of the valley of Jericho, the city which produces the palms, that is Ze'ar" (רצף).⁶

These considerations appear to the writer to render it highly probable that the Zoar of the Pentateuch was to the north of the Dead Sea, not far from its northern end, in the general parallel of Jericho. That it was on the east side of the valley seems to be implied in the fact that the descendants of Lot, the Moabites and Ammonites, are in possession of that country as their original seat when they first appear in the sacred history. It seems to follow that the "mountain" in which Lot and his daughters dwelt when Moab and Ben-Ammi were born was the "mountain" to which he was advised to flee by the angel, and between which and Sodom stood Zoar (xix. 30, compare 17, 19). It is also in favour of its position north of the Dead Sea, that the earliest information as to the Moabites makes their original seat in the plains of Heshbon, N.E. of the Lake, not, as afterwards, in the mountains on the S.E., to which they were driven by the Amorites (Num. xxi. 26).

2. The passages in Isaiah and Jeremiah in which Zoar is mentioned give no clue to its situation. True they abound with the names of places, apparently in connexion with it, but they are places (with only an exception or two) not identified. Still it is remarkable that one of these is Elealeh, which, if the modern *el-Aal*, is in the parallel of the north end of the Dead Sea, and that another is the Waters of Nimrim, which may turn out to be identical with *Wady Nimrin*, opposite Jericho. *Wady Seir*, a short distance south of *Nimrin*, is suggestive of Zoar, but we are too ill-informed of the situations and the orthography of the places east of Jordan to be able to judge of this.

3. So much for the Zoar of the Bible. When however we examine the notices of the place in the post-biblical sources we find a considerable difference. In these its position is indicated with more or less precision, as at the S.E. end of the Dead Sea. Thus Josephus says that it retained its name (*Zoar*) to his day (Ant. i. 11, §4), that it was at the further end of the Asphaltic Lake, in Arabia—by which he

means the country lying S.E. of the lake, whose capital was Petra (B. J. iv. 8, §4; Ant. xiv. 1, §4). The notices of Eusebius are to the same tenor:—the Dead Sea extended from Jericho to Zoar (*Zoapōv*; Onom. θαλασσα η αλυκη). Phaelo lay between Petra and Zoar (B. J. iv. 8). It still retained its name (*Zoapō*), lay close to *ἡ παρακειμένη* the Dead Sea, was crowded with inhabitants, and contained a garrison of Roman soldiers; the palm and the balsam still flourished, and testified to its ancient fertility (B. J. iv. 8).

To these notices of Eusebius St. Jerome adds little or nothing. Paula in her journey beholds Segor (which Jerome gives on several occasions as the Hebrew form of the name in opposition to Zoara or Zoara, the Syrian form) from Caphar Barucha (possibly *Beni Na'im*, near Hebron), at the same time with Engaddi, and the land where once stood the four cities;⁷ but the terms of the statement are too vague to allow of any inference as to its position (Epist. cviii. §11). In his commentary on Is. xv. 5, he says that it was "in the boundary of the Moabites, dividing them from the land of the Philistines," and thus justifies his use of the word *vectis* to translate מִן הַיַּרְדֵּן (A. V. "his fugitives," marg. "borders;" Gesen. *flüchtlinge*). The *terra Philistina*, unless the words are corrupt, can only mean the land of Palestine—i. e. (according to the inaccurate usage of later times) of Israel—as opposed to Moab. In his *Quaestiones Hebraicae* on Gen. xix. 30 (comp. xiv. 3) Jerome goes so far as to affirm the accuracy of the Jewish conjecture, that the later name of Zoar was Shalisha:—"Bale primum et postea Salina appellata" (comp. also his comment on Is. xv. 5). But this is probably grounded merely on an interpretation of *shalishiyah* in Is. xv. 5, as connected with *bela*, and as denoting the "third" destruction of the town by "earthquakes."⁸

In more modern times Zoar is mentioned by the Crusading historians. Fulcher (*Gesta Dei*, 405, quoted by von Raumer, 239) states that "having encircled (*girato*) the southern part of the lake on the road from Hebron to Petra, we found there a large village which was said to be Segor, in a charming situation, and abounding with dates. Here we began to enter the mountains of Arabia." The palms are mentioned also by William of Tyre (xii. 30) as being so abundant as to cause the place to be called *Villa Palmarum*, and *Palmer* (i. e. probably *Palmier*). Abulfeda (cir. A.D. 1320) does not specify its position more nearly than that it was adjacent to the lake and the *ghor*, but he testifies to its then importance by calling the lake after it—*Bahr-zeghor* (see too Ibn Idris, in Reland, 272). The natural inference from the description of Fulcher is, that Segor lay in the *Wady Kerak*, the ordinary road, then and now, from the south of the Dead Sea to the eastern highlands. The conjecture of Irby and Mangles (June 1, and see May 9), that the extensive ruins which they found in the lower part of this Wady were those of Zoar, is therefore probably accurate.

The name *Dra'a* or *Dera'ah* (دراة), which they, Poole (*Geogr. Journ.* xxvi. 63), and Burckhardt (July 15), give to the valley, may even without violence be accepted as a corruption of Zoar.

* The Samaritan Text and Version afford no light on this passage, as they, for reasons not difficult to divine, have thrown the whole into confusion.

† None of these places, however, can be seen from *Beni Na'im* (Rob. i. 491).

VOL. III.

* Similarly, Stephanus of Byzantium places Zoar & Hahaserim (quoted by Reland, 1086).

† See Rahner, *Die Hebr. Tradit. in Hieronymus* (Braun, 1861), p. 26.

Zoar was included in the province of Palestina Tertia, which contained also Kerak and Areopolis. It was an episcopal see, in the patriarchate of Jerusalem and archbishopric of Petra; at the Council of Chalcedon (A.D. 451) it was represented by its bishop Musonius, and at the Synod of Constantinople (A.D. 536) by John (Le Quen, *Oriens Christ.* iii. 743-6).

4. To the statements of the mediæval travellers just quoted there are at least two remarkable exceptions. (1.) Brocardus (cir. A.D. 1290), the author of the *Descriptio Terrarum Sanctarum*, the standard "Handbook to Palestine" of the middle ages, the work of an able and intelligent resident in the country, states (cap. vii.) that "five leagues (leucæ) to the south of Jericho is the city Segor, situated beneath the mountain of Engaddi, between which mountain and the Dead Sea is the statue of salt."^a True he confesses that all his efforts to visit the spot had been frustrated by the Saracens; but the passage bears marks of the greatest desire to obtain correct information, and he must have nearly approached the place, because he saw with his own eyes the "pyramids" which covered the "wells of bitumen," which he supposes to have been those of the vale of Siddim. This is in curious agreement with the connexion between Engedi and Zoar implied in Jerome's Itinerary of Paula. (2.) The statement of Thietmar (A.D. 1217) is even more singular. It is contained in the 11th and 12th chapters of his *Peregrinatio* (ed. Laurent, Hamburgi, 1857). After visiting Jericho and Gilgal he arrives at the "fords of Jordan" (xi. 20), where Israel crossed and where Christ was baptised, and where then, as now, the pilgrims bathed (22). Crossing this ford (33) he arrives at "the field and the spot where the Lord overthrew Sodom and Gomorra." After a description of the lake come the following words:—"On the shore of this lake, about a mile (*ad miliarium*) from the spot at which the Lord was baptised is the statue of salt into which Lot's wife was turned" (47). "Hence I came from the lake of Sodom and Gomorra, and arrived at Segor, where Lot took refuge after the overthrow of Sodom; which is now called in the Syrian tongue Zora, but in Latin the city of palms. In the mountain hard by this Lot sinned with his daughters (xii. 1-3). After this I passed the vineyard of Benjamin (?) and of Engaddi. . . . Next I came into the land of Moab and to the mountain in which was the cave where David hid . . . leaving on my left hand Sethim (Shittim), where the children of Israel tarried. . . . At last I came to the plains of Moab, which abound in cattle and grain. . . . A plain country, delightfully covered with herbage, but without either woods or single trees; hardly even a twig or shrub (4-15). . . . After this I came to the torrent Jabbok" (xiv. 1).

Making allowance for the confusion into which this traveller seems to have fallen as to Engaddi

^a The distance from Jericho to Engedi is understated here. It is really about 24 English miles.

^b In the map to the *Theatrum Terrarum Sanctarum* of Adrichomius, Sodom is placed within the Lake, at its N.W. end; Segor near it on the shore; and the Statue Salis near to the mouth of the Torrent (apparently Kidron).

^c Thietmar did not return to the west of the Jordan. From the torrent Jabbok he ascended the mountains of Abarim. He then recrossed the plain of Hebron to the river Arnon; and passing the ruins of Robba (Habbah), and Craeh (Kerak), and again crossing the Arnon (probably the Wady et Ahay), reached the top of a very

high mountain, where he was half killed by the cold. Thence he journeyed to Petra and Mount Hor, and at length reached the Red Sea. His itinerary is full of interest and intelligence.

5. But putting aside the accounts of Brocardus and Thietmar, as exceptions to the ordinary mediæval belief which placed Zoar at the Wady ed Dra's how can that belief be reconciled with the inference drawn above from the statements of the Pentateuch? It agrees with those statements in one particular only, the position of the place on the eastern side of the lake. In everything else it disagrees not only with the Pentateuch, but with the locality ordinarily assigned to Sodom. For if *Udum* be Sodom, at the S.W. corner of the lake, its distance from the Wady ed Dra's (at least 15 miles) is too great to agree with the requirements of Gen. xix.

This has led M. de Saulcy to place Zoar in the Wady Zuweirah, the pass leading from Hebron to the Dead Sea. But the names Zuweirah and Zoar are not nearly so similar in the originals as they are in their western forms, and there is the fatal obstacle to the proposal that it places Zoar on the west of the lake, away from what appears to have been the original cradle of Moab and Ammon.^a If we are to look for Zoar in this neighbourhood, it would surely be better to place it at the Tell es-Zoghbi,^b the latter part of which name (زوحبي) is almost literally the same as the Hebrew Zoar. The proximity of this name and that of *Udum*, so like Sodom, and the presence of the salt mountain—on this day splitting off in pillars which show a rude resemblance to the human form—are certainly remarkable facts; but they only add to the general mystery in which the whole of the question of the position and destruction of the cities is involved, and to which the writer sees at present no hope of a solution.

In the A. V. of 1611 the name Zoar is found in 1 Chr. iv. 7, following (though inaccurately) the *Keri* (כרי). The present Received Text of the A. V. follows (with the insertion of "and") the *Cethub* (כתיב). In either case the name has no connexion with Zoar proper, and is more accurately represented in English as Zohar (Tsochar) or Jezohar. [G.]

ZO'BA, or ZO'BAH (צוֹבָה, צוֹבָה; *Zobai*: Soba, Suba) is the name of a portion of Syria, which formed a separate kingdom in the time of the Jewish monarchs, Saul, David, and Solomon. It is difficult to fix its exact position and limits;

high mountain, where he was half killed by the cold. Thence he journeyed to Petra and Mount Hor, and at length reached the Red Sea. His itinerary is full of interest and intelligence.

^a Though incorrectly, if the writer's argument for the position of the plain of Jordan is tenable.

^b Dr. Robinson's arguments against this proposal of De Saulcy (*R. E.* ii. 197; 517), though they might be more pleasant in tone, are unanswerable in substance.

^c The *Redjion el-Mesorrah* of De Saulcy. The *gā* and *rrā* each strive to represent the Arabic *ghayn*, which is pronounced like a guttural rolling r.

ZOBA

but there seem to be grounds for regarding it as lying chiefly eastward of Coele-Syria, and extending thence north-east and east, towards, if not even to, the Euphrates. [SYRIA.] It would thus have included the eastern flank of the mountain-chain which shuts in Coele-Syria on that side, the high land about Aleppo, and the more northern portion of the Syrian desert.

Among the cities of Zobah were a Tamath (2 Chr. viii. 3), which must not be confounded with "Hamath the Great" (HAMATH-ZOBAB; a place called Tibhath or Betah (2 Sam. viii. 8; 1 Chr. xviii. 8), which is perhaps *Taibeh*, between Palmyra and Aleppo; and another called Berothai, which has been supposed to be Beyrūt. (See Winer, *Realwörterbuch*, vol. i. p. 155.) This last supposition is highly improbable, for the kingdom of Hamath must have intervened between Zobah and the coast. [BEROTHAI.]

We first hear of Zobah in the time of Saul, when we find it mentioned as a separate country, governed apparently by a number of kings who own no common head or chief (1 Sam. xiv. 47). Saul engaged in war with these kings, and "vexed them," as he did his other neighbours. Some forty years later than this, we find Zobah under a single ruler, Hadadezer, son of Rehob, who seems to have been a powerful sovereign. He had wars with Tol, king of Hamath (2 Sam. viii. 10), while he lived in close relations of amity with the kings of Damascus, Beth-Rehob, Ish-tob, &c., and held various petty Syrian princes as vassals under his yoke (2 Sam. x. 19). He had even a considerable influence in Mesopotamia, beyond the Euphrates, and was able on one occasion to obtain an important auxiliary force from that quarter (ibid. 16; compare title to Ps. lx.). David, having resolved to take full possession of the tract of territory originally promised to the posterity of Abraham (2 Sam. viii. 3; compare Gen. xv. 18), attacked Hadadezer in the early part of his reign, defeated his army, and took from him a thousand chariots, seven hundred (seven thousand, 1 Chr. xviii. 4) horsemen, and 20,000 footmen. Hadadezer's allies, the Syrians of Damascus, having marched to his assistance, David defeated them in a great battle, in which they lost 22,000 men. The wealth of Zobah is very apparent in the narrative of this campaign. Several of the officers of Hadadezer's army carried "shields of gold" (2 Sam. viii. 7), by which we are probably to understand iron or wooden frames overlaid with plates of the precious metal. The cities, moreover, which David took, Betah (or Tibhath) and Berothai, yielded him "exceeding much brass" (ver. 8). It is not clear whether the Syrians of Zobah submitted and became tributary on this occasion, or whether, although defeated, they were able to maintain their independence. At any rate a few years later, they were again in arms against David. This time the Jewish king acted on the defensive. The war was provoked by the Ammonites, who hired the services of the Syrians of Zobah, among others, to help them against the people of Israel, and obtained in this way auxiliaries to the amount of 33,000 men. The allies were defeated in a great battle by Joab, who engaged the Syrians in person with the flower of his troops (2 Sam. x. 9). Hadadezer, upon this, made a last effort. He sent across the Euphrates into Mesopotamia, and "drew forth the Syrians that were beyond the river" (1 Chr. xix. 16), who had hitherto taken no part in the war. With these allies and his own troops he

ZOHELETH. THE STONE 1859

once more renewed the struggle with the Israelites, who were now commanded by David himself, the crisis being such as seemed to demand the presence of the king. A battle was fought near Helam—a place, the situation of which is uncertain (HELAM)—where the Syrians of Zobah and their new allies were defeated with great slaughter, losing between 40,000 and 50,000 men. After this we hear of no more hostilities. The petty princes hitherto tributary to Hadadezer transferred their allegiance to the king of Israel, and it is probable that he himself became a vassal to David.

Zobah, however, though subdued, continued to cause trouble to the Jewish kings. A man of Zobah, one of the subjects of Hadadezer—Rezon, son of Eliadab—having escaped from the battle of Helam, and "gathered a band" (i.e. a body of irregular marauders), marched southward, and contrived to make himself master of Damascus, where he reigned (apparently) for some fifty years, proving a fierce adversary to Israel all through the reign of Solomon (1 K. xi. 23-25). Solomon also was (it would seem) engaged in a war with Zobah itself. The Hamath-Zobah, against which he "went up" (2 Chr. viii. 3), was probably a town in that country which resisted his authority, and which he accordingly attacked and subdued. This is the last that we hear of Zobah in Scripture. The name, however, is found at a later date in the Inscriptions of Assyria, where the kingdom of Zobah seems to intervene between Hamath and Damascus, falling thus into the regular line of march of the Assyrian armies. Several Assyrian monarchs relate that they took tribute from Zobah, while others speak of having traversed it on their way to or from Palestine. [G. R.]

ZO'BEBAH (צֹבְבָה: *Zababā*; Alex. *Σαβηβά*: *Soboba*). Son of Coz, in an obscure genealogy of the tribe of Judah (1 Chr. iv. 8).

ZO'HAR (צֹהָר: *Zohar*: *Seor*). 1. Father of Ephron the Hittite (Gen. xxii. 8, xxv. 9).

2. (*Sohar*, *Seor*.) One of the sons of Simeon (Gen. xvi. 10; Ex. vi. 15; called ZERAH in 1 Chr. iv. 24).

ZOHEL'ETH, THE STONE (אֶבֶן הַזֹּהֶלֶת). *Αἰθῆ τοῦ Ζωελεθῆ*; Alex. *τῶν λίθων τοῦ Ζωελεθ*: *lapis Zoheleth*). This was "by En Rogel" (1 K. i. 9); and therefore, if En Rogel be the modern *Um-ed-Deraj*, this stone, "where Adonijah slew sheep and oxen," was in all likelihood not far from the well of the Virgin. [EN ROGEL.] The Targumists translate it "the rolling stone;" and Jarchi affirms that it was a large stone on which the young men tried their strength in attempting to roll it. Others make it "the serpent stone" (*Gesen.*), as if from the root *זחל*, "to creep." Jerome simply says, "*Zoelet tractum sive pro tractum.*" Others connect it with running water; but there is nothing strained in making it "the stone of the conduit" (מַזְחֵלֶת, *Mazhelah*), from its proximity to the great rock-conduit or conduits that poured into Siloam. Bochart's idea is that the Hebrew word *zohel* denotes "a slow motion" (*Hieros.* part i. b. 1, c. 9): "the fullers here pressing out the water which dropped from the clothes that they had washed in the well called Rogel." If this be the case, then we have some traces of this ancient custom at the massive basalt-

1860 ZOHELETH, THE STONE

work below the present *Birket el-Hamra*, where the donkeys wait for their load of skins from the well, and where the Arab washerwomen may be seen to this day beating their clothes.*

The practice of placing stones, and naming them from a person or an event, is very common. Jacob did so at Bethel (Gen. xxviii. 22, xxxv. 14; see Bochart's *Canaan*, pp. 785, 786); and he did it again when parting from Laban (Gen. xxxi. 45). Joshua set up stones in Jordan and Gilgal, at the command of God (Josh. iv. 8-20); and again in Shechem (Josh. xxiv. 26). Near Bethshemesh there was the *Eben-gedolah* ("great stone," 1 Sam. vi. 14), called also *Abel-gedolah* ("the great weeping," 1 Sam. vi. 18). There was the *Eben-Bohan*, south of Jericho, in the plains of Jordan (Josh. xv. 6, xviii. 17), "the stone of Bohan the son of Reuben," the Ehrenbreitstein of the *Ciccar*, or "plain" of Jordan, a memorial of the son or grandson of Jacob's eldest born, for which the writer once looked in vain, but which Felix Fabri in the 15th century (*Evagal*. ii. 82), professes to have seen. The Rabbis preserve the memory of this stone in a book called *Eben-Bohan*, or the touchstone (*Chron. of Rabbi Joseph*, transl. by Bialloblatsky, i. 192). There was the stone set up by Samuel between Mizpeh and Shen, *Eben-Ezer*, "the stone of help" (1 Sam. vii. 11, 12). There was the *Great Stone* on which Samuel slew the sacrifices, after the great battle of Saul with the Philistines (1 Sam. xiv. 33). There was the *Eben-Ezer* ("lapis discensus vel abitus, a discessu Jonathanis et Davidis," Simonis, *Onom.* p. 156), where David hid himself, and which some Talmudists identify with Zoheloth. Large stones have always obtained for themselves peculiar names, from their shape, their position, their connexion with a person or an event. In the Sinaitic Desert the writer found the *Hajar-el-Rohab* ("stone of the rider"), *Hajar-el-Ful* ("stone of the beau"), *Hajar Musa* ("stone of Moses"). The subject of stones is by no means uninteresting, and has not in any respect been exhausted. (See the Notes of De Sola and Lindenthal in their edition of *Genezis*, pp. 175, 226; Bochart's *Canaan*, p. 785; Vossius de *Idolatr.* vi. 38; Scaliger on *Eusebius*, p. 198; Herulius on *Arnobius*, b. vii., and Elmenhorstius on *Arnobius*; also a long note of Ouzelius in his edition of *Minucius Felix*, p. 15; Calmet's *Fragments*, Nos. 166, 735, 736; Kitto's *Palestine*. See, besides, the works of antiquaries on stones and stone circles; and an interesting account of the curious Phœnician *Hajar Chem* in Malta, in Tallack's recent volume on that island, pp. 115-127.) [H. B.]

* We give the following Rabbinical note on Zoheloth, from the Arabic Commentary of Tanchum of Jerusalem, translated by Haarbrucker:—

"Ver. 9. הַחֹלֶת וְהַחֹלֶת significationem trepidationis habet et reptationis et cunctationis in incensu. Inde Saturnum *חַל* appellaverunt propter multos ejus regressus incensusque retrogrados. Eaque sententia est in verbis *וְהַחֹלֶת וְהַחֹלֶת* (Hi. 32, 6) i. e. cunctabar vobis respondere consiliumque meum vobiscum communicare, propterea quia vos verebar et gravitatem ætatis vestræ admirabar. Serpentes *וְהַחֹלֶת וְהַחֹלֶת* appellantur, quia in terra serpent, et ob incensum suum quasi trepidantem cunctantemque. Inde porro dicunt: (Sabb. fol. 65, b.) *וְהַחֹלֶת וְהַחֹלֶת* על הַחֹלֶת (vid. Mischn. Mikva'oth, cap. 5) וְהַחֹלֶת וְהַחֹלֶת i. e. aqua leniter fluens in terra. Fortasse igitur הַחֹלֶת וְהַחֹלֶת similiter

ZORAH

ZO'HEETH (זֹהֶת: *Zohet*: Alex. *Zohet* *Zoheth*). Son of Ishi of the tribe of Judah (1 Chr. iv. 30).

ZO'PHAH (זֹפָה: *Zoph*: Alex. *Zoph*: *Sopha*). Son of Helem, or Hotham, the son of Haber, an Asherite (1 Chr. vii. 35, 36).

ZOPHAI (זֹפַי: *Zoph*: *Sophai*). A Kethathite Levite, son of Elkanah and ancestor of Samuel (1 Chr. vi. 26 [11]). In ver. 35 he is called ZUPH.

ZO'PHAR (זֹפָר: *Zophar*: *Sophar*). One of the three friends of Job (Job ii. 11, xi. 1, xii. 1, xiii. 9). He is called in the Hebrew, "the Naamathite," and in the LXX. "the Minsean," and "the king of the Minsean."

ZOPHIM, THE FIELD OF (זֹפִים: *Zophim*: *locus sublimis*). A spot on or near the top of Pisgah, from which Balaam had his second view of the encampment of Israel (Num. xiii. 14). If the word *sadeh* (rendered "field") may be taken in its usual sense, then the "field of Zophim" was a cultivated spot high up on the top of the range of Pisgah. But that word is the almost invariable term for a portion of the upper district of Moab, and therefore may have had some local sense which has hitherto escaped notice, and in which it is employed in reference to the spot in question. The position of the field of Zophim is not defined, it is only said that it commanded merely a portion of the encampment of Israel. Neither do the ancient versions afford any clue. The Targum of Onkelos, the LXX., and the Peshito-Syriac take Zophim in the sense of "watchers" or "lookers-out," and translate it accordingly. But it is probably a Hebrew version of an aboriginal name, related to that which in other places of the present records appears as Mizpeh or Mizpah. May it not be the same place which later in the history is mentioned (not only) as MIZPAH-MOAB?

Mr. Porter, who identifies *Attâris* with Pisgah, mentions (*Handbook*, 300 a) that the ruins of *Maia*, at the foot of that mountain, are surrounded by a fertile and cultivated plain, which he regards as the field of Zophim. [G.]

ZO'RAH (זֹרָה: *Zorah*: Alex. *Zorah*: *Sarrah*: *Zorah*: *Sarrah*: *Sarrah*). One of the towns in the allotment of the tribe of Dan (Josh. xix. 41). It is previously mentioned (xv. 33) in the catalogue of Judah, among the places

explicandum est, nimirum lapis volutatus et hic illic tractus, quem sæpe quasi ludentes volebant; aut sensus est cum per se fulens teretem (volutilem) arduitate instat, cuius latera alterum elatius, alterum depressius esset in modum pontis exstructi, in quo ad locum altorem sine gradibus ascenditur; quem *זֹרָה* vocaverunt qualemque ad altare struxerunt, ut eo ascenderent, quum ad altare per gradus ascendere non liceret (Ex. xx. 23). Nec absurdum mihi videtur eundem fuisse hunc apertum atque eum, qui in Davidis Jonathanique historia *זֹרָה* vocatus est, quem interpretantur lapidem vortorum, ad quem videlicet viatores devertebant. Targum b. l. *זֹרָה* *זֹרָה* translatis i. e. altus; fortasse eorum lapis altus fuit et elatus, quem viatores e longinquo conspicerent."

* See Stanley, *S. & P.*, Appendix, §15.

* The Targum treats the names Mizpeh and Zophim as identical translating them both by *זֹרָה*.

ZORATHITES, THE

in the district of the Shefelah (A. V. ZOREAH). In both lists it is in immediate proximity to ESHTAOL, and the two are elsewhere named together almost without an exception (Judg. xiii. 25, xvi. 31, xviii. 2, 8, 11; and see 1 Chr. ii. 53). Zorah was the residence of Manoah and the native place of Samson. The place both of his birth and his burial is specified with a curious minuteness as "between Zorah and Eshtaol;" "in Mahaneh-Dan" (Judg. xiii. 25, xvi. 31). In the genealogical records of 1 Chr. (ii. 53, iv. 2), the "Zareathites and Eshtaulites" are given as descended from (i. e. colonised by) Kirjath-jearim.

Zorah is mentioned amongst the places fortified by Rehoboam (2 Chr. xi. 10), and it was re-inhabited by the men of Judah after the return from the Captivity (Neh. xi. 29, A. V. ZAREAH).

In the *Omnatation* (*Zapda* and "Sara") it is mentioned as lying some 10 miles north of Eleutheropolis on the road to Nicopolis. By the Jewish traveller hap-Parchi (*Zana's Benjamin of Tud.* ii. 441), it is specified as three hours S.E. of Lydd. These notices agree in direction—though in neither is the distance nearly sufficient—with the modern village of *Sir'ah* (سِرْأَه), which has been visited by Dr. Robinson (*B. R.* iii. 153) and Tobler (*3tte Wand.* 181-3). It lies just below the brow of a sharp pointed conical hill, at the shoulder of the ranges which there meet and form the north side of the *Wady Ghurab*, the northernmost of the two branches which unite just below *Sir'ah*, and form the great *Wady Surar*. Near it are to be seen the remains of Zanoah, Bethshemesh, Timnath, and other places more or less frequently mentioned with it in the narrative. Eshtaol, however, has not yet been identified. The position of *Sir'ah* at the entrance of the valley, which forms one of the inlets from the great lowland, explains its fortification by Rehoboam. The spring is a short distance below the village, "a noble fountain"—this was at the end of April—"walled up square with large hewn stones, and gushing over with fine water. As we passed on," continues Dr. Robinson, with a more poetical tone than is his wont, "we overtook no less than twelve women toiling upwards to the village, each with her jar of water on her head. The village, the fountain, the fields, the mountain, the females bearing water, all transported us back to ancient times, when in all probability the mother of Samson often in like manner visited the fountain and toiled ho-ward with her jar of water."

In the A. V. the name appears also as ZAREAH and ZOREAH. The first of these is perhaps most nearly accurate. The Hebrew is the same in all. [G.]

ZORATHITES, THE (זֹרָתִיטִּים; *zōrathîthîm*; Alex. τ. *Zapathî*: *Sarathî*), i. e. the people of ZORAH, are mentioned in 1 Chr. iv. 2 as descended from Shobal, one of the sons of Judah, who in 1 Chr. ii. 52, is stated to have founded Kirjath-jearim, from which again "the Zareathites and the Eshtaulites" were colonized. [G.]

ZOREAH (זֹרְעָה; *Zōrah*; Alex. *Zapaa*: *Saraa*). Another (and slightly more accurate) form of the name usually given in the A. V. as ZORAH, but

* As if reading זֹרְעָה (*Zōrah*), which the original text (*rethib*) of 1 Chr. vi. 38 still exhibits for Zuph (see margin of A. V.). This is a totally distinct name from

ZUPH, THE LAND OF 1861

once as ZAREAH. The Hebrew is the same in all cases. Zoreah occurs only in Josh. xv. 13, among the towns of Judah. The place appears, however, to have come later into the possession of Dan. [ZORAH.] [G.]

ZORITES, THE (זֹרִיתִּים; *Zōrithîm*; Alex. *Zōrithî*: *Sarathî*), are named in the genealogies of Judah (1 Chr. ii. 54), apparently (though the passage is probably in great confusion) amongst the descendants of Salma and near connexions of Joab. The Targum regards the word as being a contraction for "the Zorathites;" but this does not seem likely, since the Zareathites are mentioned in ver. 52 of the same genealogy in another connection.

ZOROBABEL. (זְרֹבָבֶּאֱל; *Zorobabel*), 1 Ecd. iv. 13; v. 5-70; vi. 2-29; Ecclus. xlix. 11; Matt. i. 12, 13; Luke iii. 27. [ZERUBBABEL.]

ZU'AR (זֻ'אֵר; *Zū'ar*; *Suar*). Father of Nethaneel the chief of the tribe of Issachar at the time of the Exodus (Num. i. 8, ii. 5, vii. 18, 23, x. 15).

ZUPH, THE LAND OF (אֶרֶץ זֻפְּה; *Erētz Zūph*; Alex. *sis γην Ζεφ*; Syr. *Peahito*, ܦܝܬܐ, *Tsur*; *Volg. terra Zuph*). A district at which

Saul and his servant arrived after passing through those of Shalisha, of Shalim, and of the Benjamites (1 Sam. ix. 5 only). It evidently contained the city in which they encountered Samuel (ver. 6), and that again, if the conditions of the narrative are to be accepted, was certainly not far from the "tomb of Rachel," probably the spot to which that name is still attached, a short distance north of Bethlehem. The name Zuph is connected in a singular manner with Samuel. One of his ancestors was named Zuph (1 Sam. i. 1; 1 Chr. vi. 35) or Zophai (ib. 27); and his native place was called Ramathaim-zophim (1 Sam. i. 1).

But it would be unsafe to conclude that the "land of Zuph" had any connexion with either of these. If Ramathaim-zophim was the present *Nebi Samuil*—and there is, to say the least, a strong probability that it was—then it is difficult to imagine that Ramathaim-zophim can have been in the land of Zuph, when the latter was near Rachel's sepulchre, at least seven miles distant from the former. *Nebi Samuil* too, if anywhere, is in the very heart of the territory of Benjamin, whereas we have seen that the land of Zuph was outside of it.

The name, too, in its various forms of Zophim, Mispheh, Mispah, Zephathah, was too common in the Holy Land, on both sides of the Jordan, to permit of much stress being laid on its occurrence here.

The only possible trace of the name of Zuph in modern Palestine, in any suitable locality, is to be found in *Soba*, a well-known place about seven miles due west of Jerusalem, and five miles south-west of *Nebi Samuil*. This Dr. Robinson (*B. R.* ii. 8, 9) once proposed as the representative of Ramathaim Zophim; and although on topographical grounds he virtually renounces the idea (see the footnote to the same pages), yet those grounds need not similarly affect its identity with Zuph, provided other con-

ditions.

* If indeed the "land of Yemini" be the territory of Benjamin.

siderations do not interfere. If Shalim and Shalisha were to the N.E. of Jerusalem, near *Tsiydeh*, then Saul's route to the land of Benjamin would be S. or S.W., and pursuing the same direction he would arrive at the neighbourhood of *Soba*. But this is at the best no more than conjecture, and unless the land of Zuph extended a good distance east of *Soba*, the city in which the meeting with Samuel took place could hardly be sufficiently near to Rachel's sepulchre.

The signification of the name Zuph is quite doubtful. Gesenius explains it to mean "honey"; while Fürst understands it as "abounding with water." It will not be overlooked that when the LXX. version was made, the name probably stood in the Hebrew Bible as Ziph (Tsiph). Zophim is usually considered to signify watchmen or lookers-out; hence, prophets; in which sense the author of the Targum has actually rendered 1 Sam. ix. 5—"they came into the land in which was a prophet of Jehovah." [G.]

ZUPH (זִפְּחָ: *Zoph* in 1 Chr.: *Soph*). A Kohathite Levite, ancestor of Elkanah and Samuel (1 Sam. i. 1; 1 Chr. vi. 35 [20]). In 1 Chr. vi. 26 he is called ZOPHAH.

ZUR (זֹר: *Zor* in 1 Chr.: *Sor*). 1. One of the five princes of Midian who were slain by the Israelites when Balaam fell (Num. xxxi. 8). His daughter Cozbi was killed by Phinehas, together with her paramour Zimri the Simeonite chieftain (Num. xxv. 15). He appears to have been in some way subject to Sihon king of the Amorites (Josh. xiii. 21).

2. Son of Jehiel the founder of Gibeon by his wife Maschah (1 Chr. viii. 30, ix. 36).

ZURIEL (זִרְיָה: *Zuriah*: *Suriah*). Son of Abihail, and chief of the Merarite Levites at the time of the Exodus (Num. iii. 35).

ZURISHADDAI (זִרְיָהוּ: *Zurishadai*: *Surishaddai*). Father of Shelumiel, the chief of the

"Sensum magis quam verbum ex verbo transferentes" (Jerome, *Quaest. Hebr. in Gen.*). Schumann (*Genesis*, 237) suggests that for זִרְיָהוּ they read זִרְיָהוּ. The change in the initial letter is the same which Ewald proposes in identifying Ham (Gen. xiv. 8) with Ammon.

Comparing the Arabic زور. By adopting this

tribe of Simeon at the time of the Exodus (Num. i. 6, ii. 12, vii. 36, 41, x. 19). It is remarkable that this and Ammishaddai, the only names in the Bible or which Shaddai forms a part, should occur in the same list. In Judith (viii. 1) Zurishaddai appears as SALASADAI.

ZUZIMS, THE (זִזִּים: *Zuzim* in both MSS.: *Zuzim*; but Jerome in *Quaest. Hebr. gentes fortes*). The name of an ancient people who lying in the path of Chedorlaomer and his allies were attacked and overthrown by them (Gen. xiv. 5 only). Of the etymology or signification of the name nothing is known. The LXX., Targum of Onkelos, and Sam. Version (with an eye to some root not now "recognizable," render it "strong people." The Arab. Version of Saadiah (in Walton's *Polyglott*) gives *ed-Dakakka*, by which it is uncertain whether a proper name or an appellation is intended. Others understand by it "the wanderers" (Le Clerc, from זר, or "dwarfs" (Michaelis, *Suppl.* No. 606).^b Hardly more ascertainable is the situation which the Zuzim occupied. The progress of the invaders was from north to south. They first encountered the Rephaim in Ashteroth Karnaim (near the *Leja* in the north of the *Hannan*); next the Zuzim in Ham; and next the Emim in Shaveh Kiriathaim. The last named place has not been identified, but was probably not far north of the Arnon. There is therefore some plausibility in the suggestion of Ewald (*Gen.* i. 308 note, provided it is etymologically correct, that Ham, זר, is זר, Am, i. e. Ammon; and that the Zuzim inhabited the country of the Ammonites, and were identical with the Zamzumim, who are known to have been exterminated and succeeded in their land by the Ammonites. This suggestion has been already mentioned under ZAMZUMIM, but at the best it can only be regarded as a conjecture, in respect to which the writer desires to say with Reland—and it would be difficult to find a fitter sentence with which to conclude a Dictionary of the Bible—"conjecturae, quibus non delectamur." [G.]

(which however Gesenius, *Thez.* 516 a, reads), and altering the points of זִזִּים to זִזִּים, as it is plain the LXX. and Vulg. read them, Michaelis ingeniously obtains the following reading: "They smote the giants in Ashteroth Karnaim, and the people of smaller (i. e. ordinary) stature who were with them."
